| ANNEX 11: ANALYSIS OF DG DEVCO KEY PERFORMANCE INDICATORS (KPI) FOR 2018 .....                                                                      | 481        |
| ANNEX 12: PERFORMANCE TABLES .....                                                                                                                  | 519        |

## ANNEXES

### ANNEX 1: Statement of the Deputy Director General in charge of Risk Management and Internal Control<sup>1</sup>

I declare that in accordance with the Commission's communication on the internal control framework<sup>2</sup>, I have reported my advice and recommendations on the overall state of internal control in the DG to the Director-General.

I hereby certify that the information provided in the present Annual Activity Report and in its annexes is, to the best of my knowledge, accurate and complete.

Brussels, 1 April 2019

Marjeta Jager  
(signed)

---

<sup>1</sup> In DG DEVCO, the Deputy Director-General in charge of People and Peace (Directorate B), Planet and Prosperity (Directorate C), the Task Force Knowledge, Performance and Results and Resources (Directorate R) is entrusted with the function of Risk Management and Internal Control. The Director of Resources reports to her.

<sup>2</sup> C(2017)2373 of 19.04.2017.

## ANNEX 2: Reporting – Human Resources, Better Regulation, Information Management and External Communication

This annex is the annex of section 2.2 "Other organisational management dimensions".

### Human resource management

**Objective:** The DG deploys effectively its resources in support of the delivery of the Commission's priorities and core business, has a competent and engaged workforce, which is driven by an effective and gender-balanced management and which can deploy its full potential within supportive and healthy working conditions.

#### Indicator 1: Percentage of female representation in middle management

Source of data: DG HR

| Baseline (2015) | Target (2019) |
|-----------------|---------------|
| 20.1%           | 53%           |

#### Latest known results (2018):

2018: 30%.

On 19 July 2017, the College adopted a renewed approach to its commitment to reach at least 40% female managers by the end of 2019 by adopting quantitative targets of first female appointments to be made per Directorate-General and service at middle management level with DG specific target[SEC(2017)359]. For DEVCO, the target is 8 female appointments (and it concerns only the first time management appointments). 7 female appointments were made by the end of 2018.

#### Indicator 2: Percentage of staff who feel that the Commission cares about their well-being

Source of data: Commission staff survey

| Baseline(2014) | Target(2020) |
|----------------|--------------|
| 27%            | 40%          |

#### Latest known results (2018):

According to the results of the 2018 Staff Survey, 41% of DEVCO staff agree with the statement. The Staff Engagement Action Plan and the actions focused on well-being (#6 Information and awareness raising, #7 Health and #8 Ethics) allowed DEVCO to reach the 2020 target.

#### Indicator 3: Staff engagement index

Source of data: Commission staff survey

| Baseline(2014) | Target(2020)                                                                                         |
|----------------|------------------------------------------------------------------------------------------------------|
| 60%            | 70% of staff feel engaged and committed to doing quality work (measured as a combination of factors) |

#### Latest known results (2018):

The percentage for the index slightly increased (from 60 to 61% in the 2018 Staff Survey). Actions on well-being, workload and work-life balance, performance and career progression, senior and middle management will be revised and updated according to the detailed results of the Staff Survey so the 2020 target could be reach in the next survey.

#### Main outputs in 2018:

|          | Description                                                                                 | Indicator                                        | Target (2018)                                 |
|----------|---------------------------------------------------------------------------------------------|--------------------------------------------------|-----------------------------------------------|

## Financial Management: Internal Control and Risk Management

Overarching objective: The Authorising Officer by Delegation should have reasonable assurance that resources have been used in accordance with the principles of sound financial management, and that the control procedures put in place give the necessary guarantees concerning the legality and regularity of the underlying transactions including prevention, detection, correction and follow-up of fraud and irregularities.

### Objective 1: Effective and reliable internal control system giving the necessary guarantees concerning the legality and the regularity of the underlying transactions

#### Indicator 1: Estimated residual error rate

Source of data: RER studies carried out by Commission's contractor

| Baseline(2014) | Target (2020)                                |
|----------------|----------------------------------------------|
| 2.81%          | Below the materiality criterion (2%) in 2020 |

#### Latest known results (2018):

2017: 1.18%, 2018: 0.85%

#### Indicator 2: Estimated overall amount at risk for the year for the entire budget under the DGs responsibility.

Source of data: RER study, expenditure data from CRIS and ABAC

| Baseline          | Target |
|-------------------|--------|
| EUR 205.7 million | none   |

#### Latest known results (2018):

Overall amount at risk at closure reported in the 2017 AAR was 69.88 million EUR. 2018 estimation is EUR 49.8 million.

#### Indicator 3: Estimated future corrections

Source of data: Key Performance indicators: ineligible amounts identified by ex-ante controls and by audits

| Baseline                                                                                                                                                            | Target |

|                                                                                                                                                              | <b>Latest known results (2018)</b><br>The pace of the revision of the pillar assessment (PA) methodology picked up speed in the second half of 2018, so that criteria and questions for the existing pillars 1-6 (internal controls, accounting, external audit, grants, procurement and financial instruments) and for new pillars 7-9 (exclusion from access to funding, publication of information on recipients and protection of personal data) were largely finalized by the end of 2018. This was the result of the joint work of DEVCO services with BUDG, NEAR, ECFIN and TAXUD. Mitigating measures were put in place, such as holding more regular meetings of the working group and the adoption of a proactive approach with DG BUDG and colleagues from line DGs in proposing constructive solutions to agree on changes, when needed. However, the scope of the modifications proposed by BUDG/ECFIN/TAXUD on the structure and content of pillar 6 (financial instruments), to include new elements regarding controls related to tax avoidance and Non-Cooperative Jurisdictions (NCJs), Anti-Money Laundering (AML) and Counter Terrorism Financing (CTF), as well as a specific set of questions for budgetary guarantees on credit risk required a more in-depth analysis and more extensive joint work on this part of the methodology, which led to delays in the finalization of the overall revision. The revised timeline foresees the adoption within the first half of 2019. |                                                |

**Objective 3: Minimisation of the risk of fraud through application of effective anti-fraud measures, integrated in all activities of the DG, based on the DG's anti-fraud strategy (AFS) aimed at the prevention, detection and reparation of fraud.**

**Indicator 1: Updated anti-fraud strategy of DG DEVCO elaborated on the basis of the methodology provided by OLAF**

| <b>Latest known results (2018):</b><br>DG DEVCO had planned to update its Anti-Fraud Strategy (AFS) in 2018 based on the Commission's Anti-Fraud Strategy's (CAFS) revision in 2018. However, the revision of the CAFS had to be postponed in order take recommendations of the European Court of Auditors' (ECA) audit "Fighting fraud in EU spending: Action needed" into account. In 2019, based on the CAFS' revision, DG DEVCO will take the opportunity to reassess the DG's priority risks, objectives and actions, and to review DG DEVCO's AFS accordingly. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                   |                                                                                                                                                                |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>Latest known results (2018)</b><br>Work on illustrative examples of fraud risks is delayed and their dispatch to focal points will start in 2019. However, other measures were taken to further raise fraud risk awareness of relevant DEVCO staff (i.e. trainings, website updates, swift information sharing, etc.). DG DEVCO's Anti-Fraud focal point network duly received relevant information on ongoing OLAF investigations and fraud risks, and were encouraged to participate in expertise sharing on fraud risk management. |                                                                                   |                                                                                                                                                                |

| <b>EXPLANATION</b><br>The methodology used for the HAN statistics does not distinguish the files manually created in Ares from the files automatically generated by systems integrated in HRS, although the latter have specific characteristics. This is the case of PROSPECT and PADOR, which have automatically created 77591 files, all of them subject to the rules set by the business owners, not by Ares. These rules do not provide for access to all DEVCO units. Considering that the files generated by PROSPECT and PADOR represent 77% of all the DEVCO files, their inclusion in the HAN statistics artificially lowers the ratio of readable /accessible files down to the figure of 20, |        |

<sup>3</sup> Year 2011 was the last year when DEVCO submitted impact assessments; therefore a more recent baseline e.g. 2015 is not applicable.

<sup>4</sup> REFIT initiatives and the impact assessments are not part of the core business of DEVCO as they are not recurrent.

<sup>5</sup> Current aquis has been adopted in 2014. Baseline 2015 is hence " 0"

<sup>6</sup> Each registered document must be filed in at least one official file of the *Chef de file*, as required by the [e-Domec policy rules](#) (and by ICS 11 requirements). The indicator is to be measured via reporting tools available in Ares.

<sup>7</sup> Suite of tools designed to implement the [e-Domec policy rules](#).

57%.

If PROSPECT and PADOR files were excluded and only the remaining 23558 files were taken into account (as it should be the case), the result is that only 896 files (<4%) are not readable/accessible by all units and 96% are readable/accessible by all units.

In conclusion, the target for 2018 is considered as achieved.

### Indicator 3: Percentage of HAN files shared with other DGs

Source of data: HAN statistics

N.B. The baseline is lower than the Commission average. The opening of files to other DGs is still rare in the Commission and DEVCO, as most DGs, is still in an early phase.

| Baseline(2015) | Target              |
|----------------|---------------------|
| 0.43%          | Between 5 % and 10% |

#### Latest known results (2018):

Source data: 4.16% => **Corrected figure = 18% Target achieved**

#### EXPLANATION

The explanation used for Indicator 2 equally applies to indicator 3, since PROSPECT and PADOR files were counted in this section as well, although they are not meant to be shared with other DGs. As pointed out before, the unduly inclusion of files automatically generated by PROSPECT and PADOR seriously alters the results provided by HAN statistics.

If those files are excluded and the indicator considers only manually created files, the percentage of files shared with other DGs raises to 18% (4212 files out of 23558), which is above the target.

### Indicator 4: Learning and Knowledge Development Strategy (LKDS) 2014-2020 implemented in line with the adopted and regularly updated Action Plan

Source of data: LKDS Implementation reports; Learning and Knowledge Management needs surveys; LKDS evaluation in 2017; OECD peer reviews; Other surveys and evaluations (e.g. training evaluations, newcomers and tutors surveys)

#### Latest known results (2018):

##### State of implementation: Learning

- In total, DEVCO organised 400 learning events in 2018 (online courses, webinars and face-to-face in HQ and Delegations) which counted for 7,346 participants (11,815 participant days).
- The overall satisfaction rate of DEVCO courses gained from participants through the course evaluation forms is 82/100, which is significantly above the minimum target of 75/100.
- Moreover, at DEVCO Academy there are more than 130 different e-learning courses and webinars available, which were already visited by almost 3,000 participants.
- The yearly Learning and Knowledge Management needs survey was launched as foreseen providing information necessary for drafting DEVCO's 2019 training programme as well as identification of initiatives in the Knowledge Management area.
- DEVCO tested and launched in April the open learning platform, the "DEVCO Academy".
- The use of new, online learning formats was extended, including additional short learning videos and, as well as webinars and new e-learning formats.
- DEVCO continued its participation in the donor competence network learn4dev where it is member of the network's core group, assumes the function as expert group coordinator and chairs the Knowledge Management expert group. In this context.
- DEVCO also coordinated the survey on Regional Seminars and Training hosted by EU Delegations for senior management endorsement. The table with the events was regularly updated and the survey for 2019 events launched in November 2018.

### State of implementation: Knowledge Management

- DEVCO's LKDS 2014-2020 Mid-Term Review and revised AP for 2018-2020 endorsed by DEVCO Management in October. An information note sent to all DEVCO Management. The revised Action Plan 2018-2020 implemented as scheduled.
- As Members of the Information Management Team - IMT, DEVCO has actively contributed to all initiatives issued from the Commission Data, Information and Knowledge Management Strategy. The Deputy Director General of DEVCO is member of the Information Management Steering Board - IMSB. Main outputs in 2018 at Commission level have been the launch of a Knowledge Management communication campaign, the creation of the One-Stop-Shop on collaboration, the Knowledge Week event and the adoption of a Data strategy, Road Map and Action Plan.
- DEVCO participated actively on the Commission Knowledge Week event organised by JRC.
- Following the output of several pilot projects, the LKDS action on new ways of working to collaborate on documents using SharePoint collaborative sites was launched.
- Organisation of a Seminar with a Senior Learning Advisor from USAID on Better development through Collaborating, Learning and Adapting – CLA, USAID approach to organisational learning.
- The KM&KS expert group of the Learn4dev network has been merged with the Organisational Learning expert group.
- DEVCO continued to publish eleven issues of the newsletter Key non-EU publications on development.

### Indicator 5: Percentage of briefings managed in accordance with a uniform business process and using a common tool

Source of data: BASIS

| Baseline (2015)                                                                                                                        | Target (2016) |
|----------------------------------------------------------------------------------------------------------------------------------------|---------------|
| 73% of the briefings and speeches – 545 items - were uploaded in BASIS in 2015 (NB: DG DEVCO started to use BASIS as of 23 March 2015) | 90%           |

### Latest known results (2018):

95%. The remaining 5% is transmitted outside of BASIS to other services which do not use this system.

### Main outputs in 2018:

|         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Indicator                                                                                           | Target (2018)                                                                       |

|         | <b>Latest known results (2018)</b><br>N.B: This indicator only concerns manually created files in Ares, thus excluding automatically generated files, for the reasons explained above. <b>32% files shared with Delegations</b> (7440 files). The overall target has not been achieved.<br>EXPLANATION: This is a manual operation that has focused first on the sharing of active files (8511 files). In 2019 this action will be extended to closed files (15044 files) in order to expand the sharing of information also to this category and reach the sought target.<br><b>18% files shared with other DGs.</b> An important proportion of DEVCO files are contract files. These files, due to the data protection clauses used in the contracts, cannot be shared beyond DEVCO. Common Commission guidelines for the sharing of this typology of files are to be issued by DG BUDG. In the meantime, this target cannot significantly progress. |                                                                                                     |                                                                                     |

## External communication activities

**Objective:** Citizens perceive that the EU is working to improve their lives and engage with the EU. They feel that their concerns are taken into consideration in European decision making and they know about their rights in the EU.

### Indicator 1: Percentage of EU citizens having a positive image of the EU

In the period 2016-20, DG DEVCO will inform and engage with its primary target audience, the citizens of the EU<sup>8</sup>, about key international cooperation and development related policies pursued by the EU, most notably the 2030 Agenda for Sustainable Development and the EU's efforts towards the Sustainable Development Goals, and about the results and impact achieved through the wide array of financial instruments for EU external action managed by DG DEVCO. Promoting the EU as a Global Actor, DG DEVCO will highlight how the EU's work on international cooperation and development benefits not only beneficiaries outside the EU, but also EU citizens themselves.)

**Definition:** Eurobarometer measures the state of public opinion in the EU Member States. This global indicator

<sup>8</sup> Complementarily, stakeholders outside the EU will be informed and engaged by the EEAS through the EU's Delegations in partner countries, with support from DG DEVCO on development related matters.

is influenced by many factors, including the work of other EU institutions and national governments, as well as political and economic factors, not just the communication actions of the Commission. It is relevant as a proxy for the overall perception of the EU citizens. Positive visibility for the EU is the desirable corporate outcome of Commission communication, even if individual DGs' actions may only make a small contribution.

**Source of data:** Standard Eurobarometer (DG COMM budget) [monitored by DG COMM [here](#)].

| Baseline: November 2014                                        | Target: 2020                      |

|          | <p><b>Latest known results (2018)</b></p> <p>The C&amp;V Requirements were formally launched on the DEVCO website in EN, FR, ES and PT on 1<sup>st</sup> January 2018 (and appeared subsequently in Arabic and Russian versions sponsored by DG NEAR). Numerous in-house and external outreach and training initiatives and webinars on the Requirements were conducted throughout the year, and an operational help desk established.</p> <p>Using the 11<sup>th</sup> EDF support expenditure allocation a communication facility was established and contracts signed to equip ACP Delegations with digital camera kits and provide basic communication training and related logistical support for all ACP project managers. All ACP Delegation allocations for national campaigns were contracted.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

<sup>11</sup> Pilot phase will be used to establish baseline

|          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                  |

|          | <b>Latest known results (2018)</b><br>Report will be online at the beginning of February 2019. The delay is due to the late submission of data by some contributing services.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                  |
| DEVCO.04 | <b>EU Results Framework is revised</b> to better adapt to the current global context (SDGs) and the evolution of EU development policy (in particular the Consensus on Development)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | EU Results Framework revised                                                                                                                                                                                                                                                                                                                                                                                                           | 2018                                                                                                                                                                                                                                                             |

**Latest known results (2018)**

A revised Results Framework has been approved at EC level and welcomed by the EU Council following Council Conclusions. The SWD (2018) 444 presenting the revised EU Results Framework was issued on the 10<sup>th</sup> October 2018 and Council Conclusions adopted on 26<sup>th</sup> November 2018. The revised EU Results Framework has been used for the annual results reporting exercise (2018) jointly conducted by DG DEVCO and DG NEAR.

DG DEVCO maintained its efforts to increase visibility and communication on the EU's role in the world on development policy. Priority will continue to be given to the collaboration with EU Member States and other partners and stakeholders (such as through European Development Days), and using social media channels to reach out to EU young audiences.

**Annual communication spending (based on estimated commitments<sup>12</sup>):**

| <b>Baseline (2017):</b> | <b>Target (2018):</b> | <b>Total amount spent</b> | <b>Total of FTEs working on external communication</b> |
|-------------------------|-----------------------|---------------------------|--------------------------------------------------------|
| 5,012,000 EUR           | 6,980,000 EUR         | 6,609,714 EUR             | 20 FTE                                                 |

It should be noted that the balance sheet and statement of financial performance presented in Annex 3 to this Annual Activity Report, represent only the assets, liabilities, expenses and revenues that are under the control of this Directorate General. Significant amounts such as own resource revenues and cash held in Commission bank accounts are not included in this Directorate General's accounts since they are managed centrally by DG Budget, on whose balance sheet and statement of financial performance they appear. Furthermore, since the accumulated result of the Commission is not split amongst the various Directorates General, it can be seen that the balance sheet presented here is not in equilibrium.

Additionally, the figures included in tables 4 and 5 are provisional since they are, at this date, still subject to audit by the Court of Auditors. It is thus possible that amounts included in these tables may have to be adjusted following this audit.

  - **Financial Statements of the EU Trust Funds consolidated in the EDF**
  - **EDF report on Financial Implementation**
- **Part 3 – Financial Statements and Explanatory Notes – Funds Managed by the European Investment Bank: Investment Facility**

## Part 1 – IMPLEMENTING AND ACCOUNTING FOR THE EDF RESOURCES

### 1. BACKGROUND

The European Union (hereinafter referred to as the EU) has cooperative relations with a large number of developing countries. The main objective is to promote economic, social and environmental development, with the primary aim of reducing and eradicating poverty in the long-term, by providing beneficiary countries with development aid and technical assistance. To achieve this, the EU draws up, jointly with the partner countries, cooperation strategies and mobilises the financial resources to implement them. These EU resources allocated to development cooperation come from three sources:

1. The EU budget;
2. The European Development Fund;
3. The European Investment Bank.

The European Development Fund (hereinafter referred to as the EDF) is the main instrument for providing EU aid for development cooperation to the African, Caribbean and Pacific (hereinafter referred to as the ACP) States and Overseas Countries and Territories (hereinafter referred to as the OCTs).

The EDF is not funded by the EU budget. It is established by an internal agreement of the Representatives of the Member States, sitting within the Council, and managed by a specific committee. The European Commission (hereinafter referred to as the Commission) is responsible for the financial implementation of the operations carried out with EDF resources. The European Investment Bank (hereinafter referred to as the EIB) manages the Investment Facility.

During the period 2014-2020, the geographic aid granted to ACP States and OCTs will continue to be mainly funded by the EDF. Each EDF is usually concluded for a period of around five years and is governed by its own Financial Regulation, which requires the preparation of financial statements for each individual EDF. Accordingly, financial statements are prepared separately for each EDF in respect of the part that is managed by the Commission. These financial statements are also presented in an aggregated way so as to provide a global view of the financial situation of the resources for which the Commission is responsible.

The Internal Agreement establishing the 11<sup>th</sup> EDF was signed by the participating Member States, meeting within the Council, in June 2013<sup>13</sup>. It came into force on 1 March 2015.

In 2018, the Council adopted the Financial Regulation applicable to the 11<sup>th</sup> EDF<sup>14</sup>. This repealed the previous regulation in force and is applicable to operations financed from previous EDFs without prejudice to existing legal commitments. This Regulation does not apply to the Investment Facility under previous EDFs.

Within the framework of the ACP-EU Partnership Agreement, the Investment Facility was established. This Investment Facility is managed by the EIB and is used to support private sector development in the ACP States by financing essentially – but not exclusively – private investments. The Facility is designed as a renewable fund, so that loan repayments can be reinvested in other operations, thus resulting in a self-renewing and financially independent facility. As the Investment Facility is not managed by the Commission, it is not consolidated in the first part of the annual accounts – the financial statements of the EDF and the related report on financial implementation. The financial statements of the Investment Facility are included as a separate part of the annual accounts (part II) to provide a full picture of the development aid of the EDF.

---

<sup>13</sup> OJ L 210, 6.8.2013, p. 1.

<sup>14</sup> Council Regulation (EU) 2018/1877 of 26 November 2018 on the financial regulation applicable to the 11<sup>th</sup> European Development Fund, and repealing Regulation (EU) 2015/323

## 2. HOW IS THE EDF FUNDED?

The European Council of 2 December 2013 adopted the Multi-annual Financial Framework for 2014-2020. In this context, it was decided that geographical cooperation with the ACP States would not be integrated into the EU budget (budgetised), but would continue to be funded through the existing inter-governmental EDF.

The EU budget is annual and according to the budgetary principle of annuality, expenditure and revenue are planned and authorised for one year. Unlike the EU Budget, the EDF is a fund operating on the basis of multiannuality. Each EDF establishes an overall fund to implement development cooperation during a period of usually five years. As resources are allocated on a multiannual basis, the allocated funds may be used over the period of the EDF. The lack of budget annuality is highlighted in the budgetary reporting, where the budgetary implementation of the EDFs is measured against the total funds.

The EDF resources are "ad hoc" contributions from the EU Member States. Approximately every five years, Member State representatives meet at intergovernmental level to decide on an overall amount that will be allocated to the fund and to oversee its implementation. The Commission then manages the fund in accordance with the Union policy on development cooperation. Since Member States have their own development and aid policies in parallel to the Union policy, the Member States must coordinate their policies with the EU to ensure they are complementary.

In addition to the above mentioned contributions, it is also possible for Member States to enter into co-financing arrangements or to make voluntary financial contributions to the EDF.

## 3. YEAR-END REPORTING

### 3.1. ANNUAL ACCOUNTS

In accordance with Articles 18(3) of the EDF Financial Regulation, the EDF financial statements are prepared on the basis of accrual-based accounting rules that themselves are based on International Public Sector Accounting Standards (IPSAS). The accounting rules adopted by the Accounting Officer of the Commission are applied by all the Institutions and bodies of the EU in order to establish a uniform set of rules for accounting, valuation and presentation of the accounts with a view to harmonising the process for drawing up the financial statements. These EU accounting rules are also applied to the EDF while taking into account the specific nature of its activities.

The preparation of the EDF annual accounts is entrusted to the Commission's Accounting Officer who is the Accounting Officer of the EDF. She ensures that the annual accounts of EDF present a true and fair view of the financial position of the EDF.

The annual accounts are presented as follows:

#### **Part I: Funds managed by the Commission**

- (i) Financial statements and explanatory notes of the EDF
- (ii) Financial statements of the EU trust funds consolidated in the EDF
- (iii) Consolidated financial statements of EDF and the EU trust funds
- (iv) Report on financial implementation of the EDF

#### **Part II: Annual report on implementation - Funds managed by the EIB**

- (i) Financial statements of the Investment Facility

The part 'Financial statements of the European trust funds consolidated in the EDF' includes financial statements of the two trust funds created under the EDF: The Bêkou EU Trust Fund (see section 'Financial statements of the Bêkou EU Trust Fund') and the EU Trust Fund for Africa (see section 'Financial statements of EU Trust Fund for Africa'). The trust funds individual financial statements are prepared under the responsibility of the Commission's

Accounting Officer and are subject to external audit carried out by a private auditor. The trust funds' figures included in these annual accounts are provisional.

The EDF annual accounts must be adopted by the Commission not later than 31 July of the subsequent year and presented to the European Parliament and to the Council for discharge.

## **4. AUDIT AND DISCHARGE**

### **4.1. AUDIT**

The EDF annual accounts are overseen by its external auditor, the European Court of Auditors (hereinafter referred to as the ECA), which draws up an annual report for the European Parliament and the Council.

### **4.2. DISCHARGE**

The final control of the financial implementation of the EDF resources for a given financial year is the discharge. The European Parliament is the discharge authority of the EDF. This means that following the audit and finalisation of the annual accounts it falls to the Council to recommend, and then to the European Parliament to decide, whether to grant discharge to the Commission for the financial implementation of the EDF resources for a given financial year. This decision is based on a review of the accounts and the annual report of the ECA (which includes an official statement of assurance) and replies of the Commission to questions and further information requests.

## Part 2 – FUNDS MANAGED BY THE EUROPEAN COMMISSION – FINANCIAL STATEMENTS OF THE EDF<sup>15</sup>

### 1. SIGNIFICANT ACCOUNTING POLICIES

#### 1.1. ACCOUNTING PRINCIPLES

The objective of financial statements is to provide information about financial position, performance and cashflows of an entity that is useful to a wide range of users.

The overall considerations (or accounting principles) to be followed when preparing the financial statements are laid down in EU Accounting Rule 1 'Financial Statements' and are the same as those described in IPSAS 1: fair presentation, accrual basis, going concern, consistency of presentation, aggregation, offsetting and comparative information. The qualitative characteristics of financial reporting are relevance, faithful representation (reliability), understandability, timeliness, comparability and verifiability.

#### 1.2. BASIS OF PREPARATION

##### 1.2.1. Reporting period

Financial statements are presented annually. The accounting year begins on 1 January and ends on 31 December.

##### 1.2.2. Currency and basis for conversion

The annual accounts are presented in millions of euros, the euro being the EDF's functional and reporting currency. Foreign currency transactions are translated into euros using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the re-translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of financial performance. Different conversion methods apply to property, plant and equipment and intangible assets, which retain their value in euros at the date when they were purchased.

Year-end balances of monetary assets and liabilities denominated in foreign currencies are translated into euros on the basis of the European Central Bank (ECB) exchange rates applying on 31 December.

#### Euro exchange rates

| Currency | 31.12.2018 | 31.12.2017 | Currency | 31.12.2018 | 31.12.2017 |
|----------|------------|------------|----------|------------|------------|
| BGN      | 1.9558     | 1.9558     | PLN      | 4.3014     | 4.177      |
| CZK      | 25.7240    | 25.5350    | RON      | 4.6635     | 4.6585     |
| DKK      | 7.4673     | 7.4449     | SEK      | 10.2548    | 9.8438     |
| GBP      | 0.8945     | 0.8872     | CHF      | 1.1269     | 1.1702     |
| HRK      | 7.4125     | 7.4400     | JPY      | 125.8500   | 135.01     |
| HUF      | 320.9800   | 310.3300   | USD      | 1.145      | 1.1993     |

##### 1.2.3. Use of estimates

In accordance with IPSAS and generally accepted accounting principles, the financial statements necessarily include amounts based on estimates and assumptions by management based on the most reliable information available. Significant estimates include, but are not limited to; accrued and deferred revenue and charges, provisions, financial risk on accounts receivables, contingent assets and liabilities, and degree of impairment of assets. Actual results could differ from those estimates.

<sup>16</sup> It should be noted that due to the rounding of figures into millions of euros, some financial data in the tables may appear not to add-up.

Reasonable estimates are an essential part of the preparation of financial statements and do not undermine their reliability. An estimate may need revision if changes occur in the circumstances on which the estimate was based or as a result of new information or more experience. By its nature, the revision of an estimate does not relate to prior periods and is not the correction of an error. The effect of a change in accounting estimate shall be recognised in the surplus or deficit in the periods in which it becomes known.

### **1.3. BALANCE SHEET**

#### **1.3.1. Financial assets**

The financial assets are classified in the following categories: financial assets at fair value through surplus or deficit; loans and receivables; held-to-maturity investments; and available for sale financial assets. The classification of the financial instruments is determined at initial recognition and re-evaluated at each balance sheet date.

- *Financial assets at fair value through surplus or deficit*

A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by the entity. Derivatives are also categorised in this category. Assets in this category are classified as current assets if they are expected to be realised within 12 months of the balance sheet date. During this financial year, the entity did not hold any investments in this category.

- *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the entity provides money, goods or services directly to a debtor with no intention of trading the receivable. They are included in non-current assets, except for maturities within 12 months of the balance sheet date. Loans and receivables include term deposits with the original maturity above three months.

- *Held-to-maturity investments*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the entity has the positive intention and ability to hold to maturity. During this financial year, the entity did not hold any investments in this category.

- *Available for sale financial assets*

Available for sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are classified as either current or non-current assets, depending on the period of time the entity expects to hold them, which is usually the maturity date.

#### **Initial recognition and measurement**

Purchases and sales of financial assets at fair value through surplus or deficit, held-to-maturity and available for sale are recognised on trade date - the date on which the entity commits to purchase or sell the asset. Cash equivalents, loans and term deposits are recognised at settlement date. Financial instruments are initially recognised at fair value. For all financial assets not carried at fair value through surplus or deficit, transaction costs are added to the fair value at initial recognition.

Financial instruments are derecognised when the rights to receive cashflows from the investments have expired or the entity has transferred substantially all risks and rewards of ownership to another party.

## **Subsequent measurement**

Financial assets at fair value through surplus or deficit, are subsequently carried at fair value, with gains and losses arising from changes in the fair value being included in the statement of financial performance in the period in which they arise.

Loans and receivables and held-to maturity investments are carried at amortised cost using the effective interest method.

Available for sale financial assets are subsequently carried at fair value. Gains and losses arising from changes in the fair value are recognised in the fair value reserve. Interest on available for sale financial assets, calculated using the effective interest method, is recognised in the statement of financial performance.

The entity assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired and whether an impairment loss should be recorded in the statement of financial performance.

### **1.3.2. Pre-financing amounts**

Pre-financing is a payment intended to provide the beneficiary with a cash advance, i.e. a float. It may be split into a number of payments over a period defined in the particular contract, decision, agreement or basic legal act. The float or advance is either used for the purpose for which it was provided during the period defined in the agreement or it is repaid. If the beneficiary does not incur eligible expenditure, he has the obligation to return the pre-financing advance to the entity. The amount of the pre-financing may be reduced (wholly or partially) by the acceptance of eligible costs (which are recognised as expenses).

Pre-financing is, on subsequent balance sheet dates, measured at the amount initially recognised on the balance sheet less eligible expenses (including estimated amounts where necessary) incurred during the period.

### **1.3.3. Receivables and recoverables**

As the EU accounting rules require a separate presentation of exchange and non-exchange transactions, for the purpose of drawing up the accounts, receivables are defined as stemming from exchange transactions and recoverables are defined as stemming from non-exchange transactions (when the entity receives value from another entity without directly giving approximately equal value in exchange).

Receivables from exchange transactions meet the definition of financial instruments and are thus classified as loans and receivables and measured accordingly (see 1.3.1 below).

Recoverables from non-exchange transactions are carried at original amount (adjusted for interests and penalties) less write-down for impairment. A write-down for impairment is established when there is objective evidence that the entity will not be able to collect all amounts due according to the original terms of the recoverables. The amount of the write-down is the difference between the asset's carrying amount and the recoverable amount. The amount of the write-down is recognised in the statement of financial performance.

### **1.3.4. Cash and cash equivalents**

Cash and cash equivalents are financial instruments and include cash at hand, deposits held at call or at short notice with banks, and other short-term highly liquid investments with original maturities of three months or less.

### **1.3.5. Provisions**

Provisions are recognised when the entity has a present legal or constructive obligation

towards third parties as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognised for future operating losses. The amount of the provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the provision involves a large number of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities ('expected value' method).

#### **1.3.6. Payables**

Included under accounts payable are both amounts related to exchange transactions, such as the purchase of goods and services, and to non-exchange transactions e.g. to cost claims from beneficiaries, grants or other EU funding.

Where grants or other funding are provided to the beneficiaries, the cost claims are recorded as payables for the requested amount when the cost claim is received. Upon verification and acceptance of the eligible costs, the payables are valued at the accepted and eligible amount.

Payables arising from the purchase of goods and services are recognised at invoice reception for the original amount and corresponding expenses are entered in the accounts when the supplies or services are delivered and accepted by the entity.

#### **1.3.7. Accrued and deferred revenue and charges**

Transactions and events are recognised in the financial statements in the period to which they relate. At year-end, if an invoice is not yet issued but the service has been rendered, the supplies have been delivered by the entity or a contractual agreement exists (e.g. by reference to a contract), an accrued revenue will be recognised in the financial statements. In addition, at year-end, if an invoice is issued but the services have not yet been rendered or the goods supplied have not yet been delivered, the revenue will be deferred and recognised in the subsequent accounting period.

Expenses are also accounted for in the period to which they relate. At the end of the accounting period, accrued expenses are recognised based on an estimated amount of the transfer obligation of the period. The calculation of accrued expenses is done in accordance with detailed operational and practical guidelines issued by the Accounting Officer which aim at ensuring that the financial statements provide a faithful representation of the economic and other phenomena they purport to represent. By analogy, if a payment has been made in advance for services or goods that have not yet been received, the expense will be deferred and recognised in the subsequent accounting period.

### **1.4. STATEMENT OF FINANCIAL PERFORMANCE**

#### **1.4.1. Revenue**

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the entity, which represents an increase in net assets, other than increases relating to contributions from owners.

Depending on the nature of the underlying transactions in the statement of financial performance it is distinguished between:

- *Revenue from non-exchange transactions*

Revenue from non-exchange transactions are taxes and transfers because the transferor provides resources to the recipient entity without the recipient entity providing approximately equal value directly in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange

transactions, other than taxes. The entity shall recognise an asset in respect of transfers when the entity controls the resources as a result of a past event (the transfer) and expects to receive future economic benefits or service potential from those resources, and when the fair value can be reliably measured. An inflow of resources from a non-exchange transaction recognised as an asset (i.e. cash) is also recognised as revenue, except to the extent that the entity has a present obligation in respect of that transfer (condition), which needs to be satisfied before the revenue can be recognised. Until the condition is met the revenue is deferred and recognised as a liability (pre-financing received).

- *Revenue from exchange transactions*

Revenue from the sale of goods and services is recognised when the significant risk and rewards of ownership of the goods are transferred to the purchaser. Revenue associated with a transaction involving the provision of services is recognised by reference to the stage of completion of the transaction at the reporting date.

#### **1.4.2. Expenses**

Expenses are decreases in economic benefits or service potential during the reporting period in the form of outflows or consumption of assets or incurrence of liabilities that result in decreases in net assets/equity. They include both the expenses from exchange transactions and expenses from non-exchange transactions.

Expenses from exchange transactions arising from the purchase of goods and services are recognised when the supplies are delivered and accepted by the entity. They are valued at original invoice amount. Furthermore, at the balance sheet date expenses related to the service delivered during the period for which an invoice has not yet been received or accepted are recognised in the statement of financial performance.

Expenses from non-exchange transactions relate to transfers to beneficiaries and can be of three types: entitlements, transfers under agreement and discretionary grants, contributions and donations. Transfers are recognised as expenses in the period during which the events giving rise to the transfer occurred, as long as the nature of the transfer is allowed by regulation or an agreement has been signed authorising the transfer; any eligibility criteria have been met by the beneficiary; and a reasonable estimate of the amount can be made.

When a request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses due to the beneficiaries but not yet reported are estimated and recorded as accrued expense.

### **1.5. CONTINGENT ASSETS AND LIABILITIES**

#### **1.5.1. Contingent assets**

A contingent asset is a possible asset that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

#### **1.5.2. Contingent liabilities**

A contingent liability is a possible obligation that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation or, in the rare circumstances where the amount of the obligation cannot be measured with sufficient reliability.

## 1.6. CO-FINANCING

Co-financing contributions received fulfil the criteria of revenues from non-exchange transactions under conditions and they are presented as payables to Member States, non-Member States and others. The EDF is required to use the contributions to deliver services to third parties or is otherwise required to return the assets (the contributions received). The outstanding payables relating to co-financing agreements represent the co-financing contributions received less the expenses incurred related to the project. The effect on net assets is nil.

Expenses relating to co-financing projects are recognised as they are incurred. The corresponding amount of contributions is recognised as operating revenue and the effect on economic result of the year is nil.

## 2. NOTES TO THE BALANCE SHEET

### ASSETS

#### 2.1. PRE-FINANCING

Many contracts provide for payments of advances before the commencement of works, delivery of supplies or the provision of services. Sometimes the payment schedules of contracts foresee payments on the basis of progress reports. Pre-financing is normally paid in the currency of the country or territory where the project is executed.

The timing of the recoverability or utilisation of pre-financing governs whether it is disclosed as a current or a non-current pre-financing asset. The utilisation is defined by the project's underlying agreement. Any repayments or utilisation due within twelve months of the reporting date are disclosed as current pre-financing. As many of the EDF projects are long-term in nature, it is necessary that the related advances are available for more than one year. Thus some pre-financing amounts are shown as non-current assets.

| EUR millions              |       |            |           |                      |                      |              |              |
|---------------------------|-------|------------|-----------|----------------------|----------------------|--------------|--------------|
|                           | Note  | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018   | 31.12.2017   |
| Non-current pre-financing | 2.1.1 | –          | 23        | 520                  | 259                  | 801          | 582          |
| Current pre-financing     | 2.1.2 | 0          | 19        | 445                  | 899                  | 1 363        | 1 518        |
| <b>Total</b>              |       | <b>0</b>   | <b>42</b> | <b>964</b>           | <b>1 157</b>         | <b>2 164</b> | <b>2 100</b> |

The increase in non-current pre-financing was mainly caused by the extension up to 2030 of a contract that was supposed to end in 2017. In 2017 the total value of this contract had been expensed, whereas after the extension, the non-current pre-financing was estimated at EUR 217 million.

The decrease in current pre-financing was caused by a decrease in the pre-financing payments made (by 10%) and an increase in the level of clearings (mainly in the 10<sup>th</sup> EDF). This decrease is in line with the lifecycle of the EDF. Many contracts have been cleared and completed in the 10<sup>th</sup> EDF: this can be seen in the drop of their number – from 3,400 in 2017 to 2,600 in 2018.

At the same time the number of open contracts in the 11<sup>th</sup> EDF increased from 1,600 in 2017 to 2,300 in 2018. The 11<sup>th</sup> EDF started in 2015 and 2018 was thus the fourth year of its existence. The 11<sup>th</sup> EDF has reached maturity with regards to the implementation of adopted actions.

### 2.1.3. Guarantees received in respect of pre-financing

Guarantees are held to secure pre-financing and are released when the final claim under a project is paid. At 31 December 2018 the guarantees received by the EDF in respect of pre-financing amounted to EUR 79 million (2017 EUR 54 million).

The majority of pre-financing is paid under the indirect management mode. In this case the beneficiary of the guarantee is not the EDF but the contracting authority. Even though the EDF

is not the beneficiary, those guarantees secure its assets. In 2018 those guarantees amounted to EUR 534 million.

## 2.2. TRUST FUND CONTRIBUTIONS

This heading represents the amount paid as contributions to the EU Trust Fund for Africa and the Bêkou EU Trust Fund. The contributions are net of the costs incurred by the trust funds and attributable to the EDF.

The trust fund contributions are implemented by the EDF under the direct management mode.

## 2.3. NON-EXCHANGE RECOVERABLES AND EXCHANGE RECEIVABLES

EUR millions

|                                                    | Note  | 31.12.2018 | 31.12.2017 |
|----------------------------------------------------|-------|------------|------------|
| <i>Recoverables from non-exchange transactions</i> | 2.3.1 | 37         | 19         |
| <i>Receivables from exchange transactions</i>      | 2.3.2 | 101        | 73         |
| <b>Total</b>                                       |       | <b>138</b> | <b>92</b>  |

### 2.3.1. Recoverables from non-exchange transactions

EUR millions

|                                                    | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|----------------------------------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| <i>Member States</i>                               | –          | –         | –                    | 5                    | 5          | 7          |
| <i>Customers</i>                                   | 2          | 7         | 16                   | 1                    | 26         | 19         |
| <i>Public bodies</i>                               | 0          | 9         | 9                    | 7                    | 25         | 20         |
| <i>Third states</i>                                | 0          | 1         | 3                    | 0                    | 5          | 6          |
| <i>Write down</i>                                  | (2)        | (15)      | (10)                 | (0)                  | (27)       | (34)       |
| <i>Inter-company accounts with EU institutions</i> | –          | –         | –                    | 3                    | 3          | 2          |
| <b>Total</b>                                       | <b>1</b>   | <b>2</b>  | <b>18</b>            | <b>16</b>            | <b>37</b>  | <b>19</b>  |

The overall increase in the recoverables from non-exchange transactions is mainly due to increased recoverables from customers and public bodies combined with a decrease in the write down for impairment.

### 2.3.2. Receivables from exchange transactions

EUR millions

|                           | Eighth EDF | Ninth EDF  | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|---------------------------|------------|------------|----------------------|----------------------|------------|------------|
| <i>Accrued income</i>     | 0          | 63         | 18                   | 0                    | 81         | 74         |
| <i>Receivable from EU</i> | –          | –          | –                    | 20                   | 20         | –          |
| <i>Inter-EDF accounts</i> | 183        | 111        | 2 421                | (2 715)              | (0)        | (0)        |
| <b>Total</b>              | <b>183</b> | <b>174</b> | <b>2 439</b>         | <b>(2 695)</b>       | <b>101</b> | <b>73</b>  |

Included under accrued income are amounts of accrued interest on pre-financing related to projects (EUR 63 million) and on pre-financing related to the EU-Africa Trust Fund (EUR 18 million).

The receivable from the EU is the amount that was transferred to the trust account owned by the European Commission.

For efficiency reasons, the single treasury covering all the EDFs is allocated to the 11<sup>th</sup> EDF; this leads to operations between the various EDFs, which are balanced out in the inter-EDF accounts between the various EDF balance sheets.

Inter-EDF accounts are presented only in the individual EDFs. The total of inter-EDF accounts is nil.

## 2.4. CASH AND CASH EQUIVALENTS<sup>17</sup>

EUR millions

|                                         | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|-----------------------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| Central banks                           | –          | –         | –                    | 276                  | 276        | 105        |
| Commercial banks                        | –          | –         | –                    | 87                   | 87         | 242        |
| Cash belonging to financial instruments | –          | –         | –                    | 24                   | 24         | –          |
| <b>Total</b>                            | <b>–</b>   | <b>–</b>  | <b>–</b>             | <b>387</b>           | <b>387</b> | <b>347</b> |

The total level of cash and cash equivalents remained stable. However, the structure of the cash position has changed. A significant decrease (EUR 136 million) was observed in the UK's contribution account in the commercial bank Natwest. It was mainly because at the end of 2017 the UK paid the first instalment of its 2018 contribution of EUR 170 million.

On 31.12.2018 more cash was kept in the central banks, in order to limit counterparty risk (see note 5.4).

## LIABILITIES

### 2.5. PROVISIONS

EUR millions

|              | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|--------------|------------|-----------|----------------------|----------------------|------------|------------|
| Provisions   | –          | –         | –                    | –                    | –          | 4          |
| <b>Total</b> | <b>–</b>   | <b>–</b>  | <b>–</b>             | <b>–</b>             | <b>–</b>   | <b>4</b>   |

The provision for the Centre de Development (CDE) has been released as the court cases have been finished and no additional costs should be incurred.

### 2.6. FINANCIAL LIABILITIES

EUR millions

|                         | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|-------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| Co-financing - payables | –          | –         | 1                    | 16                   | 18         | 14         |
| <b>Total</b>            | <b>–</b>   | <b>–</b>  | <b>1</b>             | <b>16</b>            | <b>18</b>  | <b>14</b>  |

The change in the total co-financing liabilities is explained in note 2.7.2.1.

### 2.7. PAYABLES

EUR millions

|                  | Note  | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|------------------|-------|------------|-----------|----------------------|----------------------|------------|------------|
| Current payables | 2.7.1 | 0          | 6         | 80                   | 88                   | 173        | 361        |
| Sundry payables  | 2.7.2 | –          | –         | 45                   | 23                   | 68         | 202        |
| <b>Total</b>     |       | <b>0</b>   | <b>6</b>  | <b>125</b>           | <b>111</b>           | <b>241</b> | <b>563</b> |

<sup>17</sup> In accordance with Article 53 of the Financial Regulation applicable to the 11<sup>th</sup> European Development Fund, the treasury is presented in the balance sheet of the 11<sup>th</sup> EDF. The nature of the various bank accounts is outlined in chapter 5, Financial Risk Management.

## 2.7.1. Current payables

EUR millions

|                        | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| Suppliers              | 0          | 5         | 65                   | 32                   | 102        | 133        |
| Member States          | –          | –         | 0                    | 1                    | 1          | 12         |
| Third states           | 0          | –         | 6                    | 31                   | 37         | 146        |
| Public bodies          | –          | 2         | 10                   | 30                   | 43         | 83         |
| Other current payables | (0)        | (2)       | (2)                  | (6)                  | (10)       | (13)       |
| <b>Total</b>           | <b>0</b>   | <b>6</b>  | <b>80</b>            | <b>88</b>            | <b>173</b> | <b>361</b> |

Payables include cost statements received by the EDF relating to its grant activity. They are recorded for the amount being claimed from the moment the demand is received. The same procedure applies to invoices and credit notes received under procurement activities. The cost claims concerned have been taken into account for the year-end cut-off procedures. Following the cut-off entries, estimated eligible amounts have been recognised in the statement of financial performance. Non-eligible amounts have been shown as other current payables.

## 2.7.2. Sundry payables

EUR millions

|                                     | Note    | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|-------------------------------------|---------|------------|-----------|----------------------|----------------------|------------|------------|
| Co-financing payables               | 2.7.2.1 | –          | –         | 47                   | 21                   | 68         | 28         |
| Deferred fund capital contributions | 2.7.2.2 | –          | –         | –                    | –                    | –          | 173        |
| Other sundry payables               |         | –          | –         | (2)                  | (2)                  | –          | 1          |
| <b>Total</b>                        |         | <b>–</b>   | <b>–</b>  | <b>45</b>            | <b>23</b>            | <b>68</b>  | <b>202</b> |

### 2.7.2.1. Co-financing payables

The breakdown of the non-current and current co-financing payables by Member State is summarised in the table below:

EUR millions

|                                 | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|---------------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| <b>Non-current co-financing</b> |            |           |                      |                      |            |            |
| Austria                         | –          | –         | –                    | 1                    | 1          | –          |
| Belgium                         | –          | –         | 0                    | 2                    | 2          | 2          |
| Czech Republic                  | –          | –         | –                    | 1                    | 1          | –          |
| Denmark                         | –          | –         | –                    | 3                    | 3          | 0          |
| Finland                         | –          | –         | –                    | 1                    | 1          | –          |
| France                          | –          | –         | 1                    | 1                    | 2          | 4          |
| Luxembourg                      | –          | –         | –                    | 1                    | 1          | –          |
| Portugal                        | –          | –         | –                    | 0                    | 0          | –          |
| Sweden                          | –          | –         | 0                    | –                    | 0          | 3          |

| <b>Total</b>          | – | – | 48 | 37 | 86 | 42 |

The total non-current and current co-financing payables increased by EUR 44 million compared to the previous reporting period.

During 2018, a total of EUR 28 million new co-financing contributions were received. The total co-financing payables increased by EUR 17 million in order to recognise revenue and expenses related to co-financed projects (see notes **3.1.1** and **3.4**).

#### 2.7.2.2. Deferred fund capital contributions

EUR millions

|                       | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|-----------------------|------------|-----------|----------------------|----------------------|------------|------------|
| <i>United Kingdom</i> | –          | –         | –                    | –                    | –          | 170        |
| <i>Lithuania</i>      | –          | –         | –                    | –                    | –          | 2          |
| <b>Total</b>          | –          | –         | –                    | –                    | –          | 173        |

This heading completely relates to Member States' 2018 contributions paid in advance.

## 2.8. ACCRUED CHARGES AND DEFERRED INCOME

EUR millions

|                                     | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|-------------------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| <i>Accrued charges</i>              | 0          | 83        | 358                  | 838                  | 1 279      | 730        |
| <i>Other accruals and deferrals</i> | –          | –         | –                    | 3                    | 3          | 3          |
| <b>Total</b>                        | 0          | 83        | 358                  | 840                  | 1 281      | 733        |

Accrued charges comprise estimated operating expenses for on-going or completed contracts without validated cost claims where the 2018 eligible expenses incurred by beneficiaries of EDF were estimated using the best available information. The portion of the estimated accrued charges which relates to pre-financing paid has been recorded as a reduction of the pre-financing amounts (see note 2.1).

Accrued charges increased mainly in the 11<sup>th</sup> EDF (from EUR 140 million in 2017 to EUR 840 million in 2018). This is in line with the increase in the number of contracts (from 1,600 in 2017 to 2,300 in 2018). The 11<sup>th</sup> EDF started in 2015 and 2018 was thus the fourth year of its existence. The 11<sup>th</sup> EDF has reached maturity with regards to the implementation of adopted actions.

The fund capital represents the total amount of contributions from Member States for the relevant EDF fund as laid down in each of the Internal Agreements. The uncalled funds represent the initial allocation not yet called from Member States.

The called fund capital represents the amount of the initial allocations which have been called up for transfer to the treasury accounts by the Member States (see note 2.9.2 below).

| Balance at 31.12.2018                                                                              | (2 509)    | 2 137     | 55                   | 317                  | –     |

This heading includes the resources transferred between the active EDFs.

Since the entry into force of the Cotonou Agreement, all the unspent funds in previous active EDFs are transferred to the most recently opened EDF after decommitment. The resources transferred from other EDFs increase the appropriations of the receiving fund and reduce the appropriations of the fund of origin. Funds transferred to the performance reserve of the 10<sup>th</sup> and 11<sup>th</sup> EDFs can be committed only under specific conditions set out in the Internal Agreements.

## 3. NOTES TO THE STATEMENT OF FINANCIAL PERFORMANCE

### REVENUE

EUR millions

|                                        | Note | 2018 | 2017 |
|----------------------------------------|------|------|------|
| Revenue from non-exchange transactions | 3.1  | 4    | 61   |
| Revenue from exchange transactions     | 3.2  | 57   | 25   |
| Total                                  |      | 60   | 87   |

### 3.1. REVENUE FROM NON-EXCHANGE TRANSACTIONS

EUR millions

|                          | Note  | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 2018 | 2017 |
|--------------------------|-------|------------|-----------|----------------------|----------------------|------|------|
| Recovery of expenses     |       | 0          | 3         | 14                   | 3                    | 21   | 19   |
| Recovery of STABEX funds |       | –          | –         | 0                    | –                    | 0    | 0    |
| Co-financing revenue     | 3.1.1 | –          | –         | (18)                 | 1                    | (17) | 42   |
| Total                    |       | 0          | 3         | (3)                  | 4                    | 4    | 61   |

Non-exchange revenue can be broken down by management mode as follows:

EUR millions

|                                                         | 2018        | 2017       |
|---------------------------------------------------------|-------------|------------|
| <b>Direct Management</b>                                | <b>4</b>    | <b>5</b>   |
| <i>Implemented by:</i>                                  |             |            |
| <i>Commission</i>                                       | <i>1</i>    | <i>1</i>   |
| <i>EU delegations</i>                                   | <i>3</i>    | <i>4</i>   |
| <b>Indirect Management</b>                              | <b>0</b>    | <b>56</b>  |
| <i>Implemented by :</i>                                 |             |            |
| <i>Third countries</i>                                  | <i>(13)</i> | <i>55</i>  |
| <i>International organisations</i>                      | <i>12</i>   | <i>2</i>   |
| <i>Public law bodies</i>                                | <i>0</i>    | <i>0</i>   |
| <i>Private law bodies with a public service mission</i> | <i>1</i>    | <i>(1)</i> |
| <b>Total</b>                                            | <b>4</b>    | <b>61</b>  |

### 3.1.1. Co-financing revenue

The co-financing contributions received fulfil the criteria of revenues from non-exchange transactions under conditions and as such should not affect the statement of financial performance. The received contributions remain under liabilities (see note **2.7.2.1**) until the conditions attached to the donated funds are met, i.e. eligible expenses are incurred (see note **3.4**). The corresponding amount is then recognised as non-exchange revenue from co-financing. Consequently the effect on the economic result of the year is nil.

### 3.2. REVENUE FROM EXCHANGE TRANSACTIONS

EUR millions

|                          | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 2018      | 2017      |
|--------------------------|------------|-----------|----------------------|----------------------|-----------|-----------|
| <i>Financial revenue</i> | <i>0</i>   | <i>2</i>  | <i>8</i>             | <i>1</i>             | <i>10</i> | <i>4</i>  |
| <i>Other revenue</i>     | <i>1</i>   | <i>6</i>  | <i>27</i>            | <i>12</i>            | <i>46</i> | <i>22</i> |
| <b>Total</b>             | <b>1</b>   | <b>8</b>  | <b>35</b>            | <b>13</b>            | <b>57</b> | <b>25</b> |

Financial revenue comprises interest from the Trust Funds and interest on pre-financing.

Other income entirely relates to the realised and unrealised foreign exchange gains.

## EXPENSES

### 3.3. AID INSTRUMENTS

EUR millions

|                                                    | Eighth EDF | Ninth EDF  | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 2018         | 2017         |
|----------------------------------------------------|------------|------------|----------------------|----------------------|--------------|--------------|
| <i>Programmable aid</i>                            | <i>(0)</i> | <i>1</i>   | <i>532</i>           | <i>1 468</i>         | <i>2 001</i> | <i>2 150</i> |
| <i>Macro-economic support</i>                      | <i>–</i>   | <i>26</i>  | <i>–</i>             | <i>–</i>             | <i>26</i>    | <i>21</i>    |

| <i>Intra ACP projects</i>                          | <i>–</i>   | <i>27</i>  | <i>389</i>           | <i>581</i>           | <i>998</i>   | <i>1 112</i> |
| <i>Emergency aid</i>                               | <i>–</i>   | <i>3</i>   | <i>60</i>            | <i>811</i>           | <i>873</i>   | <i>289</i>   |
| <i>Other aid programmes related to former EDFs</i> | <i>–</i>   | <i>0</i>   | <i>–</i>             | <i>–</i>             | <i>0</i>     | <i>(1)</i>   |
| <i>Institutional support</i>                       | <i>–</i>   | <i>–</i>   | <i>3</i>             | <i>15</i>            | <i>18</i>    | <i>23</i>    |
| <i>Compensation export receipts</i>                | <i>0</i>   | <i>(0)</i> | <i>–</i>             | <i>–</i>             | <i>0</i>     | <i>(1)</i>   |
| <i>Contributions to Trust Funds</i>                | <i>–</i>   | <i>–</i>   | <i>–</i>             | <i>312</i>           | <i>312</i>   | <i>114</i>   |
| <b>Total</b>                                       | <b>(0)</b> | <b>59</b>  | <b>984</b>           | <b>3 187</b>         | <b>4 230</b> | <b>3 700</b> |

The EDF operating expenditure covers various aid instruments and takes different forms, depending on how the money is paid out and managed.

The increase in overall expenses on aid instruments is mainly in the 11<sup>th</sup> EDF. This is in line

with the lifecycle of this EDF. The 11<sup>th</sup> EDF started in 2015 and 2018 was thus the fourth year of its existence. In 2018 the 11<sup>th</sup> EDF reached maturity with regards to the implementation of adopted actions and thus the expenses have increased compared to 2017. The number of open contracts in the 11<sup>th</sup> EDF increased from 1,600 in 2017 to 2,300 in 2018.

This increase is in line with the increase in clearings of pre-financing and increase in accrued charges.

The sectoral policy expenses were negative in 2017 due to reversal of an invoice that was incorrectly recorded in 2016.

### 3.4. CO-FINANCING EXPENSES

EUR millions

|              | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 2018 | 2017 |
|--------------|------------|-----------|----------------------|----------------------|------|------|
| Co-financing | –          | –         | (18)                 | 1                    | (17) | 42   |

Included under this heading are the expenses incurred on co-financing projects in 2018. It should be noted that the expenses incurred include estimated amounts related to the cut-off exercise (and consequently reversals of the estimated amounts related to last year). Because the reversals of the 2017 estimated expenses (EUR 52 million) exceeded the expenses incurred in 2018 (EUR 36 million), the co-financing expenses are negative for 2018.

Corresponding negative revenue has been recognised in the statement of financial performance (see note 3.1.1).

### 3.5. AID INSTRUMENTS AND CO-FINANCING EXPENSES BY MANAGEMENT TYPE

EUR millions

|                                                            | 2018         | 2017         |
|------------------------------------------------------------|--------------|--------------|
| <b>Direct Management</b>                                   | <b>1 755</b> | <b>1 447</b> |
| Implemented by:                                            |              |              |
| Commission                                                 | 122          | 122          |
| EU executive agencies                                      | 31           | 26           |
| Trust Funds                                                | 599          | 89           |
| EU delegations                                             | 1 003        | 1 209        |
| <b>Indirect Management</b>                                 | <b>2 458</b> | <b>2 295</b> |
| Implemented by:                                            |              |              |
| EIB and EIF                                                | 44           | 48           |
| International organisations                                | 1 091        | 1 171        |
| Private law bodies with a public service mission           | 114          | (20)         |
| Public law bodies                                          | 231          | 356          |
| Third countries                                            | 977          | 739          |
| EU bodies with Public Private Partnership                  | 1            | –            |
| Private law bodies implementing Public Private Partnership | 0            | 0            |
| <b>Total</b>                                               | <b>4 213</b> | <b>3 742</b> |

### 3.6. FINANCE COSTS

EUR millions

|                           | Eighth EDF | Ninth EDF  | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 2018       | 2017     |
|---------------------------|------------|------------|----------------------|----------------------|------------|----------|
| Write-down of receivables | (0)        | (1)        | (5)                  | (1)                  | (7)        | 9        |
| Other financial expenses  | –          | –          | –                    | (0)                  | (0)        | (1)      |
| <b>Total</b>              | <b>(0)</b> | <b>(1)</b> | <b>(5)</b>           | <b>(1)</b>           | <b>(7)</b> | <b>8</b> |

The heading write-down of receivables comprises the estimate of expenses on irrecoverable receivables. Because the estimate also includes reversals of the previous year's estimation, the overall expenses were negative in 2018 (from EUR 34 million in 2017 to EUR 27 million in 2018 – see note 2.3.1).

### 3.7. OTHER EXPENSES

EUR millions

|                                  | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 2018       | 2017       |
|----------------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| Administrative and IT expenses   | (0)        | (0)       | 45                   | 67                   | 112        | 107        |
| Provision for risks and charges  | –          | –         | –                    | (4)                  | (4)        | –          |
| Realised losses on trade debtors | 0          | 0         | 0                    | –                    | 1          | 3          |
| Exchange losses                  | 0          | 6         | 26                   | 7                    | 39         | 44         |
| <b>Total</b>                     | <b>1</b>   | <b>7</b>  | <b>71</b>            | <b>70</b>            | <b>148</b> | <b>154</b> |

This heading includes support expenditure, i.e. the administrative costs related to the programming and implementation of the EDFs. This includes expenses for preparation, follow-up, monitoring, and evaluation of projects as well as expenses for computer networks, technical assistance etc.

## 4. CONTINGENT ASSETS & LIABILITIES AND OTHER SIGNIFICANT DISCLOSURES

### 4.1. CONTINGENT ASSETS

EUR millions

|                        | Eighth EDF | Ninth EDF | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018 | 31.12.2017 |
|------------------------|------------|-----------|----------------------|----------------------|------------|------------|
| Performance guarantees | –          | 0         | 10                   | 0                    | 11         | 10         |
| Retention guarantees   | –          | 0         | 6                    | –                    | 7          | 8          |
| <b>Total</b>           | <b>–</b>   | <b>1</b>  | <b>16</b>            | <b>0</b>             | <b>17</b>  | <b>18</b>  |

Performance guarantees are requested to ensure that beneficiaries of EDF funding meet the obligations of their contracts with the EDF.

Retention guarantees concern only works contracts. Typically 10 % of the interim payments to beneficiaries are withheld to ensure that the contractors fulfil their obligations. These withheld amounts are reflected as amounts payable. Subject to the approval of the contracting authority, the contractor may instead submit a retention guarantee which replaces the amounts withheld on interim payments. These received guarantees are disclosed as contingent assets.

For contracts managed under the indirect mode, the guarantees belong to a contracting authority other than the EDF and they are therefore not recorded by the EDF. In 2018 those guarantees amounted to EUR 501 million.

### 4.2. OTHER SIGNIFICANT DISCLOSURES

#### 4.2.1. Outstanding commitments not yet expensed

The amount disclosed below is the budgetary RAL ('Reste à Liquider') less related amounts that have been included as expenses in the statement of financial performance. The budgetary RAL is an amount representing the commitments for which payments and/or de-commitments have not yet been made. This is the normal consequence of the existence of multi-annual programmes.

EUR millions

|                                          | Eighth EDF | Ninth EDF  | 10 <sup>th</sup> EDF | 11 <sup>th</sup> EDF | 31.12.2018   | 31.12.2017   |
|------------------------------------------|------------|------------|----------------------|----------------------|--------------|--------------|
| Outstanding commitments not yet expensed | 89         | (1)        | 983                  | 8 009                | 9 080        | 8 508        |
| <b>Total</b>                             | <b>89</b>  | <b>(1)</b> | <b>983</b>           | <b>8 009</b>         | <b>9 080</b> | <b>8 508</b> |

At 31 December 2018 the budgetary RAL totalled EUR 10,616 million (2017: EUR 9,745 million).

#### **4.2.2. The United Kingdom's withdrawal from the European Union**

##### *Background*

On 23 June 2016 a majority of the citizens of the United Kingdom who voted in the referendum on membership of the European Union voted to leave the EU. On 29 March 2017 the United Kingdom formally notified the European Council of its intention to leave the EU and the European Atomic Energy Community (Euratom). In doing so it triggered Article 50 of the Treaty on European Union, which sets out the procedure for a Member State to withdraw from the Union.

##### *The negotiation process*

On 19 March 2018 the Commission published a draft of the Withdrawal Agreement that outlined the progress made in the negotiations. In the financial settlement part of the Withdrawal Agreement, the EU and the UK translated the progress achieved in the first phase of negotiations into a legal text.

A Joint Report was published on 14 November 2018 reporting agreement at negotiators' level on the full text of the draft Withdrawal Agreement, and on an outline of the Political Declaration on the framework for the future relationship between the United Kingdom and the European Union. On the same day, this updated and agreed draft Withdrawal Agreement was published, in which the UK agreed to pay all its obligations under the current Multiannual Financial Framework (MFF) and previous financial perspectives as if it were still a Member State, including its share of the Union's liabilities and contingent liabilities.

##### *With regard to the EDF*

The draft Withdrawal Agreement states that the United Kingdom shall remain party to the EDF until the closure of the 11<sup>th</sup> EDF and all previous unclosed EDFs, and shall in this respect assume the same obligations as the Member States under the Internal Agreement by which it was set up, as well as the obligations resulting from previous EDFs until their closure. It may participate, as observer, without voting rights, in the EDF Committee.

The draft Withdrawal Agreement also states that, where the amounts from projects under the 10<sup>th</sup> EDF or from previous EDFs have not been committed or have been decommitted on the date of entry into force of this agreement, the United Kingdom's share of those amounts shall not be reused. The same applies to the United Kingdom share of funds not committed or decommitted amounts under 11<sup>th</sup> EDF after 31 December 2020.

At the time of transmission of these accounts the actual departure date and manner of the departure (with or without agreement) is not yet known. Based on this current situation, there is no financial impact to be reported in the EDF financial statements as at 31 December 2018.

## **5. FINANCIAL RISK MANAGEMENT**

The following disclosures with regard to the financial risk management of the EDF relate to the treasury operations carried out by the Commission on behalf of the EDF in order to implement its resources.

### **5.1. RISK MANAGEMENT POLICIES AND HEDGING ACTIVITIES**

The rules and principles for the management of the treasury operations are laid down in the 11<sup>th</sup> EDF Financial Regulation and in the Internal Agreement.

As a result of the above regulation, the following main principles apply:

- The EDF contributions are paid by Member States in special accounts opened with the bank

of issue of each Member State or the financial institution designated by it. The amounts of the contributions shall remain in those special accounts until the payments of EDF need to be made.

- EDF contributions are paid by Member States in EUR, while the EDF's payments are denominated in EUR and in other currencies, including less well-known ones.
- Bank accounts opened by the Commission on behalf of the EDF may not be overdrawn.

In addition to the special accounts, other bank accounts are opened by the Commission in the name of the EDF, with financial institutions (central banks and commercial banks), for the purpose of executing payments and receiving receipts other than the Member State contributions to the budget.

Treasury and payment operations are highly automated and rely on modern information systems. Specific procedures are applied to guarantee system security and to ensure segregation of duties in line with the Financial Regulation, the Commission's internal control standards, and audit principles.

A written set of guidelines and procedures regulate the management of the treasury and payment operations with the objective of limiting operational and financial risk and ensuring an adequate level of control. They cover the different areas of operation, and compliance with the guidelines and procedures is checked regularly.

## 5.2. CURRENCY RISK

### Exposure of the EDF to currency risk at year end – net position

EUR millions

All contributions are held in EUR, and other currencies are purchased only when they are needed for the execution of payments. As a result the EDF's treasury operations are not exposed to currency risk.

### 5.3. INTEREST RATE RISK

The EDF does not borrow money and as a consequence it is not exposed to interest rate risk.

Interest is accrued on balances it holds in its different banks accounts. The Commission, on behalf of the EDF, has therefore put in place measures to ensure that interest earned regularly reflects market interest rates as well as their possible fluctuation.

Contributions to the EDF budget are credited by each Member State to a special account opened with the financial institution designed by it. As the remuneration applied to some of these accounts may currently be negative, cash management procedures are in place to minimise balances kept on the accounts concerned. In addition, in accordance with Council Regulation (EU)2016/888, any negative remuneration on these accounts is borne by the relevant Member State.

Overnight balances held in commercial bank accounts are remunerated on a daily basis. The remuneration of balances on such accounts is based on variable market rates to which a contractual margin (positive or negative) is applied. For most of the accounts the interest calculation is linked to a market reference rate and is adjusted to reflect any fluctuations of this rate. As a result no risk is taken by the EDF that its balances remunerated at rates lower than market rates.

### 5.4. CREDIT RISK (COUNTERPARTY RISK)

**Financial assets that are neither past due nor impaired:**

EUR millions

|                                                    | Total      | Neither past due nor impaired | Past due but not impaired |           |           |

Funds in the categories *non-investment grade* and *lower medium grade* relate mainly to

Member State contributions to the EDF paid to the special accounts opened by Member States in accordance with Article 20(3) of the EDF FR. According to this regulation the amount of such contributions must remain in those special accounts until the payments need to be made.

Most of the EDF's treasury resources are kept, in accordance with the EDF FR, in the special accounts opened by Member States for the payment of their contributions. The majority of such accounts are held with Member States' treasuries or national central banks. These institutions carry the lowest counterparty risk for the EDF (exposure is with its Member States).

For the part of the EDF's treasury resources kept with commercial banks in order to cover the execution of payments, replenishment of these accounts is executed on a just-in-time basis and is automatically managed by the Commission treasury's cash management system. Minimum cash levels, proportional to the average amount of daily payments made from it, are kept on each account. As a consequence the amounts kept overnight on these accounts remain constantly at low levels which ensure the EDF's risk exposure is limited.

In addition, specific guidelines are applied for the selection of commercial banks in order to further minimise counterparty risk to which the EDF is exposed.

All commercial banks are selected by calls for tender. The minimum short-term credit rating required for admission to the tendering procedures is Moody's P-1 or equivalent (S&P A-1 or Fitch F1). A lower level may be required in specific and duly justified circumstances.

## 5.5. LIQUIDITY RISK

### Maturity analysis of financial liabilities by remaining contractual maturity

EUR millions

|                              | < 1 year   | 1-5 years | > 5 years | Total      |
|------------------------------|------------|-----------|-----------|------------|
| <i>Financial liabilities</i> | 241        | 7         | 11        | 259        |
| <b>Total at 31.12.2018</b>   | <b>241</b> | <b>7</b>  | <b>11</b> | <b>259</b> |
| <i>Financial liabilities</i> | 563        | 13        | 1         | 577        |
| <b>Total at 31.12.2017</b>   | <b>563</b> | <b>13</b> | <b>1</b>  | <b>577</b> |

Budget principles applied to the EDF ensure that overall cash resources for the budgetary period are always sufficient for the execution of all related payments. Indeed the total Member States' contributions equal the overall amount of payment appropriations for the relevant budgetary period.

Member States contributions to EDF, however, are paid in three instalments per year, while payments are subject to certain seasonality.

In order to ensure that treasury resources are always sufficient to cover the payments to be executed in any given month, information on the treasury situation is regularly exchanged between the Commission's treasury and the relevant spending departments.

In addition to the above, in the context of the EDF's treasury operations, automated cash management tools ensure that sufficient liquidity is available on each of the EDF's bank accounts, on a daily basis.

## 6. RELATED PARTY DISCLOSURES

The related parties of the EDF are the Bêkou and Africa EU Trust Funds and the European Commission. Transactions between these entities take place as part of the normal

operations of the EDF and as this is the case, no specific disclosure requirements are necessary for these transactions in accordance with the EU accounting rules.

The EDF has no separate management since it is managed by the Commission. The entitlements of the key management of the EU, including the Commission, have been disclosed in the Consolidated annual accounts of the European Union under heading 7.2 "Key management entitlements".

## 7. EVENTS AFTER THE BALANCE SHEET DATE

At the date of signing of these accounts, no material issues had come to the attention of or were reported to the Accounting Officer of the EDF that would require separate disclosure under this section. The annual accounts and related notes were prepared using the most recently available information and this is reflected in the information presented above.

## 8. RECONCILIATION OF ECONOMIC RESULT AND BUDGET RESULT

The economic result of the year is calculated on the basis of accrual accounting principles. The budget result is however based on cash accounting rules. As the economic result and the budget result both cover the same underlying operational transactions, it is a useful control to ensure that they are reconcilable. The table below shows this reconciliation, highlighting the key reconciling amounts, split between revenue and expenditure items.

*EUR millions*

### 8.1. RECONCILING ITEMS - REVENUE

The budgetary revenue of a financial year corresponds to the revenue collected from entitlements established in the course of the year and amounts collected from entitlements established in previous years.

The entitlements not affecting the budget result are recorded in the economic result but from a budgetary perspective cannot be considered as revenues as the cashed amount is transferred to reserves and cannot be recommitted without a Council decision.

The entitlements established in the current year but not yet collected are to be deducted from the economic result for reconciliation purposes as they do not form part of budgetary revenue. On the contrary, the entitlements established in previous years and collected in the current year must be added to the economic result for reconciliation

purposes.

The net effect of pre-financing is the clearing of the recovered pre-financing amounts. This is a cash receipt which has no impact on the economic result.

The net accrued revenue mainly consists of accruals made for year-end cut-off purposes. Only the net effect, i.e. the accrued revenue of the current year less the reversal of accrued revenue of the previous year, is taken into consideration.

## **8.2. RECONCILING ITEMS – EXPENDITURE**

Expenses of the current year not yet paid are to be added for reconciliation purposes as they are included in the economic result but do not form part of budgetary expenditure. On the contrary, the expenses of previous years paid in the current year must be deducted from the economic result for reconciliation purposes as they are part of the current year's budgetary expenditure but have either no effect on the economic result or they decrease the expenses in case of corrections.

The cash receipts from payment cancellations do not affect the economic result whereas they impact the budget result.

The net effect of pre-financing is the combination of the new pre-financing amounts paid in the current year (recognised as budgetary expenditure of the year) and the clearing of pre-financing paid in the current year or previous years through the acceptance of eligible costs. The latter represents an expense in accrual terms but not in the budgetary accounts since the payment of the initial pre-financing had already been considered as a budgetary expenditure at the time of its payment.

The net accrued expenses mainly consist of accruals made for year-end cut-off purposes, i.e. eligible expenses incurred by beneficiaries of EDF funds but not yet reported to the EDF. Only the net effect, i.e. the accrued expenses of the current year less the reversal of accrued expenses of the previous year, is taken into consideration.

# FINANCIAL STATEMENTS OF THE EU TRUST FUNDS CONSOLIDATED IN EDF

## **PROVISIONAL ANNUAL ACCOUNTS OF THE BÊKOU EU TRUST FUND 2018<sup>18</sup>**

### **BACKGROUND INFORMATION ON THE BÊKOU EU TRUST FUND**

#### **General background on Union Trust Funds**

In accordance with Articles 234 and 235 of the Financial Regulation applicable to the general budget of the Union (EU FR)<sup>19</sup> and Article 35 of the Financial Regulation applicable to the 11<sup>th</sup> European Development Fund (EDF FR)<sup>20</sup>, the European Commission may establish Union trust funds for external actions ('Union trust funds'). The Union trust funds are constituted under an agreement concluded with other donors for emergency and post-emergency actions necessary to react to a crisis, or for thematic actions.

Union trust funds are established by the European Commission with a decision after consulting or approval of the European Parliament and the Council. This decision includes the constitutive agreement with other donors.

Union trust funds are only established and implemented subject to the following conditions:

- there is added value of the Union intervention: the objectives of Union trust funds, in particular by reason of their scale or potential effects, may be better achieved at Union level than at national level and the use of the existing financing instruments would not be sufficient to achieve policy objectives of the Union;
- Union trust funds bring clear political visibility for the Union and managerial advantages as well as better control by the Union of risks and disbursements of the Union and other donors' contributions;
- Union trust funds do not duplicate other existing funding channels or similar instruments without providing any additionality;
- the objectives of Union trust funds are aligned with the objectives of the Union instrument or budgetary item from which they are funded.

A board chaired by the Commission is established for each Union trust fund to ensure a fair representation of the donors and to decide upon the use of the funds. The board includes a representative of each non-contributing Member State as an observer. The rules for the composition of the board and its internal rules shall be laid down in the constitutive agreement of the Union trust fund.

Union trust funds are established for a limited duration as determined in their constitutive agreement. That duration may be extended upon request of the board of the Union trust fund and upon presentation by the Commission of a report justifying the extension. The European Parliament and/or the Council may request the Commission to discontinue the appropriations for the Trust Fund or revise the constitutive act with a view to liquidate it.

The accounting officer of the Commission serves as the accounting officer of the Union

<sup>18</sup> It should be noted that due to the rounding of figures into thousands of euros, some financial data in the tables may appear not to add-up.

<sup>19</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union,

<sup>20</sup> Council regulation (EU) 2018/1877 of 26 November 2018 on the financial regulation applicable to the 11<sup>th</sup> European Development Fund, and repealing Regulation (EU) 2015/323

trust funds. The accounting officer is responsible for laying down accounting procedures and chart of accounts common to all Union trust funds. The Commission's internal auditor, OLAF and the Court of Auditors exercise the same powers over Union trust funds as they do in respect of other actions carried out by the Commission. The Union trust funds are also subject to an independent external audit every year.

### Current EU Trust Funds

To date, the Commission has set up four EUTFs:

- The **BÊKOU EUTF**, whose objective is to support all aspects of the Central African Republic's exit from crisis and its reconstruction efforts. Established on 15 July 2014;
- The **MADAD EUTF**, a European Union Regional Trust Fund in response to the Syrian crisis. Established on 15 December 2014;
- The **AFRICA EUTF**; a European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa. Established on 12 November 2015;
- The **COLOMBIA EUTF**; to support the implementation of the peace agreement in the early recovery and stabilisation post conflict. Established on 12 December 2016.

Further information is available on the websites of individual EUTFs:

### The Bêkou Trust Fund

The first multi-donor EU Trust Fund called Bêkou, which means 'hope' in Sango, was established on 15 July 2014, by the Commission (represented by DGs DEVCO and ECHO, and the EEAS) and three of its Member States (Germany, France and the Netherlands), with the aim of promoting the stabilisation and reconstruction of the Central African Republic (CAR). It has been established for a maximum duration of 60 months. The trust fund is managed from Brussels.

The Trust Fund Board and the Operational Committee of the Bêkou EU Trust Fund are composed of representatives of the donors, of the Commission and observers.

The Board adopts and reviews the strategy of the EUTF. The Board shall meet at least once a year.

The Operational Committee examines, approves and supervises the implementation of the actions financed by the Fund. The Committee also approves the annual accounts and the annual reports on the activities financed by the Trust Fund.

### Annual accounts of the Bêkou Trust Fund

According to Article 8 of the Agreement establishing the European Union Trust Fund for the Central African Republic, the 'Bêkou EU Trust Fund' and article 11.2.1 of the Constitutive agreement, the annual accounts comprise two parts: (1) The annual financial report prepared by the EUTF manager and (2) The annual financial statements prepared by the Commission's Accounting Officer, who is, based on the same article also the Accounting Officer of the trust fund.

According to Article 8 of the Constitutive agreement the financial statements shall be prepared in accordance with the accounting rules adopted by the Commission's Accounting Officer (EU Accounting Rules, EAR) that are based on the International Public Sector Accounting Standards (IPSAS).

The annual accounts are subject to independent external audit and the final annual accounts are submitted by the EUTF manager and the Accounting Officer to the Operational Committee for approval (Article 8.3.4(c)).

### Highlights of the year

The Bêkou EU Trust Fund (Bêkou EUTF) aims to ensure access to basic services, support economic recovery and job creation, and promote social cohesion and reconciliation. Since its creation, the Bêkou EUTF has adopted 16 programmes and has reached more than 2 million beneficiaries.

Despite the existence of a democratically elected government and its efforts to return to stability, the security situation in the CAR remains volatile. It is in this complex and fragile context, where the Bêkou EUTF takes full advantage of its comparative advantages of flexibility and adaptability to changing circumstances. Additionally, the Bêkou EUTF remains the only instrument building resilience for both the population and the state, in a true Linking Relief Rehabilitation and Development (LRRD) approach.

Given the current situation in CAR and in view of the expiration of the Bêkou EUTF in July 2019, in November 2018, the EUTF Board formally requested an extension of 18 months, thus bringing the total duration of the Bêkou EUTF from 60 months to 78 months. The official procedure, which includes a consultation of the European Parliament and the Council, was launched in December 2018.

The operational highlights of the 2018 are the following:

- The Bêkou EUTF adopted a new action for a total amount of EUR 35 million in the sector of health and increased by EUR 2 million each the budget of two already adopted actions in the sectors of economic recovery and promotion of social cohesion, dialogue and reconciliation.
- The Bêkou EUTF Results Framework was adopted, responding to the Court of Auditors' recommendation on the identification of SMART objectives at a EUTF level. This strategic tool will better demonstrate the overall results of the Bêkou EUTF actions.
- The Bêkou EUTF projects were marked by the relative stability in the north-eastern and south-western parts of the country that called for additional interventions, the localised conflicts in Bangui and the hinterland, as well as the redeployment of public officials outside Bangui.

On the financial side, by the end of 2018, pledges by EUTF contributors amounted to more than EUR 242 million. This is an increase of EUR 6 million compared to 2017. Only EUR 5 million out of these EUR 242 million remain to be certified.

In terms of contracts, the Bêkou EUTF signed 30 new contracts in 2018 for a total amount of nearly EUR 80 million (representing 48% of the total amount contracted since its creation). They contribute to the implementation of its programmes in the sectors of health, economic recovery, rural resilience and job creation, water and sanitation, reconciliation and opening-up of regions.

Last but not least, more than EUR 57 million (representing nearly 50% of the total amount paid since the creation of Bêkou EUTF) was paid in 2018 on top of payments made during previous years; total disbursements have nearly reached EUR 119 million since the creation of the Bêkou EUTF.

In the financial statements, the impact of the above mentioned activities are most visible when looking at:

- Pre-financing: an increase of EUR 24,839,000 resulting from the high number of new contracts signed and advances paid out;
- Cash and cash equivalents: a decrease of EUR 26,017,000 is mainly caused by the increased payments of pre-financing, highlighted above;
- Outstanding commitments not yet expensed: an increase from EUR 25,310,000 to EUR 54,645,000 due to the new contracts.

## **PROVISIONAL ANNUAL ACCOUNTS OF THE EUTF AFRICA 2018<sup>21</sup>**

### **BACKGROUND INFORMATION ON THE EUTF FOR AFRICA**

#### **General background on Union Trust Funds**

In accordance with Articles 234 and 235 of the Financial Regulation applicable to the general budget of the Union (EU FR)<sup>22</sup> and Article 35 of the Financial Regulation applicable to the 11<sup>th</sup> European Development Fund (EDF FR)<sup>23</sup>, the European Commission may establish Union trust funds for external actions ('Union trust funds'). The Union trust funds are constituted under an agreement concluded with other donors for emergency and post-emergency actions necessary to react to a crisis, or for thematic actions.

Union trust funds are established by the European Commission with a decision after consulting or approval of the European Parliament and the Council. This decision includes the constitutive agreement with other donors.

Union trust funds are only established and implemented subject to the following conditions:

- there is added value of the Union intervention: the objectives of Union trust funds, in particular by reason of their scale or potential effects, may be better achieved at Union level than at national level and the use of the existing financing instruments would not be sufficient to achieve policy objectives of the Union;
- Union trust funds bring clear political visibility for the Union and managerial advantages as well as better control by the Union of risks and disbursements of the Union and other donors' contributions;
- Union trust funds do not duplicate other existing funding channels or similar instruments without providing any additionality;
- the objectives of Union trust funds are aligned with the objectives of the Union instrument or budgetary item from which they are funded.

A board chaired by the Commission is established for each Union trust fund to ensure a fair representation of the donors and to decide upon the use of the funds. The board includes a representative of each non-contributing Member State as an observer. The rules for the composition of the board and its internal rules shall be laid down in the constitutive agreement of the Union trust fund.

Union trust funds are established for a limited duration as determined in their constitutive agreement. That duration may be extended upon request of the board of the Union trust fund and upon presentation by the Commission of a report justifying the extension. The European Parliament and/or the Council may request the Commission to discontinue the appropriations for the Trust Fund or revise the constitutive act with a view to liquidate it.

The accounting officer of the Commission serves as the accounting officer of the Union trust funds. The accounting officer is responsible for laying down accounting procedures and chart of accounts common to all Union trust funds. The Commission's internal auditor, OLAF and the Court of Auditors exercise the same powers over Union trust funds as they do in respect of other actions carried out by the Commission. The Union trust funds are also subject to an independent external audit every year.

## Current EU Trust Funds

To date, the Commission has set up four EUTFs:

- The **BÊKOU EUTF**, whose objective is to support all aspects of the Central African Republic's exit from crisis and its reconstruction efforts. Established on 15 July 2014;
- The **MADAD EUTF**, a European Union Regional Trust Fund in response to the Syrian crisis. Established on 15 December 2014;
- The **AFRICA EUTF**; a European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa. Established on 12 November 2015;
- The **COLOMBIA EUTF**; to support the implementation of the peace agreement in the early recovery and stabilisation post conflict. Established on 12 December 2016.

Further information is available on the websites of individual EUTFs:

## The EUTF for Africa

European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa ('EUTF Africa') was launched on 12 November 2015 during the Valletta Summit on Migration. The main objectives of this trust fund is to support all aspects of stability and contribute to better migration management as well as addressing the root causes of destabilisation, forced displacement and irregular migration, in particular by promoting resilience, economic and equal opportunities, security and development and addressing human rights abuses.

The trust fund operates in three main geographic areas, namely the Sahel region and Lake Chad area, the Horn of Africa and the North of Africa but also the neighbouring countries of the eligible countries may benefit, on a case by case basis, from the Trust fund's projects. The Trust Fund is established for a limited period, until 31 December 2020 in order to provide a short and medium-term response to the challenges of the regions. The trust fund is managed from Brussels.

The Trust Fund Board and the Operational Committee of the EUTF Africa are composed of representatives of the donors and of the Commission, as well as representatives of non-contributing EU Member States, authorities of eligible countries' and regional organisations as observers.

The Board establishes and reviews the strategy of the EUTF. The Board shall meet at least once a year.

The Operational Committee examines, approves and supervises the implementation of the actions financed by the Fund. The Committee also approves the annual accounts and the annual reports on the activities financed by the Trust Fund.

## Annual accounts of the EUTF for Africa

According to Article 7 of 'The agreement establishing the European Union emergency trust fund for stability and addressing root causes of irregular migration and displaced persons in Africa and its internal rules' ('Constitutive agreement') the annual accounts comprise two parts: (1) The annual financial report which is the responsibility of the EUTF manager and (2) The annual financial statements prepared by the EC Accounting Officer, who is, based on the same article, also the Accounting Officer of the trust fund.

According to Article 8 of the Constitutive agreement the financial statements shall be prepared in accordance with the accounting rules adopted by the Commission's Accounting Officer (EU Accounting Rules, EAR) that are based on the International Public Sector Accounting Standards (IPSAS).

The annual accounts are subject to independent external audit and the final annual accounts are submitted by the EUTF manager and the Accounting Officer to the Operational Committee for approval (Article 8.3.4(c)).

### Highlights of the year

As of 31 December 2018, resources pledged to the EUTF Africa amounted to approximately EUR 4.2 billion. This includes around EUR 3.7 billion from the European Development Fund (EDF) and EU financial instruments including the Development Cooperation Instrument (DCI), the European Neighbourhood Instrument (ENI), the Asylum, Migration and Integration Fund (AMIF) and funding from the Directorate-General for European Civil Protection and Humanitarian Aid Operations (DG ECHO), as well as EUR 489.5 million from EU Member States and other donors (Switzerland and Norway).

In the course of 2018, the overall resources of the EUTF Africa increased by EUR 902 million, including new pledges of EUR 674 million from the EDF and EUR 117 million from EU Budget. The EUTF Africa received 24 new pledges from EU Member States and other donors amounting to EUR 110 million (EUR 49 million to the Sahel and Lake Chad window, EUR 47 million to the North of Africa window and EUR 14 million to the Horn of Africa window). All pledges from EU Member States and other donors made in 2018 plus an outstanding pledge of 2017 were certified by the end of 2018. The conclusions of the European Council of 28 June 2018 called on the EU and its Member States to provide additional funding to the EUTF Africa. As a follow-up, the Commission adopted on 6 July a decision to transfer EUR 500 million from the 11<sup>th</sup> EDF reserve.

With regards the state of implementation of the EUTF Africa in the year 2018, 45 new programmes were adopted as well as 13 top-ups across the three regions including cross-window programmes (16 in the Sahel/Lake Chad, 26 in the Horn of Africa and 9 in the North of Africa and 7 cross-window). This brings, as of the end of 2018, the total number of programmes approved by Operational committees to 187 for a total of EUR 3,590 million. As of the end of 2018, contracts signed with implementing partners have reached 366, for an overall amount of EUR 2,461 million, of which EUR 949.3 million in new operational contracts for 2018 only. Modifications to old contracts bring the total operational contracted amount in 2018 to 959.9 million. The contracting rate as of the end of 2018 has improved compared to the contracting rate as of the end of 2017 (69% of signed contracts over approved funding as opposed to 62.9%).

In the course of 2018, the EUTF Africa has further intensified its efforts together with its African and European partners, to foster stability and contribute to improved migration management in the Sahel and Lake Chad, the Horn of Africa and the North of Africa regions. It continued addressing the root causes of destabilization, forced displacement and irregular migration, by promoting development and security. During its third year, the EUTF Africa has further demonstrated its added-value as a swift and effective implementation tool which facilitates political dialogue with partner countries, applies innovative approaches and produces concrete results by pooling together funding and expertise from a variety of stakeholders.

Through the EUTF Africa, over 5.3 million vulnerable people benefitted from basic services and food security and nutrition programmes. Over 150,000 people were reached by information campaigns on resilience-building practices and basic rights and 96,000 migrants, or potential migrants, were reached out by information campaign on migration and risks linked to irregular migration. Through the EU-IOM Initiative, the EUTF Africa

has supported 42,628 vulnerable migrants voluntary returns mostly from Libya (18,329) and Niger (17,226), and more than 58 000 vulnerable migrants were assisted upon return to their country of origin. Through the Better Migration Management programme in the Horn of Africa alone, the EUTF Africa has already assisted almost 11,000 migrants and forcibly displaced people and has trained nearly 1,600 persons on migration management.

In the financial statements, the impact of this increased activity and new contracts is most visible when looking at:

- Pre-financing: increased by EUR 52,157,000 as advances on the new contracts were paid out;
- Payables and accrued charges: increased by EUR 85,336,000 as more cost claims are processed but also more expenses must be accrued for;
- Expenses: increased from EUR 279,299,000 in 2017 to EUR 585,345,000 in 2018 as the Trust Fund is in its third year of existence and many more contracts are being implemented;
- Outstanding commitments not yet expensed increased from EUR 926,139,000 to EUR 1,308,886,000 due to the new contracts.

## EDF REPORT ON FINANCIAL IMPLEMENTATION - 2018

### INTRODUCTORY NOTE

#### Previous EDFs

- As the 6<sup>th</sup> EDF was closed in 2006 and the 7<sup>th</sup> EDF was closed in 2008, the annual accounts no longer contain implementation tables for these EDFs. However, implementation of the transferred balances can be found in the 9<sup>th</sup> EDF.
- As in past years, to ensure transparency in the presentation of the accounts for 2018, the tables set out separately for the 8<sup>th</sup> EDF the part used for Lomé Convention programming and the part used for programming under the Cotonou Agreement.
- In accordance with article 1(2)(b) of the Internal Agreement of the 9<sup>th</sup> EDF, balances and decommitments of previous EDFs have been transferred to the 9<sup>th</sup> EDF, and, during the life of the 9<sup>th</sup> EDF, have been committed as 9<sup>th</sup> EDF funds.
- In 2018 the Commission launched a special exercise for the closure of the remaining contracts under the 8<sup>th</sup> and 9<sup>th</sup> EDF. A final report on the financial implementation of the 8<sup>th</sup> EDF should be available by end 2019 (and on the 9<sup>th</sup> EDF by end 2020).

#### 11<sup>th</sup> EDF

The ACP-EC Partnership Agreement signed on 23 June 2000 in Cotonou by the Member States of the European Community and the States of Africa, the Caribbean and the Pacific (ACP States) entered into force on 1 April 2003. The Cotonou Agreement was amended twice, firstly by the agreement signed in Luxembourg on 25 June 2005, secondly by the agreement signed in Ouagadougou on 22 June 2010.

The EU Council Decision of 27 November 2001 (2001/822/EC) on the association of the overseas countries and territories (OCT) with the European Union entered into force on 2 December 2001. This Decision was amended on 19 March 2007 (Decision 2007/249/EC).

The Internal Agreement on the financing of Community aid under the multiannual financial framework for the period 2014-2020 in accordance with the revised Cotonou Agreement, adopted by the Representatives of the Governments of the Member States of the European Community on August 2013, entered into force on March 2015.

Under the Cotonou Agreement, the third period (2014-2020) of Community aid to the ACP States and OCTs is funded by the 11<sup>th</sup> EDF for an amount of EUR 30 506 million, of which:

- EUR 29,089 million is allocated to the ACP countries in accordance with Article 1.2(a) and Article 2(d) of the Internal Agreement, of which EUR 27,955 million is managed by the European Commission;
- EUR 364.5 million is allocated to the OCTs in accordance with Article 1.2(a) and Article 3.1 of the Internal Agreement, of which EUR 359.5 million is managed by the European Commission;
- EUR 1,052.5 million is for the Commission to finance the costs arising from the programming and implementation of 11<sup>th</sup> EDF resources, in accordance with Article 1.2(a) of the Internal Agreement.

#### ***Remaining funds on non-mobilisable performance reserves at 31/12/2018***

The amounts decommitted from projects under the 9<sup>th</sup> and previous EDFs are transferred to the performance reserve of the 10<sup>th</sup> EDF, with the exception of Stabex funds.

The decommitted funds from projects under the 10<sup>th</sup> EDF are transferred to the performance reserve of the 11<sup>th</sup> EDF.

During 2018, all decommitted funds from previous EDFs were transferred to the respective reserves.

In accordance with article 1.4 of the 11<sup>th</sup> EDF Internal Agreement and the Council Decision of 2 August 2016 (2016/1337), an amount of decommitted funds from the 10<sup>th</sup> EDF has been allocated for the purpose of replenishing the African Peace Facility for the period 2016-2018 up to a maximum of EUR 491,387,500 and up to EUR 16,387,500 for support of expenditure.

| non-mobilisable reserve from decommitted funds under the 8 <sup>th</sup> , and 9 <sup>th</sup> EDF | 156.5 |
| non-mobilisable reserve from decommitted funds under the 10 <sup>th</sup> EDF                      | 318.3 |
| Total available on non-mobilisable performance reserves at 31/12/2018                              | 474.8 |

### **EDF Co-financings**

Under the 10<sup>th</sup> and 11<sup>th</sup> EDF, transfer agreements for co-financings from Member States were signed, and commitment appropriations were opened for a total amount of EUR 241.9 million, while payment appropriations were opened for the cashed amounts totalling EUR 230.2 million.

The situation of co-financing appropriations at 31.12.2018 is shown in the table below:

*(EUR million)*

|                                        | Commitments appropriations | Payment appropriations |
|----------------------------------------|----------------------------|------------------------|
| Co-financing - A Envelope              | 211.5                      | 200.0                  |
| Co-financing - Intra ACP               | 23.3                       | 23.2                   |
| Co-financing – Administrative expenses | 7.1                        | 7.0                    |
|                                        | <b>241.9</b>               | <b>230.2</b>           |

The following tables, concerning the amounts decided, contracted and paid, show net figures. The tables presenting the situation by instrument are annexed.

| (Decrease) in treasury financial assets                                                            | 10    | -2,219,062                       | -1,084,149                       |
| Maturities of treasury financial assets                                                            | 10    | 2,026,659                        | 1,109,563                        |
| (Decrease) in shares and other variable yield securities                                           | 8     | -95,434                          | -62,660                          |
| Repayments/sales of shares and other variable yield securities                                     |       | 32,802                           | 44,568                           |
| (Increase) in other assets                                                                         |       | -4,214                           | -4,040                           |
| (Decrease)/increase in other liabilities                                                           |       | 31                               | -84                              |
| Increase in amounts payable to the European Investment Bank                                        |       | 2,168                            | 2,202                            |
| <b>Net cash flows used in/from operating activities</b>                                            |       | <b>-192,271</b>                  | <b>66,506</b>                    |
| <b>FINANCING ACTIVITIES</b>                                                                        |       |                                  |                                  |
| Contribution received from Member States                                                           | 17    | 230,000                          | 76,395                           |
| Amounts received from Member States with regard to interest subsidies and technical assistance     |       | 20,000                           | 60,000                           |
| Amounts paid on behalf of Member States with regard to interest subsidies and technical assistance |       | -35,641                          | -21,026                          |
| <b>Net cash flows from financing activities</b>                                                    |       | <b>214,359</b>                   | <b>115,369</b>                   |
| <b>Net increase in cash and cash equivalents</b>                                                   |       | <b>22,088</b>                    | <b>181,875</b>                   |
| <b>Summary statement of cash flows:</b>                                                            |       |                                  |                                  |
| Cash and cash equivalents at the beginning of financial year                                       |       | 549,169                          | 360,821                          |
| Net cash from:                                                                                     |       |                                  |                                  |
| Operating activities                                                                               |       | -192,271                         | 66,506                           |
| Financing activities                                                                               |       | 214,359                          | 115,369                          |
| Effects of exchange rate changes on cash and cash equivalents                                      |       | 2,561                            | 6,473                            |
| <b>Cash and cash equivalents at the end of financial year</b>                                      |       | <b>573,818</b>                   | <b>549,169</b>                   |
| <b>Cash and cash equivalents are composed of:</b>                                                  |       |                                  |                                  |
| Cash in hand                                                                                       | 5     | 51,936                           | 166,445                          |
| Term deposits (excluding accrued interest)                                                         | 5     | 521,882                          | 367,721                          |
| Commercial papers                                                                                  | 5     | -                                | 15,003                           |
|                                                                                                    |       | <b>573,818</b>                   | <b>549,169</b>                   |

## NOTES TO THE FINANCIAL STATEMENTS AS AT 31 DECEMBER 2018

### 1 General information

The Investment Facility ("the Facility" or "IF") has been established within the framework of the Cotonou Agreement (the "Agreement") on co-operation and development assistance negotiated between the African, Caribbean and Pacific Group of States (the "ACP States") and the European Union and its Member States on 23 June 2000, revised on 25 June 2005 and 22 June 2010.

The Facility is not a separate legal entity and the European Investment Bank ("EIB" or "the Bank") manages the contributions on behalf of the Member States ("Donors") in accordance with the terms of the Agreement and acts as an administrator of the Facility.

Financing under the Agreement is provided from EU Member States' budgets. EU Member States contribute with the amounts allocated to finance the IF and grants for the financing of the interest subsidies as provided for under the multi-annual financial frameworks (First Financial Protocol covering the period 2000 - 2007 and referred to as the 9<sup>th</sup> European Development Fund (EDF), Second Financial Protocol covering the period 2008 - 2013 and referred to as the 10<sup>th</sup> EDF and the Third Financial Protocol covering the period 2014 - 2020 referred to as the 11<sup>th</sup> EDF). The EIB is entrusted with the management of:

- the Facility, a EUR 3,685.5 million risk-bearing revolving fund geared to fostering private sector investment in ACP countries of which EUR 48.5 million are allocated to Overseas Countries and territories ("OCT countries");
- grants for the financing of interest subsidies worth max. EUR 1,220.85 million for ACP countries and max. EUR 8.5 million for OCT countries. Up to 15% of these subsidies can be used to fund project-related technical assistance ("TA").

The present financial statements cover the period from 1 January 2018 to 31 December 2018.

On a proposal from the Management Committee of EIB, the Board of Directors of EIB adopted the Financial Statements on 14 March 2019, and authorised their submission to the Board of Governors for approval by 26 April 2019.

### 2 Significant accounting policies

#### 2.1. Basis of preparation – Statement of compliance

The Facility's financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union.

#### 2.2. Significant accounting judgments and estimates

The preparation of financial statements requires the use of accounting estimates. It also requires the European Investment Bank's Management to exercise its judgment in the process of applying the Investment Facility's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed hereafter.

The most significant use of judgments and estimates are as follows:

#### Measurement of fair value of financial instruments

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or broker price quotations. Where the fair values cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is taken from observable markets where

possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The valuations are categorised into different levels in the fair value hierarchy based on the inputs used in the valuation techniques as described and disclosed in Notes 2.4.2 and 4.

### **Impairment losses on loans and advances**

The expected credit loss ('ECL') measurement requires management to apply significant judgments, in particular, the assessment of a significant increase in credit risk since initial recognition, the incorporation of forward looking information and further the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses. These estimates are driven by a number of factors, changes in which can result in significant changes to the timing and amount of allowance for credit loss to be recognized (Note 2.4.2).

### **Valuation of unquoted equity investments**

Valuation of unquoted equity investments is normally based on one of the following:

- recent arm's length market transactions;
- current fair value of another instrument that is substantially the same;
- the expected cash flows discounted at current rates applicable for items with similar terms and risk characteristics;
- adjusted net assets method; or
- other valuation models.

The determination of the cash flows and discount factors for unquoted equity investments requires significant estimation. The Facility calibrates the valuation techniques periodically and tests them for validity using either price from observable current market transactions in the same instrument or from other available observable market data.

### **Impairment of available-for-sale equity investments (applicable before 1 January 2018)**

The Facility treats available-for-sale equity investments as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires judgment. The Facility treats "significant" generally as 30% or more and "prolonged" greater than 12 months. In addition, the Facility evaluates other factors, including normal volatility in share price for quoted equities and the future cash flows and the discount factors for unquoted equities.

### **Consolidation of entities in which the Facility holds interest**

The Facility made significant judgements that none of the entities in which it holds interest, are controlled by the Facility. This is due to the fact that in all such entities, either the General Partner or the Fund Manager or the Management Board have the sole responsibility for the management and control of the activities and affairs of the partnership and have the power and authority to do all things necessary to carry out the purpose and objectives of the partnership complying with the investment and policy guidelines.

## **2.3. Changes in accounting policies**

Except for the changes below, the Facility has consistently applied the accounting policies set out in Note 2.4 to all periods presented in these financial statements. The Facility has adopted the following new standards and amendments to standards.

### **Standards adopted**

#### *IFRS 9 Financial Instruments*

The Facility has adopted IFRS 9 as issued by the IASB in July 2014 with a date of transition of 1<sup>st</sup> January 2018, which resulted in changes in accounting policies and adjustments to the amounts previously recognized in the financial statements. For more details refer to note 2.5.

As permitted by the transitional provisions of IFRS 9, the Facility elected not to restate comparative periods. Any adjustment to the carrying amounts of financial assets and liabilities resulting from the adoption of IFRS 9 were recognized in the reserve fund and the fair value reserve as of 1<sup>st</sup> January 2018. Accordingly, the information presented for 2017 under the applicability does not reflect the requirements of IFRS 9 and therefore is not comparable to the information presented for 2018 under IFRS 9.

#### *IFRS 15 Revenue from Contracts with Customers*

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaces existing revenue recognition guidance, including IAS 18 Revenue, IAS 11 Construction Contracts and IFRIC 13 Customer Loyalty Programmes.

The Facility adopted the standard using the modified retrospective approach which means that the cumulative impact of the adoption is recognised in retained earnings as of 1 January 2018 and the comparatives were not restated.

The application of IFRS 15, did not have a significant impact on the Facility's financial statements.

#### *IFRIC 22 Foreign currency transactions and advance consideration*

The Interpretation clarifies that, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine the date of the transactions for each payment or receipt of advance consideration.

This Interpretation adoption had no material impact on the Facility's financial statements.

#### *Annual Improvements to IFRSs 2014-2016 Cycle (Amendments to IAS 28)*

##### *Amendments to IAS 28 Investments in Associates and Joint Ventures - Clarification that measuring investees at fair value through profit or loss is an investment-by-investment choice*

The amendments clarify that an entity that is a venture capital organisation, or other qualifying entity, may elect, at initial recognition on an investment-by-investment basis, to measure its investments in associates and joint ventures at fair value through profit or loss. If an entity that is not itself an investment entity, has an interest in an associate or joint venture that is an investment entity, then it may, when applying the equity method, elect to retain the fair value measurement applied by that investment entity associate or joint venture to the investment entity associate's or joint venture's interests in subsidiaries. This election is made separately for each investment entity associate or joint venture, at the later of the date on which: (a) the investment entity associate or joint venture is initially recognised; (b) the associate or joint venture becomes an investment entity; and (c) the investment entity associate or joint venture first becomes a parent.

The Facility does not use have investment in in joint ventures. Therefore, there is no impact on the Facility's financial statements

## **Standards issued but not yet adopted**

### *IFRS 16 Leases*

IFRS 16 was issued in January 2016 and replaces the current guidance of IAS 17. It will result in almost all leases being recognised on the balance sheet, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exemptions are short-term and low-value leases. The accounting for lessors will not significantly change.

IFRS 16 has been endorsed by the EU on 31 October 2017 and is effective for annual reporting periods beginning on or after 1 January 2019, with early adoption permitted if IFRS 15 is applied.

The Facility expects that this change will have no material impact on the Facility's financial statements.

### **2.4. Summary of significant accounting policies**

The statement of financial position represents assets and liabilities in decreasing order of liquidity and does not distinguish between current and non-current items.

#### **2.4.1. Foreign currency translation**

The Facility uses the Euro (EUR) for presenting its financial statements, which is also the functional currency. Except as otherwise indicated, financial information presented in EUR has been rounded to the nearest thousand.

Foreign currency transactions are translated, at the exchange rate prevailing on the date of the transaction.

Monetary assets and liabilities denominated in currencies other than Euro are translated into Euro at the exchange rate prevailing at the statement of financial position date. The gain or loss arising from such translation is recorded in the statement of profit or loss and other comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of transactions at rates different from those at the date of the transaction, and unrealised foreign exchange differences on unsettled foreign currency monetary assets and liabilities, are recognised in the statement of profit or loss and other comprehensive income.

The elements of the statement of profit or loss and other comprehensive income are translated into Euro on the basis of the exchange rates prevailing at the date of the transaction.

#### **2.4.2. Financial assets other than derivatives**

Non-derivative financial instruments are initially recognised using the settlement date basis.

### **Classification and measurement**

#### *Financial assets - Policy applicable after 1 January 2018*

On initial recognition, a financial asset is classified as measured at amortized cost ("AC"), fair

value through other comprehensive income ("FVOCI") or fair value through P&L ("FVTPL") and a financial liability is classified as measured at AC or FVTPL.

Under IFRS 9, classification starts with determining whether the financial asset shall be considered as a debt or equity instrument. IFRS 9 refers to the definitions in IAS 32 Financial Instruments: Presentation.

Debt instruments are those instruments that meet the definition of a financial liability from the counterparty's perspective, such as loans, government and corporate bonds.

A debt instrument is classified at AC if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI criteria).

A debt instrument is classified at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and
- the contractual terms of the financial asset give rise on specific dates to cash flows that are fulfilling the SPPI criteria.

The above requirements should be applied to an entire financial asset, even if it contains an embedded derivative.

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Equity instruments are measured at FVTPL.

On initial recognition of an equity investment that is not held for trading, the Facility may irrevocably elect to present subsequent changes in other comprehensive income. This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

### *Business model assessment*

The EIB, as a manager of the Facility, makes an assessment of the objective of a business model in which a debt instrument is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Facility's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectation about future sales activity.

However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Facility stated objective for managing the financial assets is achieved and how cash flows are realised.

### *Solely payment of principal and interests ('SPPI') criteria*

For the purpose of this assessment, 'principal' is defined as the fair value of the debt instrument on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the contractual terms of the instrument are considered. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

### *Financial assets - Policy applicable before 1 January 2018*

The Facility classified its financial assets into one of the following categories:

- Loans and receivables ('L&R'),
- Held-to-maturity ('HTM'),
- Available-for-sale ('AFS'),
- at Fair Value through Profit or Loss ('FVTPL')

### *Derecognition*

The Facility derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or which the Facility neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset or financial liability (Note 2.4.4), the difference between the carrying amount of the asset or liability (or the carrying amount allocated to the portion of the asset or liability derecognised) and the sum of (i) the consideration received or paid and (ii) any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss except for the cumulative gains or losses recognised in other comprehensive income for equity investments measured at fair value through other comprehensive income which are transferred to the reserve fund rather than profit or loss on disposal.

### *Reclassification*

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Facility changes its business model for managing financial assets.

### *Measurement of fair values of financial instruments*

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Facility has access at that date.

When applicable, the EIB on behalf of the Facility measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

Where the fair values of financial assets and financial liabilities recorded on the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction.

These valuation techniques may include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist, Black-Scholes and polynomial option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Facility uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, like interest rate and currency swaps that use only observable market data and require limited management judgement and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange traded derivatives and simple over the counter derivatives like interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

For more complex instruments, the Facility uses own valuation models, which are developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Example of instruments involving significant unobservable inputs includes certain loans and guarantees for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of probability or counterparty default and prepayments and selection of appropriate discount rates.

The Facility measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- **Level 1:** inputs that are unadjusted quoted market prices in active markets for identical instruments to which the Facility has access.
- **Level 2:** inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- **Level 3:** inputs that are not observable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The Facility recognises transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

### ***Impairment on financial assets***

#### ***Impairment - policy applicable after 1 January 2018***

IFRS 9 replaces the 'incurred loss' model in IAS 39 with a forward-looking 'expected credit loss' ('ECL') model. This will require judgement to determine the underlying variable (PD, LGD, EAD) used in order to assess how changes in economic and other factors affect ECLs, which will be determined on a probability-weighted basis.

The new impairment model will apply to financial assets measured at AC, to financial guarantee contracts, as well as to off-balance sheet commitments.

Under IFRS 9, loss allowances will be measured on either of the following bases:

- 12-month ECL's: these are the ECLs that result from possible default events within the 12 months after the reporting date; and
- Lifetime ECLs: these are the ECLs that result from all possible default events over the expected life of a financial instrument.

The IFRS 9 Standard sets out a "three-stage" model for impairment based on changes in credit quality since initial recognition. Financial instruments are classified in Stage 1 except for those instruments for which significant increase in credit risk ('SICR') since initial recognition is identified. This includes both quantitative and qualitative information and analysis, based on the Bank's expertise, including forward-looking information.

Purchased or originated credit-impaired assets ('POCI') are the financial assets with exception to initial recognition of the ECLs as the POCI assets is always maintained in stage 3. For POCI financial assets, the cumulative changes in lifetime ECL since initial recognition are recognised in the statement of profit or loss.

The Facility's assessment of the Stage is based on a sequential approach which is consistent with the Credit Risk Guidelines ('CRG') and the Financial Monitoring Guidelines and Procedures ('FMGs'), notably covering watch list, internal rating and arrears.

If significant increase in credit risk has occurred, the financial instrument is moved to Stage 2 but is not yet deemed to be credit-impaired. If the financial instrument is credit-impaired, the financial instrument is then moved to Stage 3.

To identify Stage 3 exposures, the Facility determines whether or not there is objective evidence of default event. A financial asset is considered to be in default when the borrower is unlikely to pay its credit obligations to the Facility in full, without recourse by the Facility or the borrower is past due more than 90 days on any material credit obligation to the Facility.

In this respect, a financial asset is considered impaired when it is determined that it is probable that the Facility will not be able to collect all amounts due according to the original contractual terms or an equivalent value. Individual credit exposures are evaluated based upon the borrower's characteristics, overall financial condition, resources and payment record, the prospects for support from any financially responsible guarantors and, where applicable, the realisable value of any collateral.

All impaired claims are reviewed and analysed at least semi-annually. Any subsequent changes to the amounts and timing of the expected future cash flows compared to the prior estimates will result in a change in the provision for credit losses and be charged or credited to the income

statement. An allowance for impairment is reversed only when the credit quality has improved such that there is reasonable assurance of timely collection of principal and interest in accordance with the original contractual terms of the claim agreement. A write-off is made when all or part of a claim is deemed uncollectible or forgiven. Write-offs are charged against previously established impairments or directly to the income statement and reduce the principal amount of a claim. Recoveries in part or in full of amounts previously written off are credited to the income statement.

### *Measuring ECL – Inputs, Assumptions and Techniques*

Lifetime ECL measurement applies to stage 2 and stage 3 assets, while 12-month ECL measurement applies to stage 1 assets.

The expected credit losses were calculated based on the following variables:

- Probability of default (PD),
- Loss Given default (LGD),
- Exposure at default (EAD).

The probability of default represents the likelihood of a counterpart defaulting on its financial obligation, either over the next 12 months, or over the remaining lifetime of the obligation. PD is estimated at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures.

Ratings are primary input into the determination of the term structure of PD for exposures. The EIB collects performance and default information about the Facility's credit risk exposures. The collected data are segmented by type of industry and by type of region. Different industries and regions reacting in a homogenous manner to credit cycles are analysed together.

The EIB employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

The loss given default represents the EIB's expectation of the ratio of the loss on an exposure due to the default of a counterparty to the amount outstanding at default. Loss given default can be also defined as "1 - Recovery Rate". LGD estimates are determined mainly by geography and by type of counterparty, with five main exposure classes: Sovereigns, Public Institutions, Financial Institutions, Corporate and Project Finance. LGD values can be further adjusted based on the product and contract specific features of the exposure.

The EIB incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of expected credit losses.

### *Impairment - policy applicable before 1 January 2018*

The Facility assesses at each statement of financial position date whether there is any objective evidence that a financial asset is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter into bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For the loans outstanding at the end of the financial year and carried at amortised cost, impairments are made when presenting objective evidence of risks of non-recovery of all or part of their amounts according to the original contractual terms or the equivalent value. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the statement of profit or loss and other comprehensive income. Interest income continues to be accrued on the reduced carrying amount based on the effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account.

The Facility conducts the credit risk assessments based on each individual operation and does not consider a collective impairment.

For the available-for-sale financial assets, the Facility assesses at each statement of financial position date whether there is objective evidence that an investment is impaired. Objective evidence would include a significant or prolonged decline in the fair value of the investment below its costs. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of profit or loss and other comprehensive income) is removed from contributors' resources and recognised in the statement of profit or loss and other comprehensive income. Impairment losses on available-for-sale financial assets are not reversed through the statement of profit or loss and other comprehensive income; increases in their fair value after impairment are recognised directly in contributors' resources.

The European Investment Bank's Risk Management reviews financial assets for impairment at least once a year. Resulting adjustments include the unwinding of the discount in the statement of profit or loss and other comprehensive income over the life of the asset, and any adjustments required in respect of a reassessment of the initial impairment.

#### 2.4.2.1. Cash and cash equivalents

The Facility defines cash and cash equivalents as current accounts, short-term deposits or commercial papers with original maturities of three months or less. Cash and cash equivalents are carried at AC in the statement of financial position.

#### 2.4.2.2. Treasury financial assets

Treasury financial assets were presented as Held-to-maturity financial assets in the Investment Facility Financial Statements as at 31 December 2017.

Treasury financial assets comprise quoted and unquoted bonds with the intention of holding them to maturity, and commercial papers with original maturities of more than three months and are consequently classified at AC.

Those bonds and commercial papers are initially measured at cost, which is the fair value plus any directly attributable transaction cost. The difference between entry price and redemption value is amortised in accordance with the effective interest method over the remaining life of the instrument.

#### 2.4.2.3. Loans and advances

Loans and advances were presented as loans and receivables in the Investment Facility Financial

Statements as at 31 December 2017 and measured at amortised cost.

Loans and advances include:

- Loans and advances measured at AC
- Loans and advances mandatorily measured at FVTPL.

Loans originated by the Facility are recognised in the assets of the Facility when cash is advanced to borrowers. Undisbursed parts of loans are recorded in the off-balance at their nominal value.

Loans passing the SPPI test are initially recorded at cost (their net disbursed amounts), which is the fair value of the cash given to originate the loan, including any transaction costs, and are subsequently measured at AC using the effective interest rate method.

Loans not fulfilling the SPPI criterion are mandatorily measured at FVTPL.

The fair value measurement technique used is based on a discounted cash flow technique.

#### 2.4.2.4. [Shares and other variable yield securities](#)

Shares and other variable yield securities were presented as available-for-sale financial assets in the Investment Facility Financial Statements as at 31 December 2017.

There are two types of equity investments at the Facility: (i) direct equity investments and (ii) venture capital funds. The shares and other variable yield securities are initially recognised at fair value plus transactions costs. Subsequently changes in fair value, including foreign currency translation gains and losses, are recognised in the statement of profit or loss and other comprehensive income under the caption net result on shares and other variable yield securities.

For unquoted investment, when the fair value cannot be derived from active markets, the fair value is determined by applying recognised valuation techniques (Note 4.2.1).

The participations acquired by the Facility typically represent investments in private equity or venture capital funds. According to industry practice, such investments are generally investments jointly subscribed by a number of investors, none of whom is in a position to individually influence the daily operations and the investment activity of such fund. As a consequence, any membership by an investor in a governing body of such fund does not in principle entitle such investor to influence the day-to-day operations of the fund. In addition, individual investors in a private equity or a venture capital fund do not determine policies of a fund such as distribution policies on dividends or other distributions. Such decisions are typically taken by the management of a fund on the basis of the shareholders agreement governing the rights and obligations of the management and all shareholders of the fund. The shareholders' agreement also generally prevents individual investors from bilaterally executing material transactions with the fund, interchanging managerial personnel or obtaining privileged access to essential technical information. The Facility's investments are executed in line with the above stated industry practice, ensuring that the Facility neither controls nor exercises any form of significant influence within the meaning of IFRS 10 and IAS 28 over any of these investments, including those investments in which the Facility holds over 20 % of the voting rights.

#### 2.4.3. [Financial guarantees](#)

Financial guarantee contracts are contracts that require the Facility to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

**Under the existing rules, these guarantees do not meet the definition of an insurance contract (IFRS 4 Insurance Contracts).**

*Policy applicable after 1 January 2018*

Financial guarantees are accounted for under IFRS 9 – Financial Instruments, either as “Derivatives” or as “Financial Guarantees”, depending on their features and characteristics as defined by IFRS 9.

The accounting policy for derivatives is disclosed under Note 2.4.5.

Financial guarantees are initially recognised in the statement of financial position under “Provisions for guarantees issued” at fair value plus transaction costs that are directly attributable to the issuance of the financial guarantees. At initial recognition the obligation to pay corresponds to the Net Present Value (NPV) of expected premium inflows or the initial expected loss.

Subsequent to initial recognition, financial guarantees are measured at the higher of:

- The amount of the loss allowance as determined under IFRS 9; and
- The premium initially recognised less income recognised in accordance with the principles of IFRS 15.

Any increase or decrease in the net liability (as measured per IFRS 9) relating to financial guarantees other than the payment of guarantee calls is recognised in the statement of profit or loss and other comprehensive income under “Change in provisions for guarantees”.

The premium received is recognised in the statement of profit or loss and other comprehensive income in “Fee and commission income” on the basis of an amortisation schedule in accordance with IFRS 15 over the life of the financial guarantee.

In addition, when a guarantee agreement is signed, it is presented as a contingent liability for the Facility and when the guarantee is engaged, as a commitment for the Facility.

*Policy applicable before 1 January 2018*

At initial recognition, the financial guarantees are recognised at fair value corresponding to the Net Present Value (NPV) of expected premium inflows and initial expected loss. This calculation is performed at the starting date of each transaction and is recognised on the statement of financial position as “Financial guarantees” under “other assets” and “other liabilities”.

Subsequent to initial recognition, the Facility’s liabilities under such guarantees are measured at the higher of:

- the amount initially recognised less, where appropriate, cumulative amortisation recognised in accordance with IAS 18 Revenue and
- the best estimate of expenditure required to settle any present financial obligation arising as a result of the guarantee, in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets.

The best estimate of expenditure is determined in accordance with IAS 37. Financial guarantee provisions correspond to the cost of settling the obligation, which is the expected loss, estimated on the basis of all relevant factors and information existing at the statement of financial position date.

When a financial guarantee operation measured under IAS 39 is derecognised and treated under IAS 37, its value previously recorded under “Other liabilities” is transferred to the caption “Provisions for guarantees issued” on the statement of financial position.

The provision for financial guarantees (as measured per IAS 37) is recognised in the statement of profit or loss and other comprehensive income under "Change in provisions for guarantees".

#### 2.4.4. Financial liabilities other than derivatives

##### **Classification and measurement**

###### *Financial liabilities - Policy applicable after 1 January 2018*

A financial liability is measured at amortised cost except for financial liabilities that meet the definition of held for trading (e.g. derivative liabilities).

IFRS 9 largely retains the existing requirements in IAS 39 for the classification of financial liabilities and the Facility's financial liabilities are measured at AC under IAS 39 and IFRS 9 as well.

###### *Financial liabilities - Policy applicable before 1 January 2018*

The Facility classified its financial liabilities into one of the following categories:

- measured at amortised cost ('AC'),
- at fair value through profit or loss ('FVTPL'), and within this category as Held for trading ('HFT').

##### **Derecognition**

The Facility derecognises a financial liability when its contractual obligations are discharged, cancelled or expired.

#### 2.4.5. Derivative financial instruments

Derivative financial instruments include cross currency swaps, cross currency interest rate swaps, short term currency swaps ("FX swaps") and interest rate swaps.

Derivative financial instruments are initially recognised using the trade date basis.

In the normal course of its activity, the Facility may enter into swap contracts with a view to hedge specific lending operations or into currency forward contract with a view to hedge its currency positions, denominated in actively traded currencies other than the Euro, in order to offset any gain or loss caused by foreign exchange rate fluctuations.

All derivatives are measured at FVTPL and are reported as derivative financial instruments. Fair values are derived primarily from discounted cash-flow models, option-pricing models and from third party quotes.

Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivative financial instruments are shown in the statement of profit and loss and other comprehensive income under "Fair value change of derivative financial instruments".

Under IFRS 9, bifurcation requirements embedded derivatives have been eliminated for financial assets or financial liabilities and therefore, the hybrid contract is treated as a whole for classification of financial assets or financial liability accordingly.

#### 2.4.6. Contributions

Contributions from Member States are recognised as receivables in the statement of financial

position on the date of the Council Decision fixing the financial contribution to be paid by the Member States to the Facility.

The Member States contributions meet the following conditions and are consequently classified as equity:

- as defined in the contribution agreement, they entitle the Member States to decide on the utilisation of the Facility's net assets in the events of the Facility's liquidation;
- they are in the class of instruments that is subordinated to all other classes of instruments;
- all financial instruments in the class of instruments that are subordinated to all other classes of instruments have identical features;
- the instrument does not include any features that would require classification as a liability; and
- the total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Facility over the life of the instrument.

Contributions are classified and measured at AC in the financial statements.

#### 2.4.7. [Interest and similar income](#)

Interest on loans originated by the Facility is recorded in the statement of profit or loss and other comprehensive income ('Interest and similar income') and in the statement of financial position ('Loans and advances') on an accrual basis using the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the loan to the net carrying amount of the loan. Once the recorded value of a loan has been reduced due to impairment, interest income continues to be recognised using the original effective interest rate applied to the new carrying amount.

Interest on the POCI loans is recorded in the statement of profit or loss and other comprehensive income ('Interest and similar income') and in the statement of financial position ('Loans and advances') on an accrual basis using the credit- adjusted effective interest rate through the whole life of the loan, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the loan to the amortised cost of the loan.

Commitment fees are deferred and recognised in income using the effective interest method over the period from disbursement to repayment of the related loan, and are presented in the statement of profit or loss and other comprehensive income within interest and similar income.

#### 2.4.8. [Interest subsidies and technical assistance](#)

As part of its activity, the Facility manages interest subsidies and technical assistance on behalf of the Member States.

The part of the Member States contributions allocated to the payment of interest subsidies and TA is not accounted for in the Facility's contributors' resources but is classified as amounts owed to third parties. The Facility operates the disbursement to the final beneficiaries and then decreases the amounts owed to third parties.

When amounts contributed with regard to interest subsidies and TA are not fully granted, they are reclassified as contribution to the Facility.

#### 2.4.9. [Interest income on cash and cash equivalents](#)

Interest income on cash and cash equivalents is recognised in the statement of profit or loss and other comprehensive income of the Facility on an accrual basis.

#### 2.4.10. [Fees, commissions and dividends](#)

Fees received in respect of services provided over a period of time are recognised as income as the services are provided, while fees that are earned on the execution of a significant act are recognised as income when the significant act has been completed. These fees are presented in the statement of profit or loss and other comprehensive income within fee and commission income.

Dividends relating to shares and other variable yield securities are recognised when received and presented in the statement of profit or loss and other comprehensive income within net realised gains on shares and other variable yield securities.

#### 2.4.11. [Taxation](#)

The Protocol on the Privileges and Immunities of the European Union, appended to the treaty on the European Union and the treaty of the functioning of the European Union, stipulates that the assets, revenues and other property of the Institutions of the Union are exempt from all direct taxes.

## 2.5. Transition disclosures

The following table shows the original measurement categories under IAS 39 and the new measurement categories under IFRS 9 for the Facility's assets and liabilities as at 1 January 2018.

ASSETS in EUR '000

| Statement of financial position<br>as at 31 December 2017 | Measurement Category IAS 39                | Net carrying<br>amount | Measurement category IFRS 9                | Net carrying<br>amount | Statement of financial position<br>as from 1 January 2018 |
|-----------------------------------------------------------|--------------------------------------------|------------------------|--------------------------------------------|------------------------|-----------------------------------------------------------|
| 1. Cash and cash equivalents                              | L&R (Loans and receivables)                | 549,101                | AC (Amortised Cost)                        | 549,101                | 1. Cash and cash equivalents                              |
| 2. Amounts receivable from contributors                   | L&R (Loans and receivables)                | 150,000                | AC (Amortised Cost)                        | 150,000                | 2. Amounts receivable from contributors                   |

### 3 Risk Management

This note presents information about the Facility's exposure to and its management and control of credit and financial risks, in particular the primary risks associated with its use of financial instruments. These are:

- credit risk – the risk of loss resulting from client or counterparty default and arising on credit exposure in all forms, including settlement risk;
- liquidity risk – the risk that an entity is not able to fund increases in assets and meet obligations as they come due, without incurring unacceptable losses;
- market risk – the risk that changes in market prices and rates, such as interest rates, equity prices and foreign exchange rates will affect an entity's income or the value of its holdings in financial instruments.

#### 3.1. Risk management organisation

The European Investment Bank adapts its risk management on an ongoing basis.

The Risk Management of EIB independently identifies, assesses, monitors and reports the risks to which the Facility is exposed. Within a framework whereby the segregation of duties is preserved, the Risk Management is independent of the Front Offices. At EIB level the Director General of Risk Management reports for risk matters to the designated Vice-President for Risk Management. The designated Vice-President is responsible for overseeing risk reporting to the European Investment Bank's Management Committee and the Board of Directors.

#### 3.2. Credit risk

Credit risk is the potential loss that could result from client or counterparty default and arising on credit exposure in all forms, including settlement.

##### 3.2.1. Credit risk policy

In carrying out the credit analysis on loan counterparts, EIB assesses the credit risk and expected loss with a view to quantify and price the risk. EIB has developed an Internal Rating Methodology (IRM) to determine the Internal Ratings of its credit-relevant borrower/guarantor counterparts. The methodology is based on a system of scoring sheets tailored for each major credit counterpart type (e.g. Corporates, Banks, Public Sector Entities, etc). Taking into consideration both, Best Banking Practice and the principles set under the Basel International Capital Accord (Basel II), all counterparts that are material to

the credit profile of a specific transaction are classified into internal rating categories using the IRM for the specific counterpart type. Each counterpart is assigned an Internal Rating reflecting its probability of default foreign currency rating following an in-depth analysis of the counterpart's business and financial risk profile and its country risk operating context.

The credit assessment of project finance and other structured limited recourse operations is using credit risk tools relevant for the sector, focused mainly on cash flow availability and debt service capacity. These tools include the analysis of projects' contractual framework, counterpart's analysis and cash flow simulations. Similarly to corporates and financial institutions, each project is assigned an internal risk rating.

All Internal Ratings are monitored over loan life and periodically updated.

All non-sovereign (or non-sovereign guaranteed/assimilated) operations are subject to specific transaction-level and counterpart size limits. Counterpart limits are set at consolidated group exposure level, where applicable. Such limits typically reflect e.g. the size of counterparts own funds.

In order to mitigate credit risk the EIB uses, where appropriate and on a case by case basis, various credit enhancements which are:

- Counterparty or project related securities (e.g., pledge over the shares; pledge over the assets; assignment of rights; pledge over the accounts); or/and
- guarantees, generally provided by the sponsor of the financed project (e.g., completion guarantees, first demand guarantees) or bank guarantees.

The Facility does not use any credit derivatives to mitigate credit risk.

### 3.2.2. Maximum exposure to credit risk without taking into account any collateral and other credit enhancements

The following table shows the maximum exposure to credit risk for the components of the statement of financial position, including derivatives. The maximum exposure is shown gross, before the effect of mitigation through the use of collateral.

| Maximum exposure (in EUR'000)          | 31.12.2018       | 31.12.2017       |
|----------------------------------------|------------------|------------------|
| <b>ASSETS</b>                          |                  |                  |

| <b>Total credit exposure</b>           | <b>5,376,460</b> | <b>3,479,348</b> |

### 3.2.3. Credit risk on loans and advances

#### 3.2.3.1 Credit risk measurement for loans and advances

Each and every loan or guarantee undertaken by the Facility benefits from a comprehensive risk assessment and quantification of expected loss estimates that are reflected in a Loan Grading ("LG"). Operations under the IFE (as described in Note 24), with the exception of intermediated loans, are not subject to the Credit Risk Policy Guidelines and are subject to a different procedure. LGs are established according to generally accepted criteria, based on the quality of the borrower, the maturity of the loan, the guarantee and, where appropriate, the guarantor.

The loan grading (LG) system comprises the methodologies, processes, databases and IT systems supporting the assessment of credit risk in lending operations and the quantification of expected loss estimates. It summarises a large amount of information with the purpose of offering a relative ranking of loans' credit risks. LGs reflect the present value of the estimated level of the "expected loss", this being the product of the probability of default of the main obligors, the exposure at risk and the loss severity in the case of default. LGs are used for the following purposes:

- as an aid to a finer and more quantitative assessment of lending risks;
- as help in distributing monitoring efforts;
- as a description of the loan's portfolio quality at any given date;
- as one input in risk-pricing decisions based on the expected loss.

The following factors enter into the determination of an LG:

i) The borrower's creditworthiness: Risk Management independently reviews borrowers and assesses their creditworthiness based on internal methodologies and external data. In line with the Basel II Advanced Approach chosen, the Bank has developed an internal rating methodology (IRM) to determine the internal ratings of borrowers and guarantors. This is based on a set of scoring sheets specific to defined counterparty types.

ii) The default correlation: it quantifies the chances of simultaneous financial difficulties arising for both the borrower and the guarantor. The higher the correlation between the borrower and the guarantor's default probabilities, the lower the value of the guarantee and therefore the lower (worse) the LG.

iii) The value of guarantee instruments and of securities: this value is assessed on the basis of the combination of the issuer's creditworthiness and the type of instrument used.

iv) The applicable recovery rate: being the amount assumed to be recovered following a default by the relevant counterpart expressed as a percentage of the relevant loan exposure

v) The contractual framework: a sound contractual framework will add to the loan's quality and enhance its internal grading.

vi) The duration of the loan or, more generally, the cash-flows of the loan: all else being equal, the longer the loan, the higher the risk of incurring difficulties in the servicing of the loan .

A loan's expected loss is computed by combining the five elements discussed above. Depending on the level of this loss, a loan is assigned to one of the following LG classes listed below:

**"A"** Prime quality loans of which there are three sub-categories:

"A0" comprising loans to or guaranteed by an EU Member State which have an expected loss of 0% (based on the Bank's preferred creditor status and statutory protection which are deemed to assure a full recovery of the Bank's assets upon maturity).

"A+" comprising loans granted to (or guaranteed by) entities other than EU Member States in respect of which there is no expectation of deterioration in quality over their term.

"A-" includes those lending operations where there is some doubt about the maintenance of their current status but where any downside is expected to be limited.

**"B"** High quality loans: these represent an asset class with which the bank feels comfortable, although a minor deterioration is not ruled out in the future. B+ and B- are used to denote the relative likelihood of the possibility of such deterioration occurring.

**"C"** Good quality loans: an example could be unsecured loans to solid banks and corporates with a 7-year bullet, or equivalent amortising, maturity at disbursement.

**"D"** This rating class represents the borderline between "acceptable quality" loans and those that have experienced some difficulties. This watershed in loan grading is more precisely determined by the sub-classifications D+ and D-. Loans rated D- require heightened monitoring.

**"E"** This LG category includes loans with a risk profile greater than generally accepted. It also includes loans which in the course of their lives have experienced severe problems and their sliding into a situation of loss cannot be excluded. For this reason, the loans are subject to close and high monitoring. The sub-classes E+ and E- differentiate the intensity of this special monitoring process, with those operations graded E- being in a position where there is a strong possibility that debt service cannot be maintained on a timely basis and therefore some form of debt restructuring is required, possibly leading to an impairment loss.

**"F"** F (fail) denotes loans representing unacceptable risks. F- graded loans can only arise out of outstanding transactions that have experienced, after signature, unforeseen, exceptional and dramatic adverse circumstances. All operations where there is a loss of principal to the Facility are graded F and a specific provision is applied.

Generally, loans internally graded D- or below are placed on the Watch List. However, if a loan was originally approved with a risk profile of D- or weaker, it will only be placed on the Watch List as a result of a material credit event causing a further deterioration of its LG classification.

The table in section 3.2.3.3 shows the credit quality analysis of the Facility's loan portfolio based on the various LG classes as described above.

### 3.2.3.2 Analysis of lending credit risk exposure

The following table shows the maximum exposure (net of ECL) to credit risk on loans signed and disbursed by nature of borrower taking into account guarantees provided by guarantors:

*In EUR'000*

| At 31.12.2018               | Guaranteed     | Other credit enhancements | Not guaranteed   | Total            | % of Total  |
|-----------------------------|----------------|---------------------------|------------------|------------------|-------------|
| Banks                       | 88,263         | -                         | 856,484          | 944,747          | 61%         |
| Corporates                  | 147,551        | 45,820                    | 205,198          | 398,569          | 26%         |
| Public institutions         | 29,182         | -                         | -                | 29,182           | 2%          |

| <b>Signed not disbursed</b> | <b>89,597</b>  | <b>-</b>      | <b>780,386</b>   | <b>869,983</b>   |             |

Transaction Management and Restructuring Directorate is tasked with the responsibility of performing borrower and guarantor monitoring, as well as project-related financial and contractual monitoring. Thus, the creditworthiness of the Facility's loans, borrowers and guarantors are continually monitored, at least annually but more frequently on an as-needed basis and as a function of credit events taking place. In particular, Transaction Management and Restructuring Directorate reviews if contractual rights are met and, in case of a rating deterioration and/or contractual default, remedy action is taken. Mitigation measures are pursued, whenever necessary in accordance with the credit risk guidelines. Also, in case of renewals of bank guarantees received for its loans, it is ensured that these are replaced or action is taken in a timely manner.

### 3.2.3.3 Credit quality analysis per type of borrower

The tables below show the credit quality analysis of the Facility's loan portfolio as at 31 December 2018 and 31 December 2017 by the Loan Grading applications, based on the exposure signed (disbursed and un-disbursed):

*In EUR'000*

| At 31.12.2018 |                     | High Grade     | Standard Grade | Min. Accept. Risk | High Risk        | No grading    | Total            | % of Total  |
|---------------|---------------------|----------------|----------------|-------------------|------------------|---------------|------------------|-------------|
|               |                     | A to B-        | C              | D+                | D- and below     |               |                  |             |

### 3.2.3.4 Risk concentrations of loans and advances

#### 3.2.3.4.1 Geographical analysis

Based on the country of borrower, the Facility's loan portfolio can be analysed by the following geographical regions:

*In EUR'000*

| Country of borrower | 31.12.2018 | 31.12.2017 |
|---------------------|------------|------------|
| Kenya               | 233,269    | 331,891    |
| Nigeria             | 172,515    | 230,042    |
| Tanzania            | 124,718    | 116,093    |

| Country of borrower         | 31.12.2018       | 31.12.2017       |
|-----------------------------|------------------|------------------|
| Uganda                      | 81,766           | 169,869          |
| Burundi                     | 77,568           | 74,703           |
| Barbados                    | 74,638           | 25,124           |
| Egypt                       | 74,431           | -                |
| Jamaica                     | 72,165           | 85,728           |
| Congo (Democratic Republic) | 62,708           | 62,439           |
| Mauritius                   | 55,564           | 26,598           |
| Ethiopia                    | 55,215           | 51,719           |
| Dominican Republic          | 54,326           | 61,326           |
| Mauritania                  | 50,727           | 64,007           |
| Ghana                       | 39,246           | 49,895           |
| Togo                        | 30,634           | 45,574           |
| Rwanda                      | 28,704           | 38,555           |
| Malawi                      | 26,827           | 22,800           |
| Regional-ACP                | 24,335           | 751              |
| New Caledonia               | 21,124           | 21,670           |
| Angola                      | 20,651           | 14,850           |
| Cape Verde                  | 18,923           | 20,487           |
| Senegal                     | 18,330           | 13,881           |
| Zambia                      | 17,700           | 10,910           |
| French Polynesia            | 17,453           | 17,235           |
| Cameroon                    | 14,784           | 25,012           |
| Mozambique                  | 14,719           | 19,212           |
| Cayman Islands              | 13,213           | 14,958           |
| Niger                       | 9,655            | 5,631            |
| Botswana                    | 7,278            | 7,618            |
| Seychelles                  | 4,786            | 5,036            |
| Mali                        | 4,767            | 5,612            |
| Haiti                       | 4,748            | 6,006            |
| Burkina Faso                | 4,649            | 6,041            |
| Samoa                       | 3,986            | 5,100            |
| Vanuatu                     | 1,848            | 2,162            |
| Liberia                     | 1,153            | 1,553            |
| Palau                       | 1,107            | 1,384            |

| Congo                       | -                | 1,730            |
| Tonga                       | -                | 31               |
| <b>Total</b>                | <b>1,540,991</b> | <b>1,666,725</b> |

#### 3.2.3.4.2 Industry sector analysis

The table below analyses the Facility's loan portfolio by industry sector of the borrower. Operations which are first disbursed to a financial intermediary before being disbursed to the final beneficiary are reported under global loans (in EUR'000):

| In EUR'000                                  |            |            |
|---------------------------------------------|------------|------------|
| Industry sector of borrower                 | 31.12.2018 | 31.12.2017 |
| Tertiary and other                          | 957,602    | 991,282    |
| Urban development, renovation and transport | 192,400    | 194,101    |
| Electricity, coal and others                | 181,317    | 290,364    |
| Basic material and mining                   | 45,820     | 59,462     |
| Materials processing, construction          | 33,144     | 2,194      |
| Roads and motorways                         | 32,043     | 40,960     |
| Airports and air traffic management systems | 29,182     | 30,882     |
| Telecommunications                          | 26,095     | 20,310     |

| Industry sector of borrower                 | 31.12.2018       | 31.12.2017       |
|---------------------------------------------|------------------|------------------|
| Chemicals, plastics and pharmaceuticals     | 20,436           | -                |
| Food chain                                  | 15,386           | 15,586           |
| Waste recuperation                          | 7,564            | 8,018            |
| Social infrastructure, education and health | 2                | 1,100            |

| <b>Total</b>                                | <b>1,540,991</b> | <b>1,666,725</b> |

### 3.2.3.5 Credit risk exposure for each internal risk rating

The Facility uses an internal rating methodology in line with the Internal ratings based approach under Basel III. The majority of the Facility's counterparties have been assigned an internal rating according to this methodology. The table below shows a breakdown of the Facility's loan portfolio by the better of the borrower's or guarantor's internal ratings, where available. In cases where an internal rating is not available, the external rating has been used for this analysis.

The table shows both the exposures signed (disbursed and undisbursed) and the risk-weighted exposures, based on an internal methodology that the Facility uses for limit management.

(\*) agency agreements for which at reporting date there is no underlying counterpart

The Facility continually monitors events affecting its borrowers and guarantors, especially banks. In particular, the Facility is assessing on a case-by-case basis its contractual rights in case of rating deterioration and is seeking mitigating measures. It is also closely following the renewals of bank guarantees received for its loans to ensure that these are replaced or action is taken in a timely manner if need be.

### 3.2.3.6 Arrears on loans and impairments

Amounts in arrears are identified, monitored and reported according to the procedures defined into the bank wide "Finance Monitoring Guidelines and Procedures". These procedures are in line with best banking practices and are adopted for all loans managed by the EIB.

The monitoring process is structured in order to make sure that (i) potential arrears are detected and reported to the services in charge with minimum delay; (ii) critical cases are promptly escalated to the right operational and decision level; (iii) regular reporting to EIB management and to Member States is provided on the overall status of arrears and on the recovery measures already taken or to be taken.

The arrears and impairments on loans can be analysed as follows (in EUR'000):

*In EUR'000*

|                                                              | Loans and advances | Loans and receivables |

### 3.2.3.7 Loan renegotiation and forbearance

The Facility considers loans to be forborne if in response to adverse changes in the financial position of a borrower the Facility renegotiates the original terms of the contractual arrangements with this borrower affecting directly the future cash flows of the financial instrument, which may result in a loss to the Facility. However, the financial impact of restructuring activities is in general limited to impairment losses, if any, as financial neutrality is generally applied by the Facility and reflected in the renegotiated pricing conditions of the operations restructured.

In the normal course of business, the Loan Grading (LG) of the loans in question would have deteriorated and the loan would have been included in the Watch List before renegotiation. Once renegotiated, the Facility will continue to closely monitor these loans. If the renegotiated payment terms will not recover the original carrying amount of the asset, it will be considered as impaired. The corresponding impairment losses will be calculated based on the forecasted cash flows discounted at the original effective interest rate. The need for impairment for all loans whose LG deteriorated to E- is assessed regularly; all loans with a LG of F require impairment. Once the Loan Grading of a loan has improved sufficiently, it will be removed from the Watch List in line with the procedures of the Facility.

Forbearance measures and practices undertaken by the Bank's restructuring team during the

reporting period includes extension of maturity, deferral of capital only, deferral of capital and interest and capitalisation of arrears. Such forbearance measures do not lead to the derecognition of the underlying operation unless the impact of the contractual changes on the net present value of the loan at the date of restructuring is considered significant. If such newly recognised financial asset is credit-impaired, it would meet the definition of the POCI financial asset.

Exposures subject to changes in contractual terms which do not affect future cash flows, such as collateral or other security arrangements or the waiver of contractual rights under covenants, are not considered as forbore and hence those events are not considered as sufficient to indicate impairment on their own.

Operations subject to forbearance measures are reported as such in the table below:

*In EUR'000*

|                                                                         | 31.12.2018 | 31.12.2017 |

(1) Decreases are explained by repayments of capital occurred during the year on operations already considered as forbore as of 31 December 2018 and by termination of forbore measures during the year.

### 3.2.4. Credit risk on cash and cash equivalents

Available funds are invested in accordance with the Facility's schedule of contractual disbursement obligations. As of 31 December 2018 and 31 December 2017, investments were in the form of bank deposits, certificates of deposit and commercial papers.

The authorized entities have a rating similar to the short-term and long-term ratings required for the EIB's own treasury placements. In case of different ratings being granted by more than one credit rating agency, the lowest rating governs. The maximum authorized limit for each authorised bank is currently EUR 50,000,000 (fifty million euro). An exception to this rule has been granted to Societe Generale where the Facility has its operational cash accounts. The short term credit limit for Societe Generale as at 31 December 2018 and 31 December 2017 amounts to EUR 110,000,000 (one hundred and ten million euro). The increased limit applies to the sum of the cash held at the operational cash accounts and the instruments issued by this counterpart and held by the treasury portfolio.

All investments have been done with authorised entities with a maximum tenor of three months from value date. All credit exposure limit breaches have been reported to the mandators. As at 31 December 2018 all term deposits, commercial papers and cash in hand held by the treasury portfolio of the Facility had a minimum rating of at least P-2 (Moody's equivalent) at settlement day. As at 31 December 2017 all term deposits, commercial papers and cash in hand held by the treasury portfolio of the Facility had a minimum rating of P-1 (Moody's equivalent) at settlement day.

The following table shows the situation of cash and cash equivalents including accrued interest:

*In EUR'000*

| Minimum short-term rating | Minimum long-term rating | 31.12.2018     |             | 31.12.2017     |             |
|---------------------------|--------------------------|----------------|-------------|----------------|-------------|

### 3.2.5. Credit risk on derivatives

#### 3.2.5.1. Credit risk policy of derivatives

The credit risk with respect to derivatives is represented by the loss which a given party would incur where the other counterparty to the deal would be unable to honour its contractual obligations. The credit risk associated with derivatives varies according to a number of factors (such as interest and exchange rates) and generally corresponds to only a small portion of their notional value.

In the normal course of its activity, the Facility may enter into swap contracts with a view to hedge specific lending operations or into currency forward contracts, with a view to hedge its currency positions denominated in actively traded currencies other than the Euro. All the swaps are executed by the European Investment Bank with an external counterpart. The swaps are arranged by the same Master Swap Agreements and Credit Support Annexes signed between the European Investment Bank and its external counterparts.

#### 3.2.5.2. Credit risk measurement for derivatives

All the swaps executed by the European Investment Bank that are related to the Facility are treated within the same contractual framework and methodologies applied for the derivatives negotiated by the European Investment Bank for its own purposes. In particular, eligibility of swap counterparts is determined by the European Investment Bank based on the same eligibility conditions applied for its general swap purposes.

The European Investment Bank measures the credit risk exposure related to swaps and derivatives transactions using the Net Market Exposure ("NME") and Potential Future Exposure ("PFE") approach for reporting and limit monitoring. The NME and the PFE fully include the derivatives related to the Investment Facility.

The following table shows the maturities of cross currency interest rate swaps, sub-divided according to their notional amount and fair value:

*In EUR'000*

| Swap contracts at 31.12.2018 | less than 1 year | 1 year to 5 years | 5 years to 10 years | more than to 10 years | Total 2018 |
|------------------------------|------------------|-------------------|---------------------|-----------------------|------------|
| Notional amount              | -                | 5,245             | -                   | -                     | 5,245      |
| Fair Value (i.e. net)        | -                | -325              | -                   | -                     | -325       |
| Swap contracts at 31.12.2017 | less than 1 year | 1 year to 5 years | 5 years to 10 years | more than to 10 years | Total 2017 |
| Notional amount              | -                | 8,098             | -                   | -                     | 8,098      |
| Fair Value (i.e. net)        | -                | -955              | -                   | -                     | -955       |

- The Facility enters into foreign exchange short term currency swaps ("FX swaps") contracts in order to hedge currency risk on loan disbursements in currencies other than

EUR. FX swaps have a maturity of maximum three months and are regularly rolled-over. The notional amount of FX swaps stood at EUR 1,460.6 million at 31 December 2018 against EUR 1,500 million at 31 December 2017. The fair value of FX swaps amounts to EUR 1.1 million at 31 December 2018 against EUR 12 million at 31 December 2017.

- The Facility enters into interest rate swap contracts in order to hedge the interest rate risk on loans disbursed. As at 31 December 2018 there are two interest rate swaps outstanding with a notional amount of EUR 28.5 million (2017: EUR 31.7 million) and a fair value of EUR 0.7 million (2017: EUR 0.3 million).

### 3.2.6. [Credit risk on treasury financial assets](#)

The following table shows the situation of the treasury portfolio entirely composed of commercial papers issued by sub-sovereigns, banks and non-bank entities with remaining maturities of up to three months. EU Member States, their agencies, banks and non-bank entities are eligible issuers. The maximum authorized limit for each authorised issuer is EUR 50,000,000 (fifty million euro). Investments in medium and long-term bonds could also be eligible, according to the investment guidelines and depending on liquidity requirements:

| Minimum short-term rating<br>(Moody's term) | Minimum long-term rating<br>(Moody's term) | 31.12.2018 |     | 31.12.2017 |     |
|---------------------------------------------|--------------------------------------------|------------|-----|------------|-----|
| P-1                                         | Aa2                                        | 80,041     | 24% | -          | 0%  |
| P-1                                         | Aa3                                        | 95,055     | 29% | -          | 0%  |
| P-1                                         | A1                                         | 15,005     | 4%  | -          | 0%  |

| NP                                          | Ba1                                        | -          | 0%  | 50,029     | 35% |

## 3.3. *Liquidity risk*

Liquidity risk refers to an entity's ability to fund increases in assets and meet obligations as they come due, without incurring unacceptable losses. It can be split into funding liquidity risk and market liquidity risk. Funding liquidity risk is the risk that an entity will not be able to meet efficiently both expected and unexpected current and future cash flow needs without affecting its daily operations or its financial condition. Market liquidity risk is the risk that an entity cannot easily offset or eliminate a position at the market price because of inadequate market depth or market disruption.

### 3.3.1. [Liquidity risk management](#)

The Facility is primarily funded by annual contributions from Member States as well as by reflows stemming from the Facility's operations. The Facility manages its funding liquidity risk primarily by planning of its net liquidity needs and the required Member States annual contributions.

In order to calculate Member States' annual contributions, disbursement patterns of the existing and pipelined portfolio is analysed and followed up throughout the year. Special events, such as early reimbursements, sales of shares or default cases are taken into account to correct annual liquidity requirements.

To further minimize the liquidity risk, the Facility maintains a liquidity reserve sufficient to cover at any point in time forecasted cash disbursements, as communicated periodically by

EIB's Lending Department. Funds are invested on the money market and bond markets in the form of interbank deposits and other short term financial instruments by taking into consideration the Facility's cash disbursement obligations. The Facility's liquid assets are managed by the Bank's Treasury Department with a view to maintain appropriate liquidity to enable the Facility to meet its obligations.

In accordance with the principle of segregation of duties between the Front and Back Office, settlement operations related to the investment of these assets are under the responsibility of the EIB's Planning and Settlement of Operations Department. Furthermore, the authorisation of counterparts and limits for treasury investments, as well as the monitoring of such limits, are the responsibility of the Bank's Risk Management Directorate.

### 3.3.2. Liquidity risk measurement

The tables in this section analyse the financial liabilities of the Facility by maturity on the basis of the period remaining between the balance sheet date and the contractual maturity date (based on undiscounted cash flows).

In terms of non-derivative financial liabilities, the Facility holds commitments in form of un-disbursed portions of the credit under signed loan agreements, of un-disbursed portions of signed capital subscription/investment agreements, of loan guarantees granted, or of committed interest subsidies and TA.

Loans under the IF have a disbursement deadline. However, disbursements are made at times and in amounts reflecting the progress of underlying investment projects. Moreover, the IF's loans are transactions performed in a relatively volatile operating environment, hence their disbursement schedule is subject to a significant degree of uncertainty.

Capital investments become due when and as soon as equity fund managers issue valid calls for capital, reflecting the progress in their investment activities. The drawdown period is usually of 3 years, with frequent prolongation by one or two years. Some disbursement commitments usually survive the end of the drawdown period until full disposal of the fund's underlying investments, as the fund's liquidity may be insufficient from time to time to meet payment obligations arising in respect of fees or other expenses.

Guarantees are not subject to specific disbursement commitments unless a guarantee is called. The amount of guarantees outstanding is reduced alongside the repayment schedule of guaranteed loans.

Committed interest subsidies' cash outflows occur in the case of subsidized loans financed by the Bank's own resources. Therefore, reported outflows represent only commitments related to these loans rather than the total amount of committed un-disbursed interest subsidies. As in the case of loans, their disbursement schedule is uncertain.

Committed TA "gross nominal outflow" in the "Maturity profile of non-derivative financial liabilities" table refers to the total un-disbursed portion of signed TA contracts. The disbursement time pattern is subject to a significant degree of uncertainty. Cash outflows classified in the "3 months or less" bucket represent the amount of outstanding invoices received by the reporting date.

Commitments for non-derivative financial liabilities for which there is no defined contractual maturity date are classified under "Maturity Undefined". Commitments, for which there is a recorded cash disbursement request at the reporting date, are classified under the relevant time bucket.

In terms of derivative financial liabilities, the maturity profile represents the contractual undiscounted gross cash flows of swap contracts including cross currency swaps (CCS), cross

currency interest rate swaps (CCIRS), short term currency swaps and interest rate swaps.

*In EUR'000*

| Maturity profile of non-derivative financial liabilities as at 31.12.2018 | 3 months or less | More than 3 months to 1 year | More than 1 year to 5 years | More than 5 years | Maturity Undefined | Gross nominal outflow |
|---------------------------------------------------------------------------|------------------|------------------------------|-----------------------------|-------------------|--------------------|-----------------------|

### 3.4. **Market risk**

Market risk represents the risk that changes in market prices and rates, such as interest rates, equity prices and foreign exchange rates will affect an entity's income or the value of its holdings in financial instruments.

#### 3.4.1. Interest rate risk

Interest rate risk arises from the volatility in the economic value of, or in the income derived from, interest rate bearing positions due to adverse movements in interest rates.

The Facility is not directly impacted by the fluctuation of its economic value or to pricing mismatches between different assets, liabilities and hedge instruments because (i) it does not have any direct borrowing costs or interest rate bearing liabilities and (ii) it accepts the impact of interest rate fluctuations on the revenues from its investments.

The Facility measures the sensitivity of its loan portfolio and micro hedging swaps to interest rate fluctuations via a Basis Point Value (BPV) calculation.

The BPV measures the gain or loss in the net present value of the relevant portfolio, due to a 1 basis point (0.01%) increase in interest rates tenors ranging within a specified time bucket "money market – up to one year", "very short – 2 to 3 years", "short – 4 to 6 years", "medium – 7 to 11 years", "long – 12 to 20 years" or "extra-long – more than 21 years".

To determine the net present value (NPV) of the loans' cash flows denominated in EUR, the Facility uses the EIB's EUR base funding curve (EUR swap curve adjusted with EIB's global funding spread). The EIB's USD funding curve is used for the calculation of the NPV of loan's cash flows denominated in USD. The NPV of the loans' cash flows denominated in currencies for which a reliable and sufficiently complete discount curve is not available, is determined by using EIB's EUR base funding curve as a proxy.

To calculate the net present value of the micro hedging swaps, the facility uses the EUR swap curve for cash flows denominated in EUR and the USD swap curve for cash flows denominated in USD.

As shown in the following table the net present value of the loan portfolio including related micro-hedging swaps as at 31 December 2018 would decrease by EUR 483k (as at 31 December 2017: decrease by EUR 488,000) if all relevant interest rates curves are simultaneously shifted upwards in parallel by 1 basis point.

*In EUR'000*

| Basis point value                                  | Money Market | Very Short   | Short        | Medium        | Long           | Extra Long | Total |

### 3.4.2. Foreign exchange risk

Foreign exchange ("FX") risk for the IF is the risk of loss in earnings or economic value due to adverse movements of FX rates.

Given a reference accounting currency (EUR for the IF), the Facility is exposed to FX risk whenever there is a mismatch between assets and liabilities denominated in a non-reference accounting currency. FX risk also includes the effect of changes in the value of future cash flows denominated in non-reference accounting currency, e.g. interest and dividend payments, due to fluctuations in exchange rates.

#### 3.4.2.1. Foreign exchange risk and treasury assets

The IF's treasury assets are denominated either in EUR or USD.

FX risk is hedged by means of FX cross currency spot or forward transactions, FX swaps or cross-currency swaps. The EIB's Treasury Department can, where deemed necessary and appropriate, use any other instrument, in line with the Bank's policy, that provide protection against market risks incurred in connection with the IF's financial activities.

#### 3.4.2.2. Foreign exchange risk and operations financed or guaranteed by the IF

Member States' IF contributions are received in EUR. The operations financed or guaranteed by the IF as well as interest subsidies can be denominated in EUR, USD or any other authorized currency.

A foreign exchange risk exposure (against the EUR reference currency) arises whenever transactions denominated in currencies other than the EUR are left un-hedged. The IF's foreign exchange risk hedging guidelines are set out below.

##### 3.4.2.2.1. Hedging of operations denominated in USD

The FX risk generated by IF operations denominated in USD shall be covered on an aggregated basis via the use of USD/EUR FX swaps, rolled over and adjusted in terms of amount on a periodic basis. The use of FX swaps serves a dual purpose. On one side the necessary liquidity for new disbursements (loans and equity) is generated and on the other side an FX macro hedging is maintained.

At the beginning of each period, the cash flows to be received or paid in USD during the next period shall be estimated on the basis of planned or expected reflows/disbursements. Subsequently, the maturing FX swaps shall be rolled over, their amount being adjusted to cover at least the USD liquidity needs projected over the next period.

- On a monthly basis, the USD FX position shall be hedged, if exceeding the relevant limits, by means of a spot or forward operation.
- Within a roll-over period, unexpected USD liquidity deficits shall be covered by means of ad hoc FX swap operations while liquidity surpluses shall either be invested in treasury assets or converted into EUR if occurred from an increase of the FX position.

#### 3.4.2.2.2. Hedging of operations denominated in currencies other than EUR or USD

- IF operations denominated in currencies other than EUR and USD shall be hedged through cross-currency swap contracts with the same financial profile as the underlying Loan, provided that a swap market is operational.
- IF has operations denominated in currencies for which hedging possibilities are either not efficiently available or available at a high cost. These operations are denominated in local currencies (LCs) but settled in EUR or USD. IF's financial risk framework, which was approved by the IF Committee on 22 January 2015, offers the possibility to hedge the FX exposure in LCs that exhibit a significant positive correlation with the USD synthetically via USD-denominated derivatives. The LCs hedged synthetically with USD denominated derivatives are reported in the table in section 3.4.2.2.3 below under item "Local currencies (under synthetic hedge)", while the LCs not hedged synthetically with the USD are reported in the same table under item "Local currencies (not under synthetic hedge)".

#### 3.4.2.2.3. Foreign exchange position (in EUR'000)

The tables of this note show the Facility's foreign exchange position.

The foreign exchange position is presented in the tables below in accordance with the IF's Risk Policies (as described in the IF's financial risk framework). The FX position as per Risk Policies is based on accounting figures and defined as the balance between selected assets and liabilities. The assets and liabilities defined in the FX position as per Risk Policies are selected so as to ensure that the earnings will only be converted into the reporting currency (EUR) when received.

##### *Policy applicable before 1 January 2018*

The unrealised gains/losses and impairment on available-for sale financial assets (IAS 39) are included in the FX position as per Risk Policies, as well as impairments on loans and receivables. Derivatives included in the FX position as per Risk Policies are considered at their nominal value instead of their fair value, in order to be aligned with the retained value of the assets, considered also at their nominal value adjusted by the impairment for loans.

##### *Policy applicable after 1 January 2018*

The fair value change on shares and other variable yield securities are included in the FX position as per Risk Policies, as well as impairments on loans and advances. Derivatives included in the FX position as per Risk Policies are considered at their nominal value instead of their fair value, in order to be aligned with the retained value of the assets, considered also at their nominal value adjusted by the impairment for loans.

In the tables below is the remaining part of the assets and liabilities, which includes mainly interest accruals on loans, derivatives and subsidies, is presented as "FX position excluded from Risk Policies".

| At 31 December 2018                                          |                                  | Assets and liabilities                  |                           | Commitments and contingent liabilities |

### 3.4.2.3. Foreign exchange sensitivity analysis

As at 31 December 2018 a 10 percent depreciation of EUR versus all non EUR currencies would result in an increase of the contributors' resources amounting to EUR 8.8 million (31 December 2017: EUR 16.6 million). A 10 percent appreciation of the EUR versus all non EUR currencies would result in a decrease of the contributors' resources amounting to EUR 7.2 million (31 December 2017: EUR 13.6 million).

### 3.4.2.4. Conversion rates

The following conversion rates were used for establishing the balance sheet at 31 December 2018 and 31 December 2017:

|                                                                                                    | 31 December 2018 | 31 December 2017 |

### 3.4.3. Equity price risk

Equity price risk refers to the risk that the fair values of equity investments decrease as the result of changes in the levels of equity prices and/or the value of equity investments.

The IF is exposed to equity price risk via its investments in direct equity and venture capital funds.

The value of non-listed equity positions is not readily available for the purpose of monitoring and control on a continuous basis. For such positions, the best indications available include prices derived from any relevant valuation techniques.

The effects on the Facility's contributors' resources (as a result of a change in the fair value of the equity instruments portfolio) due to a +/- 10% change in the value of individual direct equity and venture capital investments, with all other variables held constant, is EUR 56.7 million respectively EUR -56.7 million as at 31 December 2018 (EUR 49.8 million respectively EUR -49.8 million as at 31 December 2017).

## 4. Fair values of financial instruments

### 4.1. Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. These do not include fair value information for financial assets and financial liabilities not carried at fair value if the carrying amount is a reasonable approximation of fair value.

In EUR'000

| At 31 December 2018                                        | Carrying amount  |                                            |                          |                           |                             |                  | Fair value     |                  |                |                  |

## 4.2. Measurement of fair values

### 4.2.1. Valuation techniques and significant unobservable inputs

The table below sets out information about the valuation techniques and significant unobservable inputs used in measuring financial instruments, categorised as level 2 and 3 in the fair value hierarchy:

| Valuation technique                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Relationship of unobservable inputs to fair value measurement                                                                                                                                                                                                                                                                                           |                                                                                                                                                        |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Financial instruments carried at fair value     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Significant unobservable inputs                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                        |
| Derivative financial instruments                | Discounted cash flow: Future cash flows are estimated based on forward exchange/interest rates (from observable forward exchange rates and yield curves at the end of the reporting period) and contract forward/interest rates, discounted at a rate that reflects the credit risk of various counterparties.                                                                                                                                                                                                                                                                           | Not applicable.                                                                                                                                                                                                                                                                                                                                         | Not applicable.                                                                                                                                        |
| Venture Capital Fund (VCF)                      | Adjusted net assets method: The fair value is determined by applying either the Facility's percentage ownership in the underlying vehicle to the net asset value reflected in the most recent report adjusted for cash flows or, where available, the precise share value at the same date, submitted by the respective Fund Manager. In order to bridge the interval between the last available Net assets value (NAV) and the year-end reporting, a subsequent event review procedure is performed and if necessary the reported NAV is adjusted.                                      | Adjustment for time elapsed between the last reporting date of the VCF and the measurement date, taking into account: operating expenses and management fees, subsequent changes in the fair value of the VCF's underlying assets, additional liabilities incurred, market changes or other economic condition changes.                                 | The longer the period between the fair value measurement date and the last reporting date of the VCF, the higher the adjustment for time elapsed.      |
| Direct Equity Investment                        | Adjusted net assets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Adjustment for time elapsed between the last reporting date of the investee and the measurement date, taking into account: operating expenses, subsequent changes in the fair value of the investee's underlying assets, additional liabilities incurred, market changes or other economic condition changes, capital increase, sale/change of control. | The longer the period between the fair value measurement date and the last reporting date of the investee, the higher the adjustment for time elapsed. |
|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Discount for lack of marketability (liquidity) determined by reference to previous transaction prices for similar equities in the country/region, ranging from 5 to 30%.                                                                                                                                                                                | The higher the marketability discount, the lower the fair value.                                                                                       |
| Financial instruments not carried at fair value |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                        |
| Loans and advances                              | Discounted cash flows: The valuation model uses contractual cash flows that are conditional upon the non-occurrence of default by the debtor and do not take into account any collateral values or early repayments' scenarios. To obtain the Net Present Value (NPV) of the loans, the model retained discounts the contractual cash flows of each loan using an adjusted market discount curve. The individual loan NPV is then adjusted to take into consideration the relevant associated Expected Loss. The results are then summed to obtain the fair value of loans and advances. | Not applicable.                                                                                                                                                                                                                                                                                                                                         | Not applicable.                                                                                                                                        |
| Treasury financial assets                       | Discounted cash flows.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Not applicable.                                                                                                                                                                                                                                                                                                                                         | Not applicable.                                                                                                                                        |

With the application of IFRS 13, valuation adjustments are included in the fair value of derivatives at 31 December 2018 and 2017, namely:

- Credit valuation adjustments (CVA), reflecting counterparty credit risk on derivative transactions, amounting to EUR -37.4k as at 31 December 2018 and to EUR -38k as at 31 December 2017.
- Debit valuation adjustments (DVA), reflecting own credit risk on derivative transactions, amounting to EUR +15.1k as at 31 December 2018 and EUR +29.5k as at 31 December 2017.

#### 4.2.2. Transfers between Level 1 and 2

The Facility's policy is to recognise the transfers between Levels as of the date of the event or change in circumstances that caused the transfer.

In 2018 and 2017 the Facility did not make transfers from Level 1 to 2 or Level 2 to 1 of the fair value hierarchy.

#### 4.2.3. Level 3 fair values

##### **Reconciliation of Level 3 fair values**

The following tables present the changes in Level 3 instruments for the year ended 31 December 2018 and 31 December 2017:

*In EUR'000*

| Shares and other variable yield securities                            |                |
|-----------------------------------------------------------------------|----------------|
| Balance at 1 January 2018                                             | 473,081        |
| Gains or losses included in profit or loss:                           |                |
| - net realised gains on shares and other variable yield securities    | -10,622        |
| - net fair value change on shares and other variable yield securities | -13,411        |
| <b>Total</b>                                                          | <b>-24,033</b> |
| Disbursements                                                         | 95,434         |
| Repayments                                                            | -11,165        |
| Write offs                                                            | 17,300         |
| <b>Balance at 31 December 2018</b>                                    | <b>550,617</b> |
| Available-for-sale financial assets                                   |                |
| Balance at 1 January 2017                                             | 494,004        |
| Gains or losses included in profit or loss:                           |                |
| - net realised gains on available-for-sale financial assets           | 2,711          |
| - impairment on available-for-sale financial assets                   | -22,024        |
| <b>Total</b>                                                          | <b>-19,313</b> |
| Gains or losses included in other comprehensive income:               |                |
| - net change in fair value of available-for-sale financial assets     | -17,592        |
| <b>Total</b>                                                          | <b>-17,592</b> |
| Disbursements                                                         | 62,660         |
| Repayments                                                            | -44,568        |
| Write offs                                                            | -2,110         |
| <b>Balance at 31 December 2017</b>                                    | <b>473,081</b> |

In 2018 and 2017 the Facility did not make transfers out or to Level 3 of the fair value hierarchy.

## 5. Cash and cash equivalents

The cash and cash equivalents are composed of:

*In EUR'000*

|                                                                         | 31.12.2018     | 31.12.2017     |
|-------------------------------------------------------------------------|----------------|----------------|
| Cash in hand                                                            | 51,936         | 166,445        |
| Term deposits                                                           | 521,882        | 367,653        |
| Commercial papers                                                       | -              | 15,003         |
| <b>Cash and cash equivalents in the statement of financial position</b> | <b>573,818</b> | <b>549,101</b> |
| Accrued interest                                                        | -110           | 68             |
| <b>Cash and cash equivalents in the cash flow statement</b>             | <b>573,708</b> | <b>549,169</b> |

## 6. Derivative financial instruments

The main components of derivative financial instruments, classified as held for trading, are as follows:

*In EUR'000*

| At 31 December 2018                           | Fair Value   |               | Notional amount  |
|-----------------------------------------------|--------------|---------------|------------------|
|                                               | Assets       | Liabilities   |                  |
| Cross currency interest rate swaps            | 340          | -665          | 5,245            |
| Interest rate swaps                           | 654          | -             | 28,470           |
| FX swaps                                      | 8,879        | -7,828        | 1,460,608        |

| At 31 December 2017                           | Fair Value    |               | Notional amount  |
|-----------------------------------------------|---------------|---------------|------------------|
|                                               | Assets        | Liabilities   |                  |
| Cross currency interest rate swaps            | 149           | -1,105        | 8,098            |
| Interest rate swaps                           | 393           | -48           | 31,711           |
| FX swaps                                      | 11,979        | -             | 1,500,000        |
| <b>Total derivative financial instruments</b> | <b>12,521</b> | <b>-1,153</b> | <b>1,539,809</b> |

## 7. Loans and advances

### 7.1. Loans and advances

The following table show reconciliation from the opening to the closing balance of the loans and advances with new ECL IFRS 9 impairment model. Comparative impairment amounts for 2017 represent allowance account for credit losses and reflect measurement under IAS 39.

*In EUR'000*

|                                                         | Global loans(*)  | Senior loans   | Subordinated loans | POCI         | Total            |

## 9. Amounts receivable from contributors (in EUR'000)

The amounts of EUR 100,000 receivable from contributors are entirely composed of Member States contribution called but not paid.

## 10. Treasury financial assets

The treasury portfolio is composed of quoted bonds which have a remaining maturity of less than three months at reporting date. The following table shows the movements of the treasury portfolio:

| <i>In EUR'000</i>                          |                |
|--------------------------------------------|----------------|
| <b>Balance as at 1 January 2018</b>        | <b>144,382</b> |
| Acquisitions                               | 2,219,062      |
| Maturities                                 | -2,026,659     |
| Change in amortisation of premium/discount | 149            |
| Change in accrued interest                 | -1,794         |
| <b>Balance as at 31 December 2018</b>      | <b>335,140</b> |
| <b>Balance as at 1 January 2017</b>        | <b>169,398</b> |
| Acquisitions                               | 1,084,149      |
| Maturities                                 | -1,109,563     |
| Change in amortisation of premium/discount | -59            |
| Change in accrued interest                 | 457            |
| <b>Balance as at 31 December 2017</b>      | <b>144,382</b> |

## 11. Other assets

The main components of other assets are as follows:

| <i>In EUR'000</i>          |                   |                   |
|----------------------------|-------------------|-------------------|
|                            | <b>31.12.2018</b> | <b>31.12.2017</b> |
| Amount receivable from EIB | -                 | 4,117             |
| Financial guarantees       | 171               | 268               |
| <b>Total other assets</b>  | <b>171</b>        | <b>4,385</b>      |

## 12. Deferred income

The main components of deferred income are as follows:

| <i>In EUR'000</i>                          |                   |                   |
|--------------------------------------------|-------------------|-------------------|
|                                            | <b>31.12.2018</b> | <b>31.12.2017</b> |
| Deferred interest subsidies                | 32,658            | 24,895            |
| Deferred commissions on loans and advances | 1,106             | 907               |
| <b>Total deferred income</b>               | <b>33,764</b>     | <b>25,802</b>     |

## 13. Provisions for guarantees issued

The following tables show reconciliation from the opening to the closing balance of the provision for financial guarantees under new ECL IFRS 9 model. Comparative amounts for 2017 represent the provision for guarantees issued that has been recognized under IAS 39 as there is objective evidence that the Facility will have to incur a loss in respect of guarantees granted.

In EUR'000

|                                              | 2018         |                                  |                              |            |
|----------------------------------------------|--------------|----------------------------------|------------------------------|------------|
|                                              | 12-month ECL | Lifetime ECL not credit-impaired | Lifetime ECL credit-impaired | Total      |
| <b>Guarantees issued</b>                     |              |                                  |                              |            |

#### 14. Provisions for loan commitments

The following table shows reconciliation from the opening to the closing balance of the loss allowance for undisbursed loans (loan commitments) under new ECL IFRS 9 model. Comparative amounts for 2017 represent allowance account for credit losses and reflect measurement under IAS 39.

In EUR'000

|                                              | 2018         |                                  |                              |               |
|----------------------------------------------|--------------|----------------------------------|------------------------------|---------------|
|                                              | 12-month ECL | Lifetime ECL not credit-impaired | Lifetime ECL credit-impaired | Total         |
| <b>Loans commitments</b>                     |              |                                  |                              |               |
| Balance at 1 January                         | 1,993        | 2,163                            | -                            | 4,156         |
| Transfer to 12-month ECL                     | 5,192        | -                                | -                            | 5,192         |
| Transfer to lifetime ECL not credit-impaired | -            | 14,420                           | -                            | 14,420        |
| Transfer to lifetime ECL credit-impaired     | -            | -                                | -                            | -             |
| Foreign exchange rates differences           | 40           | 14                               | -                            | 54            |
| <b>Balance at 31 December</b>                | <b>7,225</b> | <b>16,597</b>                    | <b>-</b>                     | <b>23,822</b> |

#### 15. Amounts owed to third parties

The main components of amounts owed to third parties are as follows:

In EUR'000

|                                                                   | 31.12.2018     | 31.12.2017     |
|-------------------------------------------------------------------|----------------|----------------|
| Net general administrative expenses payable to EIB                | 47,799         | 45,105         |
| Other amounts payable to EIB                                      | 54             | 580            |
| Interest subsidies and TA not yet disbursed owed to Member States | 95,960         | 111,600        |
| <b>Total amounts owed to third parties</b>                        | <b>143,813</b> | <b>157,285</b> |

## 16. Other liabilities

The main components of other liabilities are as follows:

*In EUR'000*

|                                         | 31.12.2018   | 31.12.2017   |
|-----------------------------------------|--------------|--------------|
| Loan repayments received in advance     | 2,124        | 1,986        |
| Deferred income from interest subsidies | 369          | 436          |
| Financial guarantees                    | -            | 40           |
| <b>Total other liabilities</b>          | <b>2,493</b> | <b>2,462</b> |

## 17. Member States Contribution called

*In EUR'000*

| Member States                       | Contribution to the Facility | Contribution to interest subsidies and technical assistance | Total contributed | Called and not paid |
|-------------------------------------|------------------------------|-------------------------------------------------------------|-------------------|---------------------|
| Austria                             | 69,935                       | 8,869                                                       | 78,804            | 2,410               |
| Belgium                             | 103,226                      | 13,046                                                      | 116,272           | 3,530               |
| Bulgaria                            | 896                          | 294                                                         | 1,190             | 140                 |
| Cyprus                              | 576                          | 189                                                         | 765               | 90                  |

## 19. Interest and similar income and expenses

The main components of interest and similar income are as follows:

*In EUR'000*

|                                          | From 01.01.2018<br>to 31.12.2018 | From 01.01.2017<br>to 31.12.2017 |
|------------------------------------------|----------------------------------|----------------------------------|
| Loans and advances                       | 92,506                           | 97,440                           |
| Interest subsidies                       | 4,224                            | 3,966                            |
| <b>Total interest and similar income</b> | <b>96,730</b>                    | <b>101,406</b>                   |

The main components of interest and similar expenses are as follows:

*In EUR'000*

|                                           | From 01.01.2018<br>to 31.12.2018 | From 01.01.2017<br>to 31.12.2017 |
|-------------------------------------------|----------------------------------|----------------------------------|
| Derivative financial instruments          | -563                             | -980                             |
| Cash and cash equivalents                 | -654                             | -1,037                           |
| Treasury financial assets                 | -1,322                           | -654                             |
| <b>Total interest and similar expense</b> | <b>-2,539</b>                    | <b>-2,671</b>                    |

## 20. Fee and commission income and expenses

The main components of fee and commission income are as follows:

*In EUR'000*

|                                            | From 01.01.2018<br>to 31.12.2018 | From 01.01.2017<br>to 31.12.2017 |
|--------------------------------------------|----------------------------------|----------------------------------|
| Fee and commission on loans and advances   | 107                              | -                                |
| Fee and commission on financial guarantees | 170                              | 209                              |
| Other                                      | 7                                | 1                                |
| <b>Total fee and commission income</b>     | <b>284</b>                       | <b>210</b>                       |

The main component of fee and commission expenses is as follows:

*In EUR'000*

|                                                                                            | From 01.01.2018<br>to 31.12.2018 | From 01.01.2017<br>to 31.12.2017 |
|--------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Commission paid to third parties with regard to shares and other variable yield securities | -106                             | -60                              |
| <b>Total fee and commission expenses</b>                                                   | <b>-106</b>                      | <b>-60</b>                       |

## 21. Net result on shares and other variable yield securities

The main components of net realised gains on shares and other variable yield securities are as follows:

*In EUR'000*

|                                                                 | From 01.01.2018<br>to 31.12.2018 | From 01.01.2017<br>to 31.12.2017 |
|-----------------------------------------------------------------|----------------------------------|----------------------------------|
| Net proceeds from shares and other variable yield securities    | 3,166                            | 1,030                            |
| Dividend income                                                 | 7,320                            | 1,681                            |
| Net fair value change                                           | -20,665                          | -                                |
| <b>Net result on shares and other variable yield securities</b> | <b>-10,179</b>                   | <b>2,711</b>                     |

## 22. General administrative expenses

General administrative expenses represent the actual costs incurred by the EIB for managing the Facility less income generated from standard appraisal fees directly charged by the EIB to clients of the Facility.

*In EUR'000*

|                                                                        | From 01.01.2018<br>to 31.12.2018 | From 01.01.2017<br>to 31.12.2017 |
|------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Actual cost incurred by the EIB                                        | -50,021                          | -48,285                          |
| Income from appraisal fees directly charged to clients of the Facility | 2,222                            | 3,180                            |
| <b>Total general administrative expenses</b>                           | <b>-47,799</b>                   | <b>-45,105</b>                   |

## 23. Involvement with unconsolidated structured entities (in EUR'000)

### *Definition of a structured entity*

A structured entity is one that has been designed so that voting or similar rights are not the dominant factor in deciding, who controls the-entity. IFRS 12 observes that a structured entity often has some or all of the following features:

- Restricted activities;
- A narrow and well-defined objective, such as to effect a tax-efficient lease, carry out research and development activities, provide a source of capital or funding to an entity or provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors;
- Insufficient equity to permit the structured entity to finance its activities without subordinated financial support;
- Financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks (tranches).

### *Unconsolidated structured entities*

The term 'unconsolidated structured entities' refers to all structured entities that are not controlled by the Facility and includes interests in structured entities that are not consolidated.

### *Definition of Interests in structured entities:*

IFRS 12 defines "interests" broadly to include any contractual or non-contractual involvement that exposes the reporting entity to variability in returns from the performance of the entity. Examples of such interests include the holding of equity interests and other forms of involvement such as the provision of funding, liquidity support, credit enhancements, commitments and guarantees to the other entity. IFRS 12 states that a reporting entity does not necessarily have an interest in another entity solely because of a

typical customer supplier relationship.

The table below describes the types of structured entities that the Facility does not consolidate but in which it holds an interest.

| Type of structured entity                                      | Nature and purpose                                                                                                                                                                                                                                                                                                                                                        | Interest held by the Facility                                                                            |
|----------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| Project Finance - lending to Special Purposes Vehicles ("SPV") | Project Finance Transactions (PF Operations) are transactions where the Facility relies for the servicing of its debt on a borrower whose sole or main source of revenue is generated by a single or limited number of assets being financed by such debt or other pre-existing assets contractually linked to the project. PF operations are often financed through SPV. | Net disbursed amounts; Interest income.                                                                  |
| Venture capital operations                                     | The Facility finances venture capital and investment funds. Venture capital and investment funds pool and manage money from investors seeking private equity stakes in small and medium-size enterprises with strong growth potential as well as financing infrastructure projects.                                                                                       | Investments in units/shares issued by the venture capital entity; Dividends received as dividend income. |

The table below shows the carrying amounts of unconsolidated structured entities in which the Facility has an interest at the reporting date, as well as the Facility's maximum exposure to loss in relation to those entities. The maximum exposure to loss includes the carrying amounts and the related un-disbursed commitments.

| Type of structured entity | Caption                                    | Carrying amount at 31.12.2018 | Carrying amount at 31.12.2017 | Maximum exposure to loss at 31.12.2018 | Maximum exposure to loss at 31.12.2017 |
|---------------------------|--------------------------------------------|-------------------------------|-------------------------------|----------------------------------------|----------------------------------------|
| Venture capital funds     | Shares and other variable yield securities | 467,152                       | 420,104                       | 797,775                                | 737,661                                |
| <b>Total</b>              |                                            | <b>467,152</b>                | <b>420,104</b>                | <b>797,775</b>                         | <b>737,661</b>                         |

## 24. Impact financing envelope (in EUR'000)

In June 2013 the ACP-EU Joint Ministerial Council approved the new financial protocol for the 11<sup>th</sup> European Development Fund (EDF), covering the period 2014-2020.

A new EUR 500m endowment was agreed for the Investment Facility, the so called 'impact financing envelope' or "IFE", enabling the Facility to support projects that promise a particularly high development impact whilst bearing the greater risks inherent in such investments. This envelope will present new possibilities for enhancing the Facility's private sector lending through investments in the following instruments:

**Social impact equity funds** - promoted by an emerging population of private equity fund managers who put the alleviation of social or environmental issues at the core of their funds' investment strategy but still target sustainability at the levels of both the fund and its investee companies.

**Loans to financial intermediaries** - (e.g. microfinance institutions, local banks and credit unions) operating in ACP countries in which the EIB cannot consider financing - in particular in local currency - under the existing credit risk guidelines, e.g. due to either high country risks, currency volatility or lack of pricing benchmarks. The main objective of such loans will be to fund projects with a high developmental impact, especially in the field of support to micro and small enterprises (MSEs) and agriculture, which generally do not qualify for IF financing.

**Risk sharing facilitating instruments** - which will take the form of first loss guarantees ("first loss pieces") that will facilitate risk sharing operations of the EIB with local financial intermediaries (mainly commercial banks) for the benefit of underserved SMEs and small

projects that meet the Impact Financing Criteria in situations where a market gap has been identified in relation to the access of SMEs/small projects to finance. The first loss pieces would be structured as a counter-guarantee in favour of senior guarantee tranches funded by the EIB - under the Investment Facility - and by other International Financial Institutions/Development Financial Institutions, thus generating a substantial leverage effect.

**Direct financing** - through debt or equity instruments in projects with sound and experienced promoters and high developmental impacts, but that will, however, also entail higher expectations of losses and difficulties to recover the investment (equity type risk with higher than usual expectation of losses). The EIB will apply strict selection and eligibility criteria for this instrument, as these projects, notwithstanding their high developmental impact, would not be able to meet acceptable financing criteria (i.e. low expectation of recovering the investment or offsetting the losses through interest rates /equity returns).

The IFE will also allow diversification into new sectors, such as health and education, agriculture and food security, and the development of new and innovative risk-sharing instruments.

From a financial and accounting perspective the IFE forms part of the IF portfolio and is accounted for in the overall IF annual financial statements.

The following table represents the carrying amounts and the committed, but undisbursed amounts, per type of asset:

| Type of IFE investment                   | Caption                                    | Carrying amount<br>at 31.12.2018 | Carrying amount<br>at 31.12.2017 | Undisbursed<br>amount at<br>31.12.2018 | Undisbursed<br>amount at<br>31.12.2017 |

## 25. Subsequent events

There have been no material post balance sheet events which could require disclosure or adjustment to the 31 December 2018 financial statements.

**Content Annex 3C**

- **Part 1 – Background Information on the EU Trust Fund Bêkou**
- **Part 2 – Financial Statements and Explanatory Notes**
- **Part 3 – Annual Financial Report**

## Part 1 - BACKGROUND INFORMATION ON THE BÊKOU EU TRUST FUND

### General background on Union Trust Funds

In accordance with Articles 234 and 235 of the Financial Regulation applicable to the general budget of the Union (EU FR)<sup>25</sup> and Article 35 of the Financial Regulation applicable to the 11<sup>th</sup> European Development Fund (EDF FR)<sup>26</sup>, the European Commission may establish Union trust funds for external actions ('EU trust funds'). The Union trust funds are established under an agreement concluded with other donors for emergency and post-emergency actions necessary to react to a crisis, or for thematic actions.

Union trust funds are set up by the European Commission with a decision after consulting or approval of the European Parliament and the Council. This decision includes the constitutive agreement with other donors.

Union trust funds are only established and implemented subject to the following conditions:

- there is added value of the Union intervention: the objectives of Union trust funds, in particular by reason of their scale or potential effects, may be better achieved at Union level than at national level and the use of the existing financing instruments would not be sufficient to achieve policy objectives of the Union;
- Union trust funds bring clear political visibility for the Union and managerial advantages as well as better control by the Union of risks and disbursements of the Union and other donors' contributions;
- Union trust funds do not duplicate other existing funding channels or similar instruments without providing any additionality;
- the objectives of Union trust funds are aligned with the objectives of the Union instrument or budgetary item from which they are funded.

A board chaired by the Commission is established for each Union trust fund to ensure a fair representation of the donors and to decide upon the use of the funds. The board includes a representative of each non-contributing Member State as an observer. The rules for the composition of the board and its internal rules shall be laid down in the constitutive agreement of the Union trust fund.

Union trust funds are established for a limited duration as determined in their constitutive agreement. That duration may be extended upon request of the board of the Union trust fund and upon presentation by the Commission of a report justifying the extension. The European Parliament and/or the Council may request the Commission to discontinue the appropriations for the Trust Fund or revise the constitutive act with a view to liquidate it.

The accounting officer of the Commission serves as the accounting officer of the Union trust funds. The accounting officer is responsible for laying down accounting procedures and chart of accounts common to all Union trust funds. The Commission's internal auditor, OLAF and the Court of Auditors exercise the same powers over Union trust funds as they do in respect of other actions carried out by the Commission. The Union trust funds are also subject to an independent external audit every year.

### Current EU Trust Funds

To date, the Commission has set up four EUTFs:

- The **BÊKOU EUTF**, whose objective is to support all aspects of the Central African Republic's exit from crisis and its reconstruction efforts. Established on 15 July 2014;
- The **MADAD EUTF**, a European Union Regional Trust Fund in response to the Syrian crisis. Established on 15 December 2014;

<sup>25</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union,

<sup>26</sup> Council regulation (EU) 2018/1877 of 26 November 2018 on the financial regulation applicable to the 11<sup>th</sup> European Development Fund, and repealing Regulation (EU) 2015/323

- The **AFRICA EUTF**, a European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa. Established on 12 November 2015;
- The **COLOMBIA EUTF**, to support the implementation of the peace agreement in the early recovery and stabilisation post conflict. Established on 12 December 2016.

Further information is available on the websites of individual EUTFs:

## The Bêkou EU Trust Fund

The first multi-donor EU Trust Fund called Bêkou, which means 'hope' in Sango, was established on 15 July 2014, by the Commission (represented by DGs DEVCO and ECHO, and the EEAS) and three EU Member States (Germany, France and the Netherlands), with the aim of promoting the stabilisation and reconstruction of the Central African Republic (CAR). It has been established for a maximum duration of 60 months. The trust fund is managed from Brussels.

The Trust Fund Board and the Operational Committee of the Bêkou EU Trust Fund are composed of representatives of the donors, of the Commission and observers.

The Board adopts and reviews the strategy of the EUTF. The Board shall meet at least once a year.

The Operational Committee examines, approves and supervises the implementation of the actions financed by the Fund. The Committee also approves the annual accounts and the annual reports on the activities financed by the Trust Fund.

## Annual accounts of the Bêkou EU Trust Fund

According to Article 8 of the Agreement establishing the European Union Trust Fund for the Central African Republic, the 'Bêkou EU Trust Fund' and article 11.2.1 of the Constitutive agreement, the annual accounts comprise two parts: (1) The annual financial report which is the responsibility of the EUTF manager and (2) The annual financial statements prepared by the Commission's Accounting Officer, who is, based on the same article, also the Accounting Officer of the trust fund.

According to Article 8 of the Constitutive agreement the financial statements shall be prepared in accordance with the accounting rules adopted by the Commission's Accounting Officer (EU Accounting Rules, EAR) that are based on the International Public Sector Accounting Standards (IPSAS).

The annual accounts are subject to independent external audit and the final annual accounts are submitted by the EUTF manager and the Accounting Officer to the Operational Committee for approval (Article 8.3.4(c)).

## Highlights of the year

The Bêkou EU Trust Fund (Bêkou EUTF) aims to ensure access to basic services, support economic recovery and job creation, and promote social cohesion and reconciliation. Since its creation, the Bêkou EUTF has adopted 16 programmes and has reached more than 2 million beneficiaries.

Despite the existence of a democratically elected government and its efforts to return to stability, the security situation in the CAR remains volatile. It is in this complex and fragile context, where the Bêkou EUTF takes full advantage of its comparative advantages of flexibility

and adaptability to changing circumstances. Additionally, the Bêkou EUTF remains the only instrument building resilience for both the population and the state, in a true Linking Relief Rehabilitation and Development (LRRD) approach.

Given the current situation in CAR and in view of the expiration of the Bêkou EUTF in July 2019, in November 2018, the EUTF Board formally requested an extension of 18 months, thus bringing the total duration of the Bêkou EUTF from 60 months to 78 months. The official procedure, which includes a consultation of the European Parliament and the Council, was launched in December 2018.

The operational highlights of the 2018 are the following:

- The Bêkou EUTF adopted a new action for a total amount of EUR 35 million in the sector of health and increased by EUR 2 million each the budget of two already adopted actions in the sectors of economic recovery and promotion of social cohesion, dialogue and reconciliation.
- The Bêkou EUTF Results Framework was adopted, responding to the Court of Auditors' recommendation on the identification of SMART objectives at a EUTF level. This strategic tool will better demonstrate the overall results of the Bêkou EUTF actions.
- The Bêkou EUTF projects were marked by the relative stability in the north-eastern and south-western parts of the country that called for additional interventions, the localised conflicts in Bangui and the hinterland, as well as the redeployment of public officials outside Bangui.

On the financial side, by the end of 2018, pledges by EUTF contributors amounted to more than EUR 242 million. This is an increase of EUR 6 million compared to 2017. Only EUR 5 million out of these EUR 242 million remain to be certified.

In terms of contracts, the Bêkou EUTF signed 30 new contracts in 2018 for a total amount of nearly EUR 80 million (representing 48% of the total amount contracted since its creation). They contribute to the implementation of its programmes in the sectors of health, economic recovery, rural resilience and job creation, water and sanitation, reconciliation and opening-up of regions.

Last but not least, more than EUR 57 million (representing nearly 50% of the total amount paid since the creation of Bêkou EUTF) was paid in 2018 on top of payments made during previous years; total disbursements have nearly reached EUR 119 million since the creation of the Bêkou EUTF.

In the financial statements, the impact of the above mentioned activities are most visible when looking at:

- Pre-financing: an increase of EUR 24.84 million (see notes 2.1 and 2.2) resulting from the high number of new contracts signed and advances paid out;
- Cash and cash equivalents: a decrease of EUR 26.02 million (see cashflow statement and note 2.4) is mainly caused by the increased payments of pre-financing, highlighted above;
- Outstanding commitments not yet expensed (see note 4.1): an increase from EUR 25.31 million to EUR 54.65 million due to the new contracts.
