## NOTES TO THE FINANCIAL STATEMENTS

### 1. SIGNIFICANT ACCOUNTING POLICIES

#### 1.1. ACCOUNTING PRINCIPLES

The objective of financial statements is to provide information about the financial position, performance and cashflows of an entity that is useful to a wide range of users.

The overall considerations (or accounting principles) to be followed when preparing the financial statements are laid down in EU Accounting Rule 1 'Financial Statements' and are the same as those described in IPSAS 1: fair presentation, accrual basis, going concern, consistency of presentation, materiality, aggregation, offsetting and comparative information. The qualitative characteristics of financial reporting are relevance, faithful representation (reliability), understandability, timeliness, comparability and verifiability.

#### 1.2. BASIS OF PREPARATION

##### 1.2.1. Reporting period

Financial statements are presented annually. The accounting year begins on 1 January and ends on 31 December.

##### 1.2.2. Currency and basis for conversion

The annual accounts are presented in thousands of euros, the euro being the EU's functional and reporting currency. Foreign currency transactions are translated into euros using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the re-translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of financial performance. Different conversion methods apply to property, plant and equipment and intangible assets, which retain their value in euros at the date when they were purchased.

Year-end balances of monetary assets and liabilities denominated in foreign currencies are translated into euros on the basis of the European Central Bank (ECB) exchange rates applying on 31 December.

### Euro exchange rates

| Currency | 31.12.2018 | 31.12.2017 | Currency | 31.12.2018 | 31.12.2017 |
|----------|------------|------------|----------|------------|------------|
| BGN      | 1.9558     | 1.9558     | PLN      | 4.3014     | 4.1770     |
| CZK      | 25.7240    | 25.5350    | RON      | 4.6635     | 4.6585     |
| DKK      | 7.4673     | 7.4449     | SEK      | 10.2548    | 9.8438     |
| GBP      | 0.8945     | 0.8872     | CHF      | 1.1269     | 1.1702     |
| HRK      | 7.4125     | 7.4400     | JPY      | 125.8500   | 135.0100   |
| HUF      | 320.9800   | 310.3300   | USD      | 1.1450     | 1.1993     |

#### 1.2.3. Use of estimates

In accordance with IPSAS and generally accepted accounting principles, the financial statements necessarily include amounts based on estimates and assumptions by management based on the most reliable information available. Significant estimates include, but are not limited to; accrued and deferred revenue and charges, provisions, financial risk on accounts receivables, contingent assets and liabilities, and degree of impairment of assets. Actual results could differ from those estimates.

Reasonable estimates are essential part of the preparation of financial statements and do not undermine their reliability. An estimate may need revision if changes occur in the circumstances on which the estimate was based or as a result of new information or more experience. By its nature, the revision of an estimate does not relate to prior periods and is not the correction of an error. The effect of a change in accounting estimate shall be recognised in the surplus or deficit in the periods in which it becomes known.

### 1.3. BALANCE SHEET

#### 1.3.1. Financial assets

The financial assets are classified in the following categories: financial assets at fair value through surplus or deficit; loans and receivables; held-to-maturity investments; and available for sale financial assets. The classification of the financial instruments is determined at initial recognition and re-evaluated at each balance sheet date.

##### (i) *Financial assets at fair value through surplus or deficit*

A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by the entity. Derivatives are also categorised in this category. Assets in this category are classified as current assets if they are expected to be realised within 12 months of the balance sheet date. During this financial year, the entity did not hold any investments in this category.

##### (ii) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the entity provides money, goods or services directly to a debtor with no intention of trading the receivable. They are included in non-current assets, except for maturities within 12 months of the balance sheet date. Loans and receivables include term deposits with the original maturity above three months.

##### (iii) *Held-to-maturity investments*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the entity has the positive intention and ability to hold to maturity. During this financial year, the entity did not hold any investments in this category.

##### (iv) *Available for sale financial assets*

Available for sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are classified as either current or non-current assets, depending on the period of time the entity expects to hold them, which is usually the maturity date. During this financial year, the entity did not hold any investments in this category.

### **Initial recognition and measurement**

Purchases and sales of financial assets at fair value through surplus or deficit, held-to-maturity and available for sale are recognised on trade date - the date on which the entity commits to purchase or sell the asset. Cash equivalents, loans and term deposits are recognised at settlement date. Financial instruments are initially recognised at fair value. For all financial assets not carried at fair value through surplus or deficit transaction costs are added to the fair value at initial recognition.

Financial instruments are derecognised when the rights to receive cashflows from the investments have expired or the entity has transferred substantially all risks and rewards of ownership to another party.

### **Subsequent measurement**

Financial assets at fair value through surplus or deficit are subsequently carried at fair value with gains and losses arising changes in the fair value being included in the statement of financial performance in the period in which they arise.

Loans and receivables and held-to maturity investments are carried at amortised cost using the effective interest method.

Available for sale financial assets are subsequently carried at fair value. Gains and losses arising from changes in the fair value are recognised in the fair value reserve. Interest on available for sale financial assets calculated using the effective interest method is recognised in the statement of financial performance.

The entity assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired and whether an impairment loss should be recorded in the statement of financial performance.

#### **1.3.2. Pre-financing amounts**

Pre-financing is a payment intended to provide the beneficiary with a cash advance, i.e. a float. It may be split into a number of payments over a period defined in the particular contract, decision, agreement or basic legal act. The float or advance is either used for the purpose for which it was provided during the period defined in the agreement or it is repaid. If the beneficiary does not incur eligible expenditure, he has the obligation to return the pre-financing advance to the entity. The amount of the pre-financing may be reduced (wholly or partially) by the acceptance of eligible costs (which are recognised as expenses).

Pre-financing is, on subsequent balance sheet dates, measured at the amount initially recognised on the balance sheet less eligible expenses (including estimated amounts where necessary) incurred during the period.

#### **1.3.3. Receivables and recoverables**

As the EU accounting rules require a separate presentation of exchange and non-exchange transactions, for the purpose of drawing up the accounts, receivables are defined as stemming from exchange transactions and recoverables are defined as stemming from non-exchange transactions (when the entity receives value from another entity without directly giving approximately equal value in exchange).

Receivables from exchange transactions meet the definition of financial instruments and are thus classified as loans and receivables and measured accordingly (see 1.3.1 above).

Recoverables from non-exchange transactions are carried at original amount (adjusted for interests and penalties) less write-down for impairment. A write-down for impairment is established when there is objective evidence that the entity will not be able to collect all amounts due according to the original terms of the recoverables. The amount of the write-down is the difference between the asset's carrying amount and the recoverable amount. The amount of the write-down is recognised in the statement of financial performance.

#### 1.3.4. Cash and cash equivalents

Cash and cash equivalents are financial instruments and include cash at hand, deposits held at call or at short notice with banks, and other short-term highly liquid investments with original maturities of three months or less.

#### 1.3.5. Provisions

Provisions are recognised when the entity has a present legal or constructive obligation towards third parties as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognised for future operating losses. The amount of the provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the provision involves a large number of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities ('expected value' method).

Provisions for onerous contracts are measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

#### 1.3.6. Payables

Included under accounts payable are both amounts related to exchange transactions such as the purchase of goods and services and to non-exchange transactions e.g. to cost claims from beneficiaries, grants or other EU funding.

Where grants or other funding is provided to the beneficiaries, the cost claims are recorded as payables for the requested amount when the cost claim is received. Upon verification and acceptance of the eligible costs, the payables are valued at the accepted and eligible amount.

Payables arising from the purchase of goods and services are recognised at invoice reception for the original amount and corresponding expenses are entered in the accounts when the supplies or services are delivered and accepted by the entity.

#### 1.3.7. Accrued and deferred revenue and charges

Transactions and events are recognised in the financial statements in the period to which they relate. At year-end, if an invoice is not yet issued but the service has been rendered, the supplies have been delivered by the entity or a contractual agreement exists (e.g. by reference to a contract), an accrued revenue will be recognised in the financial statements. In addition, at year-end, if an invoice is issued but the services have not yet been rendered or the goods supplied have not yet been delivered, the revenue will be deferred and recognised in the subsequent accounting period.

Expenses are also accounted for in the period to which they relate. At the end of the accounting period, accrued expenses are recognised based on an estimated amount of the transfer obligation of the period. The calculation of accrued expenses is done in accordance with detailed operational and practical guidelines issued by the Accounting Officer which aim at

ensuring that the financial statements provide a faithful representation of the economic and other phenomena they purport to represent. By analogy, if a payment has been made in advance for services or goods that have not yet been received, the expense will be deferred and recognised in the subsequent accounting period.

## 1.4. STATEMENT OF FINANCIAL PERFORMANCE

### 1.4.1. Revenue

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the entity, which represents an increase in net assets, other than increases relating to contributions from owners.

Depending on the nature of the underlying transactions in the statement of financial performance it is distinguished between:

- *Revenue from non-exchange transactions*

Revenue from non-exchange transactions are taxes and transfers because the transferor provides resources to the recipient entity without the recipient entity providing approximately equal value directly in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes. The entity shall recognise an asset in respect of transfers when the entity controls the resources as a result of a past event (the transfer) and expects to receive future economic benefits or service potential from those resources, and when the fair value can be reliably measured. An inflow of resources from a non-exchange transaction recognised as an asset (i.e. cash) is also recognised as revenue, except to the extent that the entity has a present obligation in respect of that transfer (condition), which needs to be satisfied before the revenue can be recognised. Until the condition is met the revenue is deferred and recognised as a liability (pre-financing received).

- *Revenue from exchange transactions*

Revenue from the sale of goods and services is recognised when the significant risk and rewards of ownership of the goods are transferred to the purchaser. Revenue associated with a transaction involving the provision of services is recognised by reference to the stage of completion of the transaction at the reporting date.

### 1.4.2. Expenses

Expenses are decreases in economic benefits or service potential during the reporting period in the form of outflows or consumption of assets or incurrence of liabilities that result in decreases in net assets/equity. They include both the expenses from exchange transactions and expenses from non-exchange transactions.

Expenses from exchange transactions arising from the purchase of goods and services are recognised when the supplies are delivered and accepted by the entity. They are valued at original invoice amount. Furthermore, at the balance sheet date expenses related to the service delivered during the period for which an invoice has not yet been received or accepted are recognised in the statement of financial performance.

Expenses from non-exchange transactions relate to transfers to beneficiaries and can be of three types: entitlements, transfers under agreement and discretionary grants, contributions and donations. Transfers are recognised as expenses in the period during which the events giving rise to the transfer occurred, as long as the nature of the transfer is allowed by regulation or an agreement has been signed authorising the transfer; any eligibility criteria have been met by the beneficiary; and a reasonable estimate of the amount can be made.

When a request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses due to the beneficiaries but not yet reported are estimated and recorded as accrued expense.

## **1.5. CONTINGENT ASSETS AND LIABILITIES**

### **1.5.1. Contingent assets**

A contingent asset is a possible asset that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

### **1.5.2. Contingent liabilities**

A contingent liability is a possible obligation that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation or, in the rare circumstances where the amount of the obligation cannot be measured with sufficient reliability.

## **1.6. CONSOLIDATION**

The accounts of this entity are fully consolidated in the EDF consolidated annual accounts.

## **1.7. CONTRIBUTIONS FROM DONORS**

The EU trust fund is required to finance specific projects and return remaining funds received from donors at the time of winding-up of the trust fund. Contributions from donors to the EU trust fund fulfil the criteria of revenues from non-exchange transactions under conditions. When the trust fund receives resources a liability, that equals to the received contributions, should be recorded on the balance sheet of the trust fund. The received contributions remain under liabilities until the conditions attached to the donated funds are met, i.e. eligible expenses are incurred by the trust fund.

At the balance sheet date the outstanding contribution liabilities are measured at contributions received less net expenses. Net expenses are the expenses incurred by the trust fund, including estimated amounts and if applicable, net of the revenue generated by the activities of the trust fund (e.g. bank interest). The corresponding amount of contributions is recognised as non-exchange revenue from donation. Consequently the effect on economic result of the year is nil.

For reporting purposes the net expenses of the reporting period will be attributed to the donors in proportion to net contributions paid as at 31 December, i.e. contributions paid to the trust fund as at 31 December, less net expenses allocated in the previous years. When the contribution from one donor is totally consumed, contributions will be allocated from the remaining donors. This allocation of contributions is only indicative. When the trust fund is wound up the actual split of remaining resources will be decided by the Board.

## 2. NOTES TO THE BALANCE SHEET

### NON-CURRENT ASSETS

#### 2.1. PRE-FINANCING

EUR '000

|                          | 31.12.2018   | 31.12.2017 |
|--------------------------|--------------|------------|
| Direct Management        | 1,608        | 686        |
| Implemented by:          |              |            |
| <i>Commission</i>        | 1,608        | 686        |
| Indirect Management      | 1,835        | –          |
| Implemented by:          |              |            |
| <i>Public law bodies</i> | 1,835        | –          |
| <b>Total</b>             | <b>3,443</b> | <b>686</b> |

### CURRENT ASSETS

#### 2.2. PRE-FINANCING

EUR '000

|                          | 31.12.2018    | 31.12.2017   |
|--------------------------|---------------|--------------|
| Direct Management        | 23,368        | 7,109        |
| Implemented by:          |               |              |
| <i>Commission</i>        | 23,368        | 7,109        |
| Indirect Management      | 6,179         | 356          |
| Implemented by:          |               |              |
| <i>Public law bodies</i> | 6,179         | 356          |
| <b>Total</b>             | <b>29,546</b> | <b>7,465</b> |

Pre-financing represents money paid out, and thus implementation of payment appropriations. As explained in note 1.3.2, these are advances not yet expensed. Thus while pre-financing reduces the outstanding RAL (see note 4.1) it represents expenses still to be recognised in the statement of financial performance.

The tables above show a combined increase in non-current and current pre-financing of EUR 24.84 million. This is explained by the fact that 30 new contracts were signed in 2018 for a total of nearly EUR 80 million (representing 48% of the total amount contracted since its creation).

Guarantees received covering pre-financing amounted to EUR 2.21 million at year-end.

#### 2.3. EXCHANGE RECEIVABLES AND NON-EXCHANGE RECOVERABLES

This heading comprises entirely deferred administrative expenses of EUR 1.14 million (EUR 0.88 million in 2017) relating to the unused management fee for the European Commission.

#### 2.4. CASH AND CASH EQUIVALENTS

At 31 December 2018 cash and cash equivalents comprise EUR 13.32 million placed on current accounts (EUR 36.74 million in 2017) and EUR 0.61 million (EUR 3.2 million in 2017) with a notice period below 32 days.

The decrease in cash and cash equivalents is a consequence of the increased level of activities of the Trust Fund and is due to the fact that throughout the year, more payments (including pre-financing) were made (EUR 57.72 million) than contributions received, EUR 31.7 million (see note 2.5).

## NON-CURRENT LIABILITIES

### 2.5. FINANCIAL LIABILITIES

EUR '000

| Donor                      | Net contributions 2017 | Contributions cashed 2018 | Total Contributions | % contribution | Allocation of 2018 result | Net contributions 2018 |

| <i>Netherlands</i>         | 1,278                  | –                         | 1,278               | 1.67%          | (563)                     | 715                    |
| <b>Non-Member States:</b>  | <b>376</b>             | <b>–</b>                  | <b>376</b>          | <b>0.49%</b>   | <b>(166)</b>              | <b>210</b>             |
| <i>Switzerland</i>         | 376                    | –                         | 376                 | 0.49%          | (166)                     | 210                    |
| <b>Total</b>               | <b>44,720</b>          | <b>31,700</b>             | <b>76,420</b>       | <b>100.00%</b> | <b>(33,682)</b>           | <b>42,737</b>          |

The net contributions of the donors at 31 December equal the contributions paid less the allocated net expenses to that date. The net expenses of the current year are allocated to the donors in proportion to the contributions at 31 December.

The contribution percentage and the allocation of net results based on it is only indicative. When the Bêkou Trust Fund is wound up, the final decision on the return of remaining funds will be made by the Trust Fund Board.

## CURRENT LIABILITIES

### 2.6. PAYABLES

EUR '000

|                               |            |            |
|-------------------------------|------------|------------|
| <i>Suppliers</i>              | 79         | 322        |
| <i>Public bodies</i>          | 894        | 454        |
| <i>Other current payables</i> | (55)       | (61)       |
| <b>Total</b>                  | <b>918</b> | <b>716</b> |

Payables include cost statements received by the EUTF. They are recorded for the amount being claimed from the moment the demand is received. The same procedure applies to invoices and credit notes received under procurement activities. The cost claims concerned have been taken into account for the year-end cut-off procedures. Following the cut-off entries, estimated eligible amounts have been recognised in the statement of financial performance. Non-eligible amounts are shown under other current payables.

### 2.7. ACCRUED CHARGES AND DEFERRED REVENUE

The Bêkou EU Trust Fund does not have any deferred revenue. All the amounts included under this heading related to accrued charges and are as follows:

EUR '000

|                        | 31.12.2018   | 31.12.2017   |
|------------------------|--------------|--------------|
| <i>Accrued charges</i> | 4,399        | 3,536        |
| <b>Total</b>           | <b>4,399</b> | <b>3,536</b> |

Accrued charges are the amounts estimated by the Authorising Officer of costs incurred for services and goods delivered in the year 2018 but not yet invoiced or processed by the end of the year. The amount comprises the estimated operating expenses for on-going or ended contracts without validated cost claims. The 2018 estimation used the best available information about the existing contracts. Expenses were calculated 'pro-rata' based on the value of the contract and the percentage of completion. The percentage of completion is based on the operational duration of the contract and the number of contract days lapsed at 31 December 2018.

In order to more accurately reflect the amount that is expected to be spent on projects, the value of the contracts is adjusted by the average implementation rate of contracts and the average invoice eligibility rate. Both these rates are determined based on actual data related to already implemented contracts.

For 2018, rates applicable to the EDF were used because the types of contract and the types of beneficiaries of the EDF are representative to the type of contracts and beneficiaries in the Trust Fund.

Included under this heading are also accrued audit charges of EUR 24,000.

### 3. NOTES TO THE STATEMENT OF FINANCIAL PERFORMANCE

#### REVENUE

#### REVENUE FROM NON-EXCHANGE TRANSACTIONS

##### 3.1. REVENUE FROM DONATIONS

This heading represents contributions from donors recognised as revenue in line with the incurred expenses. Consequently the economic result of the year is nil.

#### EXPENSES

##### 3.2. OPERATING EXPENSES

|                                                         | EUR '000      |               |
|---------------------------------------------------------|---------------|---------------|
|                                                         | 2018          | 2017          |
| <i>Basic and primary health care</i>                    | 14,404        | 11,736        |
| <i>Civilian peace-building</i>                          | 4,510         | 2,473         |
| <i>Urban development and management</i>                 | 2,880         | 5,115         |
| <i>Food aid/food security programmes</i>                | 2,496         | 2,477         |
| <i>Reconstruction relief and rehabilitation</i>         | 2,455         | 1,772         |
| <i>Basic drinking water supply and basic sanitation</i> | 1,892         | –             |
| <i>Environmental education</i>                          | 1,720         | 1,657         |
| <i>Trade education</i>                                  | 1,582         | 3,173         |
| <i>Women's equality organisations and institutions</i>  | 887           | 513           |
| <b>Total</b>                                            | <b>32,825</b> | <b>28,918</b> |

|                                                         | EUR '000      |               |
|---------------------------------------------------------|---------------|---------------|
|                                                         | 2018          | 2017          |
| <b>Direct Management</b>                                | <b>25,114</b> | <b>20,667</b> |
| Implemented by:                                         |               |               |
| <i>Commission</i>                                       | 25,114        | 20,667        |
| <b>Indirect Management</b>                              | <b>7,711</b>  | <b>8,250</b>  |
| Implemented by:                                         |               |               |
| <i>Private law bodies with a public service mission</i> | 495           | 1,772         |
| <i>Public law bodies</i>                                | 7,216         | 6,478         |
| <b>Total</b>                                            | <b>32,825</b> | <b>28,918</b> |

Operating expenses increased in 2018 by EUR 3.91 million. Aligned with the new operational strategy for the period 2017-2019, this is most visible in the field of basic and primary health care.

### 3.3. OTHER EXPENSES

EUR '000

|                                        | 2018       | 2017       |
|----------------------------------------|------------|------------|
| Management costs                       | 739        | 577        |
| Technical assistance and communication | 72         | 79         |
| Audit                                  | 48         | 48         |
| <b>Total</b>                           | <b>858</b> | <b>703</b> |

The management costs are charged to the Bêkou EU Trust Fund in accordance to Article 7.3 of the Constitutive agreement that authorises the Commission to deduct a sum of up to 5 % of the amounts contributed to the Trust Fund to cover its management costs. The amount of management costs included under this heading comprise administrative costs incurred by the Commission during 2018. The difference between amounts paid to the Commission and the expenses incurred by the Commission on behalf of the trust fund (salary expenses, mission costs, etc.) is recorded as exchange receivables and non-exchange recoverables expenses (see note 2.3).

## 4. OTHER SIGNIFICANT DISCLOSURES

### 4.1. OUTSTANDING COMMITMENTS NOT YET EXPENSED

EUR '000

|                                          | 31.12.2018 | 31.12.2017 |
|------------------------------------------|------------|------------|
| Outstanding commitments not yet expensed | 54,645     | 25,310     |

The amount comprises the budgetary RAL ('Reste à Liquider') less related amounts that have been included as expenses in the statement of financial performance. The budgetary RAL is an amount representing the open budgetary commitments for which payments and/or de-commitments have not yet been made. This is the normal consequence of the existence of multi-annual programmes.

The increase in outstanding commitments not yet expenses can be explained by the fact that 30 new contracts were signed in 2018 for a total of nearly EUR 80 million (representing 48% of the total amount contracted since its creation).

### 4.2. RELATED PARTIES

The related parties of the Bêkou EU Trust Fund are the European Commission and the European Development Fund. Transactions between these entities take place as part of the normal operations of the Bêkou EU Trust Fund and as this is the case, no specific disclosure requirements are necessary for these transactions in accordance with the EU accounting rules.

### 4.3. EVENTS AFTER REPORTING DATE

At the date of transmission of these accounts, no material issues had come to the attention of or were reported to the Accounting Officer of the Bêkou EU Trust Fund that would require separate disclosure under this section. The annual accounts and related notes were prepared using the most recently available information and this is reflected in the information presented.

## 5. FINANCIAL INSTRUMENTS DISCLOSURES

### 5.1. CURRENCY RISKS

#### Exposure of the Bêkou EU Trust Fund to currency risk at year end

At 31 December 2018 the ending balances of financial assets and financial liabilities did not include any amounts quoted in currencies other than euro.

## 5.2. CREDIT RISK

At 31 December 2018 the financial assets comprise cash and cash equivalent of EUR 13.93 million and receivables and recoverables amounting to EUR 1.14 million.

### Financial assets that are neither past due nor impaired

The amounts of receivables and recoverables are related to deferred charges and are thus neither past due nor impaired.

### Financial assets by risk category

Cash and cash equivalents comprise EUR 13.32 million placed on current accounts and EUR 0.61 million of cash equivalents with a notice period below 32 days. The entire amount is placed in banks with prime and high grade.

## 5.3. LIQUIDITY RISK

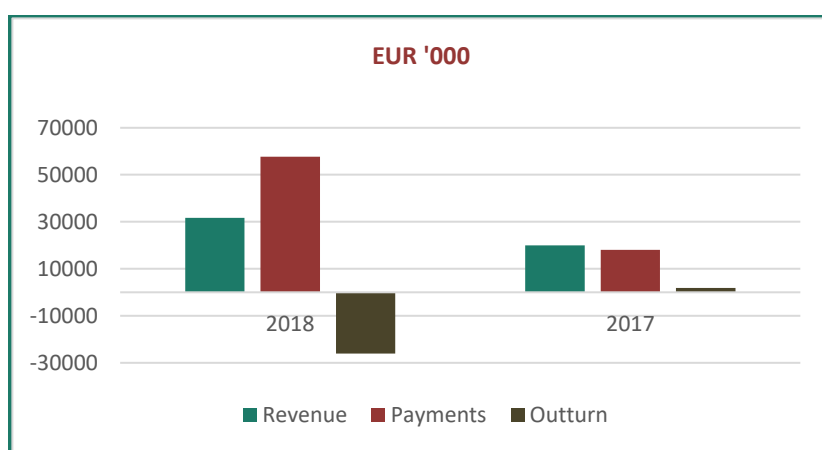

### Maturity analysis of financial liabilities by remaining contractual maturity

The financial liabilities largely comprise long term liabilities to donors. Outstanding amounts will be paid back when the Bêkou EU Trust Fund is wound-up.

## Part 3 - ANNUAL FINANCIAL REPORT

### 1. BUDGET RESULT

| EUR '000                   |          |        |
|----------------------------|----------|--------|
|                            | 2018     | 2017   |
| Revenue                    | 31,701   | 20,007 |
| Payments                   | 57,718   | 18,095 |
| Exchange rate gain or loss | -        | -      |
| Budget result              | (26,017) | 1,912  |

### 2. RECONCILIATION OF ECONOMIC RESULT AND BUDGET RESULT

The economic result of the year is calculated on the basis of accrual accounting principles. The budget result is however based on cash accounting rules. As the economic result and the budget result both cover the same underlying operational transactions, it is a useful control to ensure that they are reconcilable. The table below shows this reconciliation, highlighting the key reconciling amounts, split between revenue and expenditure items.

EUR '000

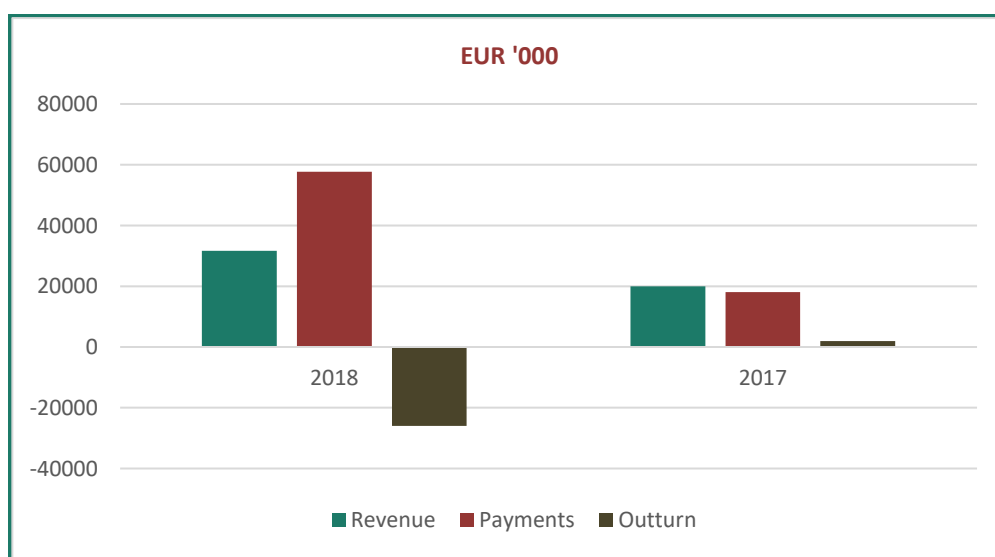

|                                                     | 2018     | 2017     |
|-----------------------------------------------------|----------|----------|
| <b>ECONOMIC RESULT OF THE YEAR</b>                  | -        | -        |
| <b>Revenue</b>                                      |          |          |
| <i>Entitlements not affecting the budget result</i> | (33,682) | (29,613) |
| <i>Contributions received</i>                       | 31,700   | 20,000   |
| <b>Expenses</b>                                     |          |          |
| <i>Net effect of pre-financing</i>                  | (44,824) | 1,086    |
| <i>Accrued expenses (net)</i>                       | 20,789   | 10,440   |
| <b>BUDGET RESULT OF THE YEAR</b>                    | (26,017) | 1,912    |

### 3. IMPLEMENTATION OF BUDGET REVENUE

#### 3.1. Overview of revenue

EUR '000

| Financial Year | Issuing year | Revenue type  | Recovery orders issued | Recovery orders cashed | Recovery orders outstanding |
|----------------|--------------|---------------|------------------------|------------------------|-----------------------------|
| 2014           | 2014         | Contributions | 45,000                 | 45,000                 | -                           |
| <b>2014</b>    |              |               | <b>45,000</b>          | <b>45,000</b>          | <b>-</b>                    |
| 2015           | 2015         | Contributions | 45,595                 | 27,480                 | 18,116                      |
|                | 2015         | Interests     | 56                     | 56                     | -                           |
| <b>2015</b>    |              |               | <b>45,651</b>          | <b>27,535</b>          | <b>18,116</b>               |
| 2016           | 2016         | Contributions | 1,000                  | 1,000                  | -                           |
|                | 2016         | Interests     | 86                     | 86                     | -                           |
|                | 2015         | Contributions | -                      | 7,446                  | (7,446)                     |
| <b>2016</b>    |              |               | <b>1,086</b>           | <b>8,532</b>           | <b>(7,446)</b>              |
| 2017           | 2017         | Contributions | 20,000                 | 20,000                 | -                           |
|                | 2017         | Interests     | 7                      | 7                      | -                           |
| <b>2017</b>    |              |               | <b>20,007</b>          | <b>20,007</b>          | <b>-</b>                    |
| 2018           | 2018         | Contributions | 31,700                 | 31,700                 | -                           |
|                | 2018         | Interests     | 1                      | 1                      | -                           |
| <b>2018</b>    |              |               | <b>31,701</b>          | <b>31,701</b>          | <b>-</b>                    |
| <b>Total</b>   |              |               | <b>143,445</b>         | <b>132,776</b>         | <b>10,670</b>               |

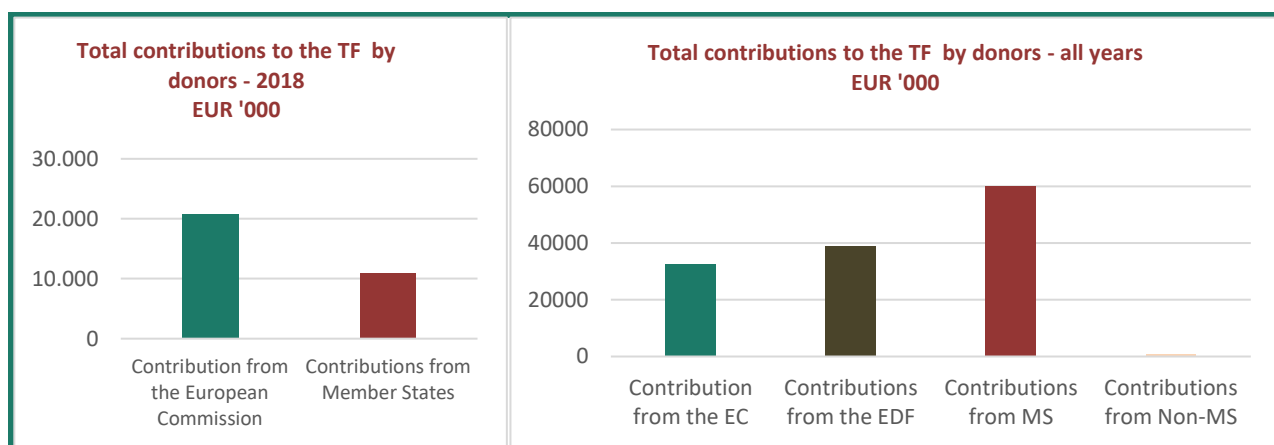

### 3.2. Overview of contributions by donors

EUR '000

| Donor                     | Contributions received during 2018 | Contributions Total | % contribution  |
|---------------------------|------------------------------------|---------------------|-----------------|
| European Commission       | 20,700                             | 32,700              | 24.66 %         |
| European Development Fund | -                                  | 39,000              | 29.41 %         |
| Member States             | 11,000                             | 60,000              | 45.24 %         |
| Non-Member States         | -                                  | 925                 | 0.70 %          |
| <b>Total</b>              | <b>31,700</b>                      | <b>132,625</b>      | <b>100.00 %</b> |

Note: The total contributions in this table do not include interests

### 3.3. Breakdown of contributions by external donors

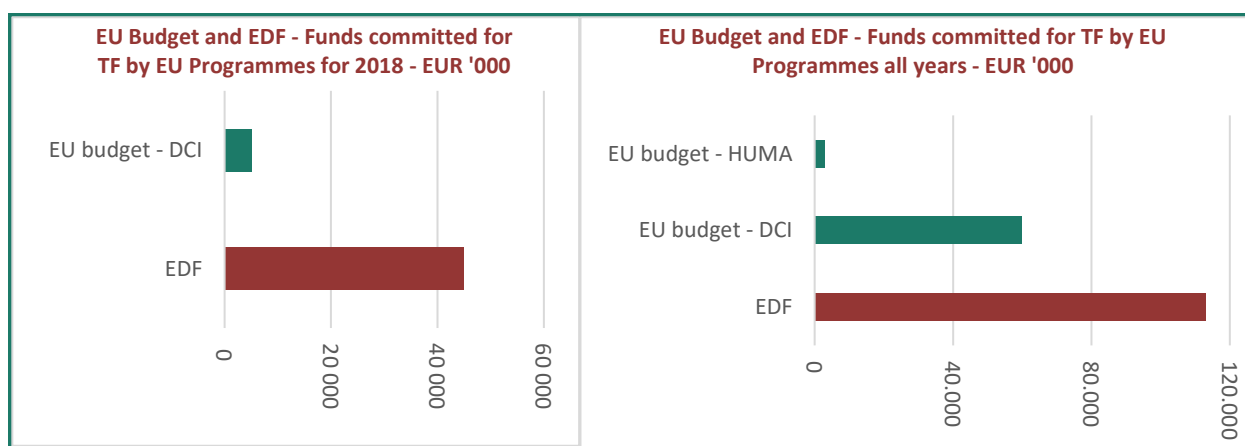

EUR '000

| Donor                             | Contributions received during 2018 | Contributions Total | % contribution  |
|-----------------------------------|------------------------------------|---------------------|-----------------|
| France                            | 10,000                             | 25,000              | 41.03 %         |
| Germany                           | -                                  | 30,000              | 49.24 %         |
| Italy                             | 1,000                              | 2,000               | 3.28 %          |
| Netherlands                       | -                                  | 3,000               | 4.92 %          |
| <b>Subtotal Member States</b>     | <b>11,000</b>                      | <b>60,000</b>       | <b>98.48 %</b>  |
| Switzerland                       | -                                  | 925                 | 1.52 %          |
| <b>Subtotal Non-member states</b> | <b>-</b>                           | <b>925</b>          | <b>1.52 %</b>   |
| <b>Total external donors</b>      | <b>11,000</b>                      | <b>60,925</b>       | <b>100.00 %</b> |

### 3.4. Breakdown of Trust Fund contributions from the European Union (EU) budget and from the European Development Fund (EDF)

EUR '000

| EU programme                                                    | Committed for the EUTF |                | Paid to the EUTF |               |
|-----------------------------------------------------------------|------------------------|----------------|------------------|---------------|
|                                                                 | 2018                   | All            | 2018             | All           |
| EDF - Envelope A: National Indicative Programme (NIP) endowment | 45,000                 | 93,000         | -                | 39,000        |
| EDF - Humanitarian and emergency aid                            | -                      | 15,000         | -                | -             |

## 5. GLOSSARY

| Term                             | Definition                                                                                                                                                                                                                                                                                        |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amount available for commitments | This amount defines the total amount of legal obligations (contracts, grant agreements/decisions) that can be incurred.                                                                                                                                                                           |
| Amount available for payments    | Payment appropriations or contributions received to cover expenditure, arising from legal commitments entered in the current year and/or earlier years.                                                                                                                                           |
| Appropriations                   | Amount of commitments/payments authorized by Parliament and Council in the annual EU budget.                                                                                                                                                                                                      |
| Budget item                      | As far as the budget structure is concerned, revenue and expenditure are shown in the budget in accordance with a binding nomenclature which reflects the nature and purpose of each item. The budget nomenclature reflects different levels of disaggregation (title, chapter, article or item). |
| Committed amount                 | Amount reserved through a Commission decision or contract conclusion for future legal obligations (contracts, grant agreements/decisions)                                                                                                                                                         |
| Contracted amount                | Amounts previously reserved, translated into binding contracts                                                                                                                                                                                                                                    |
| EDF                              | European Development Fund                                                                                                                                                                                                                                                                         |
| EUTFs                            | EU Trust Funds are Trust Funds directly implemented by the European Commission pooling resources from various sources.                                                                                                                                                                            |
| Origin of funding                | Amounts available broken down by type of donor                                                                                                                                                                                                                                                    |
| Implementation rate              | Share of available amounts committed or paid                                                                                                                                                                                                                                                      |
| Paid amount                      | Disbursement made to honor legal obligations.                                                                                                                                                                                                                                                     |
| Spending area                    | The nomenclature used in the tables by spending area corresponds to OECD DAC Sector codes for Development Aid. Due to specific constraints for the preparation of OECD reports, amounts reported here can differ from official OECD reports.                                                      |
| Total Pledge                     | Total funding for the trust fund as agreed by donors.                                                                                                                                                                                                                                             |
| Trust Fund                       | Fund established for a specific purpose with financial contributions from the EU budget and one or more donors and administered by an administrative agent, the Trustee.                                                                                                                          |

## **Annex 3D Draft annual accounts and financial reports for EU Trust Fund Africa**

### **Content Annex 3D**

- **Part 1 – Background Information on the EU Trust Fund Africa**
- **Part 2 – Financial Statements and Explanatory Notes**
- **Part 3 – Annual Financial Report**

## Part 1 - BACKGROUND INFORMATION ON THE EUTF FOR AFRICA

### General background on Union Trust Funds

In accordance with Articles 234 and 235 of the Financial Regulation applicable to the general budget of the Union (EU FR)<sup>28</sup> and Article 35 of the Financial Regulation applicable to the 11<sup>th</sup> European Development Fund (EDF FR)<sup>29</sup>, the European Commission may establish Union trust funds for external actions ('EU trust funds'). The Union trust funds are constituted under an agreement concluded with other donors for emergency and post-emergency actions necessary to react to a crisis, or for thematic actions.

Union trust funds are established by the European Commission with a decision after consulting or approval of the European Parliament and the Council. This decision includes the constitutive agreement with other donors.

Union trust funds are only established and implemented subject to the following conditions:

- there is added value of the Union intervention: the objectives of Union trust funds, in particular by reason of their scale or potential effects, may be better achieved at Union level than at national level and the use of the existing financing instruments would not be sufficient to achieve policy objectives of the Union;
- Union trust funds bring clear political visibility for the Union and managerial advantages as well as better control by the Union of risks and disbursements of the Union and other donors' contributions;
- Union trust funds do not duplicate other existing funding channels or similar instruments without providing any additionality;
- the objectives of Union trust funds are aligned with the objectives of the Union instrument or budgetary item from which they are funded.

A board chaired by the Commission is established for each Union trust fund to ensure a fair representation of the donors and to decide upon the use of the funds. The board includes a representative of each non-contributing Member State as an observer. The rules for the composition of the board and its internal rules shall be laid down in the constitutive agreement of the Union trust fund.

Union trust funds are established for a limited duration as determined in their constitutive agreement. That duration may be extended upon request of the board of the Union trust fund and upon presentation by the Commission of a report justifying the extension. The European Parliament and/or the Council may request the Commission to discontinue the appropriations for the Trust Fund or revise the constitutive act with a view to liquidate it.

The accounting officer of the Commission serves as the accounting officer of the Union trust funds. The accounting officer is responsible for laying down accounting procedures and chart of accounts common to all Union trust funds. The Commission's internal auditor, OLAF and the Court of Auditors exercise the same powers over Union trust funds as they do in respect of other actions carried out by the Commission. The Union trust funds are also subject to an independent external audit every year.

### Current EU Trust Funds

To date, the Commission has set up four EUTFs:

- The **BÊKOU EUTF**, whose objective is to support all aspects of the Central African Republic's exit from crisis and its reconstruction efforts. Established on 15 July 2014;
- The **MADAD EUTF**, a European Union Regional Trust Fund in response to the Syrian crisis. Established on 15 December 2014;

---

<sup>28</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union

<sup>29</sup> Council regulation (EU) 2018/1877 of 26 November 2018 on the financial regulation applicable to the 11<sup>th</sup> European Development Fund, and repealing Regulation (EU) 2015/323

- The **AFRICA EUTF**; a European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa. Established on 12 November 2015;
- The **COLOMBIA EUTF**; to support the implementation of the peace agreement in the early recovery and stabilisation post conflict. Established on 12 December 2016.

Further information is available on the websites of individual EUTFs:

## The EUTF Africa

European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa ('EUTF Africa') was launched on 12 November 2015 during the [Valletta Summit on Migration](#). The main objectives of this trust fund is to support all aspects of stability and contribute to better migration management as well as addressing the root causes of destabilisation, forced displacement and irregular migration, in particular by promoting resilience, economic and equal opportunities, security and development and addressing human rights abuses.

The trust fund operates in three main geographic areas, namely [the Sahel region and Lake Chad area](#), [the Horn of Africa](#) and [the North of Africa](#) but also the neighbouring countries of the eligible countries may benefit, on a case by case basis, from the Trust fund's projects. The Trust Fund is established for a limited period, until 31 December 2020 in order to provide a short and medium-term response to the challenges of the regions. The trust fund is managed from Brussels.

The Trust Fund Board and the Operational Committee of the EUTF Africa are composed of representatives of the donors and of the Commission, as well as representatives of non-contributing EU Member States, authorities of eligible countries' and regional organisations as observers.

The Board establishes and reviews the strategy of the EUTF. The Board shall meet at least once a year.

The Operational Committee examines, approves and supervises the implementation of the actions financed by the Fund. The Committee also approves the annual accounts and the annual reports on the activities financed by the Trust Fund.

## Annual accounts of the EUTF Africa

According to Article 7 of 'The agreement establishing the European Union emergency trust fund for stability and addressing root causes of irregular migration and displaced persons in Africa and its internal rules' ('Constitutive agreement') the annual accounts comprise two parts: (1) The annual financial report which is the responsibility of the EUTF manager and (2) The annual financial statements prepared by the EC Accounting Officer, who is, based on the same article, also the Accounting Officer of the trust fund.

According to Article 8 of the Constitutive agreement the financial statements shall be prepared in accordance with the accounting rules adopted by the Commission's Accounting Officer (EU Accounting Rules, EAR) that are based on the International Public Sector Accounting Standards (IPSAS).

The annual accounts are subject to independent external audit and the final annual accounts are submitted by the EUTF manager and the Accounting Officer to the Operational Committee for approval (Article 8.3.4(c)).

## Highlights of the year

As of 31 December 2018, resources pledged to the EUTF Africa amounted to approximately EUR 4.2 billion. This includes around EUR 3.7 billion from the European Development Fund (EDF) and EU financial instruments including the Development Cooperation Instrument (DCI), the European Neighbourhood Instrument (ENI), the Asylum, Migration and Integration Fund (AMIF) and funding from the Directorate-General for European Civil Protection and Humanitarian Aid Operations (DG ECHO), as well as EUR 489.5 million from EU Member States and other donors (Switzerland and Norway).

In the course of 2018, the overall resources of the EUTF Africa increased by EUR 902 million, including new pledges of EUR 674 million from the EDF and EUR 117 million from EU Budget. The EUTF Africa received 24 new pledges from EU Member States and other donors amounting to EUR 110 million (EUR 49 million to the Sahel and Lake Chad window, EUR 47 million to the North of Africa window and EUR 14 million to the Horn of Africa window). All pledges from EU Member States and other donors made in 2018 plus an outstanding pledge of 2017 were certified by the end of 2018. The conclusions of the European Council of 28 June 2018 called on the EU and its Member States to provide additional funding to the EUTF Africa. As a follow-up, the Commission adopted on 6 July a decision to transfer EUR 500 million from the 11<sup>th</sup> EDF reserve.

With regards the state of implementation of the EUTF Africa in the year 2018, 45 new programmes were adopted as well as 13 top-ups across the three regions including cross-window programmes (16 in the Sahel/Lake Chad, 26 in the Horn of Africa and 9 in the North of Africa and 7 cross-window). This brings, as of the end of 2018, the total number of programmes approved by Operational committees to 187 for a total of EUR 3,590 million. As of the end of 2018, contracts signed with implementing partners have reached 366, for an overall amount of EUR 2,461 million, of which EUR 949.3 million in new operational contracts for 2018 only. Modifications to old contracts bring the total operational contracted amount in 2018 to EUR 959.9 million. The contracting rate as of the end of 2018 has improved compared to the contracting rate as of the end of 2017 (69% of signed contracts over approved funding as opposed to 62.9%).

In the course of 2018, the EUTF Africa has further intensified its efforts together with its African and European partners, to foster stability and contribute to improved migration management in the Sahel and Lake Chad, the Horn of Africa and the North of Africa regions. It continued addressing the root causes of destabilization, forced displacement and irregular migration, by promoting development and security. During its third year, the EUTF Africa has further demonstrated its added-value as a swift and effective implementation tool which facilitates political dialogue with partner countries, applies innovative approaches and produces concrete results by pooling together funding and expertise from a variety of stakeholders.

Through the EUTF Africa, over 5.3 million vulnerable people benefitted from basic services and food security and nutrition programmes. Over 150,000 people were reached by information campaigns on resilience-building practices and basic rights and 96 000 migrants, or potential migrants, were reached out by information campaign on migration and risks linked to irregular migration. Through the EU-IOM Initiative, the EUTF Africa has supported 42,628 vulnerable migrants voluntary returns mostly from Libya (18,329) and Niger (17,226), and more than 58,000 vulnerable migrants were assisted upon return to their country of origin. Through the Better Migration Management programme in the Horn of Africa alone, the EUTF Africa has already assisted almost 11,000 migrants and forcibly displaced people and has trained nearly 1,600 persons on migration management.

In the financial statements, the impact of this increased activity and new contracts is most visible when looking at:

- Pre-financing (see notes 2.1 and 2.2): increased by EUR 52.16 million as advances on the new contracts were paid out;
- Payables and accrued charges (see notes 2.6 and 2.7): increased by EUR 85.34 million as more cost claims are processed but also more expenses must be accrued for;

- Expenses (see notes 3.2 and 3.3): increased from EUR 279.3 million in 2017 to EUR 585.35 million in 2018 as the Trust Fund is in its third year of existence and many more contracts are being implemented;
- Outstanding commitments not yet expensed (see note 4.1) increased from EUR 926.14 million to EUR 1,308.89 million due to the new contracts.

## NOTES TO THE FINANCIAL STATEMENTS

### 1. SIGNIFICANT ACCOUNTING POLICIES

#### 1.1. ACCOUNTING PRINCIPLES

The objective of financial statements is to provide information about the financial position, performance and cashflows of an entity that is useful to a wide range of users.

The overall considerations (or accounting principles) to be followed when preparing the financial statements are laid down in EU Accounting Rule 1 'Financial Statements' and are the same as those described in IPSAS 1: fair presentation, accrual basis, going concern, consistency of presentation, materiality, aggregation, offsetting and comparative information. The qualitative characteristics of financial reporting are relevance, faithful representation (reliability), understandability, timeliness, comparability and verifiability.

#### 1.2. BASIS OF PREPARATION

##### 1.2.1. Reporting period

Financial statements are presented annually. The accounting year begins on 1 January and ends on 31 December.

##### 1.2.2. Currency and basis for conversion

The annual accounts are presented in thousands of euros, the euro being the EU's functional and reporting currency. Foreign currency transactions are translated into euros using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the re-translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of financial performance. Different conversion methods apply to property, plant and equipment and intangible assets, which retain their value in euros at the date when they were purchased.

Year-end balances of monetary assets and liabilities denominated in foreign currencies are translated into euros on the basis of the European Central Bank (ECB) exchange rates applying on 31 December.

## Euro exchange rates

| Currency | 31.12.2018 | 31.12.2017 | Currency | 31.12.2018 | 31.12.2017 |
|----------|------------|------------|----------|------------|------------|
| BGN      | 1.9558     | 1.9558     | PLN      | 4.3014     | 4.1770     |
| CZK      | 25.7240    | 25.5350    | RON      | 4.6635     | 4.6585     |
| DKK      | 7.4673     | 7.4449     | SEK      | 10.2548    | 9.8438     |
| GBP      | 0.8945     | 0.8872     | CHF      | 1.1269     | 1.1702     |
| HRK      | 7.4125     | 7.4400     | JPY      | 125.8500   | 135.0100   |
| HUF      | 320.9800   | 310.3300   | USD      | 1.1450     | 1.1993     |

### 1.2.3. Use of estimates

In accordance with IPSAS and generally accepted accounting principles, the financial statements necessarily include amounts based on estimates and assumptions by management based on the most reliable information available. Significant estimates include, but are not limited to; accrued and deferred revenue and charges, provisions, financial risk on accounts receivables, contingent assets and liabilities, and degree of impairment of assets. Actual results could differ from those estimates.

Reasonable estimates are essential part of the preparation of financial statements and do not undermine their reliability. An estimate may need revision if changes occur in the circumstances on which the estimate was based or as a result of new information or more experience. By its nature, the revision of an estimate does not relate to prior periods and is not the correction of an error. The effect of a change in accounting estimate shall be recognised in the surplus or deficit in the periods in which it becomes known.

## 1.3. BALANCE SHEET

### 1.3.1. Financial assets

The financial assets are classified in the following categories: financial assets at fair value through surplus or deficit; loans and receivables; held-to-maturity investments; and available for sale financial assets. The classification of the financial instruments is determined at initial recognition and re-evaluated at each balance sheet date.

#### *(i) Financial assets at fair value through surplus or deficit*

A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by the entity. Derivatives are also categorised in this category. Assets in this category are classified as current assets if they are expected to be realised within 12 months of the balance sheet date. During this financial year, the entity did not hold any investments in this category.

#### *(ii) Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the entity provides money, goods or services directly to a debtor with no intention of trading the receivable. They are included in non-current assets, except for maturities within 12 months of the balance sheet date. Loans and receivables include term deposits with the original maturity above three months.

### *(iii) Held-to-maturity investments*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the entity has the positive intention and ability to hold to maturity. During this financial year, the entity did not hold any investments in this category.

### *(iv) Available for sale financial assets*

Available for sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are classified as either current or non-current assets, depending on the period of time the entity expects to hold them, which is usually the maturity date. During this financial year, the entity did not hold any investments in this category.

## **Initial recognition and measurement**

Purchases and sales of financial assets at fair value through surplus or deficit, held-to-maturity and available for sale are recognised on trade date - the date on which the entity commits to purchase or sell the asset. Cash equivalents, loans and term deposits are recognised at settlement date. Financial instruments are initially recognised at fair value. For all financial assets not carried at fair value through surplus or deficit transaction costs are added to the fair value at initial recognition.

Financial instruments are derecognised when the rights to receive cashflows from the investments have expired or the entity has transferred substantially all risks and rewards of ownership to another party.

## **Subsequent measurement**

Financial assets at fair value through surplus or deficit are subsequently carried at fair value with gains and losses arising changes in the fair value being included in the statement of financial performance in the period in which they arise.

Loans and receivables and held-to maturity investments are carried at amortised cost using the effective interest method.

Available for sale financial assets are subsequently carried at fair value. Gains and losses arising from changes in the fair value are recognised in the fair value reserve. Interest on available for sale financial assets calculated using the effective interest method is recognised in the statement of financial performance.

The entity assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired and whether an impairment loss should be recorded in the statement of financial performance.

### **1.3.2. Pre-financing amounts**

Pre-financing is a payment intended to provide the beneficiary with a cash advance, i.e. a float. It may be split into a number of payments over a period defined in the particular contract, decision, agreement or basic legal act. The float or advance is either used for the purpose for which it was provided during the period defined in the agreement or it is repaid. If the beneficiary does not incur eligible expenditure, he has the obligation to return the pre-financing advance to the entity. The amount of the pre-financing may be reduced (wholly or partially) by the acceptance of eligible costs (which are recognised as expenses).

Pre-financing is, on subsequent balance sheet dates, measured at the amount initially recognised on the balance sheet less eligible expenses (including estimated amounts where necessary) incurred during the period.

### 1.3.3. Receivables and recoverables

As the EU accounting rules require a separate presentation of exchange and non-exchange transactions, for the purpose of drawing up the accounts, receivables are defined as stemming from exchange transactions and recoverables are defined as stemming from non-exchange transactions (when the entity receives value from another entity without directly giving approximately equal value in exchange).

Receivables from exchange transactions meet the definition of financial instruments and are thus classified as loans and receivables and measured accordingly (see 1.3.1 above).

Recoverables from non-exchange transactions are carried at original amount (adjusted for interests and penalties) less write-down for impairment. A write-down for impairment is established when there is objective evidence that the entity will not be able to collect all amounts due according to the original terms of the recoverables. The amount of the write-down is the difference between the asset's carrying amount and the recoverable amount. The amount of the write-down is recognised in the statement of financial performance.

### 1.3.4. Cash and cash equivalents

Cash and cash equivalents are financial instruments and include cash at hand, deposits held at call or at short notice with banks, and other short-term highly liquid investments with original maturities of three months or less.

### 1.3.5. Provisions

Provisions are recognised when the entity has a present legal or constructive obligation towards third parties as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognised for future operating losses. The amount of the provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the provision involves a large number of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities ('expected value' method).

Provisions for onerous contracts are measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

### 1.3.6. Payables

Included under accounts payable are both amounts related to exchange transactions such as the purchase of goods and services and to non-exchange transactions e.g. to cost claims from beneficiaries, grants or other EU funding.

Where grants or other funding is provided to the beneficiaries, the cost claims are recorded as payables for the requested amount when the cost claim is received. Upon verification and acceptance of the eligible costs, the payables are valued at the accepted and eligible amount.

Payables arising from the purchase of goods and services are recognised at invoice reception for the original amount and corresponding expenses are entered in the accounts when the supplies or services are delivered and accepted by the entity.

### 1.3.7. Accrued and deferred revenue and charges

Transactions and events are recognised in the financial statements in the period to which they relate. At year-end, if an invoice is not yet issued but the service has been rendered, the supplies have been delivered by the entity or a contractual agreement exists (e.g. by reference to a contract), an accrued revenue will be recognised in the financial statements. In addition,

at year-end, if an invoice is issued but the services have not yet been rendered or the goods supplied have not yet been delivered, the revenue will be deferred and recognised in the subsequent accounting period.

Expenses are also accounted for in the period to which they relate. At the end of the accounting period, accrued expenses are recognised based on an estimated amount of the transfer obligation of the period. The calculation of accrued expenses is done in accordance with detailed operational and practical guidelines issued by the Accounting Officer which aim at ensuring that the financial statements provide a faithful representation of the economic and other phenomena they purport to represent. By analogy, if a payment has been made in advance for services or goods that have not yet been received, the expense will be deferred and recognised in the subsequent accounting period.

## **1.4. STATEMENT OF FINANCIAL PERFORMANCE**

### **1.4.1. Revenue**

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the entity, which represents an increase in net assets, other than increases relating to contributions from owners.

Depending on the nature of the underlying transactions in the statement of financial performance it is distinguished between:

#### *(i) Revenue from non-exchange transactions*

Revenue from non-exchange transactions are taxes and transfers because the transferor provides resources to the recipient entity without the recipient entity providing approximately equal value directly in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes. The entity shall recognise an asset in respect of transfers when the entity controls the resources as a result of a past event (the transfer) and expects to receive future economic benefits or service potential from those resources, and when the fair value can be reliably measured. An inflow of resources from a non-exchange transaction recognised as an asset (i.e. cash) is also recognised as revenue, except to the extent that the entity has a present obligation in respect of that transfer (condition), which needs to be satisfied before the revenue can be recognised. Until the condition is met the revenue is deferred and recognised as a liability (pre-financing received).

#### *(ii) Revenue from exchange transactions*

Revenue from the sale of goods and services is recognised when the significant risk and rewards of ownership of the goods are transferred to the purchaser. Revenue associated with a transaction involving the provision of services is recognised by reference to the stage of completion of the transaction at the reporting date.

### **1.4.2. Expenses**

Expenses are decreases in economic benefits or service potential during the reporting period in the form of outflows or consumption of assets or incurrence of liabilities that result in decreases in net assets/equity. They include both the expenses from exchange transactions and expenses from non-exchange transactions.

Expenses from exchange transactions arising from the purchase of goods and services are recognised when the supplies are delivered and accepted by the entity. They are valued at original invoice amount. Furthermore, at the balance sheet date expenses related to the service delivered during the period for which an invoice has not yet been received or accepted are recognised in the statement of financial performance.

Expenses from non-exchange transactions relate to transfers to beneficiaries and can be of three types: entitlements, transfers under agreement and discretionary grants, contributions and donations. Transfers are recognised as expenses in the period during which the events giving rise to the transfer occurred, as long as the nature of the transfer is allowed by regulation or an agreement has been signed authorising the transfer; any eligibility criteria have been met by the beneficiary; and a reasonable estimate of the amount can be made.

When a request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses due to the beneficiaries but not yet reported are estimated and recorded as accrued expense.

## **1.5. CONTINGENT ASSETS AND LIABILITIES**

### **1.5.1. Contingent assets**

A contingent asset is a possible asset that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

### **1.5.2. Contingent liabilities**

A contingent liability is a possible obligation that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation or, in the rare circumstances where the amount of the obligation cannot be measured with sufficient reliability.

## **1.6. CONSOLIDATION**

The accounts of this entity are fully consolidated in the EDF consolidated annual accounts.

## **1.7. CONTRIBUTIONS FROM DONORS**

The EU trust fund is required to finance specific projects and return remaining funds received from donors at the time of winding-up of the trust fund. Contributions from donors to the EU trust fund fulfil the criteria of revenues from non-exchange transactions under conditions. When the trust fund receives resources a liability, that equals to the received contributions, should be recorded on the balance sheet of the trust fund. The received contributions remain under liabilities until the conditions attached to the donated funds are met, i.e. eligible expenses are incurred by the trust fund.

At the balance sheet date the outstanding contribution liabilities are measured at contributions received less net expenses. Net expenses are the expenses incurred by the trust fund, including estimated amounts and if applicable, net of the revenue generated by the activities of the trust fund (e.g. bank interest). The corresponding amount of contributions is recognised as non-exchange revenue from donation. Consequently the effect on economic result of the year is nil.

For reporting purposes the net expenses of the reporting period will be attributed to the donors in proportion to net contributions paid as at 31 December, i.e. contributions paid to the trust fund as at 31 December, less net expenses allocated in the previous years. When the contribution from one donor is totally consumed, contributions will be allocated from the remaining donors. This allocation of contributions is only indicative. When the trust fund is wound up the actual split of remaining resources will be decided by the Board.

| <i>Private law bodies with a public service mission</i> | 57,390         | 32,748         |
| <i>Public law bodies</i>                                | 54,480         | 38,753         |
| <b>Total</b>                                            | <b>267,579</b> | <b>197,258</b> |

Pre-financing represents money paid out, and thus implementation of payment appropriations. As explained in note 1.3.2, these are advances not yet expensed. Thus while pre-financing reduces the outstanding RAL (see note 4.1) it represents expenses still to be recognised in the statement of financial performance.

The tables above show an increase in non-current and current pre-financing of EUR 52.16 million. This is explained by the increased activities and new contracts. New contracts were signed with the implementing partners for the total amount of EUR 850.5 million. As the new contracts were signed, advances were paid out.

Guarantees received covering pre-financing amounted to EUR 18.63 million at year-end.

#### 2.3. EXCHANGE RECEIVABLES AND NON-EXCHANGE RECOVERABLES

This heading relates entirely to the deferred administrative expenses. Since 2016, EUR 35.24 million was paid to the Commission of which EUR 18.58 million was used in the years 2016-2018 (EUR 9.08 million in 2018, see note 3.3), leaving EUR 16.66 million as deferred expenses.

#### 2.4. CASH AND CASH EQUIVALENTS

At 31 December 2018 cash and cash equivalents comprise EUR 140.46 million placed on current accounts (EUR 149.54 million in 2017) and EUR 6.41 million with a notice period below 32 days (EUR 13.03 million in 2017).

The decrease in cash and cash equivalents is a consequence of the increased level of activities of the Trust Fund and is due to the fact that throughout the year, more payments (including pre-financing) were made (EUR 565.12 million) than contributions received, EUR 550.09 million (see note 2.5).

| <b>Total</b>               | <b>396,713</b>         | <b>550,088</b>            | <b>946,801</b>      | <b>100.00%</b> | <b>(585,338)</b>          | <b>361,462</b>         |

The net contributions of the donors at 31 December equal the contributions paid less the allocated net expenses to that date. The net expenses of the current year are allocated to the donors in proportion to the contributions at 31 December.

The contribution percentage and the allocation of net results based on it is only indicative. When the Trust Fund is wound up, the final decision on the return of remaining funds will be made by the Trust Fund Board.

## NON-CURRENT LIABILITIES

### 2.6. PAYABLES

EUR '000

|                 | 31.12.2018    | 31.12.2017 |
|-----------------|---------------|------------|
| Suppliers       | 9,716         | 638        |
| Sundry payables | 3,017         | (112)      |
| <b>Total</b>    | <b>12,733</b> | <b>526</b> |

Payables include cost statements received by the EUTF. They are recorded for the amount being claimed from the moment the demand is received. The same procedure applies to invoices and credit notes received under procurement activities. The cost claims concerned have been taken into account for the year-end cut-off procedures. Following the cut-off entries, estimated eligible amounts have been recognised in the statement of financial performance. Non-eligible amounts are disclosed as other current payables.

The increase in payables is mainly due to the increase in number of cost statements received. At 31 December 2018, 27 cost claims were being processed and remained unpaid (5 in 2017).

### 2.7. ACCRUED CHARGES AND DEFERRED REVENUE

The EUTF Africa does not have any deferred revenue. All the amounts included under this heading related to accrued charges and are as follows:

EUR '000

|                 | 31.12.2018    | 31.12.2017    |
|-----------------|---------------|---------------|
| Accrued charges | 91,729        | 18,600        |
| <b>Total</b>    | <b>91,729</b> | <b>18,600</b> |

Accrued charges are the amounts estimated by the Authorising Officer of costs incurred for services and goods delivered in the year 2018 but not yet invoiced or processed by the end of the year. The amount comprises the estimated operating expenses for on-going or ended contracts without validated cost claims. The 2018 estimation used the best available information about the existing contracts. Expenses were calculated 'pro-rata' based on the value of the contract and the percentage of completion. The percentage of completion is based on the operational duration of the contract and the number of contract days lapsed at 31 December 2018.

In order to more accurately reflect the amount that is expected to be spent on projects, the value of the contracts is adjusted by the average implementation rate of contracts and the average invoice eligibility rate. Both these rates are determined based on actual data related to already implemented contracts. For large contracts the accrued charges are based on the real expenses incurred in the contract (if information is available).

For 2018 the rates applicable to the EDF were used because the types of contract and the types of beneficiaries of the EDF are representative to the type of contracts and beneficiaries in the Trust Fund. The portion of the estimated accrued charges which relates to pre-financing paid has been recorded as a reduction of the pre-financing amounts (see note 2.2).

The increase in the accrued charges is in line with the number of contracts signed. In 2018, 156 new contracts were signed with the implementing partners for the total amount of EUR 850.5 million and thus more expenses were incurred.

Included under this heading are also accrued audit charges of EUR 50,000.

### 3. NOTES TO THE STATEMENT OF FINANCIAL PERFORMANCE

#### REVENUE

#### REVENUE FROM NON-EXCHANGE TRANSACTIONS

##### 3.1. REVENUE FROM DONATIONS

This heading represents contributions from donors recognised as revenue in line with the incurred expenses. Consequently the economic result of the year is nil.

#### EXPENSES

##### 3.2. OPERATING EXPENSES

EUR '000

|                                                              | 2018           | 2017           |
|--------------------------------------------------------------|----------------|----------------|
| <i>Civilian peace-building</i>                               | 143,660        | 72,435         |

| <i>Commission</i>                                       | 13,260         | 10,694         |
| <i>EU executive agencies</i>                            | 179            | –              |
| <i>EU delegations</i>                                   | 220,707        | 103,568        |
| <b>Indirect Management</b>                              | <b>336,151</b> | <b>157,406</b> |
| Implemented by:                                         |                |                |
| <i>International organisations</i>                      | 178,251        | 66,135         |
| <i>Private law bodies with a public service mission</i> | 70,959         | 43,129         |
| <i>Public law bodies</i>                                | 86,941         | 48,143         |
| <b>Total</b>                                            | <b>570,297</b> | <b>271,669</b> |

The main part of the operating expenses relate to on-going or ended projects carried out in 2018 without any validated cost claims (or equivalent) available at 31 December and was estimated using the best information available at the time of the preparation of the annual accounts. The 2018 estimation used the best available information about the existing contracts which ensures that only costs that reflect the services or work performed by 31 December are included in the operating expenses of the year.

The tables above show a significant increase in operating expenses which is explained by the fact that, in the third year of its existence, the Trust Fund has reached maturity and peak in the implementation of the adopted actions. This trend is confirmed by the higher amount of money spent on new projects and 156 new contracts signed in 2018.

### 3.3. OTHER EXPENSES

EUR '000

|                                               | 2018          | 2017         |
|-----------------------------------------------|---------------|--------------|
| <i>Management fee EC and staff costs</i>      | 9,078         | 6,456        |
| <i>Technical assistance and communication</i> | 4,530         | 762          |
| <i>Foreign exchange losses</i>                | 696           | 253          |
| <i>Audit</i>                                  | 18            | 65           |
| <i>Other administrative expenses</i>          | 726           | 94           |
| <b>Total</b>                                  | <b>15,047</b> | <b>7,630</b> |

The management costs are charged to the EUTF Africa in accordance to Article 7.3 of the Constitutive agreement that authorises the Commission to deduct a sum of 2.75 % of the amounts contributed by the European Union to the Trust Fund and 5 % of the amounts contributed by other donors to cover its administrative costs. The amount of management fees included under this heading comprise administrative costs incurred by the Commission during 2018. The difference between amounts paid and the the amounts incurred is recorded as deferred expenses (see note 2.3).

The technical assistance expenses increased in line with the number of contracts, which increased from 7 at 31 December 2017 to 34 at 31 December 2018.

## 4. OTHER SIGNIFICANT DISCLOSURES

### 4.1. OUTSTANDING COMMITMENTS NOT YET EXPENSED

EUR '000

|                                                 | 31.12.2018 | 31.12.2017 |
|-------------------------------------------------|------------|------------|
| <i>Outstanding commitments not yet expensed</i> | 1,308,886  | 926,139    |

The amount comprises the budgetary RAL ('Reste à Liquider') less related amounts that have been included as expenses in the 2018 statement of financial performance. The budgetary RAL is an amount representing the open budgetary commitments for which payments and/or de-

commitments have not yet been made. This is the normal consequence of the existence of multi-annual programmes.

The increase in outstanding commitments not yet expensed was mainly due to the increase in the number and value of contracts (see notes 2.2 and 2.7)

#### **4.2. RELATED PARTIES**

The related parties of the EUTF Africa is the European Commission and the European Development Fund. Transactions between these entities take place as part of the normal operations of the EUTF Africa and as this is the case, no specific disclosure requirements are necessary for these transactions in accordance with the EU accounting rules.

#### **4.3. EVENTS AFTER REPORTING DATE**

At the date of transmission of these accounts, no material issues had come to the attention of or were reported to the Accounting Officer of the EUTF Africa that would require separate disclosure under this section. The annual accounts and related notes were prepared using the most recently available information and this is reflected in the information presented above.

### **5. FINANCIAL INSTRUMENTS DISCLOSURES**

#### **5.1. CURRENCY RISKS**

##### **Exposure of the EUTF Africa to currency risk at year end**

At December the ending balances of financial assets and financial liabilities did not include any amounts quoted in currencies other than euro.

#### **5.2. CREDIT RISK**

At 31 December 2018 the financial assets compose of cash and cash equivalents of EUR 146.86 million and receivables and recoverables amounting to EUR 16.66 million.

##### **Financial assets that are neither past due nor impaired**

The amounts of receivables and recoverables are related to deferred charges and accrued revenue and are thus neither past due nor impaired.

##### **Financial assets by risk category**

Cash and cash equivalents comprise EUR 140.46 million placed on current accounts and EUR 6.41 million of cash equivalents with a notice period below 32 days. The entire amount is placed in banks at prime and high grade.

#### **5.3. LIQUIDITY RISK**

##### **Maturity analysis of financial liabilities by remaining contractual maturity**

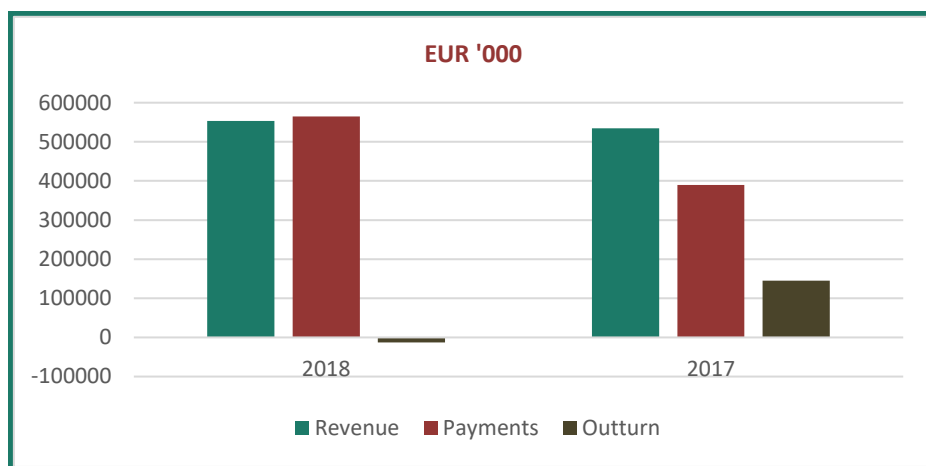

The financial liabilities largely comprise of long term liabilities to donors. Outstanding amounts will be paid when the EUTF Africa is wound-up.

## Part 3 - ANNUAL FINANCIAL REPORT

### 1. BUDGET RESULT

EUR '000

|                            | 2018            | 2017           |
|----------------------------|-----------------|----------------|
| Revenue                    | 553,106         | 534,546        |
| Payments                   | 565,121         | 389,565        |
| Exchange rate gain or loss | (692)           | 16             |
| <b>Budget result</b>       | <b>(12,706)</b> | <b>144,998</b> |

### 2. RECONCILIATION OF ECONOMIC RESULT AND BUDGET RESULT

The economic result of the year is calculated on the basis of accrual accounting principles. The budget result is however based on cash accounting rules. As the economic result and the budget result both cover the same underlying operational transactions, it is a useful control to ensure that they are reconcilable. The table below shows this reconciliation, highlighting the key reconciling amounts, split between revenue and expenditure items.

EUR '000

|                                              | 2018            | 2017           |
|----------------------------------------------|-----------------|----------------|

## 5. GLOSSARY

| Term                             | Definition                                                                                                                                                                                                                                                                                        |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amount available for commitments | This amount defines the total amount of legal obligations (contracts, grant agreements/decisions) that can be incurred.                                                                                                                                                                           |
| Amount available for payments    | Payment appropriations or contributions received to cover expenditure, arising from legal commitments entered in the current year and/or earlier years.                                                                                                                                           |
| Appropriations                   | Amount of commitments/payments authorized by Parliament and Council in the annual EU budget.                                                                                                                                                                                                      |
| Budget item                      | As far as the budget structure is concerned, revenue and expenditure are shown in the budget in accordance with a binding nomenclature which reflects the nature and purpose of each item. The budget nomenclature reflects different levels of disaggregation (title, chapter, article or item). |
| Committed amount                 | Amount reserved through a Commission decision or contract conclusion for future legal obligations (contracts, grant agreements/decisions)                                                                                                                                                         |
| Contracted amount                | Amounts previously reserved, translated into binding contracts                                                                                                                                                                                                                                    |
| EDF                              | European Development Fund                                                                                                                                                                                                                                                                         |
| EUTFs                            | EU Trust Funds are Trust Funds directly implemented by the European Commission pooling resources from various sources.                                                                                                                                                                            |
| Origin of funding                | Amounts available broken down by type of donor                                                                                                                                                                                                                                                    |
| Implementation rate              | Share of available amounts committed or paid                                                                                                                                                                                                                                                      |
| Paid amount                      | Disbursement made to honor legal obligations.                                                                                                                                                                                                                                                     |
| Spending area                    | The nomenclature used in the tables by spending area corresponds to OECD DAC Sector codes for Development Aid. Due to specific constraints for the preparation of OECD reports, amounts reported here can differ from official OECD reports.                                                      |
| Total Pledge                     | Total funding for the trust fund as agreed by donors.                                                                                                                                                                                                                                             |
| Trust Fund                       | Fund established for a specific purpose with financial contributions from the EU budget and one or more donors and administered by an administrative agent, the Trustee.                                                                                                                          |

## Part 1 - BACKGROUND INFORMATION ON THE EU TRUST FUND FOR COLOMBIA

### General background on Union Trust Funds

In accordance with Articles 234 and 235 of the Financial Regulation applicable to the general budget of the Union (EU FR)<sup>31</sup> and Article 35 of the Financial Regulation applicable to the 11<sup>th</sup> European Development Fund (EDF FR)<sup>32</sup>, the European Commission may establish Union trust funds for external actions ('EU trust funds'). The Union trust funds are constituted under an agreement concluded with other donors for emergency and post-emergency actions necessary to react to a crisis, or for thematic actions.

Union trust funds are established by the European Commission with a decision after consulting or approval of the European Parliament and the Council. This decision includes the constitutive agreement with other donors.

Union trust funds are only established and implemented subject to the following conditions:

- there is added value of the Union intervention: the objectives of Union trust funds, in particular by reason of their scale or potential effects, may be better achieved at Union level than at national level and the use of the existing financing instruments would not be sufficient to achieve policy objectives of the Union;
- Union trust funds bring clear political visibility for the Union and managerial advantages as well as better control by the Union of risks and disbursements of the Union and other donors' contributions;
- Union trust funds do not duplicate other existing funding channels or similar instruments without providing any additionality;
- the objectives of Union trust funds are aligned with the objectives of the Union instrument or budgetary item from which they are funded.

A board chaired by the Commission is established for each Union trust fund to ensure a fair representation of the donors and to decide upon the use of the funds. The board includes a representative of each non-contributing Member State as an observer. The rules for the composition of the board and its internal rules shall be laid down in the constitutive agreement of the Union trust fund.

Union trust funds are established for a limited duration as determined in their constitutive agreement. That duration may be extended upon request of the board of the Union trust fund and upon presentation by the Commission of a report justifying the extension. The European Parliament and/or the Council may request the Commission to discontinue the appropriations for the Trust Fund or revise the constitutive act with a view to liquidate it.

The accounting officer of the Commission serves as the accounting officer of the Union trust funds. The accounting officer is responsible for laying down accounting procedures and chart of accounts common to all Union trust funds. The Commission's internal auditor, OLAF and the Court of Auditors exercise the same powers over Union trust funds as they do in respect of other actions carried out by the Commission. The Union trust funds are also subject to an independent external audit every year.

### Current EU Trust Funds

To date, the Commission has set up four EUTFs:

- The **BÊKOU EUTF**, whose objective is to support all aspects of the Central African Republic's exit from crisis and its reconstruction efforts. Established on 15 July 2014;

---

<sup>31</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union

<sup>32</sup> Council regulation (EU) 2018/1877 of 26 November 2018 on the financial regulation applicable to the 11<sup>th</sup> European Development Fund, and repealing Regulation (EU) 2015/323

- The **MADAD EUTF**, a European Union Regional Trust Fund in response to the Syrian crisis. Established on 15 December 2014;
- The **AFRICA EUTF**; a European Union Emergency Trust Fund for stability and addressing root causes of irregular migration and displaced persons in Africa. Established on 12 November 2015;
- The **COLOMBIA EUTF**; to support the implementation of the peace agreement in the early recovery and stabilisation post conflict. Established on 12 December 2016.

Further information is available on the websites of individual EUTFs:

## The EU Trust Fund for Colombia

The EU Trust Fund for Colombia was established to support the implementation of the peace agreement in the early recovery and stabilisation post conflict in Colombia. The overall aim is to help Colombia to secure a stable and lasting peace, to rebuild its social and economic fabric, and to give new hope to the people of Colombia. Priority is given to rural areas, which have been disproportionately affected by the conflict.

During the EU-CELAC Summit of 2015, the EU and its Member States confirmed at the highest level their willingness to set up a Trust Fund in support of the peace process in Colombia. It enables the European Union to contribute to the implementation of the peace agreement, effectively and in a coordinated way. The signature of the constitutive agreement of the EU Trust Fund for Colombia took place on 12 December 2016. The time limit for the duration of the Trust fund is set at 31 December 2020, but may be extended.

The management of the Trust Fund is ensured by the European Commission which also acts as the secretariat of its two governing bodies – the Trust Fund Board and the Operational Committee. The Trust Fund Board is composed of representatives of the Trust Fund Members (the donors and the European Commission) and Observers (European Union Member States that are not donors). The main task of the Board is to establish and review the strategy and the scope of the EUTF. The Operational Committee is responsible for the selection of the actions financed by the Fund and supervises their implementation. It also approves the annual accounts and the annual reports on the activities financed by the Trust Fund.

## Annual accounts of the EU Trust Fund for Colombia

According to Article 8 of the Agreement establishing the European Union trust fund for Colombia ('The Constitutive agreement'), the annual accounts comprise two parts: (1) The annual financial report which is the responsibility of the EUTF manager and (2) The annual financial statements prepared by the Commission's Accounting Officer, who is, based on the same article also the Accounting Officer of the trust fund.

According to Article 8 of the Constitutive agreement the financial statements shall be prepared in accordance with the accounting rules adopted by the Commission's Accounting Officer (EU Accounting Rules, EAR) that are based on the International Public Sector Accounting Standards (IPSAS).

The annual accounts are subject to independent external audit and the final annual accounts are submitted by the EUTF manager and the Accounting Officer to the operational board for approval (Article 8.3.4(c)).

## Highlights of the year

2018 saw the first Parliamentary and Presidential elections in Colombia since the signature of the Peace agreement and therefore with FARC participating as a political party. Elections took place in a largely peaceful environment, qualified by local media as the most peaceful in decades.

On the Parliamentary elections on 11 March 2018 turnout was higher than expected (45-46%). While there was no major change in seat distribution, the main winner in the Senate was Centro Democrático party (right-wing) and the Liberals in the House of Representatives. FARC registered low votes, not winning a seat in their own right. However, the party still benefits from 5 seats in each house as a result of the peace agreement.

Centro Democrático also won the Presidential elections and its candidate, Ivan Duque, became President of Colombia on 7 August 2018. The new government expressed its commitment to implement the peace agreement and has worked closely with the EU in all aspects pertaining to the Trust Fund. Emilio Archila was appointed High Counsellor for post-conflict and stabilization and became the Colombian representative in the Trust Fund governance bodies.

At the Strategic Board of the Trust Fund, members expressed general satisfaction with state of play of the Trust Fund and the way it has been managed to date. It was agreed that strategic priorities (rural development and reincorporation) remain valid. Consensus that we should now move to a new phase in which projects should serve to anchor a structured dialogue with the government on peace implementation, achieve a greater impact and be more aligned and complementary to government programmes.

Additional pledges exceeding EUR 28 million were announced. Chile announced its intention to contribute USD 100 000 becoming the first non-European country that contributes to any EU Trust Fund.

At operational level, the Trust Fund reached cruising speed during 2018 as it was the second year of its existence. EUR 36.6 million was contracted, reaching a total of EUR 56.5 million contracted at the end of the year (plus EUR 2 million administrative expenditure). The recruitment of staff members was completed.

In the financial statements, the impact of the above mentioned activities are most visible when looking at:

- Pre-financing (see notes 2.1 and 2.2): An increase of EUR 5.41 million resulting from the high amount of new contracts signed, and so advances paid out;
- Expenses (see notes 3.2 and 3.3): An increase of EUR 12.74 million in 2018 reflecting the growing level of activities of the Trust Fund;
- Outstanding commitments not yet expensed (see note 4.1): An increase of EUR 15.36 million due to the new contracted amounts.

## NOTES TO THE FINANCIAL STATEMENTS

### 1. SIGNIFICANT ACCOUNTING POLICIES

#### 1.1. ACCOUNTING PRINCIPLES

The objective of financial statements is to provide information about the financial position, performance and cashflows of an entity that is useful to a wide range of users.

The overall considerations (or accounting principles) to be followed when preparing the financial statements are laid down in EU Accounting Rule 1 'Financial Statements' and are the same as those described in IPSAS 1: fair presentation, accrual basis, going concern, consistency of presentation, materiality, aggregation, offsetting and comparative information. The qualitative characteristics of financial reporting are relevance, faithful representation (reliability), understandability, timeliness, comparability and verifiability.

#### 1.2. BASIS OF PREPARATION

##### 1.2.1. Reporting period

Financial statements are presented annually. The accounting year begins on 1 January and ends on 31 December.

##### 1.2.2. Currency and basis for conversion

The annual accounts are presented in thousands of euros, the euro being the EU's functional and reporting currency. Foreign currency transactions are translated into euros using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the re-translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of financial performance. Different conversion methods apply to property, plant and equipment and intangible assets, which retain their value in euros at the date when they were purchased.

Year-end balances of monetary assets and liabilities denominated in foreign currencies are translated into euros on the basis of the European Central Bank (ECB) exchange rates applying on 31 December.

### Euro exchange rates

| Currency | 31.12.2018 | 31.12.2017 | Currency | 31.12.2018 | 31.12.2017 |
|----------|------------|------------|----------|------------|------------|
| BGN      | 1.9558     | 1.9558     | PLN      | 4.3014     | 4.1770     |
| CZK      | 25.7240    | 25.5350    | RON      | 4.6635     | 4.6585     |
| DKK      | 7.4673     | 7.4449     | SEK      | 10.2548    | 9.8438     |
| GBP      | 0.8945     | 0.8872     | CHF      | 1.1269     | 1.1702     |
| HRK      | 7.4125     | 7.4400     | JPY      | 125.8500   | 135.0100   |
| HUF      | 320.9800   | 310.3300   | USD      | 1.1450     | 1.1993     |

### 1.2.3. Use of estimates

In accordance with IPSAS and generally accepted accounting principles, the financial statements necessarily include amounts based on estimates and assumptions by management based on the most reliable information available. Significant estimates include, but are not limited to; accrued and deferred revenue and charges, provisions, financial risk on accounts receivables, contingent assets and liabilities, and degree of impairment of assets. Actual results could differ from those estimates.

Reasonable estimates are essential part of the preparation of financial statements and do not undermine their reliability. An estimate may need revision if changes occur in the circumstances on which the estimate was based or as a result of new information or more experience. By its nature, the revision of an estimate does not relate to prior periods and is not the correction of an error. The effect of a change in accounting estimate shall be recognised in the surplus or deficit in the periods in which it becomes known.

## 1.3. BALANCE SHEET

### 1.3.1. Financial assets

The financial assets are classified in the following categories: financial assets at fair value through surplus or deficit; loans and receivables; held-to-maturity investments; and available for sale financial assets. The classification of the financial instruments is determined at initial recognition and re-evaluated at each balance sheet date.

#### *(i) Financial assets at fair value through surplus or deficit*

A financial asset is classified in this category if acquired principally for the purpose of selling in the short term or if so designated by the entity. Derivatives are also categorised in this category. Assets in this category are classified as current assets if they are expected to be realised within 12 months of the balance sheet date. During this financial year, the entity did not hold any investments in this category.

#### *(ii) Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the entity provides money, goods or services directly to a debtor with no intention of trading the receivable. They are included in non-current assets, except for maturities within 12 months of the balance sheet date. Loans and receivables include term deposits with the original maturity above three months.

#### *(iii) Held-to-maturity investments*

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the entity has the positive intention and ability to hold

to maturity. During this financial year, the entity did not hold any investments in this category.

#### *(iv) Available for sale financial assets*

Available for sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are classified as either current or non-current assets, depending on the period of time the entity expects to hold them, which is usually the maturity date. During this financial year, the entity did not hold any investments in this category.

### **Initial recognition and measurement**

Purchases and sales of financial assets at fair value through surplus or deficit, held-to-maturity and available for sale are recognised on trade date - the date on which the entity commits to purchase or sell the asset. Cash equivalents, loans and term deposits are recognised at settlement date. Financial instruments are initially recognised at fair value. For all financial assets not carried at fair value through surplus or deficit transaction costs are added to the fair value at initial recognition.

Financial instruments are derecognised when the rights to receive cashflows from the investments have expired or the entity has transferred substantially all risks and rewards of ownership to another party.

### **Subsequent measurement**

Financial assets at fair value through surplus or deficit are subsequently carried at fair value with gains and losses arising changes in the fair value being included in the statement of financial performance in the period in which they arise.

Loans and receivables and held-to maturity investments are carried at amortised cost using the effective interest method.

Available for sale financial assets are subsequently carried at fair value. Gains and losses arising from changes in the fair value are recognised in the fair value reserve. Interest on available for sale financial assets calculated using the effective interest method is recognised in the statement of financial performance.

The entity assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired and whether an impairment loss should be recorded in the statement of financial performance.

#### **1.3.2. Pre-financing amounts**

Pre-financing is a payment intended to provide the beneficiary with a cash advance, i.e. a float. It may be split into a number of payments over a period defined in the particular contract, decision, agreement or basic legal act. The float or advance is either used for the purpose for which it was provided during the period defined in the agreement or it is repaid. If the beneficiary does not incur eligible expenditure, he has the obligation to return the pre-financing advance to the entity. The amount of the pre-financing may be reduced (wholly or partially) by the acceptance of eligible costs (which are recognised as expenses).

Pre-financing is, on subsequent balance sheet dates, measured at the amount initially recognised on the balance sheet less eligible expenses (including estimated amounts where necessary) incurred during the period.

#### **1.3.3. Receivables and recoverables**

As the EU accounting rules require a separate presentation of exchange and non-exchange transactions, for the purpose of drawing up the accounts, receivables are defined as

stemming from exchange transactions and recoverables are defined as stemming from non-exchange transactions (when the entity receives value from another entity without directly giving approximately equal value in exchange).

Receivables from exchange transactions meet the definition of financial instruments and are thus classified as loans and receivables and measured accordingly (see 1.3.1 above).

Recoverables from non-exchange transactions are carried at original amount (adjusted for interests and penalties) less write-down for impairment. A write-down for impairment is established when there is objective evidence that the entity will not be able to collect all amounts due according to the original terms of the recoverables. The amount of the write-down is the difference between the asset's carrying amount and the recoverable amount. The amount of the write-down is recognised in the statement of financial performance.

#### 1.3.4. Cash and cash equivalents

Cash and cash equivalents are financial instruments and include cash at hand, deposits held at call or at short notice with banks, and other short-term highly liquid investments with original maturities of three months or less.

#### 1.3.5. Provisions

Provisions are recognised when the entity has a present legal or constructive obligation towards third parties as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognised for future operating losses. The amount of the provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the provision involves a large number of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities ('expected value' method).

Provisions for onerous contracts are measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

#### 1.3.6. Payables

Included under accounts payable are both amounts related to exchange transactions such as the purchase of goods and services and to non-exchange transactions e.g. to cost claims from beneficiaries, grants or other EU funding.

Where grants or other funding is provided to the beneficiaries, the cost claims are recorded as payables for the requested amount when the cost claim is received. Upon verification and acceptance of the eligible costs, the payables are valued at the accepted and eligible amount.

Payables arising from the purchase of goods and services are recognised at invoice reception for the original amount and corresponding expenses are entered in the accounts when the supplies or services are delivered and accepted by the entity.

#### 1.3.7. Accrued and deferred revenue and charges

Transactions and events are recognised in the financial statements in the period to which they relate. At year-end, if an invoice is not yet issued but the service has been rendered, the supplies have been delivered by the entity or a contractual agreement exists (e.g. by reference to a contract), an accrued revenue will be recognised in the financial statements. In addition, at year-end, if an invoice is issued but the services have not yet been rendered or the goods supplied have not yet been delivered, the revenue will be deferred and recognised in the subsequent accounting period.

Expenses are also accounted for in the period to which they relate. At the end of the accounting period, accrued expenses are recognised based on an estimated amount of the transfer obligation of the period. The calculation of accrued expenses is done in accordance with detailed operational and practical guidelines issued by the Accounting Officer which aim at ensuring that the financial statements provide a faithful representation of the economic and other phenomena they purport to represent. By analogy, if a payment has been made in advance for services or goods that have not yet been received, the expense will be deferred and recognised in the subsequent accounting period.

## **1.4. STATEMENT OF FINANCIAL PERFORMANCE**

### **1.4.1. Revenue**

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the entity, which represents an increase in net assets, other than increases relating to contributions from owners.

Depending on the nature of the underlying transactions in the statement of financial performance it is distinguished between:

#### *(i) Revenue from non-exchange transactions*

Revenue from non-exchange transactions are taxes and transfers because the transferor provides resources to the recipient entity without the recipient entity providing approximately equal value directly in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes. The entity shall recognise an asset in respect of transfers when the entity controls the resources as a result of a past event (the transfer) and expects to receive future economic benefits or service potential from those resources, and when the fair value can be reliably measured. An inflow of resources from a non-exchange transaction recognised as an asset (i.e. cash) is also recognised as revenue, except to the extent that the entity has a present obligation in respect of that transfer (condition), which needs to be satisfied before the revenue can be recognised. Until the condition is met the revenue is deferred and recognised as a liability (pre-financing received).

#### *(ii) Revenue from exchange transactions*

Revenue from the sale of goods and services is recognised when the significant risk and rewards of ownership of the goods are transferred to the purchaser. Revenue associated with a transaction involving the provision of services is recognised by reference to the stage of completion of the transaction at the reporting date.

### **1.4.2. Expenses**

Expenses are decreases in economic benefits or service potential during the reporting period in the form of outflows or consumption of assets or incurrence of liabilities that result in decreases in net assets/equity. They include both the expenses from exchange transactions and expenses from non-exchange transactions.

Expenses from exchange transactions arising from the purchase of goods and services are recognised when the supplies are delivered and accepted by the entity. They are valued at original invoice amount. Furthermore, at the balance sheet date expenses related to the service delivered during the period for which an invoice has not yet been received or accepted are recognised in the statement of financial performance.

Expenses from non-exchange transactions relate to transfers to beneficiaries and can be of three types: entitlements, transfers under agreement and discretionary grants, contributions and donations. Transfers are recognised as expenses in the period during

which the events giving rise to the transfer occurred, as long as the nature of the transfer is allowed by regulation or an agreement has been signed authorising the transfer; any eligibility criteria have been met by the beneficiary; and a reasonable estimate of the amount can be made.

When a request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses due to the beneficiaries but not yet reported are estimated and recorded as accrued expense.

## **1.5. CONTINGENT ASSETS AND LIABILITIES**

### **1.5.1. Contingent assets**

A contingent asset is a possible asset that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

### **1.5.2. Contingent liabilities**

A contingent liability is a possible obligation that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation or, in the rare circumstances where the amount of the obligation cannot be measured with sufficient reliability.

## **1.6. CONSOLIDATION**

The accounts of this entity are fully consolidated in the European Commission annual accounts.

## **1.7. CONTRIBUTIONS FROM DONORS**

The EU trust fund is required to finance specific projects and return remaining funds received from donors at the time of winding-up of the trust fund. Contributions from donors to the EU trust fund fulfil the criteria of revenues from non-exchange transactions under conditions. When the trust fund receives resources a liability, that equals to the received contributions, should be recorded on the balance sheet of the trust fund. The received contributions remain under liabilities until the conditions attached to the donated funds are met, i.e. eligible expenses are incurred by the trust fund.

At the balance sheet date the outstanding contribution liabilities are measured at contributions received less net expenses. Net expenses are the expenses incurred by the trust fund, including estimated amounts and if applicable, net of the revenue generated by the activities of the trust fund (e.g. bank interest). The corresponding amount of contributions is recognised as non-exchange revenue from donation. Consequently the effect on economic result of the year is nil.

For reporting purposes the net expenses of the reporting period will be attributed to the donors in proportion to net contributions paid as at 31 December, i.e. contributions paid to the trust fund as at 31 December, less net expenses allocated in the previous years. When the contribution from one donor is totally consumed, contributions will be allocated from the remaining donors. This allocation of contributions is only indicative. When the trust fund is wound up the actual split of remaining resources will be decided by the Board.

### CURRENT ASSETS

#### 2.2. PRE-FINANCING

EUR '000

|                                    | 31.12.2018   | 31.12.2017   |
|------------------------------------|--------------|--------------|
| Direct Management                  | 3,413        | 2,380        |
| Implemented by:                    |              |              |
| <i>EU delegations</i>              | 3,413        | 2,380        |
| Indirect Management                | 3,297        | –            |
| Implemented by:                    |              |              |
| <i>International organisations</i> | 2,747        | –            |
| <i>Public law bodies</i>           | 549          | –            |
| <b>Total</b>                       | <b>6,710</b> | <b>2,380</b> |

Pre-financing represents money paid out, and thus implementation of payment appropriations. As explained in note 1.3.2, these are advances not yet expensed. Thus while pre-financing reduces the outstanding RAL (see note 4.1) it represents expenses still to be recognised in the statement of financial performance.

Non-current and current pre-financing increased in 2018 by EUR 5.41 million, mainly due to the new contracts signed. In 2018 EUR 36.6 million was contracted and so more advances were paid out than in the previous years.

Guarantees received covering pre-financing amounted to EUR 0.63 million at year-end.

#### 2.3. EXCHANGE RECEIVABLES AND NON-EXCHANGE RECOVERABLES

This heading entirely relates to deferred administrative expenses of EUR 1.43 million corresponding to unused administrative costs, which were paid to the Commission in the years 2017-2018.

#### 2.4. CASH AND CASH EQUIVALENTS

At 31 December 2018 the amount in cash and cash equivalents comprises EUR 16.7 million placed on current accounts (EUR 19.22 million in 2017) and EUR 0.76 million related to cash equivalents with a notice period below 32 days (EUR 1.68 million in 2017).

The decrease reflects primarily the increased advances paid out in 2018.

## NON-CURRENT LIABILITIES

### 2.5. FINANCIAL LIABILITIES

| <i>United Kingdom</i>      | 1,355                           | –                            | 1,355                                | 3.36%          | (519)                           | 837                             |
| <b>Total</b>               | <b>23,764</b>                   | <b>16,610</b>                | <b>40,374</b>                        | <b>100.00%</b> | <b>(15,446)</b>                 | <b>24,928</b>                   |

The net contributions of the donors at 31 December equal the contributions paid less the allocated net expenses to that date. The net expenses of the current year are allocated to the donors in proportion to the contributions at 31 December.

The contribution percentage and the allocation of net results based on it is only indicative. When the Trust Fund is wound up, the final decision on the return of remaining funds will be made by the Trust Fund Board.

## CURRENT LIABILITIES

### 2.6. ACCRUED CHARGES AND DEFERRED REVENUE

The EU Trust Fund for Colombia does not have any deferred revenue. All the amounts included under this heading relate to accrued charges and are as follows:

EUR '000

|                        | 31.12.2018   | 31.12.2017 |
|------------------------|--------------|------------|
| <i>Accrued charges</i> | 1,623        | 146        |
| <b>Total</b>           | <b>1,623</b> | <b>146</b> |

Accrued charges are the amounts estimated by the Authorising Officer of costs incurred for services and goods delivered in the year 2018 but not yet invoiced or processed by the end of the year. The amount comprises the estimated operating expenses for on-going or ended contracts without validated cost claims. The 2018 estimation used the best available information about the existing contracts. Expenses were calculated 'pro-rata' based on the value of the contract and the percentage of completion. The percentage of completion is based on the operational duration of the contract and the number of contract days lapsed at 31 December 2018.

In order to more accurately reflect the amount that is expected to be spent on projects, the value of the contracts is adjusted by the average implementation rate of contracts and the average invoice eligibility rate. Both these rates are determined based on actual data related to already implemented contracts.

For 2018 the rates applicable to the European Commission (EC) were used because the types of contract and the types of beneficiaries of the EC are representative to the type of contracts and beneficiaries in the Trust Fund. The portion of the estimated accrued charges which relates to pre-financing paid has been recorded as a reduction of the pre-financing amounts (see note 2.1).

An increase of EUR 1.48 million in 2018 is explained by the increased activities of the Trust Fund after the start-up year 2017.

Included under this heading are also accrued audit charges of EUR 36,000.

### 3. NOTES TO THE STATEMENT OF FINANCIAL PERFORMANCE

#### REVENUE

#### REVENUE FROM NON-EXCHANGE TRANSACTIONS

##### 3.1. REVENUE FROM DONATIONS

This heading represents contributions from donors recognised as operating revenue in line with the net expenses. Consequently, the economic result of the year is nil.

In the agreement establishing the EUTF for Colombia, provisions are foreseen to deduct a management fee corresponding to maximum 5% of the amounts pooled into the Trust Fund to cover its management costs. Such management fees will only be included in the statement of financial performance to the extent that costs are incurred, which are to be qualified as management costs.

#### EXPENSES

##### 3.2. OPERATING EXPENSES

EUR '000

|                                                         | 2018          | 2017         |
|---------------------------------------------------------|---------------|--------------|
| <i>Rural development - Integrated rural development</i> | 13,880        | 2,542        |
| <i>Staff costs</i>                                      | 423           | 26           |
| <i>Associated overhead</i>                              | 115           | –            |
| <i>Travel expenditure</i>                               | 12            | –            |
| <b>Total</b>                                            | <b>14,430</b> | <b>2,568</b> |

EUR '000

|                                    | 2018          | 2017         |
|------------------------------------|---------------|--------------|
| <b>Direct Management</b>           | <b>11,192</b> | <b>2,568</b> |
| <b>Implemented by:</b>             |               |              |
| <i>Commission</i>                  | 550           | 26           |
| <i>EU delegations</i>              | 10,642        | 2,542        |
| <b>Indirect Management</b>         | <b>3,239</b>  | <b>–</b>     |
| <b>Implemented by:</b>             |               |              |
| <i>International organisations</i> | 1,995         | –            |
| <i>Public law bodies</i>           | 1,244         | –            |
| <b>Total</b>                       | <b>14,430</b> | <b>2,568</b> |

The operating expenses have been mainly incurred in the field of rural development and reincorporation, that remains the strategic priority of the Trust Fund. The increase in 2018

operating expenses is a result of increased activities after the start-up year 2017 with further contracts signed and further work implemented.

### 3.3. OTHER EXPENSES

EUR '000

|                                               | 2018         | 2017       |
|-----------------------------------------------|--------------|------------|
| <i>Technical assistance and communication</i> | 869          | 126        |
| <i>Foreign exchange losses</i>                | 137          | –          |
| <i>Audit</i>                                  | 18           | 18         |
| <b>Total</b>                                  | <b>1,024</b> | <b>144</b> |

The increase in other expenses followed the same pattern as in the operating expenses (see note 3.2).

## 4. OTHER SIGNIFICANT DISCLOSURES

### 4.1. OUTSTANDING COMMITMENTS NOT YET EXPENSED

EUR '000

|                                                 | 31.12.2018 | 31.12.2017 |
|-------------------------------------------------|------------|------------|
| <i>Outstanding commitments not yet expensed</i> | 30,271     | 14,916     |

The amount comprises the budgetary RAL ('Reste à Liquider') less related amounts that have been included as expenses in the 2018 statement of financial performance. The budgetary RAL is an amount representing the open budgetary commitments for which payments and/or de-commitments have not yet been made. This is the normal consequence of the existence of multi-annual programmes.

The increase in outstanding commitments results from new contracts signed in 2018. In 2018 EUR 36.6 million was contracted, reaching a total of EUR 56.5 million contracted at 31 December 2018 (plus EUR 2 million administrative expenditure).

### 4.2. RELATED PARTIES

The related party of the EUTF for Colombia is the European Commission. Transactions between these entities take place as part of the normal operations of the EUTF for Colombia and as this is the case, no specific disclosure requirements are necessary for these transactions in accordance with the EU accounting rules.

### 4.3. EVENTS AFTER REPORTING DATE

At the date of transmission of these accounts, no material issues had come to the attention of or were reported to the Accounting Officer of the EUTF for Colombia that would require separate disclosure under this section. The annual accounts and related notes were prepared using the most recently available information and this is reflected in the information presented above.

## 5. FINANCIAL INSTRUMENTS DISCLOSURES

### 5.1. CURRENCY RISKS

#### Exposure of the EUTF for Colombia to currency risk at year end

At 31 December 2018 the ending balances of financial assets and financial liabilities only include amounts quoted in euro.

### 5.2. CREDIT RISK

At 31 December 2018 the financial assets were composed of cash and cash equivalent of EUR 17.46 million and exchange receivables and non-exchange recoverables of EUR 1.43 million.

## Financial assets that are neither past due nor impaired

The amounts of receivables and recoverables are related to deferred charges and accrued revenue and are thus neither past due nor impaired.

## Financial assets by risk category

The amount in cash and cash equivalents comprises EUR 16.7 million placed on current accounts and EUR 0.76 million related to cash equivalents with a notice period below 32 days. The entire amount is placed in a bank with prime and high grade.

## 5.3. LIQUIDITY RISK

### Maturity analysis of financial liabilities by remaining contractual maturity

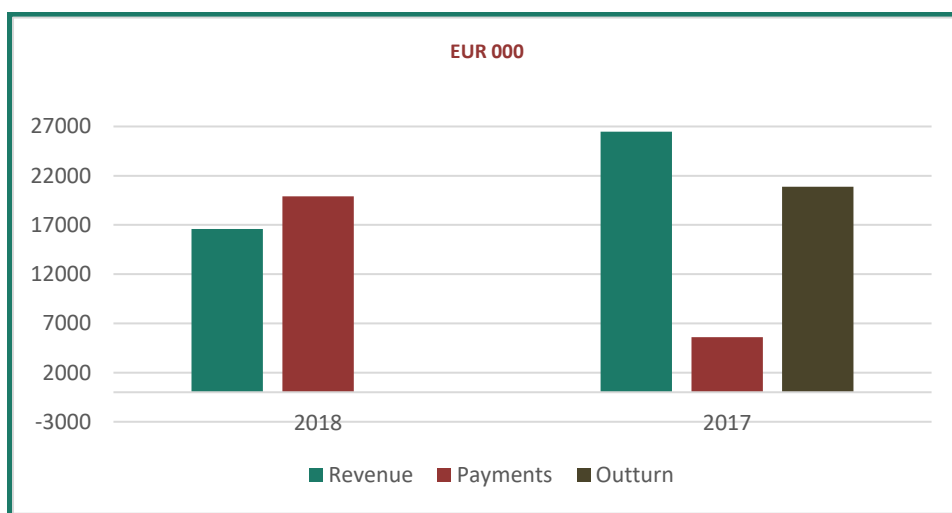

The financial liabilities mainly compose of liabilities to donors. The outstanding amounts will be paid back when the EUTF for Colombia is wound-up.

## Part 3 - ANNUAL FINANCIAL REPORT

### 1. BUDGET RESULT

EUR '000

|                            | 2018    | 2017   |
|----------------------------|---------|--------|
| Revenue                    | 16,589  | 26,476 |
| Payments                   | 19,916  | 5,582  |
| Exchange rate gain or loss | (128)   | (0)    |
| Budget result              | (3,455) | 20,893 |

### 2. RECONCILIATION OF ECONOMIC RESULT AND BUDGET RESULT

The economic result of the year is calculated on the basis of accrual accounting principles. The budget result is however based on cash accounting rules. As the economic result and the budget result both cover the same underlying operational transactions, it is a useful control to ensure that they are reconcilable. The table below shows this reconciliation, highlighting the key reconciling amounts, split between revenue and expenditure items.

EUR '000

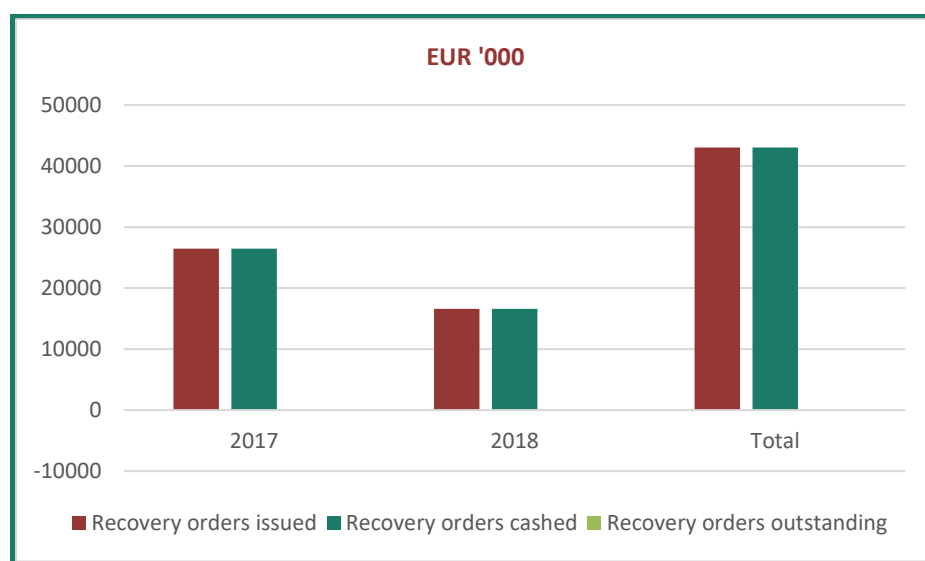

|                                                     | 2018     | 2017    |
|-----------------------------------------------------|----------|---------|
| <b>ECONOMIC RESULT OF THE YEAR</b>                  | -        | -       |
| <b>Revenue</b>                                      |          |         |
| <i>Entitlements not affecting the budget result</i> | (15,446) | (2,741) |
| <i>Contributions received</i>                       | 16,588   | 26,476  |
| <b>Expenses</b>                                     |          |         |
| <i>Net effect of pre-financing</i>                  | (18,355) | (4,920) |
| <i>Accrued expenses (net)</i>                       | 13,757   | 2,079   |
| <b>BUDGET RESULT OF THE YEAR</b>                    | (3,455)  | 20,893  |

### 3. IMPLEMENTATION OF BUDGET REVENUE

#### 3.1. Overview of revenue

EUR '000

| Financial Year | Issuing year | Revenue type  | Recovery orders issued | Recovery orders cashed | Recovery orders outstanding |
|----------------|--------------|---------------|------------------------|------------------------|-----------------------------|
| 2017           | 2017         | Contributions | 26,476                 | 26,476                 | (0)                         |
|                | 2017         | Interests     | 0                      | 0                      | -                           |
| <b>2017</b>    |              |               | <b>26,476</b>          | <b>26,476</b>          | <b>(0)</b>                  |
| 2018           | 2018         | Contributions | 16,588                 | 16,588                 | -                           |
|                | 2018         | Interests     | 0                      | 0                      | -                           |
| <b>2018</b>    |              |               | <b>16,589</b>          | <b>16,589</b>          | <b>-</b>                    |
| <b>Total</b>   |              |               | <b>43,064</b>          | <b>43,064</b>          | <b>(0)</b>                  |

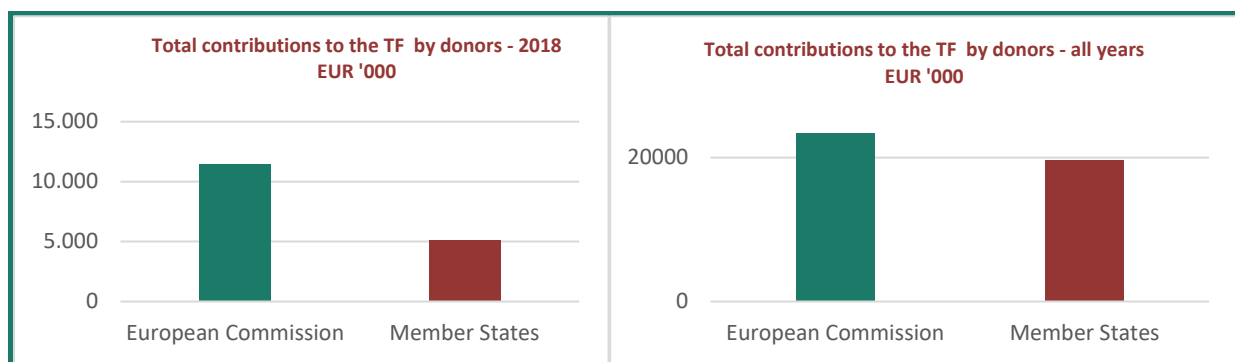

#### 3.2. Overview of contributions by donors

EUR '000

| Donor               | Contributions received during 2018 | Contributions Total | % contribution  |
|---------------------|------------------------------------|---------------------|-----------------|
| European Commission | 11,470                             | 23,470              | 54.50 %         |
| Member States       | 5,118                              | 19,594              | 45.50 %         |

Note: One contract of EUR 3 million signed in December 2018 will be reported in the Annual Accounts of 2019.

## 5. GLOSSARY

|                                  | Definition                                                                                                                                                                                                                                                                                        |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amount available for commitments | This amount defines the total amount of legal obligations (contracts, grant agreements/decisions) that can be incurred.                                                                                                                                                                           |
| Amount available for payments    | Payment appropriations or contributions received to cover expenditure, arising from legal commitments entered in the current year and/or earlier years.                                                                                                                                           |
| Appropriations                   | Amount of commitments/payments authorized by Parliament and Council in the annual EU budget.                                                                                                                                                                                                      |
| Budget item                      | As far as the budget structure is concerned, revenue and expenditure are shown in the budget in accordance with a binding nomenclature which reflects the nature and purpose of each item. The budget nomenclature reflects different levels of disaggregation (title, chapter, article or item). |
| Committed amount                 | Amount reserved through a Commission decision or contract conclusion for future legal obligations (contracts, grant agreements/decisions)                                                                                                                                                         |
| Contracted amount                | Amounts previously reserved, translated into binding contracts                                                                                                                                                                                                                                    |
| EDF                              | European Development Fund                                                                                                                                                                                                                                                                         |
| EUTFs                            | EU Trust Funds are Trust Funds directly implemented by the European Commission pooling resources from various sources.                                                                                                                                                                            |
| Origin of funding                | Amounts available broken down by type of donor                                                                                                                                                                                                                                                    |
| Implementation rate              | Share of available amounts committed or paid                                                                                                                                                                                                                                                      |
| Paid amount                      | Disbursement made to honor legal obligations.                                                                                                                                                                                                                                                     |
| Spending area                    | The nomenclature used in the tables by spending area corresponds to OECD DAC Sector codes for Development Aid. Due to specific constraints for the preparation of OECD reports, amounts reported here can differ from official OECD reports.                                                      |
| Total Pledge                     | Total funding for the trust fund as agreed by donors.                                                                                                                                                                                                                                             |
| Trust Fund                       | Fund established for a specific purpose with financial contributions from the EU budget and one or more donors and administered by an administrative agent, the Trustee.                                                                                                                          |

## ANNEX 4: Materiality criteria

The criteria used by DG International Cooperation and Development (DEVCO) to determine the materiality of potential weaknesses have been established in line with the instructions for the elaboration of the 2018 Annual Activity Report. These instructions propose a standard quantitative materiality threshold of maximum 2% for the reporting year.

However, they allow a multi-annual approach, in which case the DG should present evidence that the control systems are effective in a multi-annual perspective. The multi-annual perspective is covered through the fact that the RER study scope includes contracts closed during a given 12-month period and consequently the specific transactions sampled can span back over a number of years.

Because of their multiannual nature, the effectiveness of DEVCO's control strategy can only be fully measured and assessed once all audits, checks and controls have been fully implemented and systematic errors have been detected and corrected. In addition, DEVCO was requested to issue a more risk-differentiated assurance, i.e. issue specific reservations for high-risk spending areas.

The control objective for DEVCO services is to ensure that the residual error rate, i.e. the level of errors which remain undetected and uncorrected, does not exceed 2% by the end of the management cycle. DEVCO believes that a weakness is significant and deserves to be disclosed as a reservation to the Declaration where:

- the financial impact exceeds 2% of the total payments made for the year in question and concerns an area identified as bearing a high risk as a result of the risk assessment;
- the weakness is qualitatively significant - despite mitigating measures - in nature, scope and duration e.g. systematic, wide-ranging or long term problems;
- the weakness gives rise to a high reputational risk for the Community institutions (i.e. the weakness is significant notwithstanding the absence of one or more of the above elements) e.g. major fraud cases or decisions with a significantly negative political impact.

The question of being on track towards the control objective is to be (re)assessed annually, taking into account both the frequency and importance of the errors found as well as a cost/benefit analysis of the effort needed to detect and correct them.

Notwithstanding the multiannual span of DEVCO's control strategy, its Director-General is required to sign a statement of assurance for each financial reporting year. In order to determine whether to qualify this statement of assurance with a reservation, the effectiveness of the control systems in place needs to be assessed not only for the year of reference but also with a multiannual perspective, to determine whether it is possible to reasonably conclude that the control objectives will be met in the future as foreseen.

The identification and potential correction of internal control weaknesses (and - in particular - errors with financial impact), the criteria for making a decision on whether there is material error in the expenditure of the DG and the question of whether to make a reservation in the AAR, will therefore be based on the full range of internal controls described in the Annual Activity Report and on the level of error identified in the Residual Error Rate Studies on a multi-annual basis and in the Annual Reports by the European Court of Auditors.

## ANNEX 5: Relevant Control Systems (RCS) for budget implementation

### I – Direct Management - Grants

#### Stage 1: Prior to Contracting

#### A – Identification and formulation of action to be co-financed including choice of instrument and implementation modality

**Main control objectives:** Ensuring that the Commission selects the most appropriate instrument in its cooperation with partner countries in line with the policy objectives (effectiveness); compliance (legality & regularity) and ensures the proper type of support and modalities specific to each partner country.

**Overall control efficiency indicator:** Estimated cost of controls of grant operations divided by total amount of expenditure under grant operations in the year.

| Main risks It may happen (again) that                                                                                                                                     | Mitigating controls                                                                                        | How to determine coverage frequency and depth | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Stage 4 - Ex-Post controls and Follow-up

### A - Reviews, audits and monitoring

**Main control objectives:** Measuring the effectiveness of ex-ante controls by ex-post controls; detect and correct any error or fraud remaining undetected after the implementation of ex-ante controls (legality & regularity; anti-fraud strategy); addressing systemic weaknesses in the ex-ante controls, based on the analysis of the findings (sound financial management); ensuring appropriate accounting of the recoveries to be made (reliability of reporting, safeguarding of assets and information).

| Main risks It may happen (again) that                                                                     | Mitigating controls                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | How to determine coverage, frequency and depth                                                                                                                 | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                         |

## II – Direct Management - Budgetary support

### Stage 1: Identification and formulation

**Main control objectives:** Ensuring that the Commission selects the most appropriate instrument in its cooperation with partner countries in line with the policy objectives (effectiveness); compliance (legality & regularity) and ensures the proper type of support and modalities specific to each partner country.

### Overall control efficiency indicator:

Estimated cost of controls of budget support operations divided by total amount of expenditure under budget support operations in the year.

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                                                                                                                                                        | Mitigating controls                                                                                                                                               | How to determine coverage frequency and depth | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | DEVCO step by step financial circuit for level one commitments in budget support operations.                                                                      | 100 % of BS FAs                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | RISK assessment framework for budget operations: Implemented by the Delegation and reviewed in the BSSC <sup>34</sup> for substantial or high risk BS programmes. | Substantial or high risk BS FAs               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

<sup>34</sup> Budget Support Steering Committee.

## Stage 2 – Contracting

**Main control objectives:** Ensuring that the main parameters of the budget support operation are correctly encoded in the contract database.

| Main risks It may happen (again) that                                                                | Mitigating controls                                                                          | How to determine coverage, frequency and depth | Cost-Effectiveness Indicators |
|------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|------------------------------------------------|-------------------------------|
| Important parameters relevant for disbursements under budget support operations are wrongly encoded. | DEVCO step by step financial circuit for level two commitments in budget support operations. | 100%                                           | See Stage 1A                  |

## Stage 3 – Monitoring of the implementation – operational, financial and reporting aspects.

**Main control objectives:** Ensuring that the operational results meet the conditions, objectives and expected results (effectiveness & efficiency); ensuring that the related financial operations comply with regulatory and contractual provisions (legality & regularity); ensuring appropriate accounting of the operations (reliability of reporting, safeguarding of assets and information).

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Mitigating controls                                                                                                                                                                                                                                                                                                                 | How to determine coverage, frequency and depth                                                     | Cost-Effectiveness Indicators |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|-------------------------------|
| <p><b>1.</b> The Commissions fails to identify a significant deterioration of fundamental values and/or wrong assessment on the 4 eligibility criteria before BS payments are released.</p> <p><b>2.</b> The Commission makes a wrong calculation of the amount to be disbursed for the variable tranches.</p> <p><b>3.</b> Risk that transfer of funds into the Treasury account has not respected the terms of the financing Agreement on exchange rate and treasury credit delay.</p> | <p>Policy structured dialogue</p> <p>On eligibility, risk assessment framework and policy performance framework;</p> <p>DEVCO step by step financial circuit for payments in BS operations;</p> <p>RISK assessment framework Implemented by the Delegation and reviewed in the BSSC for substantial or high risk BS programmes.</p> | <p>100% of BS payments</p> <p>100% of BS payments</p> <p>Substantial or high risks BS payments</p> | See Stage 1A                  |

## Stage 4 –Ex post controls

### A – Ex-post controls and follow-up

**Main control objectives:** Measuring the effectiveness of ex-ante controls; detect and correct any error or fraud remaining undetected after the implementation of ex-ante controls (legality & regularity; anti-fraud strategy); addressing systemic weaknesses in the ex-ante controls, based on the analysis of the findings (sound financial management); Ensuring appropriate accounting of the recoveries to be made (reliability of reporting, safeguarding of assets and information).

| Main risks It may happen (again) that                                                       | Mitigating controls                                                        | How to determine coverage, frequency and depth                                                                                  | Cost-Effectiveness Indicators |
|---------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The ex- ante controls fail to prevent, detect and correct erroneous disbursements or fraud. | Residual error rate study.                                                 | BS payments are included in the scope of the RER study (MUS sample).                                                            | See Stage 1A                  |
|                                                                                             | Review of sample transactions during Verification missions to Delegations. | Size and composition of sample are determined in accordance with the cooperation portfolios managed by the visited Delegations. |                               |

### B - Implementing results from ex-post controls

**Main control objectives:** Ensuring that the results from ex-post controls lead to appropriate corrective measures (legality & regularity; anti-fraud strategy).

| Main risks It may happen (again) that                                                                      | Mitigating controls                                                    | How to determine coverage, frequency and depth                                                                                           | Cost-Effectiveness Indicators |
|------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The deficiencies, errors, and irregularities detected through ex-post controls are not addressed (timely). | Systematic registration of ex-post control outcomes to be implemented. | <b>Coverage:</b> 100% of ex-post control outcomes <i>with a financial impact</i> .                                                       | See Stage 1A                  |
|                                                                                                            | Authorisation by AO.                                                   | <b>Depth:</b> consider 'extending' the findings of systemic errors into corrections of non-audited projects by the same country partner. |                               |

### III – Direct Management – Procurement

#### A – Identification and formulation of action including choice of instrument and implementation modality

##### Stage 1: Prior to Contracting

**Main control objectives:** Ensuring that the Commission selects the most appropriate instrument in its cooperation with partner countries in line with the policy objectives (effectiveness); compliance (legality & regularity) and ensures the proper type of support and modalities specific to each partner country.

**Overall control efficiency indicator:** Estimated cost of controls of procurement operations divided by total amount of expenditure under procurement contracts in the year.

| Main risks It may happen (again) that | Mitigating controls                                                        | How to determine coverage frequency and depth | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## B - Planning the procurement

**Main control objectives:** Effectiveness, efficiency and economy. Compliance (legality and regularity).

**Overall cost efficiency indicator:** total cost of controls of process / total expenditure executed during the year.

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                           | Mitigating controls                                                                                                                                                                                               | How to determine coverage frequency and depth | Cost-Effectiveness Indicators |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|-------------------------------|
| <ul style="list-style-type: none"> <li>The needs are not well defined (operationally and economically) and that the decision to procure was inappropriate to meet the operational objectives</li> <li>Discontinuation of the services provided due to a late contracting (poor planning and organisation of the procurement process)</li> </ul> | <ul style="list-style-type: none"> <li>Validation by AO(S)D of justification (economic , operation) for launching a procurement process.</li> <li>Publication of intended procurements/Work programme.</li> </ul> | 100% of the forecast procurements             | See Stage 1A                  |

## C - Needs assessment & definition of needs

**Main control objectives:** Effectiveness, efficiency and economy. Compliance (legality and regularity).

| Main risks It may happen (again) that                                               | Mitigating controls                                                                                                                                                                                      | How to determine coverage frequency and depth                                                                                                                                                             | Cost-Effectiveness Indicators |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The best offer/s are not submitted due to the poor definition of the tender dossier | AOSD supervision and approval of specifications<br>Call for tenders which are technically complex are elaborated by external experts contracted through service contracts and then verified by EC staff. | 100% of the calls for tenders including the technical specifications are verified ex-ante by EC staff except for some of the CFT launched inside Programme-estimates in accordance with applicable rules. | See Stage 1A                  |

## D – Selection of the offer & evaluation

**Main control objectives:** Effectiveness, efficiency and economy. Compliance (legality and regularity). Fraud prevention and detection.

| Main risks It may happen (again) that                                                                                   | Mitigating controls (those in bold are strongly recommended)                       | How to determine coverage frequency and depth                             | Cost-Effectiveness Indicators |
|-------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|---------------------------------------------------------------------------|-------------------------------|
| The most economically advantageous offer not being selected, due to a biased, inaccurate or 'unfair' evaluation process | Formal evaluation process: Opening committee and Evaluation committee              | 100% of the offers analysed. Depth: all documents transmitted             | See Stage 1A                  |
|                                                                                                                         | Opening and Evaluation Committees' declaration of absence of conflict of interests | 100% of the members of the opening committee and the evaluation committee |                               |
|                                                                                                                         | Exclusion decisions documented                                                     | 100% checked. Depth: required documents provided are consistent           |                               |

## Stage 2 - Contracting: Transformation of selected offers into legally binding contracts

**Main control objectives:** Ensuring that the actions and funds allocation is optimal (best value for public money; effectiveness, economy, efficiency); Compliance (legality & regularity); Prevention of fraud (anti-fraud strategy).

| Main risks It may happen (again) that                                                                                                                                                               | Mitigating controls                                                                                                                                                                                               | How to determine coverage, frequency and depth | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>The contractor lacks operational and/or financial capacity to carry out the actions.</li> <li>Procedures do not comply with regulatory framework.</li> </ul> | <ul style="list-style-type: none"> <li>Validation of substantiating documents provided by contractors</li> <li>Signature of contracts by the AO</li> <li>Reinforce financial and contractual circuits.</li> </ul> | 100%                                           | Cost <b>Effectiveness</b> Indicator / <b>Efficiency</b> :<br>See Stage 1A.<br><b>Economy</b><br>Total amount of costs for all controls of financial transactions (i.e. commitment/contracting, payments, RO) related to procurement contracts divided by the total amount paid out under all procurement contracts |

## Stage 3 – Monitoring Implementation / Financial transactions

**Main control objectives:** Ensuring that the implementation of the contract is in compliance with the signed contract.

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                                 | Mitigating controls                                                                                                                                                                                                                                                                                                                                                 | How to determine coverage frequency and depth                                                                                                                                                                                     | Cost-Effectiveness Indicators |

### B - Implementing results from ex-post audits/controls

**Main control objectives:** Ensuring that the (audit) results from the ex-post controls lead to effective recoveries (legality & regularity; anti-fraud strategy); Ensuring appropriate accounting of the recoveries made (reliability of reporting).

| Main risks It may happen (again) that                                                                        | Mitigating controls                                                                                                                                                                                                                             | How to determine coverage, frequency and depth                                                                                                                                                          | Cost-Effectiveness Indicators |
|--------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The errors, irregularities and cases of fraud detected are not addressed or not addressed in a timely manner | <ul style="list-style-type: none"> <li>Systematic registration of audit / control results is implemented.</li> <li>Financial operational validation of recovery in accordance with financial circuits.</li> <li>Authorisation by AO.</li> </ul> | <b>Coverage:</b> 100% of final audit results with a financial impact.<br><b>Depth:</b> findings of systemic errors are considered for correction of non-audited projects by the same economic operator. | See Stage 1A                  |

## IV - Indirect management with Beneficiary Countries

### Stage 1 – Prior to Contracting

#### A – Identification and formulation of action to be financed including choice of instrument and implementation modality

**Main control objectives:** Ensuring that the Commission selects the most appropriate instrument in its cooperation with partner countries in line with the policy objectives (effectiveness); compliance (legality & regularity) and ensures the proper type of support and modalities specific to each partner country.

**Overall control efficiency indicator:** Estimated cost of controls of IM operations with beneficiary countries divided by total amount of expenditure under these operations in the year.

| Main risks It may happen (again) that                                                                                                                                     | Mitigating controls                                                                                        | How to determine coverage frequency and depth | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The instrument and/or implementation modality is not well suited to work towards the identified objectives and/or lead to a substantial increase of implementation risks. | <ul style="list-style-type: none"> <li>Quality Support Group 1</li> <li>Quality Support Group 2</li> </ul> | 100%                                          | <p><b>Effectiveness</b> A risk index is calculated based on the results of ECA DAS reports and the RER studies covering a 3 years period. This index is defined for each RCS. Additional verifications are also performed by external auditors. ## C - Needs assessment & definition of needs

**Main control objectives:** Effectiveness, efficiency and economy. Compliance (legality and regularity).

| Main risks It may happen (again) that                                                                            | Mitigating controls                                                                                                                                                                                       | How to determine coverage frequency and depth                                                                                                                                                             | Cost-Effectiveness Indicators |
|------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Procurement</b><br>The best offer/s are not submitted due to the poor definition of the tender specifications | AOSD supervision and approval of specifications.<br>Call for tenders which are technically complex are elaborated by external experts contracted through service contracts and then verified by EC staff. | 100% of the calls for tenders including the technical specifications are verified ex-ante by EC staff except for some of the CFT launched inside Programme-estimates in accordance with applicable rules. | See Stage 1A                  |
| <b>Grants</b><br>See Stage I B above                                                                             | See Stage I B above                                                                                                                                                                                       | See Stage I B above                                                                                                                                                                                       | See Stage 1A                  |

## D – Selection of the offers / proposals & evaluation

**Main control objectives:** Effectiveness, efficiency and economy. Compliance (legality and regularity). Fraud prevention and detection.

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                       | Mitigating controls                                                                                                                                                                                                        | How to determine coverage frequency and depth                                                                                                       | Cost-Effectiveness Indicators |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Procurement</b><br>The most economically advantageous offer not being selected, due to a biased, inaccurate or 'unfair' evaluation process                                                                                                                                                                               | Formal evaluation process: Opening committee and Evaluation committee with an EU staff as observer<br>Opening and Evaluation Committees' declaration of absence of conflict of interests<br>Exclusion decisions documented | As a general rule, the European Commission is represented as an observer when proposals/offers are opened and evaluated and must always be invited. | See Stage 1A                  |
| <b>Grants</b><br>The evaluation, ranking and selection of proposals is not carried out in accordance with the established procedures, the policy objectives, priorities and/or the essential eligibility, or with the selection and award criteria defined in the annual work programme and subsequent calls for proposals. | Assignment of staff (e.g. programme officers) and/or Selection and appointment of expert evaluators (under the conditions foreseen in FR)<br>Redress procedure                                                             |                                                                                                                                                     |                               |

## Stage 2 - Contracting: Transformation of selected offers into legally binding contracts

**Main control objectives:** Ensuring that the actions and funds allocation is optimal (best value for public money; effectiveness, economy, efficiency); Compliance (legality & regularity); Prevention of fraud (anti-fraud strategy).

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                                                                                  | Mitigating controls                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | How to determine coverage, frequency and depth                                                           | Cost-Effectiveness Indicators |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Procurement</b><br>The contractor lacks operational and/or financial capacity to carry out the actions.<br>Procedures do not comply with regulatory framework.                                                                                                                                                                                                                                      | Review of the proposed selection criteria by the European Commission<br>Validation of substantiating documents provided by contractors<br>Endorsement of evaluation report for contracts within Program Estimate (PE)<br>Reinforce financial and contractual circuits.                                                                                                                                                                                                                                 | 100% except for some of the CFT launched inside Programme-estimates in accordance with applicable rules. | See Stage 1A                  |
| <b>Grants</b><br>The description of the action in the grant agreement includes tasks which do not contribute to the achievement of the programme objectives and/or that the budget foreseen overestimates the costs necessary to carry out the action.<br>The beneficiary lacks operational and/or financial capacity to carry out the actions.<br>Procedures do not comply with regulatory framework. | Project Officers implement evaluators' recommendations in discussion with selected applicants. Hierarchical validation of proposed adjustments.<br>Validation of beneficiaries (operational and financial viability) and planning of (mid-term and final) evaluations.<br>Endorsement of evaluation report for contracts within Program Estimate (PE)<br>In-depth financial verification and taking appropriate measures for high risk beneficiaries.<br>Reinforce financial and contractual circuits. | 100% except for some of the CFP launched inside Programme-estimates in accordance with applicable rules. | See Stage 1A                  |

### Stage 3 – Monitoring Implementation / Financial transactions

**Main control objectives:** Ensuring that the implementation of the contract is in compliance with the endorsed contract.

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                                                    | Mitigating controls                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | How to determine coverage frequency and depth                                                                                                                       | Cost-Effectiveness Indicators |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Procurement</b><br>The products/services/works foreseen are not, totally or partially, provided in accordance with the technical description and requirements foreseen in the contract and/or the amounts paid exceed that due in accordance with the applicable contractual and regulatory provisions.<br>Business discontinues because contractor fails to deliver. | Operational and financial checks in accordance with the financial circuits.<br><br>Operation authorisation by the AO<br>For riskier operations, ex-ante in-depth verification.                                                                                                                                                                                                                                                                                                                                                             | 100% of the payments are controlled, including only value-adding checks.<br>Riskier operations subject to in-depth controls.<br>The depth depends on risk criteria. | See Stage 1A                  |
| <b>Grants</b><br>The actions foreseen are not, totally or partially, carried out in accordance with the technical description and requirements foreseen in the grant agreement and/or the amounts paid exceed that due in accordance with the applicable contractual and regulatory provisions.                                                                          | Operational and financial checks in accordance with the financial circuits.<br>Operation authorisation by the AO<br>For riskier operations, ex-ante in-depth and/or on-site verification.<br><br>For high risk operations, reinforced monitoring<br>Recommended: consider an ex-ante verification on-the-spot (OV and/or FV) – e.g. monitoring visit. Earmark projects for risk-based ex-post audit.<br><br><b>If needed:</b> application of Suspension/interruption of payments, Penalties or liquidated damages. Referring grant to OLAF | 100% of the payments are controlled, including only value-adding checks.<br>Riskier operations subject to in-depth controls.<br>The depth depends on risk criteria. | See Stage 1A                  |

## Stage 4 – Ex-Post controls

### A - Reviews, audits and monitoring

**Main control objectives:** Measuring the effectiveness of ex-ante controls by ex-post controls; detect and correct any error or fraud remaining undetected after the implementation ex-ante controls (legality & regularity; anti-fraud strategy); addressing systemic weaknesses in the ex-ante controls, based on the analysis of the findings (sound financial management); Ensuring appropriate accounting of the recoveries to be made (reliability of reporting, safeguarding of assets and information).

| Main risks It may happen (again) that                                                                     | Mitigating controls                                                                                                                                                                                                                                                                                                                          | How to determine coverage frequency and depth                                                                             | Cost-Effectiveness Indicators |
|-----------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The ex-ante controls (as such) fail to prevent, detect and correct erroneous payments or attempted fraud. | <b>Annual Audit Plans:</b> Audits and expenditure verifications are planned annually for ongoing and closed operations of DEVCO's overall portfolio. The operations to be verified or audited are determined through risk analyses. These controls can take place before (ex-ante) or after (ex-post) disbursements recognizing expenditure. | <b>Coverage:</b> 5% of cumulative amounts disbursed under ongoing or "recently" closed operations                         | See Stage 1A                  |
|                                                                                                           | RER study of a representative sample of closed operations in order to determine effectiveness of ex-ante controls. Findings are validated with fund recipients, used for possible ex-post corrections (i.e. recoveries), taken into consideration for improvements of ex-ante controls, and referred to OLAF where needed.                   | MUS sample sufficiently representative to draw valid management conclusions                                               |                               |
|                                                                                                           | Review of exceptions reported                                                                                                                                                                                                                                                                                                                | 100% at least once a year. <b>Depth:</b> look for any weakness in the procedures (procurement and financial transactions) |                               |

### B - Implementing results from ex-post audits/controls

**Main control objectives:** Ensuring that the (audit) results from the ex-post controls lead to effective recoveries (legality & regularity; anti-fraud strategy); Ensuring appropriate accounting of the recoveries made (reliability of reporting).

| Main risks It may happen (again) that                                                            | Mitigating controls                                                                                                                                                            | How to determine coverage, frequency and depth                                                                                                                                                    | Cost-Effectiveness Indicators |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The errors, irregularities and cases of fraud detected are not addressed or not addressed timely | Systematic registration of audit / control results to be implemented. Financial operational validation of recovery in accordance with financial circuits. Authorisation by AO. | <b>Coverage:</b> 100% of final audit results with a financial impact.<br><b>Depth:</b> findings of systemic errors are considered for correction of non-audited projects by the same beneficiary. | See Stage 1A                  |

## V - Indirect management with International Organisations and national development agencies

### Stage 1 – Prior to Contracting

**A – Ex-ante (re)assessment of the entrusted entity’s financial and control framework (towards “budget autonomy”; “financial rules”).**

**Main control objectives:** Ensuring that the entrusted entity is fully prepared to start/continue implementing the delegated funds autonomously with respect of all 5 ICOs.

| Main risks It may happen (again) that                                                                                                                                                                                                                                     | Mitigating controls                                                                                                                                                                                                                                                                                             | How to determine coverage, frequency and depth                                                                                                                                                                                                                                                                            | Cost-Effectiveness Indicators                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The financial and control framework deployed by the entrusted entity is not fully mature to guarantee achieving all 5 ICOs (legality and regularity, sound financial management, true and fair view reporting, safeguarding assets and information, anti-fraud strategy). | Ex-ante assessment, conditional to granting budget autonomy. Hierarchical validation within the authorising department. Requiring justification and prior consent for any deviating financial rules. Postponing the budget autonomy. Obligation to notify any subsequent changes embedded in Board proceedings. | <b>Coverage/frequency:</b> 100% of entrusted entities/once<br><b>Depth:</b> may be determined after considering the <u>type or nature</u> of the entrusted entity (e.g. other international organisation with a specific EC agreement, EIB/EIF, PPPs, CFSP persons, etc) and/or the <u>value</u> of the budget concerned. | <b>Effectiveness</b> A risk index is calculated based on the results of ECA DAS reports and the RER studies covering a 3 years period. This index is defined for each RCS. Additional verifications are also performed by external auditors. Corrective measures.<br><b>Efficiency</b><br>KPI 11 “% of payments paid within contractual deadline” and KPIs 22 to 25 related to the audit system” (see Annex 11)<br><b>Economy:</b> Costs of control: <ul style="list-style-type: none"> <li>staff costs of control are estimated using approximations based on analyses of the organigram, job descriptions and programme/project portfolios</li> <li>external costs of control are based on values of respective contracts and related disbursements</li> <li>Overall cost of controls implemented by EuropeAid divided by the annual amount delegated (excluding remuneration paid).</li> <li>Remuneration and/or fees paid to entrusted entities divided by the annual amount delegated (excluding remuneration paid).</li> </ul> |

### B - Identification and formulation

**Main control objectives:** Ensuring that the Commission selects the most appropriate instrument in its cooperation with partner countries in line with the policy objectives (effectiveness); compliance (legality & regularity) and ensures the proper type of support and modalities specific to each partner country.

| Main risks It may happen (again) that                                                                                                                                     | Mitigating controls                                                                                        | How to determine coverage frequency and depth | Cost-Effectiveness Indicators |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|-----------------------------------------------|-------------------------------|
| The instrument and/or implementation modality is not well suited to work towards the identified objectives and/or lead to a substantial increase of implementation risks. | <ul style="list-style-type: none"> <li>Quality Support Group 1</li> <li>Quality Support Group 2</li> </ul> | 100%                                          | See Stage 1A                  |

## Stage 2 – Contracting (i.e. Establishment -or prolongation- of the mandate to the entrusted entity (“delegation agreements”))

**Main control objectives:** Ensuring that the legal framework for the management of the relevant funds is fully compliant and regular (legality & regularity), delegated to an appropriate entity (best value for public money, economy, efficiency), without any conflicts of interests (anti-fraud strategy).

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                | Mitigating controls                                                                                                                                                                                                                                                          | How to determine coverage frequency and depth                                                                                                                                                                                                  | Cost-Effectiveness Indicators |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The establishment (or prolongation) of the mandate of the entrusted entity is affected by legal issues, which would undermine the legal basis for the management of the related EU funds (via that particular entity).                                                                                                               | The establishment of the delegated acts concerned (Delegation Agreements) is submitted to hierarchical validation                                                                                                                                                            | <b>Coverage:</b> 100%<br><b>Frequency:</b> once<br>If risk materialises, all funds delegated during the year(s) to the entrusted entity would be irregular. Possible impact 100% of budget involved and significant reputational consequences. | See Stage 1A                  |
| The Commission has insufficient information from independent sources on the entrusted entity’s management achievements, which prevents drawing conclusions on the assurance for the budget entrusted to the entity – which may reflect negatively on the Commission’s governance reputation and quality of accountability reporting. | Agreements specify the control, accounting, audit, publication, etc. related requirements – incl. independent audit function and cooperation with IAS and ECA<br>- potential escalation of any major governance-related issues with entrusted entities<br>- referral to OLAF | <b>Coverage:</b> 100%                                                                                                                                                                                                                          | See Stage 1A                  |

### Stage 3 – Monitoring the implementation

#### A - Operations: monitoring, supervision, reporting (“representation” / “control with or around the entity”).

**Main control objectives:** Ensuring that the Commission is fully and timely informed of any relevant management issues encountered by the entrusted entity, in order to possibly mitigate any potential financial and/or reputational impacts (legality & regularity, sound financial management, true and fair view reporting, anti-fraud strategy).

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                                                                                                                     | Mitigating controls                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | How to determine coverage, frequency and depth                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Cost-Effectiveness Indicators |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| Due to weak "modalities of cooperation, supervision & reporting", the Commission is not (timely) informed of relevant management issues encountered by the entrusted entity, and/or does not (timely) react upon notified issues by mitigating them or by making a reservation for them – which may reflect negatively on the Commission's governance reputation and quality of accountability reporting. | <p>Agreement specifying the control, accounting, audit, publication, etc related requirements – incl. the modalities on reporting back relevant and reliable control results.</p> <p>Monitoring or supervision of the entrusted entity (e.g. ‘regular’ monitoring meetings at operational level; review of reported control results and any underlying management/audit reports; representation and intervention at the board, scrutiny of annual report, etc.).</p> <p>Management review of the supervision results.</p> <p>If appropriate/needed:</p> <ul style="list-style-type: none"> <li>reinforced monitoring of operational and/or financial aspects of the entity</li> <li>intervention, e.g. via own audits on-the-spot, by IAC or IAS</li> <li>potential escalation of any major governance-related issues with entrusted entities</li> <li>referral to OLAF</li> </ul> | <p><b>Coverage:</b> 100% of the entities are monitored / supervised.</p> <p><b>Frequency:</b> meetings take place regularly depending on the delegated activities and delegated entities, reports submitted at least annually (depending on contractual provisions). In case of operational and/or financial issues, measures are being reinforced.</p> <p><b>The depth</b> depends on the mandate of the (type of) entity, inter alia whether the Commission has full access to the entity's internal control information.</p> | See Stage 1A                  |
|                                                                                                                                                                                                                                                                                                                                                                                                           | <p><b>Annual Audit Plans:</b> Audits and expenditure verifications are planned annually for ongoing and closed operations of DEVCO's overall portfolio. The operations to be verified or audited are determined through risk analyses. These controls can take place before (ex-ante; estimated 80%) or after (ex-post; estimated 20%) disbursements recognizing expenditure.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <p><b>Coverage:</b> &gt; 5% of cumulative amounts disbursed under ongoing or "recently" closed operations</p>                                                                                                                                                                                                                                                                                                                                                                                                                   | See Stage 1A                  |

## B – Commission contribution: payment or suspension/interruption.

**Main control objectives:** Ensuring that the Commission fully assesses the management situation at the entrusted entity, before either paying out the (next) contribution for the operational budget of the entity, or deciding to suspend/interrupt the (next) contribution (legality & regularity, sound financial management, anti-fraud strategy).

| Main risks It may happen (again) that                                                                                                                                          | Mitigating controls                                                                                                                                                                                                                                                                                                                                                                          | How to determine coverage, frequency and depth                                                                                                                                                                                                                                                                                  | Cost-Effectiveness Indicators |

| The Commission pays out the (next) contribution to the entrusted entity, while not being aware of the management issues that may lead to financial and/or reputational damage. | Agreement specifying the control, accounting, audit, publication, etc. related requirements – incl. reporting back<br>Management review of the supervision results.<br>Ex-ante OV and FV, 'in-depth' if need be<br>Hierarchical validation of contribution payment and recovery of non-used operating budget subsidy<br><b>If appropriate/needed:</b> suspension or interruption of payments | <b>Coverage:</b> 100% of the contribution payments.<br><b>Frequency:</b> usually annually but can be more frequent depending on the contractual provisions.<br><b>The depth</b> depends on the mandate of the (type of) entity, inter alia whether the Commission has full access to the entity's internal control information. | See Stage 1A                  |

## Stage 4 - Ex-Post controls and Follow-up

### A - Reviews, audits, verifications and monitoring

**Main control objectives:** Measuring the effectiveness of ex-ante controls by ex-post controls; detect and correct any error or fraud remaining undetected after the implementation ex-ante controls (legality & regularity; anti-fraud strategy); addressing systemic weaknesses in the ex-ante controls, based on the analysis of the findings (sound financial management); Ensuring appropriate accounting of the recoveries to be made (reliability of reporting, safeguarding of assets and information).

| Main risks It may happen (again) that                                                                                                                                                                                                                                                                             | Mitigating controls                                                                                                                                                                                                                                                                                                                                                        | How to determine coverage, frequency and depth                                                                                  | Cost-Effectiveness Indicators |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The ex-ante controls (as such) fail to prevent, detect and correct erroneous payments or attempted fraud.<br>The ex-post controls focus on the detection of external errors (e.g. made by beneficiaries) and do not consider any internal errors made by staff or embedded systematically in the own organisation | Through a residual error rate (RER) study a representative sample of closed operations is reviewed in order to determine the effectiveness of ex-ante controls.<br>Findings are validated with fund recipients, used for possible ex-post corrections (i.e. recoveries), taken into consideration for improvements of ex-ante controls, and referred to OLAF where needed. | MUS sample sufficiently representative to draw valid management conclusions.                                                    | See Stage 1A                  |
|                                                                                                                                                                                                                                                                                                                   | Verification missions to Delegations by independent staff not involved in the operational and financial circuits.                                                                                                                                                                                                                                                          | Size and composition of sample are determined in accordance with the cooperation portfolios managed by the visited Delegations. | See Stage 1A                  |

### B - Implementing results from ex-post controls

**Main control objectives:** Ensuring that the results from the ex-post controls lead to effective recoveries (legality & regularity; anti-fraud strategy); Ensuring appropriate accounting of the recoveries made (reliability of reporting)

| Main risks It may happen (again) that                                                            | Mitigating controls                                                                                                                                                          | How to determine coverage, frequency and depth                                                                                                                                               | Cost-Effectiveness Indicators |
|--------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| The errors, irregularities and cases of fraud detected are not addressed or not addressed timely | Systematic registration of control results to be implemented.<br>Financial operational validation of recovery in accordance with financial circuits.<br>Authorisation by AO. | <b>Coverage:</b> 100% of final audit results with a financial impact.<br><b>Depth:</b> findings of systemic errors are considered for corrections of other projects by the same beneficiary. | See Stage 1A                  |

## **ANNEX 6: Implementation through national or international public-sector bodies and bodies governed by private law with a public sector mission**

### **A. Justification of the recourse to Indirect Management with Member States agencies**

DEVCO examines the relevance and feasibility of the delegated measure for the EU, the partner country and the delegatee. It analyses whether the delegated measure contributes to the strengthening or rationalisation of a wider division of labour process, whether it is coherent with the EU strategies and programming documents, it assesses its impact as regards EU visibility, the cost-benefit/impact ratio and the likely risks and disadvantages of the measure. With regard to the partner country, it asks whether the delegated measure is owned and led by it and aligned to its development strategy and whether it agrees with the implementation by the delegatee. Information on expected efficiency gains and reduction in transaction costs is also analysed.

### **B. Justification of the selection of the bodies (identity, selection criteria, possible indication in the legal basis, etc.)**

Pursuant to Article 62(1)(c)(ii) FR<sup>35</sup>, when acting as indirect management delegatee, the international organisation is an international public sector organisation set up by an international agreement or a specialised agency set up by such organisation. Such an international organisation may have worldwide or regional scope. The typical feature of international organisations is their specialisation in certain activities relevant for the EU's external action objectives. This specialisation, along with the capacity to provide co-financing (its own or from other donors) is the primary reasons for selecting a certain organisation as delegatee.

The Member State agency can be, pursuant to Article 62(1) (c)(v) and (vi) FR<sup>36</sup>, a public-law body or a body governed by private law with a public-service mission providing adequate financial guarantees. In practice, it is either a ministry where the legal entity is the Member State itself or it is a separate legal entity (agency) established under public law (i.e. by a sovereign act of State, such as a law or a decree) or under private law (i.e. in a legal form available to anyone while that entity is entrusted with the tasks of implementing the government's development policy and under the latter's control, which is a public-service mission). The potential delegatee must fulfil the following eligibility criteria:

- it operates at the highest government level (national or federal);
- it is specialised in technical or financial development cooperation with partner countries of the Development policy; as such, it is generally capable of mobilising co-financing of its own (i.e. from its Member State) or from other donors, along with that of the EU;
- it implements cooperation activities without subcontracting or subdelegating entire programmes or projects to other entities.

---

<sup>35</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012, OJ L-193, 30.7.2018, p.1;

<sup>36</sup> Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012, OJ L-193, 30.7.2018, p.1;

The Commission with the help of the Member States has identified eligible entities. DEVCO receives any new request; it also prepares the decision of DEVCO Management on whether the Commission should engage in Delegated Cooperation with the interested entity and whether, by consequence, the Pillar Assessment should be launched. Any entity has to be assessed in the Pillar Assessment and any weaknesses in its financial management have to be satisfactorily addressed either at the level of following up on the Pillar Assessment report recommendations or by way of appropriate remedial provisions in the delegation agreement.

Moreover, with regard to the delegatee, it is assessed whether it has the technical and financial management capacity to implement the delegated measure, on the basis of international track record, sectors of intervention and project pipeline, whether it provides comparative advantages and whether it has significant and sustainable involvement in the relevant programme or sector.

### **C. Summary description of the implementing tasks entrusted to these bodies**

For the delegatee, being the contracting authority implies carrying out the following budget implementation tasks: managing and enforcing the contracts concluded (making payments, accepting or rejecting deliverables, enforcing the contract, carrying out checks and controls, recovering unduly paid funds), and also running the procurement and grant procedures preceding the conclusion of such contracts, including the award and rejection decisions.

### **D. List of national and international implementing entities in 2018**

The below table provides for each commitment the references of the Programmes and the amounts and duration of the delegations agreements concerned.

| Contract No. |         | Contract Title                                                                                                                                                             | Com L2 Local Key   | Report<br>ing<br>DG/TF | DG/TF In Charge | Instrument              | Complete name                     | Legal Entity Country | Benefitting Zone                              | Contracted / EU Contribution (Eur) | Start Date of Activities | End Date of Activities |

- **Section 2 – Programmation, mise en œuvre et résultats ( y inclus évaluations)**
- **Section 3 – Rapport financier**
- **Section 4 – Gestion et contrôle interne**
- **Section 5 – Annexes**
- **Section 6 – Declaration d'assurance**

## **SECTION 1 – EVENEMENTS POLITIQUES ET OPERATIONNELS MARQUANTS**

La situation sécuritaire reste volatile en RCA; depuis les efforts d'un retour à la stabilité, le conflit en RCA a changé mais perdure. Malgré la présence des autorités nationales légitimes et soutenues par la communauté internationale et les efforts de médiation, un accord de paix entre le gouvernement et les groupes armés n'a pas été signé en 2018.

L'année 2018 a été une année particulièrement sanglante et a mis en lumière l'enracinement des groupes armés (de 10 à 17 groupes armés de 2015 à 2018) et la réversibilité des maigres acquis sécuritaires. La situation dans la capitale reste fragile, notamment dans les zones plus sensibles de la ville. Un des enjeux importants reste le redéploiement de l'administration de l'Etat sur tout le territoire sécurisé.

La mise en œuvre du Plan national de Relèvement et de Consolidation de la Paix (RCPCA) 2017-2021 a continué cette année. Les Groupes de Coordination Programmatique (GCP), qui rassemblent les institutions nationales et les PTF directement concernés, ont été relancés le 14 mars pour le pilier 1, le 16 juin pour le pilier 2 et le 11 juillet pour le pilier 3.

La diminution de la conflictualité au nord-ouest et sud-est au début 2018 a permis le reflux des PDI de Paoua, de Bocaranga et le début du retour des réfugiés à Bangassou. Cependant, à la fin de 2018, plus de 576.000 réfugiés centrafricains sont toujours à l'abri au Cameroun, au Tchad, en République Démocratique du Congo et au Congo, et on compte plus de 636.000 personnes déplacées à l'intérieur du pays.

Le 15 novembre 2018 le plus grand site de PDI de la ville d'Alindao, dans le sud-est du pays, a été attaqué et incendié affectant plus de 18 000 personnes parmi les 26.000 que comptait le site. Selon les chiffres d'OCHA de 2016 à 2018, le nombre de Centrafricains ayant besoin d'assistance reste identique: 2,9 millions de personnes, soit plus de la moitié de la population.

C'est dans ce contexte si complexe et fragile qu'œuvre l'action du Fonds Bêkou, en mettant en évidence ses avantages comparatifs et sa flexibilité et adaptabilité aux changements de situation, en intervenant partout dans le pays dès que les conditions minima le permettent.

L'approche intégrée de l'UE (premier bailleur en RCA) est plus que jamais d'actualité, comme l'indiquent l'extension de l'action de la Mission de Formation de l'UE ("EUTM") à Bouar, l'aide humanitaire, la coopération au développement et l'approche résilience du Fonds Bêkou.

Le Fonds Bêkou s'est positionné de manière unique comme le seul outil permettant de combler le gap entre les besoins humanitaires et les besoins de développement, d'un point de vue LRRD («Linking Relief, Rehabilitation and Development»), en permettant le continuum de l'aide.

En 2018 le Fonds Bêkou a également connu un processus d'intégration accrue dans les outils de la coopération européenne mis en œuvre par la DUE.

Par ailleurs, la même année, le Fonds Bêkou a adopté une nouvelle action pour un montant total de EUR 35 million dans le domaine de la santé.

La contractualisation des projets du Fonds s'est élevée à plus de EUR 80 million dans les secteurs de la santé, de la résilience rurale, de l'eau et de l'assainissement, de la relance économique et de la réconciliation.

L'adoption d'un Cadre de Résultats par le Fonds Bêkou, en novembre 2018, répond à une

des recommandations de la Cour des comptes<sup>37</sup> basée sur l'identification des objectifs SMART en y associant des indicateurs pertinents.

Il constitue un outil stratégique afin de démontrer les résultats au niveau du Fonds.

En novembre 2018, suite à plusieurs étapes, dont une réflexion stratégique avec les Etats-Membres menée à Bruxelles en octobre 2018 (en présence des autorités centrafricaines), le Conseil d'administration du Fonds Bêkou a officiellement demandé une extension de 18 mois du fonds, portant donc sa date d'expiration à décembre 2020.

La procédure officielle, qui inclut une consultation du Conseil et du Parlement européen, a été lancée en décembre 2018. Une décision finale suivra la conclusion de ces consultations.

Par ailleurs, au cours de l'année 2018, les interventions du Fonds Bêkou ont été marquées par les événements politiques et sécuritaires suivants:

- la zone du nord-est et celle du sud-ouest demeurent relativement stables permettant à l'UE et à d'autres bailleurs d'investir en apaisant davantage les tensions et en enclenchant un processus de sécurité – paix – développement dans le but d'améliorer les conditions de vie des communautés, rétablir le fonctionnement des services sociaux de base et faciliter le retour de l'administration et des FACA.
- le redéploiement d'agents publics dans l'arrière-pays: suite aux nominations de préfets et de sous-préfets fin 2017, les équipes-cadre de région et de district ont été nommées par le Ministère de la santé et de la population en juillet 2018 et leur déploiement sur le territoire centrafricain a été effectif en août.  
Ce redéploiement a été crucial pour permettre aux partenaires de mise en œuvre du Fonds Bêkou d'engager les actions de renforcement des capacités et de commencer à instaurer une collaboration renforcée.
- les conflits localisés à Bangui et l'arrière-pays: comme eu en 2017 plusieurs projets et partenaires de mise en œuvre du Fonds ont été affectés par les affrontements et l'insécurité dans les zones concernées.  
Il en a résulté des pertes d'équipement/matériel et, temporairement, la suspension/le ralentissement d'activités ou un suivi à distance par les partenaires de mise en œuvre.  
Certains projets ont également dû s'ajuster aux mouvements des populations provoqués par les violences, et dans le cas de la santé, l'afflux de personnes blessées ou cherchant refuge dans les centres de santé.
- le suivi des projets a été formalisé et renforcé par une majeure appropriation des autorités nationales. De manière générale, chaque projet ou ensemble de projets sur une même « thématique » fait l'objet d'un Comité de suivi trimestriel, piloté par les ministères techniques compétents. Sur la base de TDR validés par les autorités nationales, le Comité de suivi présente l'état d'avancement des projets, les enjeux et les perspectives des différentes parties prenantes.

## SECTION 2 – PROGRAMMATION, MISE EN ŒUVRE ET RESULTATS (Y INCLUS EVALUATIONS)

### 2.1. Programmation

Lors des deux réunions qui se sont tenues en 2018, le Comité de gestion a adopté un nouveau programme en 2018, en augmentant à 16 le nombre total de ses actions depuis sa création le 14 juillet 2014.

La liste de toutes les fiches d'action adoptées depuis le lancement du Fonds Bêkou, y inclus le montant et la date d'adoption, est présentée ci-dessous.

| Fiches d'action adoptées (2014-2018)                                                                                                                                                |                    |                               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------|
| Action                                                                                                                                                                              | Montant (EUR)      | Date d'adoption <sup>38</sup> |
| Facilité d'assistance technique et de communication                                                                                                                                 | 500.000            | 29/09/2014                    |

| <b>Montant total des décisions adoptées (EUR)</b>                                                                                                                                   | <b>188.260.000</b> |                               |

Au total, le Fonds Bêkou a adopté un montant de EUR 39 millions en 2018 (santé et extension des actions promouvant la réconciliation et la relance économique).

### 2.2. Mise en œuvre des programmes et résultats clés

#### ❖ *Reconstruction économique et sociale en milieu urbain (PRESU – phases 1 et 2)*

La phase 1 du Projet de Reconstruction Economique et Sociale en milieu urbain (PRESU I), qui a démarré en juin 2015, a été prolongée de 36 à 60 mois de mise en œuvre. La phase 1, approuvée par le Fonds Bêkou pour un montant de EUR 4,5 millions, vise à

<sup>38</sup> Il s'agit de la date initiale d'adoption de la Fiche d'action. Les actions peuvent avoir subi des révisions décidées ultérieurement par le Comité de gestion. Révisions adoptées en 2018: augmentation de 2 millions d'euros en février 2018 du programme de promotion de la cohésion sociale, du dialogue et de la réconciliation dans la société africaine et de EUR 2 millions en décembre 2018 du programme de relance économique.

<sup>39</sup> Un dégageant de EUR 630.742,30 a été effectué en avril 2018 portant le montant de ce programme à EUR 14.369.257,68.

améliorer la cohésion sociale et l'environnement urbain de quartiers défavorisés à Bangui, et à favoriser la reconstruction économique des ménages. Elle s'articule autour de trois axes : 1) des actions à vocation sociale à court terme qui se sont déroulées de juillet 2015 à février 2017 ; 2) la préparation encore en cours d'actions de développement urbain prévoyant des aménagements d'infrastructures collectives ; 3) la réhabilitation de l'avenue Idriss Déby. L'exécution du projet a été déléguée à l'Agence Française de Développement (AFD) à hauteur d'un financement maximal de EUR 4,4 millions.

Le premier volet du projet s'est terminé en 2017 et a bénéficié aux jeunes et aux femmes des quartiers précaires de Bangui (Sara Yakité, Miskine et KM5), mais aussi plus généralement à toute la population résidente par sa portée communautaire.

Mis en œuvre par les ONG ACTED, Danish Refugee Council (DRC) et OXFAM, ce volet a permis de former les jeunes à divers métiers (menuiserie, couture, maintenance informatique, mécanique, etc.), à améliorer l'accès à l'eau et à l'assainissement dans les quartiers ciblés, à sensibiliser les populations à l'hygiène, à procurer des revenus aux populations par les travaux à haute intensité de main d'œuvre (THIMO) et les activités génératrices de revenus (AGR), à améliorer l'environnement urbain (désherbage, curage des drains, creusage de canaux pour adduction), à promouvoir la cohésion sociale et la paix, et à renforcer les acteurs économiques locaux.

Le deuxième axe du projet place les autorités centrafricaines au centre de l'action, devant mener à un retour de l'action publique dans les quartiers ciblés.

Les maîtrises d'ouvrage pour l'aménagement d'infrastructures collectives et la réhabilitation de voiries ont été déléguées à l'Agence d'Exécution de Travaux d'Intérêt Public en Centrafrique (AGETIP CAF) respectivement par le Ministère de l'Urbanisme, de la Ville et de l'Habitat (MUVH) et le Ministère des Travaux Publics et de l'Entretien Routier (MTPER).

La mise en œuvre de ce volet en 2018, a connu des retards qui ont demandé une prolongation de la période de mise en œuvre. En effet, les études techniques pour les équipements socio-collectifs ont été affectées par des incidents sécuritaires qui ont rendu difficile l'accessibilité des sites d'intervention, mais également des mouvements de population qui ont généré le besoin d'un plan d'accompagnement pour le retour de populations déplacées dans les quartiers du projet.

Des difficultés ont été rencontrées par AFD avec le bureau d'études sélectionné. Néanmoins, la réalisation des études s'est terminée fin 2018. Les travaux prévus sous la phase 2 du projet (PRESU II) concernent la réhabilitation du lycée de Miskine, la réhabilitation de l'avenue Idriss Déby, la construction d'une classe maternelle et la réhabilitation de la maison des femmes à Miskine, la réhabilitation du marché de Miskine, la réhabilitation d'un centre de santé urbain au PK5, la réhabilitation de l'atelier de forgerons au KM5 et l'assainissement de l'école à Yakité, et la réhabilitation du collecteur Bouagba.

Concernant la réhabilitation de l'avenue Idriss Déby, la possibilité de concevoir une voirie permettant un véritable désenclavement des quartiers sinistrés a rendu indispensable la mise en place d'un Plan d'Action de Réinstallation, lequel prendra également en compte les enjeux environnementaux et sociaux de la zone d'intervention. Les travaux de voirie devraient démarrer au premier semestre 2019.

La phase 2 vise à capitaliser les acquis de la phase 1, en favorisant la reconstruction économique des ménages et en permettant le retour de l'action publique par l'amélioration de l'environnement social et urbain des quartiers précaires de Bangui de Miskine et Sara/Yakité. Tel que le PRESU I, l'exécution du PRESU II est déléguée à l'AFD. Les activités ont démarré en Janvier 2017 pour une durée de 36 mois et un financement total de EUR 11,66 millions.

Entre les actions structurantes de fort impact s'inscrivent le drainage et la réhabilitation de l'équipement des deux quartiers, y compris la réhabilitation de l'école primaire de Yakité, du lycée, de l'école maternelle et du marché en Miskine. Au niveau des travaux de proximité, s'incluent le drainage tertiaire pour évacuer les eaux pluviales des zones d'habitation et la voirie tertiaire pour la circulation interne, entre autres.

La complexité du contexte a rendu l'organisation des marchés et la planification des activités sur la base des études techniques préparés difficile. Par conséquent, la plupart des contrats seront attribués dans le premier trimestre de 2019.

| Résultats clés – PRESU (Phases 1 et 2)                                                                  |                                                |                     |

| Nombre de clubs d'hygiène formés et actifs dans les écoles                                              | 2 écoles (environ 15 000 élèves bénéficiaires) | 100%                |

❖ **Amélioration de la situation économique et sociale des femmes et de leur famille en RCA et Promotion de l'intégration et de la participation des femmes et des jeunes filles à la vie économique, sociale et politique de la République Centrafricaine (Genre – phase 2)**

La mise en œuvre de la deuxième phase du programme, attribuée à l'ONG *International Rescue Committee UK (IRC-UK)*, en consortium avec COOPI depuis juillet 2017, avance de manière satisfaisante.

Le projet intervient dans les zones de Bangui, Kaga Bandoro, Bocaranga et Dekoa (IRC) et Mbaïki (COOPI) pour intégrer les femmes/filles dans la vie communautaire, et renforcer leur participation aux décisions du foyer. Alors que les zones appuyées par IRC sont celles de la 1ère phase du programme, Mbaïki représente une nouvelle zone d'intervention couverte par COOPI.

Une approche inclusive est utilisée à travers les activités, ciblant non seulement les femmes/filles, mais également les hommes/conjoints/garçons et les décideurs communautaires et politico-administratifs.

Le projet appuie des organisations communautaires de base (OCB) et groupements féminins, mais également des bénéficiaires individuelles. La pérennisation de l'action et l'ancrage local sont renforcés non seulement par le renforcement des OCB/groupements, mais également par l'appui par IRC à l'autonomisation de 3 ONG nationales (Levier, Echelle, et AFPE - Association des femmes pour la Promotion de l'Entrepreneuriat). La signature du Protocole d'Accord entre IRC et les deux dernières ONG nationales partenaires a été faite en juillet 2018. Dans la zone de Mbaïki, des partenariats existent avec deux ONG nationales, l'Organisation Nationale des Femmes Rurales (ONFR) et l'Association des Femmes Juristes de Centrafrique (AFJC). Une collaboration est également établie avec les ONG du programme de santé du Fonds, concernant le référencement des victimes de violences basées sur le genre. En 2018, la prise en charge psychosociale directe a bénéficié plus de 150 femmes et jeunes filles.

Le renforcement des capacités en droits, compétences socio-économiques, connaissances sur les violences basées sur le genre, et compétences de la vie, se fait notamment à travers des formations, sensibilisations, groupes de discussion, et causeries éducatives.

En 2018, plusieurs thématiques ont été abordées dans le contexte des campagnes de sensibilisation, comme : « Tolérance zéro à l'égard des violences basées sur le genre en

milieu rural et urbain », « le concept genre », « conséquences de viol et les services disponibles ». Jusqu'à aujourd'hui, plus de 648 membres des OCB/associations féminines/coopératives ont été formés en compétence de base.

Par ailleurs, le projet vise à créer des opportunités économiques dans une logique de chaîne de valeur et d'accès au crédit et à l'épargne. Les OCB sont appuyées par IRC en intrants et outillages, et formations en agro-business. Un partenariat a été établi avec l'Agence Centrafricaine pour le Développement Agricole (ACDA) et les organisations bénéficiaires sont mises en relation avec des institutions de microfinance (IMF).

Conformément au protocole d'accord entre IRC et l'ACDA, un module de formation a été produit par l'ACDA et des sessions de formations ont été animées. En décembre 2018, 60 représentants des OCBs (dont 16 hommes et 44 femmes) ont pris part à ces sessions à Bocaranga, Kouï, Ngaoundaye. Une plateforme de transformation des produits agropastoraux est en cours de construction à Dekoa, dans la Kémo. Le soutien aux trois centres de formation professionnelle identifiés et à un IMF débutera cependant en 2019. A Mbaïki, le soutien à des groupements féminins et les femmes/filles individuelles dans leurs AGR est en cours, avec des sessions d'échange et de discussion.

Un autre point fort du projet consiste dans la mise en place de deux Centres d'Autonomisation Socio-Economiques des Femmes (CASEF) dans le 7<sup>e</sup> arrondissement de Bangui et la commune de Bimbo, et d'une Maison de la Femme dans le 5<sup>e</sup> arrondissement de Bangui. A terme, ces centres multifonctionnels, gérés par des organisations de femmes, procurent des espaces sécurisés aux femmes/filles pour la prise en charge psychosociale des cas de protection et violences basées sur le genre, les sensibilisations thématiques et formations ciblées.

Le projet a été revu en septembre 2018 pour intégrer le volet de renforcement des capacités du MPFFPE. Ce nouveau ministère a émergé dans le cadre du remaniement gouvernemental opéré en septembre 2017, portant ainsi une attention particulière aux besoins spécifiques des femmes et enfants en RCA.

| Résultats clés – Genre (phase 2)                                                                                                         |          |                     |

### ❖ *Appui sectoriel Santé au Plan de Transition en RCA (phases 2 et 3)*

Pendant l'année 2018, la phase 2 du programme de santé est mise en œuvre par les ONG Première Urgence Internationale (PUI), *International Medical Corps* (IMC), *The Alliance for International Medical Action* (ALIMA), Croix-Rouge Française (CRF) et Cordaid, pour la fourniture de services de santé dans 128 formations sanitaires du pays couvrant plus de 1,5 millions d'habitants. Six de ces projets se sont achevés au cours de l'année. L'appui au Complexe pédiatrique de Bangui avec Médecins avec l'Afrique - CUAMM a démarré en début juillet 2018.

Par ailleurs, l'assistance technique prestée au Ministère de la Santé et Population (MSP) a été renforcée avec un deuxième expert à partir de mi-juin. L'expert, dont les responsabilités se concentrent sur le niveau central (politiques, stratégies, régulation, coordination sectorielle), complète ainsi l'action du premier assistant technique focalisé sur le niveau périphérique (coordination des projets, harmonisation, renforcement des agents décentralisés).

En 2018, l'assistance technique a notamment appuyé le MSP dans la formation des nouvelles équipes-cadres de région et de district, la coordination avec les partenaires techniques et financiers (OMS, UNICEF, Banque mondiale, Fonds mondial, GAVI, etc.), le suivi des projets de santé, l'articulation entre le niveau central et décentralisé du MSP, la revue et la planification annuelle du MSP, la réforme du Cadre de Concertation Stratégique du Secteur de la Santé, et la mise en place des groupes thématiques.

Suite à l'évaluation externe des phase 1 et 2, qui a été conduite en avril/mai 2018, le Fonds Bêkou a procédé avec la formulation de la phase 3 du programme. La fiche d'action respective a été adoptée par le Comité de gestion du Fonds en juin 2018 pour un montant total de EUR 35 millions, comportant 2 volets d'intervention: (i) le renforcement du MSP dans sa fonction de gouvernance et leadership, incluant l'assistance technique au ministère à Bangui, mais également un renforcement des capacités des directions régionales et districts sanitaires; (ii) la fourniture de services de santé de qualité et l'accompagnement des acteurs de santé locaux.

La mise en œuvre du deuxième volet a été attribuée, dans un souci de capitalisation des acquis et de continuité des activités et en ligne avec les recommandations de l'évaluation, aux mêmes ONG partenaires de la phase 2 évitant une interruption des services de santé.

Les 6 régions sanitaires ciblées sont également restées inchangées, pourtant avec quelques modifications au niveau des districts, suite au nouvel découpage administratif. Pendant la phase 3, au moins 151 formations sanitaires devraient être appuyées dans les districts de Bangassou, Ouango, Bossangoa, Bimbo, Boda, Haute Kotto, Vakaga, Bangui 1, Bangui 2, Bangui 3, Bamingui, Ndélé, Berberati, et Gamboula.

Cette troisième phase met l'accent sur le transfert des compétences vers les agents du MSP, faisant ainsi progressivement évoluer le rôle des ONG de la substitution à l'accompagnement des acteurs locaux. Le Fonds Bêkou continue d'appliquer le principe de la gratuité ciblée pour les groupes vulnérables, tels que définis par le MSP, avec la fourniture directe des médicaments essentiels.

Tout comme en 2017, les partenaires et les projets du Fonds Bêkou ont été affectés par les violences localisées en 2018, résultant dans des délocalisations temporaires du personnel, des pillages de bureaux et centres de santé, des afflux de population sporadiques dans les formations sanitaires, et des suspensions partielles ou ralentissements d'activités.

Ces incidents sécuritaires ont notamment affecté la Croix-Rouge dans la zone de Nassolé/Gamboula et à Bangui/PK5, Cordaid à Bangassou, PUI dans la Bamingui-Bangoran et IMC dans la Haute-Kotto. Néanmoins, tous les partenaires se sont efforcés à une reprise des activités au plus vite.

Suite à l'évaluation, il a été constaté la nécessité de formuler un projet spécifiquement dédié au renforcement des capacités au niveau des régions et districts sanitaires, permettant aux ONG de se concentrer davantage sur les formations sanitaires en complément du redéploiement des fonctionnaires et agents du MSP dans les directions et districts sanitaires dès août 2018. Suite à un appel à manifestation d'intérêt restreint, le projet de renforcement des capacités a été confié à l'Agence Italienne pour la Coopération au Développement (AICS) et démarrera début 2019.

| Résultats clés – Santé (phases 2 et 3)                                                                                        |           |         |                     |         |

| Nombre de personnes bénéficiaires des activités de sensibilisation                                                            | 432.051   | -       | 193%                | -       |

❖ **Appui à la production alimentaire pour la résilience et la cohésion sociale des communautés affectées par les crises récurrentes en République centrafricaine**

Le programme d'appui à la production alimentaire pour la résilience et la cohésion sociale des communautés affectées par les crises récurrentes en République centrafricaine vise à améliorer la sécurité alimentaire et nutritionnelle à travers d'un appui à la relance de la production alimentaire, à la gestion des enjeux intercommunautaires et au renforcement des capacités institutionnelles.

Le programme, mis en œuvre depuis 2015, comporte 3 volets complémentaires:

1. Résilience des communautés rurales agricoles et agropastorales: mis en œuvre par la Food and Agriculture Organisation (FAO) et Danish Refugee Council (DRC) dans la région de l'Ouham Pendé (nord-ouest) et WWF dans les régions de la Lobaye et Sangha Mbaéré (sud-ouest);
2. Transhumance et renforcement des communautés pastorales: mis en œuvre par la FAO, DRC, Association for Cooperative Operations Research and Development (ACORD), ACTED et Catholic Relief Services (CRS) à échelle nationale<sup>40</sup>;
3. L'établissement de filières de petit élevage: mis en œuvre par COOPI à Bangui et sa périphérie.

En 2018, seuls les projets mis en œuvre par ACTED sous le volet 2 du programme et COOPI sous le volet 3, ont encore été opérationnels.

Le projet de renforcement de la résilience des éleveurs par ACTED, s'est achevé en début d'avril 2018 après une prolongation du projet. Le projet est intervenu dans les préfectures du Haut-Mbomou, Mbomou, Basse-Kotto, Ouaka et Bangui, bénéficiant les éleveurs résidents et transhumants, les ménages autochtones, la Fédération Nationale des Eleveurs Centrafricains (FNEC) et l'Agence Nationale de Développement de l'Élevage (ANDE).

En dépit des difficultés rencontrées pendant la mise en œuvre (notamment violences qui ont amené à des périodes de suspension), ACTED a mis en place et formé les structures de gestion des ressources naturelles pour la gestion des conflits entre agriculteurs et éleveurs. La filière de l'élevage a par ailleurs été soutenue par ACTED à travers des dotations à des associations de bouchers et pharmacies vétérinaires, ainsi que la construction d'aires d'abattage. Ces activités ont également contribué à la gestion du conflit entre éleveurs et agriculteurs.

ACTED, avec les autres partenaires du programme, a relancé les campagnes nationales

<sup>40</sup> Ouham, Ouham Pendé, Nana Mambéré, Nana Gribizi, Obella Mpoko, Mambéré Kadei, Ouaka, Kémo, Lobaye, Bamingui-Bangoran, Haute-Kotto, Basse-Kotto, Mbomou, Haut-Mbomou

de vaccination du gros et petit bétail, en partenariat avec la FNEC et l'ANDE, y compris la construction de parcs de vaccination et la réhabilitation du laboratoire de l'ANDE.

Le projet d'appui à la relance des filières de l'élevage urbain et périurbain en République Centrafricaine a démarré le 23/6/2017 et il est mis en œuvre par un consortium d'ONG internationales et nationales chapoté par COOPI. Une très forte implication de l'ANDE et de la FNEC sous la supervision du Ministère de l'Elevage et de la Santé animale a pu être constatée.

L'objectif spécifique de ce projet est de «Renforcer les performances économiques et organisationnelles des filières du petit élevage dans les arrondissements de la Capitale et les Communes de Bimbo , Damara , Boali et Bégoua»; il vise globalement à soutenir la production d'intrants de qualité (alevins, porcins, poussins, produits vétérinaires, aliments spécifiques) pour redynamiser les filières volaille, piscicole et porcine en rendant disponibles et accessibles de manière permanente ces intrants aux producteurs.

Le projet, en plus de faciliter leurs accès aux marchés, appui la structuration et la bonne gouvernance des organisations de producteurs qui sont à la base des faitières et de la FNEC.

A ce jour, toutes les études préalables ont été réalisées avec l'appui de Vétérinaires Sans Frontières (étude sur l'installation des sites de production) et du LERSA (recensement de plus de 1.000 producteurs sur Bangui et sa périphérie). Les travaux de construction/réhabilitation sont quasiment tous terminés ou en voie de finalisation et vont permettre:

- la mise en fonction du siège de la FNEC qui va abriter aussi un centre de production de 10 000 poussins et l'usine de fabrication des aliments;
- la mise en fonction d'une station avicole et d'une station de reproduction des porcs (déjà finalisé et doté de 23 reproducteurs porcins) ;
- la remise en état d'une station piscicole dans le 7ème arrondissement.

Le volet de renforcement de capacités a déjà achevé sa première phase qui consistait à actualiser/réviser les manuels techniques de formation et procéder au recyclage des techniciens de la FNEC, des faitières et des ONG locales partenaires (Caritas, Calebasse) pour avoir un noyau de 30 formateurs, qui ont démarré des formations en cascade au profit des 1000 producteurs sélectionnés.

| Résultats clés – Sécurité alimentaire et nutritionnelle                                                                                        |                               |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|---------------------|
| Indicateur                                                                                                                                     | Résultat                      | Taux de réalisation |
| <b>Volet 1 – Résilience des communautés rurales agricoles et agropastorales</b>                                                                |                               |                     |

| Bégoua par rapport à la situation d'avant-projet                                                                                                                                        |     |     |
| Nombre d'éleveurs respect effectif de la part des producteurs des protocoles techniques standardisés et validés par l'ANDE pour la préparation, démarrage et suivi des cycles d'élevage | 130 | 16% |
| Augmentation de la portion de valeur ajoutée retenue par les éleveurs (segment de la production de base)                                                                                | 14% | 70% |

### ❖ **Relance économique et d'autonomisation des acteurs économiques centrafricains**

Depuis mi-2015, le Fonds Bêkou a initié ce programme important et novateur pour contribuer à la redynamisation des acteurs économiques locaux (AEL) et des services concernés par les activités économiques à petite et moyenne échelle à Bangui et Bouar. Globalement l'impact accru du programme résidait dans le fait de soutenir en même temps et de manière coordonnée 1.500 AEL d'une part via des services d'accompagnement « non financier » (formation, coaching, accompagnement, appui/conseil) et d'autre part via la promotion / facilitation de l'accès aux services financiers.

Le projet « Fini Bangondo Ti Mai (Nouvelle vision pour le développement) », mis en œuvre par le consortium d'ONG DRC, *Mercy Corps Europe* (MCE) et ACTED, renforce le capital économique, humain, social et financier des acteurs économiques de Bangui, Bimbo, Bégoua et Bouar. Plus précisément, le projet cible six filières (maraichage, aviculture, savonnerie, apiculture, construction traditionnelle et textile), qui ont été identifiées comme porteuses dans les zones ciblées lors de l'étude socio-économique menée initialement.

En 2018, l'identification des AEL a été finalisée avec 1501 AEL bénéficiant d'un paquet d'appui intégré pour lancer, redynamiser et/ou consolider leur projet. En plus de la dotation des kits et de formations sur les bonnes pratiques en gestion des activités économiques et l'éducation financière, un suivi post-formation continu a assuré les acquis de la formation reçue.

Cet accompagnement de proximité a déjà entraîné un engouement croissant quant à la demande de crédits. Environ 346 AEL ont déjà manifesté un intérêt à demander un crédit. De plus, les échanges lors de ce suivi, aideront à recadrer ou à réorienter les actions des AEL, à apporter des solutions aux problèmes rencontrés, notamment au regard des activités du deuxième volet du programme.

L'initiative FabLab (un incubateur permettant de soutenir des entrepreneurs innovants), lancée en 2017, continue à suivre leurs évolutions et leurs avancements. Tout au long de l'année, l'une des activités les plus importantes du projet a été le traitement des dossiers de demande de crédit et leur acheminement aux différents Etablissements de Microfinance (EMF) partenaires.

Une extension du projet a été signée fin 2018 pour assurer 15 mois additionnels d'accompagnement aux AEL et l'alignement avec la deuxième composante du programme.

La composante "Renforcement des capacités techniques et organisationnelles des parties prenantes du secteur de la microfinance est mise en œuvre via l'AFD par le consortium IRAM/ECHELLE. Le projet vise à redynamiser et renforcer les capacités des principaux acteurs du secteur de la microfinance en RCA:

- Au niveau macro, il renforcera les capacités des acteurs du cadre institutionnel afin de permettre aux EMF d'exercer leurs activités dans un environnement favorable et sécurisé. Pour cela, il est prévu de soutenir le « Comité National de Microfinance (CNMF) », et de renforcer des capacités de la Direction des Assurances, des Banques et de la Microfinance, et notamment du Service de la Microfinance, organe ministériel chargé du suivi de l'activité de microfinance en République Centrafricaine.

- Au niveau méso, il s'agit d'accompagner et d'appuyer la redynamisation de l'Association Professionnelle des Etablissements de Microfinance de Centrafrique (APEMF-CA) créé en 2006, via l'élaboration d'un plan de développement focalisé sur l'offre de services au profit des différents acteurs du secteur.
- Au niveau micro, il s'agit de renforcer les capacités techniques, matérielles et organisationnelles de trois EMF. En l'absence de réseau bancaire, tourné vers les plus pauvres, ces établissements représentent la seule possibilité de bancarisation dans les quartiers et leurs agences constituent le seul moyen d'assurer des transactions financières sécurisées.

Après la crise de 2013, seuls 5 établissements de microfinance demeurent encore en activité constante, avec une couverture géographique conséquemment réduite. Leurs réseaux d'agences, impactés par la crise demeurent toujours opérationnels et délivrent leurs services aux populations, y inclus dans les quartiers les plus difficiles. Le projet prévoit de renforcer les capacités de la Caisse Mutuelle de Centrafrique (CMCA) et du Crédit Populaire de Centrafrique S.A (CPC), un autre établissement est en phase d'identification.

A ce jour, l'équipe du projet est en place et deux missions d'identification et d'analyse des besoins ont été initiées.

| Résultats clés – Relance économique                                                                           |          |                     |
|---------------------------------------------------------------------------------------------------------------|----------|---------------------|
| Indicateur                                                                                                    | Résultat | Taux de réalisation |
| % des AEL formés maîtrisant les bonnes pratiques en gestion des activités économiques et éducation financière | 89%      | 118%                |
| % des AEL non bancarisés lors de leur sélection et qui le deviennent à la fin du projet                       | 70%      | 117%                |
| % des AEL appuyés qui sont mis en relation avec des acteurs commerciaux, économiques et/ou institutionnels.   | 100%     | 125%                |

#### ❖ *Ecofaune+, Ecosystèmes faunistiques du nord-est RCA/Tchad et du sud-est de la RCA*

Le programme Ecofaune+ vise à améliorer la gouvernance et la gestion durable des ressources naturelles et de la biodiversité en RCA dans une perspective de développement de l'économie verte et de lutte contre la pauvreté.

L'action se décompose en deux zones ayant chacune ses particularités.

#### *Les Aires protégées et les Zones Cynégétiques Villageoises (ZCV) dans le Nord-Est*

En mars-avril 2018 un sondage pédestre a permis entre autres le comptage d'indices animaliers et humains. 7.996 Km<sup>2</sup> ont été couverts dont 3.708 Km<sup>2</sup> au sud du PN Bamingui Bangoran, 2.286Km<sup>2</sup> dans la ZCV Idongo, 1.109 Km<sup>2</sup> dans la ZCV Bamingui-Bangoran, et 893 Km<sup>2</sup> à l'est de la ZCV Koukou-Bamingui.

Les résultats ont permis de préciser les espèces présentes et leur nombre. Les résultats ont été partagés avec le Comité Interministériel de Suivi (CIS) et présentés en Conseil des Ministres.

Entre février et décembre 2018, 709 journées et 478 nuits de missions de luttés anti-braconnage ont été comptabilisés. 10.633 km ont été parcourus par les surveillants pisteurs et 159 braconniers ont été arrêtés.

L'analyse comparée des données mensuelles partant de février 2018 montre une régression progressive des nombres d'arrestations et de saisies d'armes jusqu'à en octobre 2018, ce qui pourrait être le reflet de l'impact positif de la lutte anti-braconnage.

Les courbes des arrestations et des saisies ont légèrement augmenté en novembre et décembre en raison de l'arrivée de la saison sèche.

Amorcé depuis 2017, le processus d'élaboration du Schéma Directeur d'aménagement du territoire (SDAT) de la préfecture de Bamingui-Bangoran a bien avancé en 2018.

L'ensemble des études en vue de déterminer les valeurs écosystémiques de la préfecture couverte ont été réalisées, les enquêtes conduites sur le terrain et des consultations menées. Les ateliers locaux et interministériels de pré validation technique du projet du document du SDAT ont été tenus en novembre 2018.

Les actions de valorisation des produits forestiers non ligneux et des produits de la transhumance se sont concrétisées par le financement et l'accompagnement de quatre microprojets pilotes.

Le but est de faire évoluer le modèle ZCV voué à une dépendance importante de la chasse sportive, vers un modèle territorial de Développement Endogène et Durable (TeDED), qui prône une cohabitation ou un voisinage organisé de plusieurs vocations d'usage des ressources. Par conséquent, le projet a promu :

- la valorisation d'un produit forestier non ligneux, la noix de karité;
- la production de «charmouttes» (viande séchée) à base de viande de bœuf, en tant qu'alternative à la «charmoutte» à base de viande de brousse;
- l'élevage de pintade (autre alternative à la viande de brousse);
- la production de pain, actuellement absente sur le marché de Bamingui.

Compte tenu de la fin du projet en décembre 2018, le gouvernement centrafricain et la WCS ont signé un accord de Partenariat Public-Privé (21 décembre).

Ce projet capitalise sur les acquis d'ECOFAUNE+ et vise à assurer la conservation efficace et durable de la grande faune et de ses domaines vitaux (habitats, couloirs de migrations) en formant un continuum écologique pour l'intérêt des communautés locales, nationales et internationales.

### La réserve naturelle "Chinko" dans le Sud-Est de la RCA

Le parc Chinko est géré par l'ONG African Parks Network (APN). Le contrat entre APN et le Fonds Bêkou a été signé en décembre 2017 et la mise en œuvre a commencé en janvier 2018.

La vision pour le parc est de « préserver la biodiversité par une gestion durable, concentrée sur de pratiques saines de conservation, en obtenant le soutien de la communauté locale pour la conservation de la faune, en favorisant le développement communautaire durable et en développant les infrastructures de la ZPC de manière compatible avec le Projet Chinko».

L'année 2018 a marqué une année de changement pour Chinko avec une restructuration interne et une nouvelle approche qui met également l'accent sur le développement des activités communautaire dans la périphérie.

Des succès ont été atteints, notamment dans la gestion de la transhumance venant du Soudan. Néanmoins, tout au long de l'année le contexte sécuritaire autour de la réserve était très fragile avec une présence des groupes armés qui rend parfois difficile la mise en place des activités communautaires de sensibilisation.

La présence d'APN à l'est de la RCA donne une occasion unique pour des efforts de conservation à long terme qui incluent également des investissements dans l'infrastructure, le développement économique, l'éducation et une étroite collaboration avec les responsables locaux. Actuellement Chinko donne de l'emploi à environ 300 personnes des communautés locales.

| Km de route rénovée                                    | 337      | 320%                |

### ❖ *Promotion de la cohésion sociale, du dialogue et de la réconciliation dans la société centrafricaine*

Ce programme contribue à favoriser la stabilisation et le relèvement de la société centrafricaine en renforçant les capacités locales et le dialogue à court et moyen terme à travers 4 composantes:

- (i) renforcement des capacités de la société civile centrafricaine;
- (ii) appui au retour des PDI et réfugiés centrafricains;
- (iii) appui au redéploiement des autorités locales;
- (iv) soutien aux médias centrafricains.

#### (i) Renforcement des capacités de la société civile centrafricaine

Cette composante, en faveur de la société civile centrafricaine, constitue la mise en œuvre d'une partie de la Feuille de route d'appui à la société civile centrafricaine par l'UE et ses Etats Membres.

Il est considéré comme un projet pilote pour démarrer un processus de travail important avec la société civile locale accompagné des interventions dans le cadre du Programme Indicatif National (PIN) sous le 11<sup>e</sup> FED. Le projet, qui maximise les complémentarités avec les projets financés sous d'autres instruments de l'Union européenne en faveur de la société civile, sera capitalisé par le programme REPASOCC du 11<sup>ème</sup> FED, en phase d'adoption début 2019.

En 2018, les activités sur la composante du renforcement des capacités des organisations locales ont bien avancé. Dans le cadre du processus d'adhésion à la Maison de Services (MdS), 120 OSC y seront associées. Fin 2018, 92 OSC y avaient déjà adhéré. La construction d'un nouveau bâtiment pour la MdS est prévue.

Sur la composante du renforcement des capacités des organisations intermédiaires, une dynamique d'appropriation du projet par les bénéficiaires est à souligner. En 2018, 22 membres de l'ACFPE et du LeRSA ont participé à la formation des instructeurs et à l'ingénierie pédagogique.

De plus, les contenus de deux modules de formation du parcours Management (structuration associative/gouvernance/RH et gestion de projets) ont été développés par les formateurs avec un appui des experts du siège de Bioforce. Les premières 49 OSC ont été formées dans le premier module du parcours « *Management* ». En outre, en novembre 2018, 13 *coachs* ont participé à une première formation. Chaque coach appuiera la mise en œuvre des plans d'action individuels des OSC formées.

Les activités d'appui du Secrétariat Permanent pour les ONG (SPONG), un service sous tutelle du Ministère du Plan, ont également avancé. Afin de renforcer les compétences du personnel, des formations en Microsoft Word et Excel de 20 membres ont eu lieu. D'autres formations (comme Access) suivront en 2019.

De plus, un véhicule pick-up, du matériel informatique et des fournitures de bureau ont été achetés et remis au SPONG en 2018. L'installation d'une connexion internet ainsi que l'achat de motos sont en cours de finalisation. Enfin, le SPONG est en cours

d'identification d'une structure homologue dans la sous-région, pour un voyage d'étude et de capitalisation de bonnes pratiques qui aura lieu en 2019.

| Résultats clés – Renforcement des capacités de la société civile                                                                                                                    |          |                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|---------------------|
| Indicateur                                                                                                                                                                          | Résultat | Taux de réalisation |
| La Maison des services est utilisée par les OSC (augmentation en valeur absolue)                                                                                                    | 51       | 43%                 |
| Nombre de personnes issues du secteur du développement, de l'humanitaire et institutionnel ont renforcé leurs compétences à travers une offre de formation disponible et accessible | 112      | 13%                 |
| Modules de formations de l'équipe du SPONG développés et mis en œuvre                                                                                                               | 2        | 20%                 |

## (ii) Appui au retour des PDI et réfugiés centrafricains

En réponse aux mouvements de retour observés depuis le début de l'année 2017 dans certaines zones, le Fonds Bêkou avait adopté une nouvelle composante d'appui au retour des PDI et des réfugiés centrafricains pour un montant de EUR 9 millions.

Afin de favoriser le retour à Bangui, un contrat a été signé le 16/3/2018 avec ACTED pour un montant de EUR 3.675.000. Le projet soutient les dynamiques de retour des populations à Bangui à travers de la mise en place des instruments sociaux, économiques et de protection renforcés. Dans ces instruments s'inscrivent les mesures de protection individuelles et communautaires dans les quartiers, l'appui psychosociale, l'organisation de THIMO et l'appui à des AGR et caisses de résilience pour l'augmentation de pouvoir d'achat des ménages vulnérables. Les THIMO ont déjà bénéficié 238 personnes en créant 2.360 emploi-jours. Toutes les activités sont mises en œuvre en coordination avec les autorités locales et gouvernementales.

Le projet I koue boumbi ti ya Bambari na ndouzou / Tous ensemble pour le relèvement de Bambari, a démarré en février 2018 pour un montant de EUR 1.750.000 pour favoriser le retour des habitants de Bambari. Le projet utilise des instruments d'atténuation des conflits pour améliorer la cohabitation pacifique des communautés et des instruments de prévention, atténuation et réponse aux conflits comme l'appui aux survivants de violences, le renforcement des services de base et l'appui à des AGR.

Les activités de sensibilisation ont déjà démarré avec environ 5.000 personnes sensibilisées sur la cohésion sociale et la paix et/ou sur la prévention de la violence basée sur le genre et les droits de l'Homme. De plus, plus de 400 victimes de VBG et/ ou des violations des droits de l'Homme bénéficient déjà d'un appui psychosocial direct. Dans ses activités s'inscrivent l'appui aux initiatives qui peuvent renforcer les opportunités économiques et améliorer les conditions de vie des populations de Bambari.

Ces activités seront mises en œuvre en 2019 en combinaison avec l'appui à la résilience des institutions locales.

Enfin, en novembre 2018, un projet signé avec CRS a l'objectif d'améliorer l'harmonie et les conditions de vie des populations retournées/déplacées et les communautés hôtes des Préfectures de l'ouest de la RCA.

Le projet cible 30 communautés réparties entre les préfectures Mambéré- Kadeï, Nana-Mambéré et Sangha Mbaéré. L'intervention appuie le retour spontané des ménages déplacés dans la zone transfrontalière avec le Cameroun où se trouve la grande majorité des réfugiés centrafricains. Les activités du projet ont démarré en novembre 2018 pour une durée de 24 mois.

| Résultats clés – Appui au retour des PDI et réfugiés centrafricains                                |          |                     |
|----------------------------------------------------------------------------------------------------|----------|---------------------|
| Indicateur                                                                                         | Résultat | Taux de réalisation |
| Nombre de personnes formées aux compétences en matière d'atténuation des conflits et de résolution | 55       | 110%                |
| Nombre de cas de VBG et violation des droits de l'Homme qui bénéficient d'un appui psychosocial    | 406      | 29%                 |
| Nombre de kits de matériel de soutien aux survivants distribué                                     | 126      | 90%                 |
| Nombre de bénéficiaires des THIMO                                                                  | 238      | 8%                  |

### (iii) Appui au redéploiement des autorités locales

Une Convention de délégation a été signée le 10 mars 2016 avec Expertise France (EF) pour la mise en œuvre d'un projet pilote de redéploiement des services publics déconcentrés, renforcement de la cohésion sociale et relèvement précoce en Centrafrique.

EF agit en partenariat avec Avocats Sans Frontières Belgique (ASF) pour le volet justice et avec l'Agence française de coopération médias (CFI) pour le volet médias. Une collaboration est également établie entre CFI et l'Association des Radios Communautaires centrafricaines (ARC). Le projet est piloté par un comité multi-acteurs sous la présidence du Haut-Commissaire à la Primature chargé de la politique de décentralisation et de régionalisation. La coordination locale est renforcée par des comités réunissant les autorités locales et les autres partenaires du projet dans les régions ciblées.

Les activités qui ont démarré en 2016 se poursuivent en trois phases: phase 1 - diagnostic (cartographie des acteurs et renforcement des partenaires locaux); phase 2 - stabilisation (redéploiement des autorités locales et renforcement des cadres de concertation locaux); phase 3 - relèvement précoce de deux régions (restauration des services locaux de base et relance économique locale).

Suite au diagnostic établi en 2016 sur les 4 territoires présélectionnés (Bambari, Berberati, Bria et Bangassou), les régions de Berberati et Bria ont été retenues comme zones ciblées par le projet.

Le diagnostic a porté sur la gouvernance locale, le cadre et les conditions de travail, et les compétences et capacités des services et du personnel, les médias, la cohésion sociale et l'activité économique.

Ainsi, les deux régions ont été sélectionnées selon les critères de nécessité du projet au regard de ses différents enjeux, synergie des actions en cours et à venir et faisabilité. Un plan d'action évolutif pour chacune des régions a été adopté par la suite.

Depuis 2016, Bria a connu une recrudescence de violence et en février 2018, comme la situation sécuritaire s'était dégradée, la décision de fermer le bureau de Bria et de rapatrier l'ensemble du matériel encore sur place a été prise. Par conséquent les équipes ont renforcé les activités à Berberati et finalement à Bangui. Toutefois, les activités de la composante « médias » ont continué à Bria.

A Berberati, le renforcement des autorités locales, médias et instances de justice, ainsi que la réhabilitation des bâtiments administratifs et des points d'eau communautaires, ont bien avancé.

Les formations ont renforcé et sensibilisé les autorités locales et 84 chefs de quartiers dans leurs responsabilités ainsi qu'à la gestion de la vie associative. Les activités sur le renforcement des capacités de plaidoyer de la société civile sont toujours en cours. Sur la composante « relance socio-économique », 73 dossiers de micro-projets ont été enregistrés et, après analyse, 3 micro-projets ont été validés et sont en attente de financement (3,5 MFCFA, 4M FCFA et 8 MFCFA).

Concernant le volet de renforcement de la cohésion sociale, l'appui aux frais de

fonctionnement des stations de radio de Berberati et de Bria, ainsi que leur besoin en équipement a eu lieu le premier trimestre 2018. Plusieurs séances de travail ont été effectuées sur la gestion et les aspects techniques de l'appui aux radios.

| Résultats clés – Appui au redéploiement des autorités locales                              |                                                                                                                   |                     |
|--------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|---------------------|
| Indicateur                                                                                 | Résultat                                                                                                          | Taux de réalisation |
| 1 bâtiment administratif réhabilité et équipé                                              | 1 bâtiment d'ACDA pleinement réhabilité et réceptionné avec 13 bureaux équipés et des panneaux solaires installés | 100%                |
| 500 chefs et 500 conseils de quartier/villages sont formés sur leurs rôles et attributions | 201 chefs et 191 conseils de quartier/villages dynamisés et formés                                                | 39%                 |
| Nombre d'infrastructures et équipements communautaires réhabilités                         | 3                                                                                                                 | 30%                 |

#### (iv) Soutien aux médias indépendants comme acteurs directs du dialogue public au niveau local et national

Un deuxième contrat, suite à la conclusion du contrat précédent, a été signé fin mai 2018 avec la Fondation Hirondelle pour une durée des deux ans afin de consolider les acquis et continuer à appuyer la Radio Ndeke Luka (RNL) et ses efforts importants en faveur de la cohésion sociale.

RNL reste jusqu'à présent la seule radio avec une couverture nationale en Sango et en Français, émettant en direct 24h/24 et 7 jours/7. Ses émissions sont axées sur les droits humains, la jeunesse, la condition féminine, le développement, la santé, la justice et la bonne gouvernance.

La radio intervient également à travers son site web (<https://www.radiondekeluka.org/>), sur lequel elle publie ses articles et donne accès à ses émissions en direct et enregistrées.

Ainsi, RNL travaille contre la propagation de rumeurs et de fausses informations, diffuse des messages de cohésion sociale et fournit des clés de compréhension des efforts de réconciliation par son programme d'informations usuel, mais aussi des émissions thématiques comme « E le Songo » sur le rôle des femmes dans la prévention des conflits communautaires et le magazine parlementaire sur l'implication des élus dans l'initiative de l'Union africaine pour la paix. Par ailleurs, les émissions-débat « Patara » renforce l'échange des opinions et le dialogue sur les activités gouvernementales et l'actualité.

Le Fonds Bêkou appuie RNL dans son fonctionnement quotidien et renforce ses capacités, afin d'accroître son professionnalisme et sa durabilité. Après l'adoption de la nouvelle grille de programmes en 2017, RNL a continué à répondre aux besoins des auditeurs avec le lancement du nouveau site web, avec un interface encore plus convivial (juillet 2018). Les relais de Bambari, Bouar, Bozoum et Ndélé, ainsi que les radios partenaires diffusant les programmes de RNL, ont globalement continué à fonctionner sur l'année. Depuis juin 2018, un nouvel émetteur RNL opère dans la ville de Berberati.

En 2019, la RNL réalisera ses plans pour la mise en ligne d'une page Facebook et d'un compte Twitter.

| Résultats clés – Appui à la Radio Ndeke Luka                                                                                                                  |                            |                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---------------------|
| Indicateur                                                                                                                                                    | Résultat                   | Taux de réalisation |
| Taux de la population centrafricaine ayant accès aux programmes de RNL                                                                                        | 60% (>2.000.000 personnes) | 100%                |
| Nombre des correspondants en régions                                                                                                                          | 24                         | 80%                 |
| Nombre des émissions sur la réconciliation, le dialogue et la reconstruction du pays sur 24 mois                                                              | 104                        | 100%                |
| Nombre de collaborateurs d'autres médias participant aux formations de RNL                                                                                    | 8                          | 80%                 |
| Nombre de journalistes, animateurs, présentateurs, techniciens et membres de l'administration conseillés, suivis et évalués lors des formations et en interne | 30                         | 100%                |

## ❖ *Résilience rurale et création d'emplois*

L'action « Résilience rurale et création d'emplois » vise à promouvoir une dynamique de croissance durable et de création d'emplois dans les secteurs agropastoraux productifs en RCA. Le programme adopte une approche "filière" pour relever les défis structurels et organisationnels entravant le développement des filières productives.

Dans le contexte de ce programme, une étude d'expertise a été conduite en 2018. Cette étude a produit un diagnostic exhaustif et actualisé du système de formation en milieu rural et à vocation agropastorale.

Ce diagnostic a été complété par une synthèse du cadre politique et stratégique autour de la formation agricole et rurale. Différents ateliers collaboratifs ont permis de définir les grandes axes d'intervention pour la rénovation du dispositif de formation. Un programme d'intervention a ainsi pu être formulé sur la base de ces travaux et des visites de terrain.

### Renforcement des capacités centrales et des services décentralisés

Afin de faciliter le dialogue sectoriel, contribuer à la consolidation des politiques et renforcer les aspects organisationnels et opérationnels, deux assistants techniques seront mis à disposition des Ministères de l'Agriculture et du Développement Rural (MADR) et du Ministère de l'Élevage et de la Santé Animale (MESA) à partir du premier trimestre 2019.

Le contrat des services d'assistance technique a été signé avec Sogerom en décembre 2018 et les deux AT travailleront ensemble pour renforcer le cadre de concertation du secteur. Ils assureront aussi la cohérence et complémentarité des actions financées par le Fonds Bêkou et les partenaires techniques et financiers (PTF). Les deux AT auront des objectifs et des tâches similaires mais contextualisées par rapport aux deux différents secteurs d'intervention.

Un contrat pour une phase préliminaire de l'appui au niveau décentralisé a été signé en décembre 2018 avec IRAM. Une étude/diagnostic réalisé en 2017 aux principaux structures techniques des services aux producteurs du secteur agropastoral a identifié les 5 organisations les plus pertinentes: IACDA, l'ANDE, l'Institut Centrafricain de Recherche agronomique (ICRA), la FNEC et la Chambre d'Agriculture, de l'Élevage, des Eaux, Forêts, Chasses, Pêches et du Tourisme (CAEEFCPT). La phase préliminaire du programme permettra d'actualiser le diagnostic institutionnel et d'identifier les priorités des services d'appui aux producteurs agropastoraux.

Une deuxième phase du programme renforcera ces structures techniques afin d'améliorer la qualité des services disponibles aux producteurs du secteur agropastoral. L'objectif est de favoriser un renforcement progressif des capacités techniques, organisationnelles et matérielles des principales structures qui fournissent des services techniques aux producteurs de base.

### Appui multidimensionnel aux producteurs de base agricoles, agropastoraux et pastoraux

En mai 2018, le projet « soutien aux petits producteurs agricoles en République Centrafricaine pour un meilleur accès au marché à travers la vente groupée (P4P) » a été signé. Le projet dispose d'un budget de EUR 2 millions sur 24 mois et il est mis en œuvre par le PAM.

L'idée de fonds du P4P est d'acheter localement certains produits agricoles qui sont ensuite transformés et utilisés dans les actions plus urgentes, comme la distribution des vivres pour les personnes déplacées ou les cantines scolaires. Ceci permet d'assurer des débouchés commerciaux aux producteurs et donc des gains monétaires dans un contexte où la commercialisation des produits agricoles est perçue comme un des facteurs de blocage au développement des filières agricoles.

Une phase pilote, du P4P en 2015, a consisté principalement à identifier et organiser les groupements de petits producteurs en organisations paysannes (OP) et à renforcer leurs capacités par des formations thématiques. Cette phase pilote a permis au PAM d'acheter localement, auprès de dix organisations paysannes (OP) des petits producteurs, 1100 mt de céréales et légumineuses entre 2015 et 2017. De plus le PAM, en partenariat avec le MADR, a visé le renforcement et l'encadrement des producteurs et du Laboratoire de Sciences Biologique et Agronomique pour le développement (LASBAD) sur le contrôle de qualité (Q&Q).

L'appui aux petits producteurs/P4P du PAM en RCA a suscité beaucoup d'espoir de la part des groupements agricoles et aussi du Gouvernement qui a officiellement demandé au PAM de poursuivre le développement de cette initiative à travers une mise à l'échelle progressive.

C'est dans cette perspective que le Fonds Bêkou a lancé le financement d'une partie de ce projet. L'objectif global du projet est de « renforcer les capacités de production et de commercialisation des petits producteurs à travers la vente groupée pour augmenter leurs revenus et de renforcer leurs moyens de subsistance ». Le Fonds Bêkou, en synergie avec les financements d'autres bailleurs, ne finance pas uniquement l'achat de produits mais toute l'entièreté de l'action qui permet ces achats (formation, mise en relation, stockage etc.).

Les bénéficiaires directs du projet sont 20 Organisations paysannes faitières encadrant 46 000 groupements et associations paysannes, de petits producteurs ruraux de riz, haricots et sorgho.

Les bénéficiaires ont été ciblés en fonction des critères de vulnérabilité, du potentiel de production et du pourcentage des femmes dans les organisations paysannes. La présence des établissements scolaires de base, dans la zone du projet, est également prise en compte dans le but d'intégrer les activités d'appui aux petits producteurs et le programme d'alimentation scolaire à base de produits locaux.

Au cours des cinq premiers mois du projet, un peu plus d'un million EUR ont été mis à disposition dans l'économie locale à travers des achats locaux. Des missions d'identification, sensibilisation et ciblage ont permis d'identifier d'abord 10 organisations et faitières regroupant 1.253 groupements (24.500 ménages de petits producteurs agricoles, soit environ 122.500 individus) et ensuite 15 nouvelles organisations paysannes constituées de plus de 3.000 groupements et 40.000 ménages et le processus d'adhésion au projet est en cours.

L'identification des besoins en formations auprès ces OP est en cours. Afin de renforcer la coordination du secteur, cinq réunions de coordination sur les activités du P4P ont été organisées et présidées par le Ministère du MADR.

En décembre 2018, le Fonds Bêkou a établi deux nouveaux contrats pour ce secteur:

- Le projet d'appui intégré au développement des filières agropastorales porteuses pour la croissance et l'emploi mis en œuvre par un consortium d'ONG géré par Welthungerhilfe (WHH).  
Le projet vise l'amélioration de l'accès des Organisations Paysannes à des intrants de qualité dans les filières porteuses identifiées; la structuration des OP et la diversification de leurs services aux producteurs ; la création de valeur ajoutée à tous les maillons des chaines de valeurs agricoles à haut potentiel; et l'intégration verticale et horizontale et la structuration des filières agricoles porteuses.  
Les zones d'intervention du projet seront Ombella-M'Poko, Lobaye, Kémo, Bangui et environs.
- Le projet de renforcement de la résilience rurale dans les préfectures du Nord mis en œuvre par les ONG DRC, ACF, PUI, TGH et Concordis. Le projet vise en même temps le renforcement des capacités des organisations faitières (OPA), des groupements

des producteurs et des producteurs individuels, ainsi que celles des acteurs étatiques.

Un volet sur la mitigation des tensions liées aux transhumances est prévu. Les zones d'intervention du projet sont les Préfectures de l'Ouham, de l'Ouham Pendé, de la Bamingui Bangoran et de la Vagaka, RCA.

Grace à ces deux projets plusieurs centaines de groupements / faïtières seront formés et équipés pour initier des productions agricoles importantes qui pourront être en partie achetées par les équipes du PAM dans le cadre du projet P4P.

| Résultats clés – Résilience rurale et création d'emplois                                                                                                                     |          |                     |

### ❖ *Désenclavement des Régions en République Centrafricaine*

L'objectif de l'action consiste à désenclaver les régions prioritairement par la mise en place d'infrastructures et d'équipements. Le projet est complémentaire à de nombreuses actions en cours et il travaillera en synergie avec d'autres projets de construction et de réhabilitation d'infrastructures dans le pays.

L'installation de ponts métalliques, mis à disposition gratuitement par la France, en remplacement de bacs et ponts vétustes, permettra en particulier d'agir sur les axes routiers. Le programme contribue ainsi au développement socio-économique du pays en promouvant la circulation des biens et des personnes, en renforçant la sécurité et la cohésion sociale, et en facilitant le redéploiement des fonctionnaires et agents de l'Etat. La Convention de délégation (phase 0 du programme) a été signée avec EF en Mai 2018 pour une durée de 8 mois et un budget d'environ EUR 2,4 million.

La mise en œuvre de cette phase consiste en:

- (i) un set activités dédiées à l'identification des ponts et aux études préalables ;
- (ii) cinq activités liées à l'acheminement des matériels et équipements depuis la France et à l'installation des premiers ponts.

Dans le contexte du premier groupe d'activités des progrès sont à signaler; la formation du Comité de Pilotage en novembre 2018, les différentes missions du Centre National des Ponts de Secours (CNPS) et la signature d'un accord de cession de ponts le 2 novembre 2018.

Compte tenu que l'identification des sites d'installation des ponts est en cours, les activités liées à l'évaluation de l'impact social et environnemental et l'analyse conflit n'ont pas été encore réalisées. Deux missions de diagnostic ont été déjà réalisées avec les ingénieurs du CNPS et plusieurs cadres interministériels de l'administration centrafricaine: la première mission a été effectuée en Juillet 2018 dans la région du Sud-ouest à Mbaïki-Mongoumba et Carnot-Boda et une deuxième, du 9 au 30 novembre 2018, dans la zone du nord-ouest (Ouham Pendé, Ouham, Nana Mamberé).

Le deuxième groupe d'activités dédié à la mise en œuvre des ponts, dont la phase d'acheminement des matériaux et des opérations de construction des ponts, a démarré. Le transport de 300 mètres de ponts métalliques comporte la mobilisation d'une bonne trentaine de containers et, vers la fin décembre 2018, huit containers étaient déjà arrivés à Bangui et une bonne vingtaine était encore au Cameroun en attendant la finalisation des procédures douanières.

Une cérémonie de lancement officiel du projet a eu lieu à Bimbo le 28/11/2018 en présence du Président de la République S. E. Pr. Faustin Archange Touadera, du Premier Ministre et des membres du gouvernement ainsi que du Directeur Général de DEVCO, M.

Stefano Manservisi.

Pendant la cérémonie les éléments des FACA ont procédé à une démonstration de montage d'un segment d'un pont Bailey. En effet, EUTM avait formé une section du Génie Militaire FACA au montage de pont Bailey ainsi que pour le démontage d'un pont existant, celui de SAPEKE, et son remontage à ZINGA. Compte tenu de l'absence d'une expertise nationale, il a été décidé de confier le montage au Génie Militaire qui comptera avec le soutien technique d'EUTM. Il faut noter que les règles d'engagement du bataillon de génie des FACA imposent des contraintes élevées pour travailler à l'extérieur de Bangui, mais elles peuvent être surmontées.

La mise en œuvre du projet en huit mois préconisée par EF s'est démontrée trop optimiste et tous les délais décrits ont porté l'opérateur à demander une prolongation de la période de mise en œuvre.

A la fin de la Phase 0 il est prévu que 60m de ponts métalliques seront installés (1 pont de 30m et 2 ponts de 15m) et qu'au moins 120m de matériaux et équipements accessoires seront acheminés à Bangui.

| Résultats clés – Projet de désenclavement                                                                                                                                         |                                                                         |                     |

#### ❖ *Eau pour la Paix, Eau pour la Vie (PEPEV)*

Cette action a pour but principal d'augmenter le taux de couverture en eau potable et en assainissement de la République centrafricaine. Le projet est en ligne avec la Politique et Stratégie Nationale de l'Eau et de l'Assainissement (PSNEA), qui constitue le cadre d'orientation du secteur.

La présente action vient compléter et renforcer les impacts des différents projets de l'Union européenne, ainsi que de la Banque Africaine de Développement (BAD), de l'UNICEF et d'autres partenaires à la République centrafricaine.

#### *Intervention immédiate d'appui à l'accès à l'eau et à l'assainissement de base dans les zones prioritaires*

Le projet « Accès à l'eau et à l'assainissement de base dans les zones prioritaires en RCA », contracté le 12 avril 2018, est mis en œuvre par les ONG World Vision, Judepec (ONG nationale), Water for Good et Oxfam.

Son objectif global est d'augmenter le taux de couverture en eau potable et d'améliorer l'hygiène et l'assainissement dans les zones rurales des préfectures de Sangha-Mbaéré (sous-préfectures de Nola, Bayanga et Bambio), Ouham Pendé (Bocaranga, Kouï et Ngaoundaye, Paoua), Bamingui-Bangoran (Ndelé et Bamingui) et Vakaga (Birao). En plus de la construction des nouveaux forages, des latrines familiales et d'autres points d'eau, le développement des compétences techniques pour les membres des communautés est prévu.

En plein alignement avec l'approche LRRD, le projet vise d'établir un partenariat effectif entre les Comités de Gestion des Points d'Eau (CGPE) locaux et l'Agence Nationale de l'Eau et de l'Assainissement (ANEa).

Afin de mieux comprendre les besoins ainsi que les attitudes et pratiques des communautés en matière d'eau, une phase diagnostique a eu lieu pendant les premiers mois du projet. Cette phase comprenait l'évaluation des besoins et capacités des Comités de Gestion des Points d'Eau (CGPE) ; à l'issue de cette première enquête, le choix des villages est en train d'être finalisé et un programme de renforcement des capacités est développé. De plus, un autre diagnostique a permis la finalisation et publication des listes des sites pour la construction et réalisation des forages.

Afin de connaître le niveau de connaissances, d'attitudes et de pratiques des communautés en matière d'eau, d'assainissement et d'hygiène, une enquête de base a été distribuée. A la base de cette analyse, les premières activités de sensibilisation de masse ont eu lieu avant la fin de l'année.

Dans le cadre du renforcement des capacités des communautés en matière d'hygiène et d'assainissement piloté par la communauté (ATPC), plusieurs communautés ont été engagées et ont bénéficié des activités de construction des latrines familiales.

L'objectif fondamental est d'amener la communauté à faire eux même une approche participative afin de se donner à l'utilisation des latrines.

### Intervention structurante sur le moyen terme

La deuxième composante du programme a pour but l'acquisition de matériels et équipements de forages pour l'ANEA pour leur permettre d'assurer le suivi et la maintenance dans les zones rurales. Une convention de subvention a été signée avec UNICEF en juillet 2018.

Comme pour la première composante, une phase d'analyse de base était nécessaire. En novembre, l'analyse de la situation a été lancée à Bossangoa et à Paoua. A Bossangoa, l'analyse faite sur 12 axes a permis d'identifier 176 villages identifiés pour la conduite de l'ATPC; le besoin de 77 nouvelles constructions de points d'eau et de 133 réhabilitations de points d'eau répertoriées.

A Paoua, le l'analyse faite sur 5 axes a permis d'identifier le besoin de 17 nouvelles constructions de points d'eau et de 70 réhabilitations de points d'eau répertoriées.

En pleine synergie avec d'autres programmes, le projet vise l'installation de latrines pour les écoles et les FOSAs. Etant donné que l'ANEA a développé des plans similaires, une complémentarité et synergie sera assurée.

Le déploiement des équipes ANEA sur le terrain vers la fin du mois d'octobre était un point marquant pour le projet et les préfectures de la mise en œuvre. Cependant, tous les agents n'ont pas pris leurs fonctions. Afin de favoriser ce déploiement, UNICEF a remis une partie de matériel acheté sous fonds du projet à l'ANEA pour permettre le démarrage des activités.

## **2.3. Suivi et évaluation**

### **2.3.1. Cadre de Résultats**

Dans son rapport spécial<sup>42</sup> (publié en octobre 2017), la Cour des comptes a recommandé l'identification des objectifs SMART pour le Fonds Bêkou avec des indicateurs correspondants, afin de pouvoir suivre et démontrer les résultats au niveau du Fonds.

Le Cadre de Résultats identifiant la chaîne de résultats et reprenant tous les indicateurs importants des projets individuels a été approuvé par le Comité de Gestion le 30 novembre 2018. Le Cadre de Résultats sera alimenté par des bases des données internationales et nationales (notamment au niveau d'impact et de réalisations) et des cadres logiques des projets mis en œuvre par le Fonds Bêkou (notamment au niveau d'extrants).

Enfin, il est important de noter qu'il évoluera en accord avec la ligne stratégique du Fonds Bêkou ainsi que l'adoption des nouvelles actions et/ou la mise à jour des cadres logiques individuels.

### 2.3.2. Missions de suivi axé sur les résultats

Depuis 2016, les projets du Fonds Bêkou bénéficient du suivi basé sur les résultats (ROM – *Results Oriented Monitoring*), module commun aux DG DEVCO, DG NEAR, et Délégations de l'Union européenne.

La planification annuelle prévu 5 missions ROM; cependant, la seule mission effectuée était celle du projet T03.101 – « Projet d'appui à la relance des filières de l'élevage urbain et périurbain en République centrafricaine ». L'incapacité d'avancer avec tous les missions prévues, est liée, dans tous les cas, au contexte sécuritaire et à l'indisponibilité des experts prêts à partir pour la RCA et notamment pour des missions dehors Bangui.

### 2.3.3. Evaluations

Une évaluation externe a été conduite en avril/mai 2018 sur les deux premières phases du programme de Santé<sup>43</sup> et a principalement porté sur les critères de pertinence, valeur ajoutée de l'Union européenne, cohérence, efficacité, efficience, impact et viabilité. Les évaluateurs ont confirmé le rôle essentiel du Fonds Bêkou dans le secteur de la santé, en couvrant 30% des services de santé du pays. L'impact visible du programme lors de l'évaluation concerne notamment la remise en activité des formations sanitaires dans les zones d'intervention et la relance du Paquet Minimum d'Activités (PCA) et Paquet Complémentaire d'Activités (PCA). La population locale, y inclus les notables, ont clairement associé la diminution des mortalités infantiles et maternelles, observée dans les communautés ciblées, au programme du Fonds Bêkou. L'évaluation a par ailleurs mis en lumière la contrainte structurelle en termes de disponibilité de ressources humaines qualifiées et adéquates au niveau des équipes-cadres de district et des formations sanitaires.

Bien que les ONG aient réussi à renforcer les districts sanitaires et contribuent à recruter/former le personnel des formations sanitaires, celui-ci reste insuffisant par rapport aux besoins. Les évaluateurs ont cependant constaté la bonne performance des ONG partenaires, en dépit des conditions contextuelles et sécuritaires souvent difficiles. Les interventions des différents acteurs méritent néanmoins d'être mieux harmonisées, afin d'assurer une qualité égale dans les formations sanitaires appuyées. Dans la mesure du possible, les recommandations de l'évaluation ont été prises en compte dans la formulation de la phase 3 de l'action.

## 2.4. Communication et visibilité

Sur toute l'année 2018, les partenaires ont poursuivi la mise en œuvre de leur plan de communication et visibilité, assurant une sensibilisation et communication sur les projets, ainsi que la visibilité de l'Union européenne. Cette année a marqué une coordination plus étroite avec les partenaires de la mise en œuvre en termes du respect des exigences de visibilité accompagnée par une révision progressive des Plans de Communication des projets.

Par ailleurs, les partenaires exécutifs ont continué à publier des articles et témoignages de bénéficiaires sur le site internet de capacity4dev (<https://europa.eu/capacity4dev/trust-fund-bekou>), mais également leurs propres sites et réseaux sociaux et la presse locale.

Le Fonds Bêkou a également effectué les activités de communication et visibilité suivantes:

| Activité                                                                              | Lieu      | Dates                |
|---------------------------------------------------------------------------------------|-----------|----------------------|

| Discussion stratégique sur le futur du Fonds Bêkou avec l'objectif d'échanger des idées et de développer les perspectives avec toutes les parties prenantes: UE (SEAE et Commission Européenne), Etats membres, gouvernement centrafricain (avec la présence du Ministre du Plan et du Ministre de la Santé) et des ONG qui opèrent en RCA. | Bruxelles | 19/10/2018              |

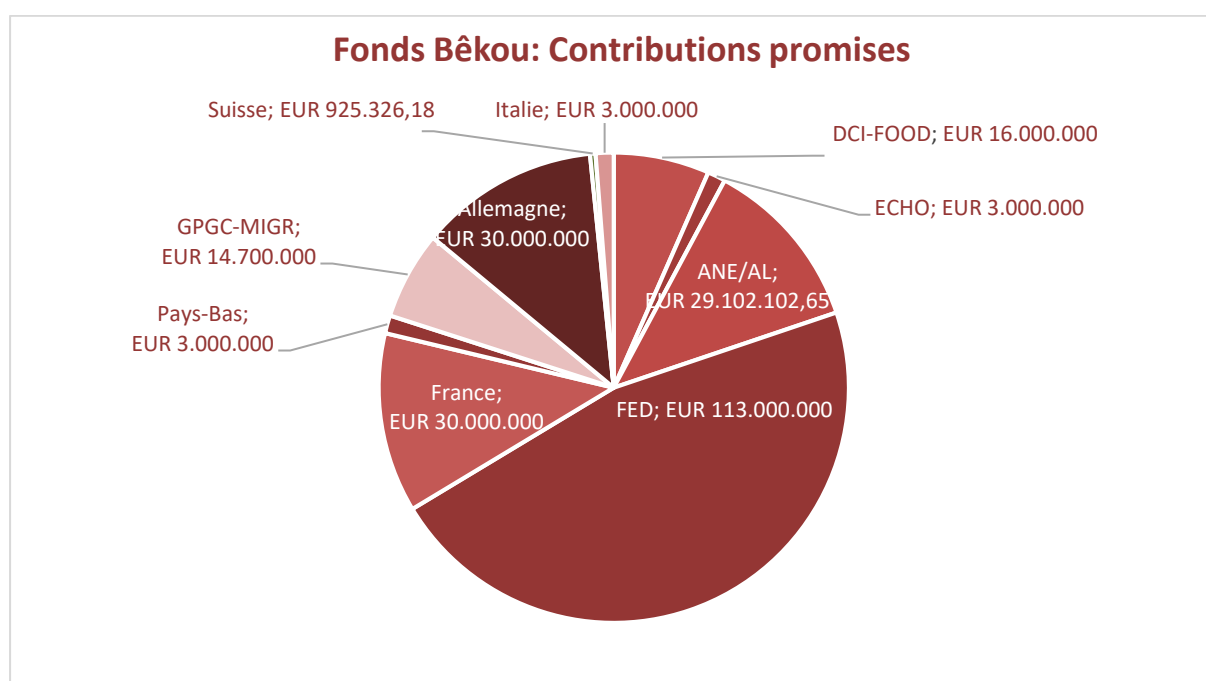

## SECTION 3 – RAPPORT FINANCIER<sup>44</sup>

### 3.1. Promesses de dons et contributions

En 2018, les contributeurs du Fonds Bêkou se sont engagés pour un montant de contributions dépassant les EUR 242 millions, ce qui représente une augmentation de 6 millions par rapport au total des contributions 2017.

Ces promesses de dons se sont concrétisées pour la plus grande part: plus de EUR 237 millions ont été confirmés par un certificat de contribution, contre seulement EUR 5 millions en attente de certificat.

Le graphique ci-dessous montre la ventilation des contributions promises par contributeur.

<sup>44</sup> Draft annual accounts of the EU Trust Fund will be annexed to the AAR of the AOD.

Le tableau ci-dessous montre la ventilation entre contributions promises, confirmées et payées ainsi que les montants des crédits (opérationnels et administratifs) d'engagement et de paiement (avec les intérêts perçus jusqu'à la fin de 2018).

| Contributions                                                                               | Promesses (EUR)       | Certifiés (EUR)       | Intérêts (EUR) | Payés (EUR)           |

### 3.2. Bénéficiaires et montants contractualisés

En 2018, le Fonds Bêkou a conclu 30 nouveaux contrats pour un montant total de presque EUR 80 millions. Ces contrats ont été conclus dans le cadre des programmes suivants: Programme d'appui sectoriel santé au Plan de Transition en RCA (Santé 2) ; Programme d'appui sectoriel santé au Plan Intérimaire en RCA (Santé 3) ; Programme de relance économique et d'autonomisation des acteurs économiques centrafricains; Programme de promotion de la cohésion sociale, du dialogue et de la réconciliation dans la société centrafricaine ; Programme de résilience rurale et création d'emplois ; Projet Eau pour la Paix, Eau pour la Vie (PEPEV) ; Projet de désenclavement des Régions en République Centrafricaine et dans le cadre de la Facilité d'assistance technique et de communication.

En 2018, le Fonds Bêkou a aussi approuvé l'augmentation de certaines subventions déjà attribuées lors d'années précédentes. En particulier la subvention déjà attribuée en 2016 à DRC dans le cadre du programme Relance économique a été augmentée de quasi 2 000 000 EUR, la subvention déjà attribuée en 2016 à ALIMA dans le cadre du programme Santé II a été augmentée d'un peu plus de EUR 423.000 et la subvention déjà attribuée en 2017 à IRC dans le cadre du programme Genre II a été augmentée de EUR 600.000. La liste de tous les contrats signés depuis le lancement du Fonds Bêkou, y inclus le nom de l'organisation bénéficiaire, le montant contractualisé ou final et l'année de signature du contrat, est l'objet du tableau ci-dessous.

| Contrats 2014-2018 |                                                                                                                                                                                                                                           |                           |                                                          |                               |

### 3.3. Montants payés

En 2018, presque EUR 58 millions ont été décaissés. Ce montant vient s'ajouter aux paiements précédents pour atteindre un total décaissé de plus de EUR 115 millions depuis le lancement du Fonds Békou.

Le tableau ci-dessous montre le montant des paiements en 2018 par type de ligne budgétaire.

| Ligne budgétaire                       | Montant des paiements |
|----------------------------------------|-----------------------|
| Dépense administrative                 | 1.000.000             |
| Société civile, autorités locale       | 10.429.952            |
| Changement climatique                  | 1.907.446             |
| Education                              | 4.468.306             |
| Sécurité alimentaire et nutritionnelle | 8.293.313             |
| Santé                                  | 20.695.209            |
| Dépenses opérationnelles horizontales  | 113.701               |
| Aide humanitaire (réponse d'urgence)   | 3.233.178             |
| Infrastructure, réseaux                | 1.585.000             |
| Eau & assainissement                   | 5.991.962             |
| <b>Total</b>                           | <b>57.718.067</b>     |

Le tableau ci-dessous montre la part des préfinancements et des dépenses réelles (dépenses justifiées et approuvées) par type de contrat/mode de gestion pour les paiements 2018.

### 3.4. Analyse KPI

Le Fonds Bêkou rapporte sur les KPI 6, 7, 19, et I6.

Sur les 37 projets actifs en 2018, 11 projets ont été marqués oranges pour les KPI 6 et/ou KPI 7. Les raisons principales sont :

1. Le niveau élevé d'insécurité dans les régions/communautés ciblées. La situation sécuritaire a compliqué la mise en œuvre des activités en créant des retards significatifs. Dans certains cas, les mouvements des populations ont entravé une partie des résultats des projets.
2. Les faibles capacités de certaines structures publiques, notamment au niveau décentralisé. Comme plusieurs projets ont des composantes inextricablement liées aux opérations d'entités publiques, ces faiblesses ont eu un impact direct sur les projets.

Pour toutes les raisons susmentionnées, le Fonds Bêkou considérera une éventuelle extension des projets et/ou réorientation de certaines activités, afin que les résultats escomptés puissent être atteints.

En 2018, deux projets ont été marqués rouges pour les KPI 6 et/ou KPI 7.

- PRESU II: visant à capitaliser sur les acquis de la première phase du projet, PRESU II a souffert des retards de la composante infrastructure du PRESU I. La complexité du contexte a rendu l'organisation des marchés et la planification des activités sur la base des études techniques préparés difficile. Une extension du projet pourrait être envisagée.
- Désenclavement des Régions: la mise en œuvre du projet en huit mois préconisée par EF s'est démontrée trop optimiste. Une prolongation de la période de mise en œuvre a été demandée fin décembre 2018.

En 2018, seulement un projet a été évalué ponctuellement par une mission ROM (cf. section 2.3). En raison des conditions sécuritaires, des visites de projets par le personnel du Fonds Bêkou se sont principalement effectuées à Bangui. Par ailleurs, le suivi des projets a été assuré par les réunions de suivi/coordination avec les partenaires de mise en œuvre, la participation du Fonds Bêkou dans les comités de pilotage de certains projets, et la collecte régulière d'informations et de données.

Les projets du Fonds Bêkou sont dotés d'un plan de communication et visibilité, lesquels sont adoptés par le Fonds lors de la contractualisation des partenaires de mise en œuvre. Exceptions sont les projets d'Assistance technique. Contrairement au premier projet, le nouveau projet d'appui à la « Radio Ndeke Luka » s'est doté d'un plan de communication et visibilité.

Le Fonds Bêkou rapporte aussi sur les KPI liés à la bonne gestion financière et l'utilisation efficace des ressources de la Commission ainsi que l'efficacité des contrôles internes (voir annexe Rapport sur les KPI (DWH report)).

| Indicator Category                                           | Indicator Name               | Indicator Title                                                                                      | Benchmark Label      | KPI / Indicator Value |

| Effectiveness of Internal Controls                           | K21B - Ex-ante Inelig. (Nbr) | Undue expenditure prevented by ex-ante controls as a % of the claimed amount (by number of invoices) | -                    | 34,78%                |

Les résultats pour 2018 sont globalement positifs.

En ce qui concerne les indicateurs oranges sur les prévisions financières:

L'exactitude des prévisions faites en début d'année se sont avérées relativement correctes pour le premier semestre mais pas pour le second semestre où les prévisions pour les paiements et les décisions se sont montrées trop optimistes et les prévisions pour les contrats trop pessimistes. En effet nous avons eu tendance à sous-estimer le retard pris par les bénéficiaires soit pour la mise en œuvre de leur action soit pour la soumission des rapports narratifs et financiers intermédiaires et/ou finaux. Egalement la qualité de certains rapports financiers a laissé à désirer ce qui a demandé pour certains d'entre eux de nombreuses demandes de clarifications et corrections. Tout cela a eu un impact non négligeable sur le montant de paiements.

L'exactitude des prévisions révisées en juillet pour le second semestre se sont par contre montrées plus exactes pour les paiements (96%) et les contrats (95%) mais sont restées trop optimistes pour les décisions. Il avait été décidé de maintenir la décision pour la suite du programme résilience rurale et création d'emplois (« DEVRUR ») mais cela n'a finalement pas été possible pour les raisons suivantes :

- La faible capacité d'absorption et les retards dans la mise en œuvre des projets par les contractants, surtout sur DEVRUR I;
- La nécessité de réadapter la stratégie pour DEVRUR II, après des conversations avec les états-membres et les collègues à Bangui;
- Les changements/vacances de staff dans le secteur « Développement Rural ».

En ce qui concerne l'indicateur orange sur l'insuffisance des montants inéligibles détectés ex-ante :

Il peut s'expliquer par le fait qu'aucun des rapports finaux des audits et vérifications externes (voir section 4.1.1.2 ci-dessous) que nous avons lancés en 2018 et qui en

général détectent plus de montants inéligibles que dans les rapports de vérification que nous recevons de nos bénéficiaires n'ont pu être finalisés à temps pour pouvoir enregistrer ces dépenses inéligibles en 2018. Ce qui sera fait seulement en 2019.

Il est sans doute aussi important de mentionner qu'en 2018 trois nouveaux agents contractuels ont rejoint l'équipe du Fonds Bêkou sur des postes qui étaient déjà vacants en 2017 et qu'il n'a pas été possible de recruter un deuxième agent contractuel pour en poste à Bangui (désistement). Fin 2018 un poste d'agent contractuel au siège ainsi qu'un poste d'agent contractuel et un poste d'agent local en Délégation restent vacants. Malgré cela, il faut noter que presque 50% du total décaissé depuis le début du Fonds Bêkou a été payé en 2018 et que 48% du montant contractualisé depuis le début du Fonds Bêkou l'a été en 2018.

## SECTION 4 – MANAGEMENT ET CONTRÔLE INTERNE

### 4.1. Résultats des contrôles

#### 4.1.1. Efficacité des contrôles concernant la légalité et la régularité

##### 4.1.1.1. Résultats des contrôles ex-ante

Des contrôles ex-ante sont effectués de manière systématique par les 4 intervenants du circuit financier Bêkou, et ce pour toutes les transactions du Fonds. En 2018, 23 "factures" (factures commerciales ou demandes de remboursement) présentaient des dépenses à valider, les autres paiements étant liés à des préfinancements. Le tableau ci-dessous montre le résultat des contrôles et les dépenses inéligibles détectées avant paiement.

|                                               | Number of invoices | Gross Amount         | Not Eligible     | Credit Note      | Total Not Eligible | % Not Eligible |
|-----------------------------------------------|--------------------|----------------------|------------------|------------------|--------------------|----------------|
| Grants in Direct Management                   | 7                  | 7.542.441,01         | 38.175,55        | 0,00             | 38.175,55          | 0,51%          |
| Procurement in Direct Management              | 13                 | 614.210,29           | 0,00             | 16.988,00        | 16.988,00          | 2,77%          |

| <b>Total</b>                                  | <b>23</b>          | <b>12.949.296,07</b> | <b>38.176,02</b> | <b>16.988,00</b> | <b>55.164,02</b>   | <b>0,43%</b>   |

##### 4.1.1.2. Résultats des audits externes

Les audits externes incluent les contrats de vérification de dépenses ou d'audit financier/de système contractualisés par le Fonds Bêkou.

Le premier plan annuel d'audit et de vérification a été établi en 2017<sup>48</sup> comme suit:

| Réf N° | Titre                                                                                                                                               | Bénéficiaire | Type d'engagement |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-------------------|
| T03.10 | Strengthening the health system in North-eastern Central African Republic                                                                           | IMC          | Audit financier   |
| T03.11 | Assistance médico-nutritionnelle auprès des populations résidentes et déplacées du VIème arrondissement de Bangui et du district sanitaire de Bimbo | ALIMA        | Audit financier   |
| T03.30 | Programme de reconstruction économique et sociale en milieu urbain RCA                                                                              | AFD          | Audit financier   |
| T03.32 | Programme de réponse à court et moyen terme à l'afflux de réfugiés de la RCA au Cameroun                                                            | GIZ          | Audit financier   |

<sup>48</sup> En 2018 il a été décidé de retirer le contrat T03.30 signé avec AFD de ce plan à cause de l'avenant prolongeant la durée de la mise en œuvre de 36 mois. Ce contrat fera partie du plan annuel d'audit et de vérification de 2020.

|        |                                                                     |       |                               |
|--------|---------------------------------------------------------------------|-------|-------------------------------|
| T03.46 | Sécurité alimentaire – accompagnement des activités de pastoralisme | ACORD | Audit financier et de système |
| T03.47 | Sécurité alimentaire - Résilience                                   | FAO   | Vérification                  |
| T03.49 | Sécurité alimentaire - Transhumance                                 | FAO   | Vérification                  |

Le deuxième plan annuel d'audit et de vérification a été établi en 2018 comme suit:

| Ref N° | Titre                                                                              | Bénéficiaire | Type d'engagement |
|--------|------------------------------------------------------------------------------------|--------------|-------------------|
| T03.80 | Ecosystème Faunistiques du Nord-est RCA/Tchad et du Sud-est de la RCA – Volet Nord | AGRECO       | Audit financier   |
| T03.88 | Fini Bangondo Ti Mai (Nouvelle vision pour le développement)                       | DRC          | Audit financier   |

En 2018, trois contrats spécifiques ont été signés via le contrat-cadre audit.

Un contrat spécifique a été signé avec Moore Stephens pour auditer les subventions octroyées à IMC, ALIMA et ACORD. Seul le projet de rapport d'audit pour IMC a été soumis avec une opinion non qualifiée. Le montant inéligible à ce stade est équivalent à 0,39% du total des dépenses du projet mais ce pourcentage pourrait être ramené à 0,001% suite aux commentaires de la Commission.

Un contrat spécifique a été signé avec Baker Tilly pour la vérification des deux contrats signés avec la FAO. Le rapport final de vérification pour le contrat T03.47 (résilience) a été soumis. Le montant des dépenses dont l'inéligibilité est établie est équivalent à 0,7% du total des dépenses du projet.

En plus de deux constatations financières pour un montant de EUR 10.171,25, il mentionne également une constatation de contrôle interne (absence de contrôle du rapport financier d'un prestataire justifiant des dépenses engagées) et cinq autres constatations relatives à l'obligation de conformité (rapport soumis en retard, communication tardive de la modification budgétaire, rapport non conforme au niveau des mesures de contrôle prises, des informations sur les transferts d'équipements, de véhicules et des fournitures importantes ainsi que des mesures de visibilité). Le rapport pré-final de vérification pour le contrat T03.4 (transhumance) a été soumis.

Le montant des dépenses dont l'inéligibilité est établie est équivalent à 17,99% du total des dépenses du projet. En plus de trois constatations financières pour un montant de EUR 130.256,57, il mentionne également une constatation relative au contrôle interne (incohérence entre le rapport financier final et le rapport financier final) et les mêmes constatations relatives à l'obligation de conformité que celles pour le contrat T03.47.

Un contrat spécifique a été signé avec Moore Stephens pour auditer le rapport financier de la première année de la subvention avec AGRECO. Le rapport final d'audit a été soumis avec une opinion non qualifiée.

Le montant des dépenses dont l'inéligibilité est établie est équivalent à 0,15% du total des dépenses du projet.

En plus de trois constatations financières pour un montant de EUR 1.870,99, il mentionne également plusieurs constatations relatives au contrôle interne (insuffisances dans le système de documentation des dépenses, forme de contrat avec le Haut-Commissariat inappropriée, libellés des dépenses imprécis ou non explicites dans le système comptable, insuffisances au niveau du système de contrôle des coûts d'entretien et de réparation des véhicules, marché de services attribué en marge des procédures, contenu du dossier du personnel non exhaustif, absence d'un système d'évaluation du personnel).

La procédure pour l'attribution d'un contrat spécifique pour auditer GIZ a été infructueuse alors que la procédure pour auditer DRC n'a pas été lancée à cause du retard dans la soumission du rapport financier intermédiaire.

#### **4.1.2. Prévention et détection des fraudes<sup>49</sup>**

Pas de résultats à rapporter sous cette rubrique pour 2018.

### **4.2. Observations et recommandations faites par le Service d'audit interne/la Cour des comptes**

La Cour des comptes européenne a mené une mission d'audit de performance en 2016/2017 sur la conception et la mise en œuvre du Fonds Bêkou. Cette mission a donné lieu à un rapport spécial ("Le fonds fiduciaire Bêkou de l'UE pour la République centrafricaine: un début chargé d'espoir malgré quelques insuffisances" - <http://publications.europa.eu/webpub/eca/special-reports/Bekou-11-2017/fr/>) sur la base duquel un plan d'action a été établi par DEVCO et le Fonds Bêkou afin d'apporter une réponse aux recommandations effectuées par la Cour.

Les observations de la Cour sont les suivantes:

- Bien que reposant sur une analyse limitée, tant la décision de mettre en place le Fonds Bêkou que la conception retenue pour celui-ci étaient adaptées aux circonstances.
- La gestion du fonds Bêkou peut être améliorée.
- Malgré des circonstances difficiles, le Fonds Bêkou a donné à ce jour des résultats globalement positifs.

Les recommandations de la Cour sont les suivantes:

- Elaborer de nouvelles orientations sur le choix des instruments de financement et sur les analyses des besoins visant à définir les champs d'intervention des fonds fiduciaires;
- Améliorer la coordination au niveau des donateurs, les procédures de sélection et la mesure de la performance et optimiser les coûts administratifs.

### **4.3. Evaluation de l'efficacité des systèmes de contrôle interne**

Le Fonds Bêkou opère dans le système général de contrôle interne défini par la Commission.

Dans ce cadre, le gestionnaire a effectué l'évaluation des systèmes de contrôle en place au moyen du questionnaire ad hoc sur les 16 standards de contrôle interne.

Cette évaluation se fonde sur le rapport du Service d'audit interne, sa propre évaluation des systèmes de contrôle et des risques, le type d'exceptions/dérogations enregistrées, le nombre et la fréquence des irrégularités détectées (faible) et d'autres informations (fonctionnement des circuits financiers, rapports de vérification des dépenses, missions de l'équipe, missions ROM, etc.).

D'une manière générale, aucune faiblesse significative n'a été détectée.

### **4.4. Conclusions concernant l'assurance**

L'évaluation des systèmes de contrôle en place permet au gestionnaire de signer la déclaration d'assurance ci-dessous sans formuler de réserve.

---

<sup>49</sup> EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge.

## SECTION 5 – ANNEXES

### Annex 1 – Liste des dérogations, exceptions, cas de non-conformité, autorisations préalables et cas à signaler

| EUTF BEKOU - RAPPORT D'EXCEPTIONS 2018 |                                                                                                                                                                                                                                                                                                                    |                                                                                        |                                   |                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                                         |

| 83       |                                                                | Attribution directe suite à un AMI                                                                                              | EVR 20b)              | PRAG 2016, section 6.4.2: Subventions attribuées sans appel à propositions ("Attribution directe") / Companion novembre 2017, section 24.6.2.1: Exceptions à l'application des procédures de mise en concurrence ou d'attribution de subventions | Il n'est pas nécessaire d'organiser un appel à propositions avant d'attribuer des subventions dans le cadre de l'aide humanitaire, des opérations de protection civile, ou des aides visant des situations de crise.                                                           | La situation en RCA a fait l'objet d'une déclaration de crise. L'autorisation de recours aux procédures flexibles a de plus été inscrite dans l'Acte constitutif du Fonds Békou en son art. 10: "les procédures flexibles adaptées au contexte seront utilisées afin d'assurer l'efficacité et la réactivité du fonds". En vertu des lignes directrices sur les procédures à utiliser dans les situations de crise, la procédure d'octroi direct de subventions a été retenue et approuvée par le DG de DEVCO le 10/11/2014 (ref. Ares(2014)3731767).                                                                                                                                                                                                                                                       | Pas de risque | N/A                                     |
| 84       | Contrat de service avec AEDES - T03.150 - SANTÉ II             | Procédure négociée concurrentielle pour une Assistance Technique invitant les entités du Contrat-cadre BENEf 2013 - lot 8 Santé | E                     | PRAG 2016, sections 2.4.4 et 3.4.2: Procédure négociée concurrentielle / Companion novembre 2017, section 21.4.2.5: Passation de marchés                                                                                                         | Dans la procédure négociée concurrentielle, le pouvoir adjudicateur invite les candidats de son choix à soumettre une offre. A l'issue de cette procédure, il retient l'offre techniquement conforme qui présente le meilleur rapport qualité/prix pour les services demandés. | Conformément aux lignes directrices sur les fonds fiduciaires du Companion, il est possible de dépasser les seuils du Contrat-cadre (CC). Il aurait donc été possible d'utiliser le CC BENEf pour ce marché. Cependant, les Termes de Référence (TdR) prévoyaient que les prestations incluent l'habillage de l'expert, ce qui rendait les honoraires fixés dans le CC inapplicables. Pour cette raison, il a été décidé de passer une procédure concurrentielle négociée, avec dépassement du seuil de 300 000 EUR, en invitant les sociétés du CC BENEf 2013 - lot 8 étant donné que leur expertise avait déjà été évaluée et que les critères de non-exclusion et de capacité avaient été vérifiés. Le modèle de contrat de service - et ses annexes - non du CC a par conséquent également été utilisé. | Pas de risque | N/A                                     |
| 85       | Contrat de service avec Sogerom - T03.172- DÉVELOPPEMENT RURAL | Procédure négociée concurrentielle pour une Assistance Technique invitant 4 des entités du Contrat-cadre SIEA                   | E                     | PRAG 2016, sections 2.4.4 et 3.4.2: Procédure négociée concurrentielle / Companion novembre 2017, section 21.4.2.5: Passation de marchés                                                                                                         | Dans la procédure négociée concurrentielle, le pouvoir adjudicateur invite les candidats de son choix à soumettre une offre. A l'issue de cette procédure, il retient l'offre techniquement conforme qui présente le meilleur rapport qualité/prix pour les services demandés. | Conformément aux lignes directrices sur les fonds fiduciaires du Companion, il est possible de dépasser les seuils du CC. Il aurait donc été possible d'utiliser le CC SIEA pour ce marché. Cependant, les TdR prévoyaient que les prestations incluent l'habillage de l'expert, ce qui rendait les honoraires fixés dans le CC inapplicables. Pour cette raison, il a été décidé de passer une procédure concurrentielle négociée, avec dépassement du seuil de                                                                                                                                                                                                                                                                                                                                            | Pas de risque | N/A                                     |

| 89       |                                                                           | Ajout de dispositions supplémentaires à l'article 7 des conditions particulières du PAGODA lorsqu'elles ne sont pas permises par les conditions générales ou, le cas-échéant, un accord-cadre | 7c                    | Annexes Companion novembre 2017, annexe c5b                                                                                                                      | Le modèle des Conditions Particulières du PAGODA permet explicitement d'inclure à l'article 7 des dispositions supplémentaires qui complètent les conditions générales, notamment concernant l'aide financière à des tiers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | L'aide financière à des tiers est l'un des principaux objectifs de cette action, dont l'objectif global est de renforcer les capacités de production et de commercialisation des petits producteurs à travers la vente groupée pour augmenter leurs revenus et de renforcer leurs moyens de subsistance. Pour la mise en œuvre opérationnelle, le PAM envisage de fournir un soutien financier à des structures nationales comme l'ACDA, le LASBAD et autres pour l'encadrement des organisations paysannes (OP) et les aspects liés au contrôle de qualité tout comme à des ONGs Internationales et nationales pour mettre en œuvre les activités de renforcement des OP notamment les activités d'encadrement et de formation.                  |                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 90       | Convention de délégation PAGODA 2 avec Expertise France - T03.140 - PONTS | Ajout de dispositions supplémentaires à l'article 7 des conditions particulières du PAGODA lorsqu'elles ne sont pas permises par les conditions générales ou, le cas-échéant, un accord-cadre | 7c                    | Annexes Companion novembre 2017, annexe c5a                                                                                                                      | Le modèle des Conditions Particulières du PAGODA permet explicitement d'inclure à l'article 7 des dispositions supplémentaires qui complètent les conditions générales, notamment concernant les coûts de bureau de projet.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Les infrastructures et le personnel du bureau local à Bangui de Expertise France sont mis à disposition pour la réalisation des activités du projet et pour le suivi des missions du personnel provenant de la France afin de garantir les conditions adéquates pour la phase de diagnostic et d'installation des premiers ponts. Le bureau local fait aussi la liaison avec les acteurs présents en RCA et impliqués dans l'action.                                                                                                                                                                                                                                                                                                              | Pas de risque                                                                                                                                                                                   | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 91       | Contrat de subvention avec CUAMM - T03.141 - SANTÉ II                     | Financement rétroactif                                                                                                                                                                        | EVR 22 a)             | PRAG 2016, section 6.3.8: Non-rétroactivité / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | Exceptionnellement une subvention peut être attribuée en cours d'action si les demandeurs démontrent et justifient la nécessité de démarrer l'action avant la signature du contrat. Dans ce cas, les dépenses encourues avant la soumission de la demande de la subvention ne sont en principe pas éligibles à un financement (pour les subventions directes le financement peut démarrer au premier jour des négociations, tel que confirmé par les preuves administratives). Dans le cadre d'une gestion directe, un financement rétroactif - lorsque les coûts encourus avant la signature du contrat de subvention mais après la soumission des demandes de subventions seront remboursés - constitue un événement à déclarer. | L'ONG CUAMM a repris officiellement les activités d'appui et de formation au Complexe Pédiatrique de Bangui (CPB) le 01/07/2018 à la place de l'ONG Emergency qui s'est retirée du pays le 30.06.2018. Le financement octroyé via le contrat T03.141 visait à appuyer l'opérateur travaillant au sein du CPB, structure ayant un rôle essentiel pour la santé infantile en RCA, car il est le seul hôpital pédiatrique en RCA et la seule structure de 2e référence au niveau national pour les urgences pédiatriques. Afin d'éviter un gap entre le départ d'Emergency du CPB et la reprise de l'appui par CUAMM, le Fonds Békou a retenu l'option de démarrer le financement au 01/07/2018, avant même la finalisation du contrat (12/07/2018). | Risque lié à la mise en œuvre d'une action sans couverture contractuelle, ce qui implique notamment l'absence d'un cadre (légal) clair en cas de litige ou plus simplement sur les modalités de | Nombreux éléments permettant d'encadrer l'action et sa mise en œuvre :<br>- une invitation à soumissionner détaillée, tant en termes de conditions de mise en œuvre de l'action, qu'en termes d'objectifs et de résultats attendus,<br>- canaux de communication nombreux (contacts avec la gestionnaire de projet, présence sur place du représentant Békou),<br>- périmètre de mise en œuvre connu étant donné que le contrat T03.141 est le résultat d'une longue discussion/négociation avec l'ONG Emergency en charge du CPB |

## EUTF BEKOU - RAPPORT D'EXCEPTIONS 2018

| No. Ref. | Ref. (FA/Proc/Contrat)                                                            | Cas rapporté                                                                                                                                                                                  | E - D - NC - AP - EVR | Base légale de référence                                                                                                                                         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Description du cas, justification, impact                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Risques                                                                                                                                                                                                        | Mesures prises pour limiter les risques                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 92       | <b>Contrat de subvention avec Fondation Hirondelle - T03.144 - RÉCONCILIATION</b> | Financement rétroactif                                                                                                                                                                        | EVR 22 a)             | PRAG 2016, section 6.3.8: Non-rétroactivité / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | Exceptionnellement une subvention peut être attribuée en cours d'action si les demandeurs démontrent et justifient la nécessité de démarrer l'action avant la signature du contrat. Dans ce cas, les dépenses encourues avant la soumission de la demande de la subvention ne sont en principe pas éligibles à un financement (pour les subventions directes le financement peut démarrer au premier jour des négociations, tel que confirmé par les preuves administratives). Dans le cadre d'une gestion directe, un financement rétroactif - lorsque les coûts encourus avant la signature du contrat de subvention mais après la soumission des demandes de subventions seront remboursés - constitue un événement à déclarer. | Pour éviter qu'il y ait une interruption entre le projet T03.70 et le projet en question dans l'appui à la Radio Ndeke Luka, le Fonds Békou a retenu l'option de démarrer le financement au 01/05/2018, suite à la fin du contrat précédent (T03.70), et non à la signature du contrat en question, qui a eu lieu le 26/05/2018. L'importance d'éviter toute interruption entre les deux actions avait déjà été discutée lors de plusieurs rencontres entre la Fondation et le Fonds Békou. Malgré les efforts faits pour obtenir une proposition satisfaisante avant fin avril 2018, un délai supplémentaire a été nécessaire pour finaliser le contrat. La Fondation Hirondelle a donc soumis une demande formelle de rétroactivité que le Fonds Békou a accepté.G35 | Risque lié à la mise en œuvre d'une action sans couverture contractuelle, ce qui implique notamment l'absence d'un cadre (légal) clair en cas de litige ou plus simplement sur les modalités de mise en œuvre. | Nombreux éléments permettant d'encadrer l'action et sa mise en œuvre :<br>- une invitation à soumissionner détaillée, tant en termes de conditions de mise en œuvre de l'action, qu'en termes d'objectifs et de résultats attendus,<br>- canaux de communication nombreux (contacts avec la gestionnaire de projet, présence sur place du représentant Békou),<br>- périmètre de mise en œuvre connu étant donné que le contrat T03.144 est une continuation du contrat T03.70. |
| 93       | <b>Convention de délégation PAGODA 2 avec UNICEF - T03.149 - EAU</b>              | Ajout de dispositions supplémentaires à l'article 7 des conditions particulières du PAGODA lorsqu'elles ne sont pas permises par les conditions générales ou, le cas-échéant, un accord-cadre | 7c                    | Annexes Companion novembre 2017, Annexe c5a                                                                                                                      | Le modèle des Conditions Particulières du PAGODA permet explicitement d'inclure à l'article 7 des dispositions supplémentaires qui complètent les conditions générales, notamment concernant les coûts de bureau de projet.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | L'utilisation des bureaux locaux d'UNICEF à Bangui, Bambari, Bossangoa, Bouar et Kaga Bandoro est mentionnée dans la description de l'action. Ces bureaux locaux assurent les capacités opérationnelles d'intervention d'UNICEF en RCA du point de vue programmatique, logistique et administratif.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 94       | <b>Contrat de service avec AMEX - T03.151 - FACILITÉ D'ASSISTANCE TECHNIQUE</b>   | Utilisation du modèle "bon d'achat pour un contrat de faible valeur" du Vademecum de la passation des marchés de la Commission européenne                                                     | E                     | PRAG 2016, section 3.2.3: Marchés d'une valeur égale ou inférieure à 20 000 EUR                                                                                  | À la place d'utiliser le modèle des conditions particulières d'un contrat de service annexé au PRAG, il a été jugé opportun d'utiliser le modèle d'un bon de commande spécifiquement prévu pour les contrats de faible valeur.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Ce modèle qui n'est pas annexé au PRAG est néanmoins un modèle officiel de la Commission européenne et est publié sur le site de la DG Budget. Il est particulièrement pratique pour des contrats de faible valeur.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 95       | <b>Contrat de subvention avec Cordaid - T03.161 - SANTÉ III</b>                   | Financement intégral - pas de cofinancement                                                                                                                                                   | EVR 21                | PRAG 2016, section 6.3.9: Cofinancement / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux                            | En principe une subvention n'a pas vocation à financer l'intégralité des coûts de l'action ni l'intégralité des dépenses opérationnelles d'un organisme bénéficiaire à l'exception de certains cas. L'administration contractante doit être en mesure de                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | L'aide fournie ici vise une situation de crise, qui plus est dans le domaine de la protection de la santé et des droits fondamentaux des populations. Les justifications de contexte se retrouvent dans la fiche d'action qui a été approuvée par le COGES le 04/06/2018                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## EUTF BEKOU - RAPPORT D'EXCEPTIONS 2018

| No. Ref. | Ref. (FA/Proc/Contrat)                                 | Cas rapporté                                                                                                   | E - D - NC - AP - EVR | Base légale de référence                                                                                                                                         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Description du cas, justification, impact                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Risques                                                                                                                                                                                                        | Mesures prises pour limiter les risques                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| 96       |                                                        | Financement rétroactif                                                                                         | EVR 22 a)             | PRAG 2016, section 6.3.8: Non-rétroactivité / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | Exceptionnellement une subvention peut être attribuée en cours d'action si les demandeurs démontrent et justifient la nécessité de démarrer l'action avant la signature du contrat. Dans ce cas, les dépenses encourues avant la soumission de la demande de la subvention ne sont en principe pas éligibles à un financement (pour les subventions directes le financement peut démarrer au premier jour des négociations, tel que confirmé par les preuves administratives). Dans le cadre d'une gestion directe, un financement rétroactif - lorsque les coûts encourus avant la signature du contrat de subvention mais après la soumission des demandes de subventions seront remboursés - constitue un événement à déclarer. | Pour éviter qu'il y ait une interruption entre la phase II et la phase III dans l'appui aux formations sanitaires, le Fonds Békou a retenu l'option de démarrer le financement au 01/07/2018, suite à la fin du contrat précédent (T03.95), et non à la signature du contrat en question, qui a eu lieu le 14/08/2018. Eviter une interruption entre les deux phases était très important afin d'éviter des ruptures de stock de médicaments, de continuer à assurer les soins de base à la population vulnérable et d'éviter toute détérioration de la situation déjà précaire.                                                                                                                                                             | Risque lié à la mise en œuvre d'une action sans couverture contractuelle, ce qui implique notamment l'absence d'un cadre (légal) clair en cas de litige ou plus simplement sur les modalités de mise en œuvre. | Nombreux éléments permettant d'encadrer l'action et sa mise en œuvre :<br>- une note de cadrage détaillée, tant en termes de conditions de mise en œuvre de l'action, qu'en termes d'objectifs et de résultats attendus,<br>- canaux de communication nombreux (contacts avec la gestionnaire de projet, réunions mensuelles, présence sur place du représentant Békou),<br>- périmètre de mise en œuvre connu étant donné que la phase III est dans le prolongement de la phase II. |
| 97       |                                                        | Ajout de l'annexe III du contrat de subvention modèle ECHO à l'annexe IV du contrat de subvention modèle DEVCO | E - 8 b)              | Annexes PRAG 2016, annexe IV du contrat de subvention                                                                                                            | Ajout d'une annexe plus spécifique pour l'attribution des contrats concernant l'approvisionnement en médicaments/fournitures médicales                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | L'annexe IV du contrat de subvention de DEVCO sur les "procédures de passation de marchés applicables par les bénéficiaires de subventions dans le cadre des actions extérieures de l'Union européenne" ne comprend pas de clauses spécifiques à l'approvisionnement en médicaments/fournitures médicales dont la qualité est essentielle. L'ajout de l'annexe III aux contrats de subvention de ECHO sur les "principes et procédures applicables aux marchés passés dans le cadre d'actions d'aide humanitaire financées par l'Union européenne" vise donc à assurer un approvisionnement satisfaisant aux principes obligatoires en matière de passation de marchés tout en assurant la qualité des médicaments et fournitures médicales. | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 99       |                                                      | Financement rétroactif                                                                                         | EVR 22 a)             | PRAG 2016, section 6.3.8: Non-rétroactivité / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | Exceptionnellement une subvention peut être attribuée en cours d'action si les demandeurs démontrent et justifient la nécessité de démarrer l'action avant la signature du contrat. Dans ce cas, les dépenses encourues avant la soumission de la demande de la subvention ne sont en principe pas éligibles à un financement (pour les subventions directes le financement peut démarrer au premier jour des négociations, tel que confirmé par les preuves administratives). Dans le cadre d'une gestion directe, un financement rétroactif - lorsque les coûts encourus avant la signature du contrat de subvention mais après la soumission des demandes de subventions seront remboursés - constitue un événement à déclarer. | Pour éviter qu'il y ait une interruption entre la phase II et la phase III dans l'appui aux formations sanitaires, le Fonds Békou a retenu l'option de démarrer le financement au 01/07/2018, suite à la fin du contrat précédent (T03.93), et non à la signature du contrat en question, qui a eu lieu le 04/09/2018. Eviter une interruption entre les deux phases était très important afin d'éviter des ruptures de stock de médicaments, de continuer à assurer les soins de base à la population vulnérable et d'éviter toute détérioration de la situation déjà précaire.                                                                                                                                                             | Risque lié à la mise en œuvre d'une action sans couverture contractuelle, ce qui implique notamment l'absence d'un cadre (légal) clair en cas de litige ou plus simplement sur les modalités de mise en œuvre. | Nombreux éléments permettant d'encadrer l'action et sa mise en œuvre :<br>- une note de cadrage détaillée, tant en termes de conditions de mise en œuvre de l'action, qu'en termes d'objectifs et de résultats attendus,<br>- canaux de communication nombreux (contacts avec la gestionnaire de projet, réunions mensuelles, présence sur place du représentant Békou),<br>- périmètre de mise en œuvre connu étant donné que la phase III est dans le prolongement de la phase II. |
| 100      |                                                      | Ajout de l'annexe III du contrat de subvention modèle ECHO à l'annexe IV du contrat de subvention modèle DEVCO | E - 8 b)              | Annexes PRAG 2016, annexe IV du contrat de subvention                                                                                                            | Ajout d'une annexe plus spécifique pour l'attribution des contrats concernant l'approvisionnement en médicaments/fournitures médicales                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | L'annexe IV du contrat de subvention de DEVCO sur les "procédures de passation de marchés applicables par les bénéficiaires de subventions dans le cadre des actions extérieures de l'Union européenne" ne comprend pas de clauses spécifiques à l'approvisionnement en médicaments/fournitures médicales dont la qualité est essentielle. L'ajout de l'annexe III aux contrats de subvention de ECHO sur les "principes et procédures applicables aux marchés passés dans le cadre d'actions d'aide humanitaire financées par l'Union européenne" vise donc à assurer un approvisionnement satisfaisant aux principes obligatoires en matière de passation de marchés tout en assurant la qualité des médicaments et fournitures médicales. | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 101      | Contrat de subvention avec IMC - T03.163 - SANTÉ III | Financement intégral - pas de cofinancement                                                                    | EVR 21                | PRAG 2016, section 6.3.9: Cofinancement / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention     | En principe une subvention n'a pas vocation à financer l'intégralité des coûts de l'action ni l'intégralité des dépenses opérationnelles d'un organisme bénéficiaire à l'exception de certains cas.<br>L'administration contractante doit être en mesure de justifier que le financement intégral est indispensable à la réalisation de l'action en question, et doit motiver la décision d'attribution en conséquence.<br>Le financement intégral d'une action peut être autorisé                                                                                                                                                                                                                                                 | L'aide fournie ici vise une situation de crise, qui plus est dans le domaine de la protection de la santé et des droits fondamentaux des populations.<br>Les justifications de contexte se retrouvent dans la fiche d'action qui a été approuvée par le COGES le 04/06/2018 et dans les documents d'attribution.                                                                                                                                                                                                                                                                                                                                                                                                                             | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## EUTF BEKOU - RAPPORT D'EXCEPTIONS 2018

| No. Ref. | Ref. (FA/Proc/Contrat)                                                            | Cas rapporté                                                                                                   | E - D - NC - AP - EVR | Base légale de référence                                                                                                                                         | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Description du cas, justification, impact                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Risques                                                                                                                                                                                                        | Mesures prises pour limiter les risques                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| 102      |                                                                                   | Financement rétroactif                                                                                         | EVR 22 a)             | PRAG 2016, section 6.3.8: Non-rétroactivité / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | Exceptionnellement une subvention peut être attribuée en cours d'action si les demandeurs démontrent et justifient la nécessité de démarrer l'action avant la signature du contrat. Dans ce cas, les dépenses encourues avant la soumission de la demande de la subvention ne sont en principe pas éligibles à un financement (pour les subventions directes le financement peut démarrer au premier jour des négociations, tel que confirmé par les preuves administratives). Dans le cadre d'une gestion directe, un financement rétroactif - lorsque les coûts encourus avant la signature du contrat de subvention mais après la soumission des demandes de subventions seront remboursés - constitue un événement à déclarer. | Pour éviter qu'il y ait une interruption entre la phase II et la phase III dans l'appui aux formations sanitaires, le Fonds Békou a retenu l'option de démarrer le financement au 01/07/2018, suite à la fin du contrat précédent (T03.92), et non à la signature du contrat en question, qui a eu lieu le 28/08/2018. Eviter une interruption entre les deux phases était très important afin d'éviter des ruptures de stock de médicaments, de continuer à assurer les soins de base à la population vulnérable et d'éviter toute détérioration G45de la situation déjà précaire.                                                                                                                                                          | Risque lié à la mise en œuvre d'une action sans couverture contractuelle, ce qui implique notamment l'absence d'un cadre (légal) clair en cas de litige ou plus simplement sur les modalités de mise en œuvre. | Nombreux éléments permettant d'encadrer l'action et sa mise en œuvre :<br>- une note de cadrage détaillée, tant en termes de conditions de mise en œuvre de l'action, qu'en termes d'objectifs et de résultats attendus,<br>- canaux de communication nombreux (contacts avec la gestionnaire de projet, réunions mensuelles, présence sur place du représentant Békou),<br>- périmètre de mise en œuvre connu étant donné que la phase III est dans le prolongement de la phase II. |
| 103      |                                                                                   | Ajout de l'annexe III du contrat de subvention modèle ECHO à l'annexe IV du contrat de subvention modèle DEVCO | E - 8 b)              | Annexes PRAG 2016, annexe IV du contrat de subvention                                                                                                            | Ajout d'une annexe plus spécifique pour l'attribution des contrats concernant l'approvisionnement en médicaments/fournitures médicales                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | L'annexe IV du contrat de subvention de DEVCO sur les "procédures de passation de marchés applicables par les bénéficiaires de subventions dans le cadre des actions extérieures de l'Union européenne" ne comprend pas de clauses spécifiques à l'approvisionnement en médicaments/fournitures médicales dont la qualité est essentielle. L'ajout de l'annexe III aux contrats de subvention de ECHO sur les "principes et procédures applicables aux marchés passés dans le cadre d'actions d'aide humanitaire financées par l'Union européenne" vise donc à assurer un approvisionnement satisfaisant aux principes obligatoires en matière de passation de marchés tout en assurant la qualité des médicaments et fournitures médicales. | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 104      | Contrat de subvention avec PUI (Consortium avec CRF et ACF) - T03.164 - SANTÉ III | Financement intégral - pas de cofinancement                                                                    | EVR 21                | PRAG 2016, section 6.3.9: Cofinancement / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention     | En principe une subvention n'a pas vocation à financer l'intégralité des coûts de l'action ni l'intégralité des dépenses opérationnelles d'un organisme bénéficiaire à l'exception de certains cas.<br>L'administration contractante doit être en mesure de justifier que le financement intégral est indispensable à la réalisation de l'action en question, et doit motiver la décision d'attribution en conséquence.<br>Le financement intégral d'une action peut être autorisé dans les cas suivants pour autant que l'acte de base ne l'interdise pas:                                                                                                                                                                        | L'aide fournie ici vise une situation de crise, qui plus est dans le domaine de la protection de la santé et des droits fondamentaux des populations.<br>Les justifications de contexte se retrouvent dans la fiche d'action qui a été approuvée par le COGES le 04/06/2018 et dans les documents d'attribution.                                                                                                                                                                                                                                                                                                                                                                                                                             | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 105      |                                                                          | Financement rétroactif                                                                                         | EVR 22 a)             | PRAG 2016, section 6.3.8: Non-rétroactivité / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | Exceptionnellement une subvention peut être attribuée en cours d'action si les demandeurs démontrent et justifient la nécessité de démarrer l'action avant la signature du contrat. Dans ce cas, les dépenses encourues avant la soumission de la demande de la subvention ne sont en principe pas éligibles à un financement (pour les subventions directes le financement peut démarrer au premier jour des négociations, tel que confirmé par les preuves administratives). Dans le cadre d'une gestion directe, un financement rétroactif - lorsque les coûts encourus avant la signature du contrat de subvention sont remboursés - constitue un événement à déclarer.                                                            | Pour éviter qu'il y ait une interruption entre la phase II et la phase III dans l'appui aux formations sanitaires, le Fonds Békou a retenu l'option de démarrer le financement au 01/07/2018, suite à la fin des contrats qui couvraient la même zone géographique dans la phase II (T03.91 et T03.94), et non à la signature du contrat en question, qui a eu lieu le 07/09/2018. Éviter une interruption entre les deux phases était très important afin d'éviter des ruptures de stock de médicaments, de continuer à assurer les soins de base à la population vulnérable et d'éviter toute détérioration de la situation déjà précaire.                                                                                                 | Risque lié à la mise en œuvre d'une action sans couverture contractuelle, ce qui implique notamment l'absence d'un cadre (légal) clair en cas de litige ou plus simplement sur les modalités de mise en œuvre. | Nombreux éléments permettant d'encadrer l'action et sa mise en œuvre :<br>- une note de cadrage détaillée, tant en termes de conditions de mise en œuvre de l'action, qu'en termes d'objectifs et de résultats attendus,<br>- canaux de communication nombreux (contacts avec la gestionnaire de projet, réunions mensuelles, présence sur place du représentant Békou),<br>- périmètre de mise en œuvre connu étant donné que la phase III est dans le prolongement de la phase II. |
| 106      |                                                                          | Ajout de l'annexe III du contrat de subvention modèle ECHO à l'annexe IV du contrat de subvention modèle DEVCO | E - 8 b)              | Annexes PRAG 2016, annexe IV du contrat de subvention                                                                                                            | Ajout d'une annexe plus spécifique pour l'attribution des contrats concernant l'approvisionnement en médicaments/fournitures médicales                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | L'annexe IV du contrat de subvention de DEVCO sur les "procédures de passation de marchés applicables par les bénéficiaires de subventions dans le cadre des actions extérieures de l'Union européenne" ne comprend pas de clauses spécifiques à l'approvisionnement en médicaments/fournitures médicales dont la qualité est essentielle. L'ajout de l'annexe III aux contrats de subvention de ECHO sur les "principes et procédures applicables aux marchés passés dans le cadre d'actions d'aide humanitaire financées par l'Union européenne" vise donc à assurer un approvisionnement satisfaisant aux principes obligatoires en matière de passation de marchés tout en assurant la qualité des médicaments et fournitures médicales. | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 107      | Contrat de subvention avec PUI (Bamingui-Bangoran) - T03.165 - SANTÉ III | Financement intégral - pas de cofinancement                                                                    | EVR 21                | PRAG 2016, section 6.3.9: Cofinancement / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention     | En principe une subvention n'a pas vocation à financer l'intégralité des coûts de l'action ni l'intégralité des dépenses opérationnelles d'un organisme bénéficiaire à l'exception de certains cas.<br>L'administration contractante doit être en mesure de justifier que le financement intégral est indispensable à la réalisation de l'action en question, et doit motiver la décision d'attribution en conséquence.<br>Le financement intégral d'une action peut être autorisé dans les cas suivants pour autant que l'acte de base ne l'interdise pas:<br><ul style="list-style-type: none"> <li>l'aide humanitaire y compris l'assistance aux réfugiés, aux personnes déracinées, à la réhabilitation et au déminage;</li> </ul> | L'aide fournie ici vise une situation de crise, qui plus est dans le domaine de la protection de la santé et des droits fondamentaux des populations.<br>Les justifications de contexte se retrouvent dans la fiche d'action qui a été approuvée par le COGES le 04/06/2018 et dans les documents d'attribution.                                                                                                                                                                                                                                                                                                                                                                                                                             | Pas de risque                                                                                                                                                                                                  | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 108      |                                                                         | Ajout de l'annexe III du contrat de subvention modèle ECHO à l'annexe IV du contrat de subvention modèle DEVCO                                                                                | E - 8 b)              | Annexes PRAG 2016, annexe IV du contrat de subvention                                                          | Ajout d'une annexe plus spécifique pour l'attribution des contrats concernant l'approvisionnement en médicaments/fournitures médicales                                                            | L'annexe IV du contrat de subvention de DEVCO sur les "procédures de passation de marchés applicables par les bénéficiaires de subventions dans le cadre des actions extérieures de l'Union européenne" ne comprend pas de clauses spécifiques à l'approvisionnement en médicaments/fournitures médicales dont la qualité est essentielle. L'ajout de l'annexe III aux contrats de subvention de ECHO sur les "principes et procédures applicables aux marchés passés dans le cadre d'actions d'aide humanitaire financées par l'Union européenne" vise donc à assurer un approvisionnement satisfaisant aux principes obligatoires en matière de passation de marchés tout en assurant la qualité des médicaments et fournitures médicales.                                                                              | Pas de risque | N/A                                     |
| 109      | Contrat de service avec B&S - T03.167 - FACILITÉ D'ASSISTANCE TECHNIQUE | Attribution directe                                                                                                                                                                           | AP 25)                | PRAG 2018, section 2.6.8: Procédure négociée / procédure de passation de marchés sur la base d'une seule offre | Un contrat de service peut être octroyé par attribution directe quand le montant du marché à attribuer ne dépasse pas les 20 000 EUR.                                                             | La situation en RCA a fait l'objet d'une déclaration de crise. L'autorisation de recours aux procédures flexibles a de plus été inscrite dans l'Acte constitutif du Fonds Békou en son art. 10: "les procédures flexibles adaptées au contexte seront utilisées afin d'assurer l'efficacité et la réactivité du fonds". Le contrat T03.167 a été attribué pour un montant de 28 000 EUR. Cette attribution directe a été justifiée par le fait que B&S était le seul contractant du CC SIEA 2018 à posséder les deux compétences nécessaires (organisation d'événements et communication) pour l'exécution du marché. La décision de procéder avec une entité déjà présélectionnée par le CC SIEA 2018 a été prise à cause du délai très restreint pour l'organisation de l'événement pour lequel ce marché a été conclu. | Pas de risque | N/A                                     |
| 110      | Convention de délégation avec AICS - T03.173 - SANTÉ III                | Ajout de dispositions supplémentaires à l'article 7 des conditions particulières du PAGODA lorsqu'elles ne sont pas permises par les conditions générales ou, le cas-échéant, un accord-cadre | 7c                    | Annexes Companion novembre 2017, Annexe c5a                                                                    | Le modèle des Conditions Particulières du PAGODA permet d'inclure des dispositions supplémentaires qui complètent les conditions générales, notamment concernant les coûts d'un bureau de projet. | Le rôle du bureau de projet d'AICS en RCA est mentionné dans la description de l'action. La présence d'un bureau d'AICS dans le pays permettra des économies d'échelle dans la gestion, l'administration et la logistique du programme. Le programme sera aussi l'objet d'un processus de monitoring régulier conduit par le bureau régional d'AICS à Khartoum et le bureau d'AICS en RCA. Aussi le staff de coordination/responsable programme, administrateur et le personnel de support sera basé dans le bureau local en RCA.                                                                                                                                                                                                                                                                                         | Pas de risque | N/A                                     |
| 111      |                                                                         | Ajout de                                                                                                                                                                                      | 7c                    | Annexes Companion                                                                                              | Le modèle des Conditions Particulières du PAGODA permet                                                                                                                                           | À la fin du processus d'évaluation des 7 piliers, AICS a reçu                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Pas de risque | N/A                                     |

## EUTF BEKOU - RAPPORT D'EXCEPTIONS 2018

| No. Ref. | Ref. (FA/Proc/Contrat)                                                      | Cas rapporté                                                                                                                                                                                  | E - D - NC - AP - EVR | Base légale de référence                                                                                                                                     | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Description du cas, justification, impact                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Risques       | Mesures prises pour limiter les risques |

|          |                                                                             | dispositions supplémentaires à l'article 7 des conditions particulières du PAGODA lorsqu'elles ne sont pas permises par les conditions générales ou, le cas-échéant, un accord-cadre          |                       | novembre 2017, Annexe c5a                                                                                                                                    | d'inclure des dispositions supplémentaires qui complètent les conditions générales. À la demande d'AICS, l'article 7.1.2 mentionnant que "les règles convenues en matière d'octroi de subventions, visées à l'article 1.3 point b), des présentes conditions particulières sont les « Marchés publics et Subventions dans le cadre des actions extérieures de l'Union Européenne - Un Guide pratique" a été ajouté dans les conditions particulières du contrat.                                                                                                                                                                                                                                                                                                                                                                    | une recommandation qui vise à amplifier les opportunités d'octroi des subventions. Cependant pour faire cela, une modification de la législation, pas encore réalisée, est nécessaire. AICS utilise par conséquent le PRAG.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |               |                                         |
| 112      |                                                                             | Ajout de dispositions supplémentaires à l'article 7 des conditions particulières du PAGODA lorsqu'elles ne sont pas permises par les conditions générales ou, le cas-échéant, un accord-cadre | 7c                    | Annexes Companion novembre 2017, Annexe c5a                                                                                                                  | Le modèle des Conditions Particulières du PAGODA permet d'inclure des dispositions supplémentaires qui complètent les conditions générales. À la demande d'AICS, l'article 7.1.3 mentionnant que "les intérêts sur le préfinancement seront dûs et ils seront utilisés dans l'Action" a été ajouté dans les conditions particulières du contrat.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Pas de risque | N/A                                     |
| 113      | Contrat de subvention avec IRAM - T03.174 - DÉVELOPPEMENT RURAL             | Financement intégral - pas de cofinancement                                                                                                                                                   | EVR 21                | PRAG 2016, section 6.3.9: Cofinancement / Companion novembre 2017, section 24.6.2.2: Procédures flexibles spécifiques applicables aux contrats de subvention | En principe une subvention n'a pas vocation à financer l'intégralité des coûts de l'action ni l'intégralité des dépenses opérationnelles d'un organisme bénéficiaire à l'exception de certains cas.<br>L'administration contractante doit être en mesure de justifier que le financement intégral est indispensable à la réalisation de l'action en question, et doit motiver la décision d'attribution en conséquence.<br>Le financement intégral d'une action peut être autorisé dans les cas suivants pour autant que l'acte de base ne l'interdise pas:<br>• l'aide humanitaire y compris l'assistance aux réfugiés, aux personnes déracinées, à la réhabilitation et au déminage;<br>• les aides visant des situations de crise;<br>• les actions visant la protection de la santé ou des droits fondamentaux des populations. | L'aide fournie ici vise une situation de crise.<br>La note de cadrage publiée pour l'AMI dont ce contrat est un des résultat prévoyait "Le Fonds Bêkou financera à hauteur de maximum 95% le coût total de l'action proposée. Un cofinancement minimal de 5% est donc demandé. Un financement supérieur allant jusqu'à 100% pourra être accordé dans les zones où la situation sécuritaire est particulièrement complexe, situation qui devra être décrite et justifiée dans la proposition reçue". En considérant la situation de crise de la RCA et les conditions de sécurité complexes, notamment dans les zones rurales où les structures d'appui aux producteurs sont installées, la demande de financement intégral proposé par IRAM a été acceptée par le Fonds Bêkou. | Pas de risque | N/A                                     |
| 114      | Avenant n°3 au contrat de subvention avec DRC - T03.88 - RELANCE ECONOMIQUE | Extension avec augmentation du montant de la contribution de                                                                                                                                  | E                     | Annexes PRAG 2016, article 9 (modification du contrat) des conditions générales d'un contrat de subvention et plus                                           | La contribution maximale de l'UE et le pourcentage des coûts éligibles ou acceptés financés par le pouvoir adjudicateur ne peuvent être augmentés.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Le contrat T03.88 avait été attribué directement au consortium DRC/ACTED/Mercy Corps. La modification apportée avec l'avenant n° 3 n'a donc pas mis en question l'égalité de traitement entre demandeurs. L'extension de la                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Pas de risque | N/A                                     |

## EUTF BEKOU - RAPPORT D'EXCEPTIONS 2018

| No. Ref. | Ref. (FA/Proc/Contrat)                                              | Cas rapporté                                                      | E - D - NC - AP - EVR | Base légale de référence                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Description                                                                                                                                        | Description du cas, justification, impact                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Risques       | Mesures prises pour limiter les risques |
|----------|---------------------------------------------------------------------|-------------------------------------------------------------------|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-----------------------------------------|
|          |                                                                     | l'UE                                                              |                       | particulièrement article 9.2: "La modification ne peut avoir pour objet ou pour effet d'apporter au contrat des changements susceptibles de remettre en cause la décision d'octroi de la subvention, ni d'enfreindre la règle de l'égalité de traitement entre demandeurs. Le montant maximal de la subvention mentionné à l'article 3.2 des conditions particulières ne peut être augmenté."                                                                                                                    |                                                                                                                                                    | durée de mise en œuvre de 15 mois et l'augmentation de l'enveloppe budgétaire de EUR 2 millions ont été justifiées par des raisons opérationnelles: 1) la nécessité de permettre aux deux composantes de l'Action 'Relance Economique' de s'aligner dans le temps, la Composante 2 n'ayant débuté qu'en juin 2018 (presque 2 ans après le début de la Composante 1 mise en œuvre par ce contrat); 2) le besoin d'assurer appui/conseil et accompagnement 'post-crédit' des Acteurs Economiques Locaux qui, sélectionnés et formés pendant les 2 premières années de l'action, ont finalement accès au crédit via la mise en œuvre de la Composante 2 du projet.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |               |                                         |
| 115      | Avenant n° 1 au contrat de subvention avec IRC - T03.102 - GENRE II | Extension avec augmentation du montant de la contribution de l'UE | E                     | Annexes PRAG 2016, article 9 (modification du contrat) des conditions générales d'un contrat de subvention et plus particulièrement article 9.2: "La modification ne peut avoir pour objet ou pour effet d'apporter au contrat des changements susceptibles de remettre en cause la décision d'octroi de la subvention, ni d'enfreindre la règle de l'égalité de traitement entre demandeurs. Le montant maximal de la subvention mentionné à l'article 3.2 des conditions particulières ne peut être augmenté." | La contribution maximale de l'UE et le pourcentage des coûts éligibles ou acceptés financés par le pouvoir adjudicateur ne peuvent être augmentés. | L'avenant permet d'ajouter des activités d'assistance technique. Lors de l'adoption de la Fiche d'action Genre II, il était prévu que la composante 'Accompagnement des administrations centrafricaines dans l'intégration de l'approche genre dans les politiques sectorielles' pour un montant de 600.000 euros soit attribuée par marché de services à un prestataire du contrat-cadre. L'action devait être exécutée grâce à un consultant senior sur une durée de 18 mois. Cependant, le remaniement gouvernemental en septembre 2017 a mené à la création du Ministère de la Promotion de la Femme, de la Famille et de la Protection de l'Enfant (MPFFPE) dont le portfolio était auparavant confié au Ministère des affaires sociales et de la réconciliation nationale. Il s'agit donc d'un nouveau ministère avec un budget très limité. Il a été jugé prématuré d'affecter un assistant technique au MPFFPE, car le ministère ne dispose pas des ressources humaines et matérielles nécessaires pour permettre à un assistant technique de travailler efficacement. Il a paru plus judicieux d'intégrer cette composante du programme dans le contrat d'IRC selon une approche « projet » qui permettra un renforcement des capacités plus complet et un accompagnement du Ministère par une équipe de projet. Le lien déjà établi entre IRC et le MPFFPE, et le fait qu'IRC appuie déjà le Ministère dans la construction et le fonctionnement d'une Maison des femmes à Bangui, constituent un avantage considérable pour mettre en œuvre la composante d'assistance technique. | Pas de risque | N/A                                     |

## SECTION 6 – DECLARATION D'ASSURANCE

Je, soussignée,

gestionnaire du Fonds fiduciaire de l'Union européenne en faveur de la République centrafricaine, le « Fonds fiduciaire de l'UE Bêkou »

en ma capacité d'ordonnateur subdélégué,

Déclare par la présente que les informations contenues dans ce rapport sont sincères et véritables<sup>50</sup>.

Affirme avoir une assurance raisonnable que les ressources allouées aux activités décrites dans le présent rapport ont été utilisées aux fins prévues et conformément au principe de bonne gestion financière, et que les procédures de contrôle mises en place donnent les garanties nécessaires quant à la légalité et la régularité des opérations.

Cette déclaration d'assurance se fonde sur mon propre jugement et sur les éléments d'informations à ma disposition, tels que les résultats de l'auto-évaluation, les contrôles ex-post, les observations du Service d'Audit interne, les leçons apprises du rapport de la Cour des Comptes des années précédant l'année de cette déclaration.

Je confirme en outre n'avoir connaissance d'aucun fait non signalé pouvant nuire aux intérêts du Fonds fiduciaire de l'UE Bêkou.

**Fait à Bruxelles, le 15/2/2019**

**Francesca Di Mauro  
(signed)**

---

<sup>50</sup> Dans ce contexte, sincère et véritable signifie une vision complète, fiable et correcte sur l'état des lieux du Fonds.

- **Section 4- Management and internal control**
- **Section 5- Annexes**
- **Section 6 - Statement of assurance**

## **SECTION 1 – POLICY AND/OR OPERATIONAL HIGHLIGHTS OF THE YEAR**

In 2018, the Horn of Africa window of the EUTF for Africa approved the largest amount for actions to date, while picking up the implementation pace of its activities. A total of EUR 480 million for new programmes and top-ups of ongoing actions was approved in 2018 alone. At the end of the year, the Horn of Africa window counted 69 projects worth a total of EUR 1,254 million, 71% of which has already been contracted. Moreover, a further EUR 33 million has been committed to three cross-window projects.

The Horn of Africa window continued to respond to the orientations of its regional operational framework, and already yielded substantial results for all four strategic objectives of the EUTF for Africa. Donors continued to respond positively to the need for contributions for the Horn of Africa, investing an additional EUR14 million in 2018.

The EUTF for Africa remained a key instrument to address the main challenges of the region, complementing traditional EU development instruments, humanitarian aid and existing political dialogues with partner countries.

With 4.5 million refugees, the highest number on the African continent, and an estimated 10 million internally displaced people, the EUTF continued to invest significantly in the rolling out of the Comprehensive Refugee Response Framework (CRRF), a process aimed at assisting refugee populations to become self-sufficient while supporting host communities. The EUTF Board expressed their strong support to this initiative during the meetings in April and September 2018. The CRRF, a UNHCR-led initiative with the close involvement of the Intergovernmental Authority on Development (IGAD), the World Bank and the EU, is now enshrined in the United Nations Global Refugee Compact. By the end of 2018, EUR 247.55 million had been dedicated to implement the CRRF.

Last year, the first regional stocktaking meeting took place to review progress made in delivering the Nairobi Declaration and Action Plan, a joint commitment to pursue a regional solution to the protracted situation for Somali refugees. On this occasion, IGAD Ministers reaffirmed their commitment and recognised the progress made in the development of national plans and programmes, as well as in the introduction of legal reforms.

Throughout the year, the EUTF contributed to strengthening the political and policy dialogue with and also in Somalia. The Somalia Partnership Forum, organised in Brussels in mid-2018, brought together the Federal Government of Somalia, the Federal Member States and international partners to discuss political, security, economic and development issues. The overall perception of the forum's outcome was satisfactory.

The deteriorating political, social and economic situation in Sudan throughout the year further exacerbated the many challenges the country is already facing. Whilst the EU and other partners maintained the diplomatic initiative to establish a "phased engagement" with the Government of Sudan, the EUTF continued to provide essential assistance aimed, primarily, at containing the deterioration of the already very vulnerable refugee and internally displaced populations and host communities. This assistance is framed in the EU Humanitarian-Development Nexus, an initiative pioneered in Sudan and Uganda, which creates links between humanitarian aid and cooperation assistance with a developmental approach.

The recent peace agreement agreed by the main parties in South Sudan brought in renewed, though cautious, hope for the country to reach much-awaited long-lasting peace and stability. The EUTF approved an action to support CSO and grass-root organisations, such as the Council of Churches, women's and youth groups, to monitor the peace agreement and to engage in promotion, conflict mediation and conflict resolution. A series of new action were under formulation to deliver basic services to extremely vulnerable population.

Finally, the Peace and Friendship Agreement between Eritrea and Ethiopia provides a unique opportunity for the EU to support Eritrea's *rapprochement* with its neighbours, to promote regional stability and to foster regional integration. The EUTF started to identify potential initiatives to facilitate the dialogue and to re-establish links between these two countries.

## **SECTION 2 – PROGRAMMING, IMPLEMENTATION AND RESULTS (INCLUDING EVALUATIONS)**

In the Horn of Africa region, the EUTF for Africa has continued to respond to the orientations of its regional operational framework. EUTF-funded actions have started to yield significant results for all four strategic objectives of the EUTF for Africa, as reported by the first two quarterly reports produced by the Monitoring & learning System (MLS). EUTF partners have praised the work of the HoA window as well as the preparation of these reports.

The HoA window focused its 2018 programming around the six strategic priorities set by the EUTF Board in April 2018, which were ratified in September 2018. Particular attention was paid to promoting essential stabilisation in Somalia and Sudan, with relevant actions of large financial envelopes approved, including a State and Resilience Building Contract for Somalia. The migration dialogue with Ethiopia, the only country in the region the EU has an ongoing Partnership Framework on Migration, also benefited from a substantial support with the approval of a Sector Reform Contract on employment. The EUTF continued to significantly invest in the rolling out of the Comprehensive Refugee Response Framework (CRRF). This support is yielding satisfactory results both at operational level, with the provision of critical assistance to forcibly displaced people and their host communities, but also at policy level, with countries in the region working on and already passing pro-refugee legislation, such as the recent case of Ethiopia.

The EUTF for Africa continued to fund multiple actions in the field of technical and vocational training, jobs and employment promotion, basic service delivery such as health and education as well as protection to vulnerable people and livelihood.

Support was also approved to continue improving migration management by disrupting human trafficking and smuggling networks. The EUTF Horn of Africa window continues to work with African partner countries to develop national and regional approaches to address migration challenges, to help them protecting vulnerable migrants and to re-integrate those who wished to return to their country of origin. The EUTF continue to promote governance and conflict prevention, to address human rights abuses and to enforce the rule of law.

Further to this, the Horn of Africa's Research and Evidence Facility (REF), completed a number of qualitative research, based on field work in peripheral areas of the Horn of Africa with relative low State presence. These include research on return to and displacement from Somalia; on rural to urban migration in Ethiopia, Kenya and Uganda, and migration and displacement from Sudan (Darfur) towards Europe.

## **SECTION 3 – FINANCIAL REPORT<sup>51</sup>**

### **3.1. Amounts pledged and received**

This Financial Report is drawn up in accordance with Art. 7.2 (d) of the Constitutive Agreement of the EUTF for Africa.

The tables below provide a summary of the contributions to the EUTF for Africa as of 31 December 2018. Contributions are split between the three windows according to the earmarking information contained in the Contribution Certificate. As per Constitutive

---

<sup>51</sup> Draft annual accounts of the EU Trust Fund will be annexed to the AAR of the AOD.

Agreement earmarking is only possible per window. If no earmarking has been requested, the following distribution applies:

- Window SAH (A) Sahel and Lake Chad: 40 %
- Window HOA (B) Horn of Africa: 40 %
- Window NOA (C) North of Africa: 20 %

Table A provides information on the contributions from external contributors (i.e. Member States and other external donors), as follows:

- Contributions pledged: total funding for the EUTF for Africa as agreed by donors (i.e. pledges that have been announced in a formal manner but have not yet been officially confirmed by a Contribution Certificate).
- Contributions certified: contributions supported by a Certificate of the external contributor.
- Contributions received: contributions received in the EUTF for Africa bank account, on the basis of which the amount available for commitment (i.e. the total amount of legal obligations that can be incurred) and the amount available for payment are subsequently established in the EUTF for Africa accounting system (ABAC). As of 31 December 2018, EUR 461 million had been received. Contributions received in currencies other than EUR are registered using the European Commission's official exchange rate.

Table B provides information on the contributions from the EU and EDF budgets, as follows:

- Contributions pledged: total funding for the EUTF for Africa as agreed by donors.
- Contributions certified: contributions supported by a Commission Financing Decision, on the basis of which the amount available for commitment (e.g. the total amount of legal obligations that can be incurred) is subsequently established in the EUTF for Africa accounting system (ABAC). As of 31 December 2018, an amount available for commitments of EUR 3,980 million had been made available in the EUTF for Africa accounting system (ABAC).
- Contributions received: contributions received in the EUTF for Africa bank account, on the basis of which the amount available for payment is subsequently established in the EUTF for Africa accounting system (ABAC). As of 31 December 2018, an amount available for payment of EUR 816 million had been made available in the EUTF for Africa accounting system (ABAC).

Interest generated by cash received in the EUTF for Africa bank account is shown in section III of Table B;

| <b>W OTH* and W REG**</b>          | 4                | 2%          | 80.957.909              | 8%          |
| <b>TOTAL</b>                       | <b>186</b>       | <b>100%</b> | <b>1.048.828.173</b>    | <b>100%</b> |

\* W OTH relates to administrative commitments covering staff and related costs

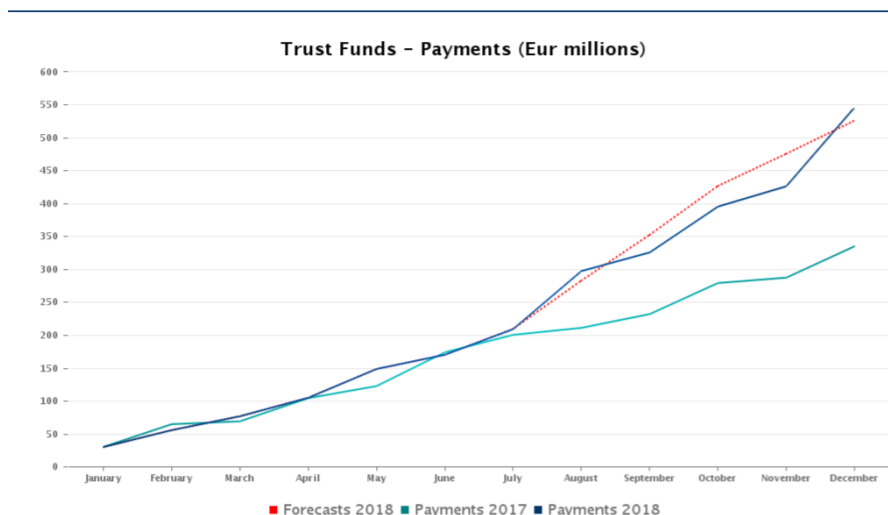

\*\*W REG relates to commitments that pertain to all three windows of the TF

### 3.4. KPI analysis

This is the first year that KPIs 1, 2 and 3 are calculated for the EUTF. And it is to be noted that a specificity of the EUTF, in comparison with the EDF or the EU BUDGET, is that contributions proceeding from EUTF donors are not fixed in advance and the overall yearly allocation is constantly evolving.

According to the attached KPI analysis the EUTF Horn of Africa window underperformed on KPI 1 and KPI 3, which compare actual amounts paid and decided by the end of the year to the forecasted amounts at the beginning of the year (1.01.2018). Whilst for Decisions the final value was 111%, missing the threshold by just 1%, the Payments performance of 89%, also missed the threshold of acceptability by just 1%.

During the year, several actions were undertaken to improve the performance for both windows. Revised amounts were provided during the mid-year BPC exercise (30.06.2018), from that point onwards the discrepancy between actuals and forecasts was considerably reduced. This can be illustrated by the graph below that shows the revised 2018 forecast and annual payments as of December 2018 (this graph includes both Sahel and Horn of Africa figures).

While the result for KPI 4 is above the benchmark for the Horn Of Africa window it must be taken into account that the Trust Fund contains a high number of relatively big contracts that started recently and thus the indicator value are expected to decrease in the next 12-18 month period.

The result for KPI 20 is below the benchmark, however, based on the questions for this indicator, this indicator is not applicable for the EUTF since it is not enrolled in the EVAL module nor it is part of the Annual Action Plan for the Directorate. It is worth noting, though, that a Mid-Term Evaluation (MTE) contract was signed for the Better Migration Management programme. EU Delegations planned 22 MTEs in 2018; the majority started in the second semester and they are in their concluding stages, whilst 8 MTEs are already finalised.

The result for the 'Ineligible amounts identified by ex-ante controls as a % of amount claimed' is below the benchmark as there have been only a small number of interim and final reports and thus the population taken into account for this indicator is small.

## SECTION 4 – MANAGEMENT AND INTERNAL CONTROL

The EUTF for Africa operates in the same general system of internal control defined by the Commission. It was decided that the EU Financial Regulation and the rules and procedures developed by the European Commission's Directorate General for International Cooperation and Development (DEVCO) for the management and implementation of its operations are equally applicable to the EUTF for Africa.

For the North of Africa window the Directorate-General for Neighbourhood and Enlargement Negotiations (NEAR) benefits from a sub delegation of DEVCO so that the EU Financial Regulation and the rules and procedures developed by the latter for the management and implementation of its operations are applicable to this window.

Once approved by the Operational Committee, actions are implemented in accordance with the implementing procedures provided for in the applicable Commission rules and regulations, including those applicable to EDF.

As per the Constitutive Agreement of the EUTF for Africa and given its objective to operate in a crisis and post-crisis situation, flexible procedures appropriate to the local environment are used to ensure that the Fund is effective and responsive to the needs identified. These procedures are in accordance with the FR provisions and are set up in DEVCO and NEAR financial guides. Their use needs to be justified on a case by case basis. A register of exceptions, derogations and prior approvals granted under the EUTF for Africa together with non-compliance events detected during the year is kept.

Project implementation is foreseen in direct management where the EUTF for Africa is the Contracting Authority and signs procurement and grant contracts or in indirect management by which project implementation is delegated to a third party, a EU Member State Agency or International Organisation. Candidate entities to be entrusted with budget-implementation tasks have to demonstrate a level of financial management and protection of the EU's financial interest equivalent to that of the Commission. International Organisations and Member States Agencies have to provide Management declarations on the use of the funds they are entrusted with.

Ex-ante controls are carried out by the EUTF for Africa staff for all operations/transactions carried out under the EUTF for Africa.

In line with DEVCO and NEAR contractual models and audit policy, audits/expenditure verifications are either foreseen in contracts or can be launched by the EUTF for Africa based on a risk analysis. An annual audit and verification plan for the EUTF for Africa was prepared and included in DEVCO's Annual Audit Plan for the year 2018. A total of 19 contracts/projects funded by the EUTF were selected for audit and/or financial verification.

In 2017 and 2018 the EUTF for Africa was also included in the "Residual Error Rate" exercise (ex-post controls) as are other programs/instruments managed by DEVCO and NEAR.

The EUTF for Africa accounts are also subject to an annual external audit.

The EUTF for Africa Managers take into account reports and recommendations of the different control bodies, notably the IAS and Court of Auditors, for the purpose of providing an assessment of the effectiveness of risk management, control and governance processes, in addition to the results of the audits carried out at the level of contractors/beneficiaries.

The European Anti-Fraud Office (OLAF) exercises the same powers over the EUTF for Africa in its entirety, including its governance bodies and the representatives of donors and observers participating in such bodies, as it does in respect of other activities of the Commission.

## 4.1. Control results

### 4.1.1. Control effectiveness as regards legality and regularity

#### 4.1.1.1. Results of ex-ante controls

By the end of 2018, the ex-ante controls had detected a total of EUR 2.2 million of expenditure that were ineligible for all windows combined.

Overview of results of ex-ante controls for the all windows:

|                                                      | Africa             |                       |                     |                   |                     |
|------------------------------------------------------|--------------------|-----------------------|---------------------|-------------------|---------------------|

#### 4.1.1.2. Results of external audits

The annual external audit of accounts of the EUTF Africa for years 2016 to 2018 were concluded satisfactorily. With regards to year 2019 an external audit of the accounts is currently in preparation.

#### 4.1.2. Fraud prevention and detection<sup>52</sup>

EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge. Therefore EUTF Africa is subject to OLAF's competence for the anti-fraud matters and OLAF's rules on the management of the related information apply.

<sup>52</sup>EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge.

## **4.2. Observations and recommendations made by IAS/ECA**

A Performance Audit of the EUTF for Africa was launched by the ECA in early November 2017 and the final report issued at the end of 2018.

In summary the ECA concluded that the EUTF for Africa is a flexible tool facing unprecedented challenges and that, compared to traditional instruments, the EUTF for Africa is faster in launching projects and has managed to speed up the signing of contracts and making advance payments. The ECA states however that projects face similar challenges as traditional instruments that delay their implementation.

The ECA makes a number of recommendations aiming at:

- improve the quality of the objectives of the EUTF for Africa,
- revise the selection procedure for projects,
- take measures to speed up implementation,
- improve the monitoring of the EUTF for Africa.

The EUTF Africa has taken duly note of the ECA recommendations and will take appropriate measures to address them in due course.

With regards the Internal Audit Service of the Commission, a review of the EUTF for Africa has not yet been carried out.

## **4.3. Assessment of the effectiveness of the internal control systems**

The EUTF for Africa operates in the general system of internal control defined by the Commission. In this framework the EU Trust Fund has put in place the organisational structure and the internal control systems suited to the achievement of the policy and control objectives, in accordance with the standards and having due regard to the risks associated with the environment in which it operates.

Monitoring of the compliance and effectiveness of the internal control systems was done on a continuous basis by the Trust Fund Managers and adjusted and complemented where necessary.

Exceptions, derogations, prior approvals and non-compliance events that occurred during the reporting period have been registered and documented.

As flexible procedures apply ex-officio for the EUTF, exceptions and derogations are applied as needed when justified. This includes derogations to the rule of nationality and origin as well as reductions of deadlines for submission of tenders. Approvals for direct grant awards or negotiated procedures of service contracts were also applied in justified cases. The majority of such flexible procedures are preferably identified ab-initio and therefore included in the Action Document of each respective programme that is submitted for the approval of the Operational Committee of the Trust Fund.

Some cases of non-compliant event were detected (i.e. for instance signature of an agreement prior to the final reservation of funds or with a reservation of funds of different amount of the agreement in question). They were however identified and duly corrected and reported.

While a significant number of actions approved to date are still at an early stage of implementation, some of them have reached their cruising speed. The Trust Fund Managers have taken appropriate measures to ensure that the financial interests of the Union and of the donors are protected by the application of preventive measures against irregularities and fraud, by effective controls and, if irregularities or fraud are detected, by the recovery of the amounts wrongly paid. The contracts and agreements signed with third parties authorise the Commission to carry out controls on the spot, to suspend payments and implementation of actions where serious irregularities or fraud are noted,

and to apply, where appropriate, effective, proportionate and deterrent contractual penalties.

#### **4.4. Conclusions as regards assurance**

Based on the above statements related to the internal management and control systems put in place and their functioning, sufficient assurance can be provided with regards to the legality and regularity of underlying operations.

PRIOR APPROVAL CASES - YEAR 2018

A prior approval is a request to activate an option explicitly allowed by the established processes and procedures, but which requires an adequate ex-ante justification and approval from the competent authority responsible for the procedure or contract.

## **SECTION 6 – DECLARATION OF ASSURANCE**

I, the undersigned,

Manager of the European Union Trust Fund for the Horn of Africa window.

In my capacity as authorising officer by sub-delegation

Declare that the information contained in this report gives a true and fair view<sup>53</sup>.

State that I have reasonable assurance that the resources assigned to the activities described in this report have been used for their intended purpose and in accordance with the principles of sound financial management, and that the control procedures put in place give the necessary guarantees concerning the legality and regularity of the underlying transactions.

This reasonable assurance is based on my own judgement and on the information at my disposal, such as the results of the self-assessment, ex-post controls, the opinion of the Internal Auditor on the state of control.

Confirm that I am not aware of anything not reported here which could harm the interests of the European Union Trust Fund for the Horn of Africa window.

**Brussels, 04 February 2019**

**Hans Christian STAUSBOLL  
(signed)**

---

<sup>53</sup> True and fair in this context means a reliable, complete and correct view on the state of affairs under the TF  
Annex 8

- **Section 2 – Programming, implementation and results (including evaluations)**
- **Section 3 - Financial Report**
- **Section 4 - Management and internal controls**
- **Section 5 - Annexes**
- **Section 6 - Statement of assurance**

## **SECTION 1 - POLICY AND OPERATIONAL HIGHLIGHTS OF THE YEAR**

In 2018, the European Union Emergency Trust Fund for Africa (EUTF for Africa) further demonstrated its added value as a swift and effective implementation tool which facilitates political dialogue with partner countries, applies innovative approaches and produces concrete results by pooling funding and expertise from a variety of stakeholders.

It further consolidated its achievements by approving 45 new actions and 13 'top-ups' of ongoing actions, based on the priority areas validated by the Strategic Board, for a total of EUR 1.2 billion. This brings the total number of approved actions since the founding of the EUTF for Africa to 187, for a total of EUR 3.6 billion.

In the course of 2018, the EU, through the EUTF for Africa, worked with its African and European partners to foster stability and better migration management in the Sahel and Lake Chad, the Horn of Africa, and the North of Africa. It continued to tackle the root causes of destabilisation, forced displacement and irregular migration, including the fight against trafficking in human beings and smuggling of migrants and the return and reintegration of migrants to their countries of origin by promoting development and security.

Although the number of detected irregular border crossings on the central Mediterranean route fell significantly in 2018, the situation along this route remains of great concern. At the same time, the increase in irregular arrivals through the Western Mediterranean route called for greater political and financial engagement by the EU.

The EU therefore continued to support sub-Saharan partner countries to address mixed migration flows in countries of origin and transit. The AU-EU-UN (African Union, European Union and United Nations) Task Force, established at the AU-EU summit in Abidjan in 2017, helped reinforce this partnership to improve the situation of migrants in Libya.

At the European Council held in June 2018, EU leaders reiterated that tackling the challenges of migration requires a strong partnership with African countries. This partnership should aim at a socioeconomic transformation of the African continent, with increased development funding, and the creation of a new framework to enable greater private investment from African and European partners. The European Council also recognised the need for additional funding to support the work of the EUTF for Africa, and agreed to transfer to it EUR 500 million from the European Development Fund reserve. Finally, the European Council called on EU Member States to contribute further to the EUTF for Africa with a view to its replenishment.

As of 31 December 2018, resources allocated to the EUTF for Africa amounted to approximately EUR 4.2 billion. This included around EUR 3.7 billion from the European Development Fund and EU financial instruments, as well as EUR 489.5 million from EU Member States and other donors (Switzerland and Norway). In 2018, the EUTF for Africa received 25 new contributions from EU Member States and other donors amounting to EUR 116.7 million, and its overall resources increased by EUR 884 million.

In 2018, the EUTF for Africa stepped up its efforts to measure the progress of its activities. It created a regional approach to monitoring, evaluation and learning and increased the number of common output indicators to 41, to better reflect the scope and variety of its activities.

In the Horn of Africa and the Sahel and Lake Chad region, the system gathers primary data from all projects and reports on them on a quarterly basis. Two quarterly reports for the Horn of Africa region were published in 2018, and the first report for the Sahel and Lake Chad region will be published in the first half of 2019. In the North of Africa region, the EUTF for Africa created a monitoring and evaluation system focused on aligning newly adopted projects with the EUTF for Africa's strategic objectives for the North of Africa. The first report from this monitoring and evaluation system is due to be published

in the first half of 2019.

In December, the European Court of Auditors (ECA) published a report on the EUTF for Africa. The report acknowledges that the EUTF for Africa is a flexible tool for addressing unprecedented challenges, although it argues that it should have been more focused in its work. The report recognises that audited projects have started to produce concrete results and notes that, compared to traditional policy instruments, the EUTF for Africa is faster in developing and launching projects and in signing contracts. A specific section of the 2018 annual report is dedicated to the results of the ECA performance audit.

At the end of 2018, the EUTF for Africa launched an external mid-term evaluation, which will be completed in 2019. It will assess in particular:

- the relevance and consistency of the EUTF for Africa's strategic approaches against its objectives and its intermediary results, focusing on effectiveness and efficiency;
- the value added of the EUTF for Africa;
- the coordination and complementarity of the EU's work with work by other donors; and
- the consistency between EU actions in development cooperation and other EU policies that are likely to affect the partner country/region.

The final results of the mid-term evaluation are expected in the first quarter of 2020.

In the Sahel and Lake Chad region, the EUTF for Africa offered a swift response to changes in migratory routes that occurred in the course of the year, with more migrants taking the Western Mediterranean Route. This change in migratory routes led to an increasing need for protection, return and reintegration in countries such as Mauritania. The EUTF for Africa continued to support the UNHCR Evacuation Transit Mechanism (ETM,) which enables the protection, evacuation and resettlement of refugees stranded in Libya. It also supported the EU-IOM Joint Initiative to provide protection and voluntary return assistance to migrants in transit, and to help them reintegrate in their countries of origin. The Sahel and Lake Chad region addressed constraints on the labour market, such as youth employability and economic development in countries of departure and transit. The EUTF for Africa also continued its efforts to strengthen the resilience of local communities in the region by addressing food insecurity and malnutrition and improving access to basic services. Finally, EUTF for Africa actions helped to consolidate the support provided by the EU and other donors to the G5 Sahel group of countries (Burkina Faso, Chad, Mali, Mauritania and Niger).

## **SECTION 2 - PROGRAMMING, IMPLEMENTATION AND RESULTS (INCLUDING EVALUATIONS)**

### **2.1 Programming**

The identification of the priorities of the EUTF is the result of a thorough dialogue with African partners and relevant national and regional stakeholders. The process is based on a review of quantitative data (latest data available from numerous sources such as national statistics, IOM, Eurostat, Frontex, ACLED, HCR, FAO, World Bank, UNICEF and CILSS) as well as a qualitative analysis of the situation on the ground, based on the expertise developed by EU Delegations and its partners, constant dialogue with stakeholders and lessons learned from past projects. This enables a better understanding of local contexts and the identification of geographical areas and beneficiaries to be targeted and the most suitable implementing partners.

The EUTF addresses situations that are constantly evolving (migration flows are adapting to new routes, trafficking/smuggling networks adapt to new opportunities and border situations, terrorist groups make alliances, food security is seasonal and partly depends on climate) and needs to adapt. To do so, the EUTF can also rely on a research facility, to mobilise the best available research partners, enhance the knowledge and understanding

of the complex root causes of instability, insecurity, irregular migration and forced displacement, their drivers and underlying factors.

## 2.2 Operational Implementation

In 2018, the Sahel and Lake Chad window approved 15 new actions and one budgetary top-up, for a total of EUR 449.4 million, including contributions to cross-window actions. As of December 31, 2018, a total of 92 actions amounting to EUR 1.7 billion had been approved for this operational window, of which EUR 1.2 billion (72%) had been contracted. Member states and other donors contributed EUR 49 million to this window in 2018.

### AMOUNTS APPROVED IN 2018 (EUR million)

| COUNTRY              | . Greater economic and employment opportunities | Strengthening resilience | Improving migration management | Improved governance | Other        | TOTAL         |
|----------------------|-------------------------------------------------|--------------------------|--------------------------------|---------------------|--------------|---------------|
| <i>Burkina Faso</i>  |                                                 |                          |                                |                     |              |               |
| <i>Côte d'Ivoire</i> |                                                 |                          |                                | 30.00               |              | 30.00         |
| <i>Cameroon</i>      |                                                 |                          |                                |                     |              |               |
| <i>(The) Gambia</i>  | 23.00                                           |                          |                                |                     |              | 23.00         |
| <i>Mali</i>          |                                                 |                          |                                | 10.00               |              | 10.00         |
| <i>Mauritania</i>    |                                                 |                          |                                | 25.00               |              | 25.00         |
| <i>Niger</i>         | 7.60                                            |                          |                                | 10.00               |              | 17.60         |
| <i>Nigeria</i>       | 50.00                                           |                          |                                |                     |              | 50.00         |
| <i>Senegal</i>       |                                                 |                          |                                | 9.00                |              | 9.00          |
| <i>Chad</i>          |                                                 |                          |                                | 10.00               |              | 10.00         |

| <i>Cross-Window</i>  |                                                 |                          | 71.00                          |                     | 13.80        | 84.80         |
| <b>TOTAL</b>         | <b>95.60</b>                                    | <b>70.00</b>             | <b>161.00</b>                  | <b>99.00</b>        | <b>23.80</b> | <b>449.40</b> |

The region still faces crucial challenges. The humanitarian crisis in the Lake Chad basin is among the most severe in the world, with more than 10 million people in urgent need of life-saving assistance and protection according to the United Nations Office for the Coordination of Humanitarian Affairs (OCHA).

In Mali, the upsurge in insecurity due to an unprecedented influx of radical armed groups has led to a spread of terrorist acts from the northern regions of Mali to the central and southern parts of the country. Consequently, the situation is worsening in the Mopti and Ségou regions while Burkina Faso and Niger are increasingly affected by the crisis. The security situation in Burkina Faso deteriorated, particularly in the North and the East. In addition to local insurgencies exacerbating intercommunal conflicts, Boko Haram remains active in the Lake Chad region,. In this fragile context, improving access to basic services and strengthening resilience remain difficult and bring to light the continued need for an integrated approach and a strong humanitarian-development nexus.

The EUTF for Africa offered a swift response to changes observed in the migratory routes in the course of the year, with more migrants taking the Western Mediterranean Route, leading to increasing protection needs in countries such as Mauritania. Changes in migration trends contributed to a significant drop of arrivals to Italy and an increase by 131% (64,298) of arrivals to Spain compared to 2017.

Moreover, EUTF for Africa actions helped consolidate the support provided by the EU and other donors to the G5 Sahel, as reflected during the Donors Coordination Conference for G5 Sahel Partners held in Nouakchott on December 6, 2018.

#### Greater economic and employment opportunities

In 2018, the European Commission accelerated the implementation of actions aimed at reducing incentives to irregular migration by creating employment and economic activities in countries and regions of origin and transit. In the Sahel and Lake Chad

window, the EUTF for Africa offers a tailor-made response to specific challenges addressing constraints on the labour market including youth employability and economic development in productive sectors. Approved actions are supporting 24,211 beneficiaries to increase their skills and employability through Technical and Vocational Education and Training (TVET) actions.

Previously approved actions have made substantial progress to support job creation for young people through "quick win" actions in areas of origin and transit in Guinea and Niger. It is estimated that 10,825 new jobs have been created in the region. The "Archipelago" programme was officially launched in Dakar in December 2018. It aims at matching skill gaps identified by local private sector with tailor-made training and mentoring schemes for the youth. The involvement of both African and European private sector is a strong asset and constitutes a major step forward in the public-private partnership.

The programme 'Building a future - Make it in the Gambia' adopted in 2018 already started in greater Banjul and other inland provinces, focusing on promoting social cohesion and attractive employment or self-employment in renewable energy, eco-tourism and modern farming. This programme targets 25,000 beneficiaries and will focus on returning migrants.

This year, actions in the region have put an additional focus on high intensity labour force activities to foster full labour market integration through on-the-job training, financial education and incentives for financial saving as well as access to entrepreneurial schemes,. A workshop on projects involving labour-intensive methods and on-the-job training was organized in Mauritania with the active participation of the International Labour Organization (ILO), the Belgian Development Agency (Enabel), Agence Française de Développement (AFD) and the UN Capital Development Fund (UNCDF). The event stressed the importance of skills acquisition (technical, entrepreneurial and financial) leading to professional insertion paths for the beneficiaries and the reinforcement of labour protection and safety measures in the private sector.

In 2018, the new Africa-Europe alliance for sustainable investment and jobs announced the generation of 10 million jobs in Africa in the next five years. The Sahel and Lake Chad window actions are in line with this target in complementarity with the European Investment Plan and other instruments.

### *Strengthening resilience of communities*

The Sahel and Lake Chad window aim to address food insecurity and malnutrition whilst improving access to basic services, promoting public services and long-term issues such as social cohesion and natural resource management. Resilience actions apply an agile and conflict-sensitive approach, capable of adapting to rapidly changing contexts. It addresses immediate and essential needs to bridge the gap between humanitarian aid and development cooperation.

The objective is also to build resilience by strengthening national capacities. Local authorities are involved at all stages of the project cycle. For instance, 730 Community Development Plans will be reviewed across the region.

Actions in this area take place predominantly in regions exposed to conflict and extreme poverty. In Far North Cameroon, water, hygiene and sanitation services are improved through diagnosis, monitoring and infrastructure maintenance, which will benefit 30,000 households. Under the programme *Promoting Stability in North East Nigeria*, 1,935 people already benefited from inter-community mediation and conflict sensitization such as awareness raising on the dangers of explosive remnants of war.

Resilience programmes include economic development projects particularly relevant to vulnerable groups and youth. In Northern Mali, the *RELAC II*<sup>54</sup> programme helped

---

<sup>54</sup> Relance de l'économie et appui aux collectivités II (RELAC II)

relaunch the local economy and support local authorities by funding 87 local economic projects in the field of agriculture, livestock and fish farming in 28 communes in Gao and Timbuktu. In Mauritania, socio-economic activities have supported approximately 800 families amongst host communities and forcibly displaced persons with a plot of approximately 50 m<sup>2</sup> each. In addition, 43 Malian refugee students from the Mbera refugee camp received scholarships to continue their university studies in Nouakchott.

As a direct response to the request from Heads of State of the G5 Sahel, the EUTF for Africa adopted the *Regional Emergency Programme* to address urgent needs in border areas. Instigated by the G5 Sahel Permanent Secretariat at the Extraordinary Summit of Heads of State held in Nouakchott in July 2018, it forms part of the *Sahel Priority Investment Programme (PIP)*. Developed jointly with the G5 Sahel Permanent Secretariat within the framework of the Sahel Alliance, the programme offers a regional response to improve living conditions, access to water, resilience and social cohesion of vulnerable populations in the most fragile areas.

### Improved migration management

In line with the commitments taken at the Valetta Summit in 2015 and the AU-EU Summit in Abidjan in 2017, the Sahel and Lake Chad window continues to support the UN High Commissioner for Refugees (UNHCR) Evacuation Transit Mechanism (ETM) enabling the protection, evacuation and resettlement of refugees stranded in Libya, as well as the EU-IOM Joint Initiative providing protection, voluntary return assistance to migrants in transit and reintegration in the countries of origin.

Between September 2017 and December 2018, 2,202 persons have been evacuated from Libya to Niger in the frame of the ETM. A total of 3,719 individuals have been proposed for resettlement from Libya and Niger to 12 countries. 1,598 refugees have departed for resettlement from Niger and Libya to Belgium, Canada, Finland, France, Germany, the Netherlands, Sweden, Switzerland, the United Kingdom and the United States.

In 2018, the EUTF for Africa continued to step-up efforts in that sector by approving the programme *Protection and sustainable solutions for migrants and refugees along the Central Mediterranean route* amounting to EUR 135 million for the Sahel and Lake Chad window. It will enable the International Organization for Migration (IOM) and the United Nations High Commissioner for Refugees (UNHCR) to continue their activities in the field. Additional protection measures for the most vulnerable groups, in particular host communities, are envisaged in actions adopted this year. With a view to enhancing legal mobility, a complementary programme to the ongoing Erasmus + in West Africa will reinforce student and academic staff mobility in the Sahel and Lake Chad region and expand these opportunities to the Horn of Africa.

## **2.3 Results**

In 2017, the Trust Fund has achieved significant results and has been able to better demonstrate them. These results are illustrated in the above sections. As part of the approach of ensuring maximum transparency, these results and more are publicised on the EUTF's new website and on the AKVO RSR platform.

In 2018, the EUTF for Africa designed a regional Monitoring and Learning System (MLS) for the Horn of Africa and the Sahel and Lake Chad). The system gathers primary data from all projects on a quarterly basis. The information is analysed and delivered in quarterly reports which enables the European Commission to showcase results early on in the implementation process and analyse the way in which the Trust Fund is reaching its objectives. It also includes a learning component to capture and share more qualitative information on projects' approaches. The detail of results achieved by individual project is also publicly available on AKVO RSR, the IATI complaint platform system which ensures great transparency on the results of the on-going EUTF for Africa projects results.

In the Sahel and Lake Chad, the Monitoring and Learning System was set up in October 2018 to ensure an harmonised approach across the EUTF for Africa and consistent data aggregation. It has been possible to capitalize on the existing CAD (Collect, Analyse, Disseminate) approach already in place. Both the monitoring and learning components of the system are conceived in synergy with the existing tools used for the collection, analysis and dissemination of data, including the AKVO RSR platform. Field missions to the Sahel and Lake Chad countries are being carried-out by the European Commission to ensure appropriation of the Monitoring and Learning System across all involved stakeholders. The first MLS report for the Sahel and Lake Chad window will be published in the first half of 2019.

As of December 2018, 62 EUTF for Africa projects were selected for Results-Oriented Monitoring (ROM) reviews, of which 36 were fully completed. These reviews consist of assessments conducted by external experts according to four DAC criteria: relevance, efficiency, effectiveness and sustainability. They cover all three regions of the EUTF for Africa with 38 projects assessed in the Horn of Africa, 20 in the Sahel & Lake Chad and four in the North of Africa. A specific ROM-EUTF for Africa consolidated report will be published in early 2019 based on the reviews already available. It will present an overview of the ROM reviews main findings as well as lessons learnt and recommendations for future project implementation.

## 2.4 Communication

The European Commission is committed to ensuring transparency and to facilitate a clear understanding of programmes implemented under the EUTF for Africa. On top of Operational Committees and Board meetings, the operational and financial situation of the EUTF for Africa was presented to the European Parliament (BUDG, CONT and DEVE committees), the Council (CODEV and ACP working groups; EDF and DCI committees) and the ACP-EU inter-parliamentary assembly. The EUTF for Africa teams have regular in-depth exchanges with institutional partners and implementing agencies with which they maintain a dynamic dialogue through the Practitioners' Network for Development Cooperation.

EUTF for Africa programmes were showcased during the European Development Days in June in Brussels through a session entitled "Women on The Move: Stories of Resilience and Reintegration" as part of the EU-IOM Joint Initiative for Migrant Protection and Reintegration.

Earlier in 2018, EUTF for Africa actions in support of stabilisation and development in the G5 Sahel<sup>55</sup> region were highlighted at the High-Level International Conference on the Sahel, which confirmed the international community's political commitment to the Sahel countries.

A photo exhibition presenting the EU's support to G5 Sahel took place in Nouakchott in December 2018 and was inaugurated by the European Commissioner for International Cooperation and Development in the presence of four heads-of-state of G5 countries. This exhibition illustrated the work undertaken in the areas of food security, access to drinking water, access to basic services and peaceful coexistence of populations in the most vulnerable regions of the Sahel. It will tour in five African countries and in Brussels in 2019.

Finally, in 2018, the EUTF for Africa website gained considerable importance and helped to make EUTF for Africa activities known with more than 71,000 visits and 212,000 pages viewed. The overall content has considerably increased and now includes all the action documents as well as regular updates on ongoing programmes and information on the general state-of-play of the EUTF for Africa updated weekly. On social networks, the #AfricaTrustFund has been mentioned more than 3,000 times.

## SECTION 3 – FINANCIAL REPORT<sup>56</sup>

### 3.1. Amounts pledged and received

This Financial Report is drawn up in accordance with Art. 7.2 (d) of the Constitutive Agreement of the EUTF for Africa. The tables below provide a summary of the contributions to the EUTF for Africa as of 31 December 2018. Contributions are split between the three windows according to the earmarking information contained in the Contribution Certificate. As per Constitutive Agreement earmarking is only possible per window. If no earmarking has been requested, the following distribution applies:

- Window SAH (A) Sahel and Lake Chad: 40 %
- Window HOA (B) Horn of Africa: 40 %
- Window NOA (C) North of Africa: 20 %

Table A provides information on the contributions from external contributors (i.e. Member States and other external donors), as follows:

- Contributions pledged: total funding for the EUTF for Africa as agreed by donors (i.e. pledges that have been announced in a formal manner but have not yet been officially confirmed by a Contribution Certificate).
- Contributions certified: contributions supported by a Certificate of the external contributor.
- Contributions received: contributions received in the EUTF for Africa bank account, on the basis of which the amount available for commitment (i.e. the total amount of legal obligations that can be incurred) and the amount available for payment are subsequently established in the EUTF for Africa accounting system (ABAC). As of 31 December 2018, EUR 461 million had been received. Contributions received in currencies other than EUR are registered using the European Commission's official exchange rate.

Table B provides information on the contributions from the EU and EDF budgets, as follows:

- Contributions pledged: total funding for the EUTF for Africa as agreed by donors.
- Contributions certified: contributions supported by a Commission Financing Decision, on the basis of which the amount available for commitment (e.g. the total amount of legal obligations that can be incurred) is subsequently established in the EUTF for Africa accounting system (ABAC). As of 31 December 2018, an amount available for commitments of EUR 3 980 million had been made available in the EUTF for Africa accounting system (ABAC).
- Contributions received: contributions received in the EUTF for Africa bank account, on the basis of which the amount available for payment is subsequently established in the EUTF for Africa accounting system (ABAC). As of 31 December 2018, an amount available for payment of EUR 816 million had been made available in the EUTF for Africa accounting system (ABAC).

Interest generated by cash received in the EUTF for Africa bank account is shown in section III of Table B

---

<sup>56</sup> Draft annual accounts of the EU Trust Fund will be annexed to the AAR of the AOD.

**Table A: EUTF for Africa contributions from external contributors**

| A = Country                        | Contributions pledged (EUR) | Contributions certified (EUR) |                     |                   |                    | Contributions received (EUR) |
|------------------------------------|-----------------------------|-------------------------------|---------------------|-------------------|--------------------|------------------------------|
|                                    | TOTAL                       | TOTAL                         | Allocated by window |                   |                    | As 31/12/2018                |
|                                    |                             |                               | SAH (A)             | HOA (B)           | NOA (C )           | Total                        |

\* W OTH relates to administrative commitments covering staff and related costs

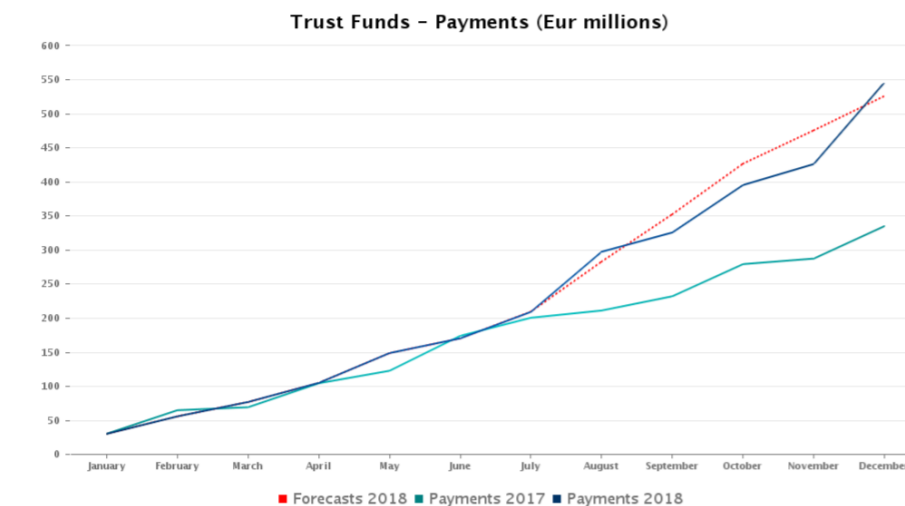

\*\*W REG relates to commitments that pertain to all three windows of the TF

### 3.4. KPI analysis

This is the first year that KPIs 1, 2 and 3 are calculated for the EUTF. And it is to be noted that a specificity of the EUTF, in comparison with the EDF or the EU BUDGET, is that contributions proceeding from EUTF donors are not fixed in advance and the overall yearly allocation is constantly evolving.

The KPI analysis shows that the EUTF **Sahel and Lake Chad** window underperformed on KPI 1, KPI 2, KPI3, which compare actual amounts paid, contracted and decided to date to the forecasted amounts at the beginning of the year (1.01.2018). Whilst for Decisions the KPI was 171%, the Contracts performance was of the 198%, and the Payments performance of 84%, the latter missing the KPI threshold by 6%.

During the year, several actions were undertaken to improve the performance for both windows. Revised amounts were provided during the mid-year BPC exercise (30.06.2018), from that point onwards the discrepancy between actuals and forecasts was considerably reduced. This can be illustrated by the graph below that shows the revised 2018 forecast and annual payments as of December 2018 (this graph includes both Sahel and Horn of Africa figures).

The result for the 'Ineligible amounts identified by ex-ante controls as a % of amount claimed' is below the benchmark for both windows as there have been only a small number of interim and final reports and thus the population taken into account for this indicator is small.

## SECTION 4 – MANAGEMENT AND INTERNAL CONTROL

The EUTF for Africa operates in the same general system of internal control defined by the Commission. It was decided that the EU Financial Regulation and the rules and procedures developed by the European Commission's Directorate General for International Cooperation and Development (DEVCO) for the management and implementation of its operations are equally applicable to the EUTF for Africa.

For the North of Africa window the Directorate-General for Neighbourhood and Enlargement Negotiations (NEAR) benefits from a sub delegation of DEVCO so that the EU Financial Regulation and the rules and procedures developed by the latter for the management and implementation of its operations are applicable to this window.

Once approved by the Operational Committee, actions are implemented in accordance with the implementing procedures provided for in the applicable Commission rules and regulations, including those applicable to EDF.

As per the Constitutive Agreement of the EUTF for Africa and given its objective to operate in a crisis and post-crisis situation, flexible procedures appropriate to the local environment are used to ensure that the Fund is effective and responsive to the needs identified. These procedures are in accordance with the FR provisions and are set up in DEVCO and NEAR financial guides. Their use needs to be justified on a case by case basis. A register of exceptions, derogations and prior approvals granted under the EUTF for Africa together with non-compliance events detected during the year is kept.

Project implementation is foreseen in direct management where the EUTF for Africa is the Contracting Authority and signs procurement and grant contracts or in indirect management by which project implementation is delegated to a third party, a EU Member State Agency or International Organisation. Candidate entities to be entrusted with budget-implementation tasks have to demonstrate a level of financial management and protection of the EU's financial interest equivalent to that of the Commission. International Organisations and Member States Agencies have to provide Management declarations on the use of the funds they are entrusted with.

Ex-ante controls are carried out by the EUTF for Africa staff for all

operations/transactions carried out under the EUTF for Africa.

In line with DEVCO and NEAR contractual models and audit policy, audits/expenditure verifications are either foreseen in contracts or can be launched by the EUTF for Africa of its own volition based on a risk analysis. An annual audit and verification plan for the EUTF for Africa was drawn-up for year 2017.

In 2018 the EUTF was included in the Annual Audit Plan of the Directorate General. A total of 19 contracts/projects under the EUTF were selected for audit and/or financial verification under DEVCO's Annual Audit Plan 2018.

In 2017 and 2018 the EUTF for Africa was also included in the "Residual Error Rate" exercise (ex-post controls) as are other programs/instruments managed by DEVCO and NEAR.

The EUTF for Africa accounts are also subject to an annual external audit.

The EUTF for Africa Managers take into account reports and recommendations of the different control bodies, notably the IAS and Court of Auditors, for the purpose of providing an assessment of the effectiveness of risk management, control and governance processes, in addition to the results of the audits carried out at the level of contractors/beneficiaries.

The European Anti-Fraud Office (OLAF) exercises the same powers over the EUTF for Africa in its entirety, including its governance bodies and the representatives of donors and observers participating in such bodies, as it does in respect of other activities of the Commission.

## 4.1. Control results

### 4.1.1. Control effectiveness as regards legality and regularity

#### 4.1.1.1. Results of ex-ante controls

As of the end of 2018, for all windows combined, the ex-ante controls had detected a total of M EUR 2.2 of expenditure that were ineligible.

Overview of results of ex-ante controls for the all windows:

|                                                      | Africa             |                       |                     |                   |                     |

#### 4.1.1.2. Results of external audits

The annual external audit of accounts of the EUTF Africa for years 2016 to 2018 were concluded satisfactorily. With regards to year 2019 an external audit of the accounts is currently in preparation.

#### 4.1.2. Fraud prevention and detection<sup>57</sup>

EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge. Therefore EUTF Africa is subject to OLAF's competence for the anti-fraud matters and OLAF's rules on the management of the related information apply.

### 4.2. Observations and recommendations made by IAS/ECA

A Performance Audit of the EUTF for Africa was launched by the ECA in early November 2017 and the final report issued at the end of 2018.

<sup>57</sup> EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge.

In summary the ECA concluded that the EUTF for Africa is a flexible tool facing unprecedented challenges and that, compared to traditional instruments, the EUTF for Africa is faster in launching projects and has managed to speed up the signing of contracts and making advance payments. The ECA states however that projects face similar challenges as traditional instruments that delay their implementation.

The ECA makes a number of recommendations aiming at:

- improve the quality of the objectives of the EUTF for Africa,
- revise the selection procedure for projects,
- take measures to speed up implementation,
- improve the monitoring of the EUTF for Africa.

The EUTF Africa has taken duly note of the ECA recommendations and will take appropriate measures to address them in due course.

With regards the Internal Audit Service of the Commission, a review of the EUTF for Africa has not yet been carried out.

### **4.3. Assessment of the effectiveness of the internal control systems**

The EUTF for Africa operates in the general system of internal control defined by the Commission. In this framework the EU Trust Fund has put in place the organisational structure and the internal control systems suited to the achievement of the policy and control objectives, in accordance with the standards and having due regard to the risks associated with the environment in which it operates.

Monitoring of the compliance and effectiveness of the internal control systems was done on a continuous basis by the Trust Fund Managers and adjusted and complemented where necessary.

Exceptions, derogations and non-compliance events that occurred during the reporting period have been registered and documented.

As flexible procedures apply ex-officio for the EUTF, exceptions and derogations are applied as needed when justified. This includes derogations to the rule of nationality and origin as well as reductions of deadlines for submission of tenders. Approvals for direct grant awards or negotiated procedures of service contracts were also applied in justified cases. The majority of such flexible procedures are preferably identified ab-initio and therefore included in the Action Document of each respective programme that is submitted for the approval of the Operational Committee of the Trust Fund.

Some cases of non-compliant event were detected (i.e. for instance signature of an agreement prior to the final reservation of funds or with a reservation of funds of different amount of the agreement in question). They were however identified and duly corrected and reported.

While many of the actions approved to date are still at an early stage of implementation, some of them have just started their cruising speed. The Trust Fund Managers have taken appropriate measures to ensure that the financial interests of the Union and of the donors are protected by the application of preventive measures against irregularities and fraud, by effective controls and, if irregularities or fraud are detected, by the recovery of the amounts wrongly paid. The contracts and agreements signed with third parties authorise the Commission to carry out controls on the spot, to suspend payments and implementation of actions where serious irregularities or fraud are noted, and to apply, where appropriate, effective, proportionate and deterrent contractual penalties.

#### **4.4. Conclusions as regards assurance**

Based on the above statements related to the internal management and control systems put in place and their functioning, sufficient assurance can be provided with regards to the legality and regularity of underlying operations.

## **SECTION 6 – DECLARATION OF ASSURANCE**

I, the undersigned,

Manager of the European Union Trust Fund for the Sahel And Lake Chad window.  
In my capacity as authorising officer by sub-delegation

Declare that the information contained in this report gives a true and fair view<sup>58</sup>.

State that I have reasonable assurance that the resources assigned to the activities described in this report have been used for their intended purpose and in accordance with the principles of sound financial management, and that the control procedures put in place give the necessary guarantees concerning the legality and regularity of the underlying transactions.

This reasonable assurance is based on my own judgement and on the information at my disposal, such as the results of the self-assessment, ex-post controls, the opinion of the Internal Auditor on the state of control.

Confirm that I am not aware of anything not reported here which could harm the interests of the European Union Trust Fund for the Sahel And Lake Chad window.

**Brussels, the 01.02.2019**

**Jean-Marc DEWERPE**  
**(signed)**

---

<sup>58</sup> True and fair in this context means a reliable, complete and correct view on the state of affairs under the TF

## **SECTION 1 – POLICY AND/OR OPERATIONAL HIGHLIGHTS OF THE YEAR**

In the course of 2018, the EU, through the EUTF for Africa, further pursued its efforts, together with its African and European partners, to foster stability and contribute to improved migration management in the Sahel and Lake Chad, the Horn of Africa and the North of Africa regions. It continued tackling the root causes of destabilization, forced displacement and irregular migration, by promoting development and security.

In April 2018, the Board of the EUTF for Africa took stock of progress achieved in different areas of work across the three regions and agreed on the need to further prioritize future actions based on six priority areas validated by the EUTF for Africa Board in September 2018: (i) return and reintegration; (ii) refugees management (Comprehensive Refugee Response Framework); (iii) completing progress on the securitization of documents and civil registry; (iv) anti-trafficking measures; (v) stabilization efforts in the Horn of Africa and in the Sahel/Lake Chad region; (vi) migration dialogues. The Board also acknowledged that the North of Africa window will continue contributing to an improved migration management with a priority set on the protection of vulnerable migrants, assisted voluntary return and reintegration and community stabilization; support to integrated border management; support to labour migration and mobility and to improved overall migration governance. Programmes adopted by the EUTF for Africa in 2018 have been developed in accordance with these policy directions.

Although the number of detected irregular border crossings on the Central Mediterranean route has significantly dropped in 2018, the situation along this route remains a concern. The EU continued its efforts in supporting Sub-Saharan partner countries to address the mixed migration flows in countries of origin and transit. The AU-EU-UN Task Force, established at the AU-EU Summit in Abidjan in 2017, helped to reinforce this partnership with a view to improving the situation of migrants in Libya. At the same time, the increased number of irregular arrivals in 2018 through the Western Mediterranean route called for an increased political and financial EU engagement along this route.

On 17 May 2018, the European Commission adopted a Communication “Progress report on the Implementation of the European Agenda on Migration”, providing an overview of progress and developments in implementing the European Agenda on Migration. The Communication identified concrete actions necessary to ensure the effectiveness of the EU response to migration challenges, including the need for additional financial support from the EU and its Member States to sustain EU action on the external dimension of migration.

At the European Council held in June 2018, EU leaders reiterated that tackling the migration challenges requires a strong partnership with African countries, aiming at socio-economic transformations of the African continent, increased development funding and the creation of a new framework enabling a substantial increase of private investments from African and European partners. The European Council recognised the need for additional funding to further pursue the efforts of the EUTF for Africa. It agreed on the transfer of EUR 500 million from the European Development Fund reserve to the Sahel and Lake Chad as well as Horn of Africa windows, and called on EU Member States to further contribute to the replenishment of the Trust Fund.

The Senior Officials’ Meeting (SOM) of the Joint Valletta Action Plan (JVAP) held in Addis Ababa (Ethiopia) on 14-15 November 2018 recognised the added value, continuing relevance and role of the EUTF for Africa as well as other bilateral and multilateral financial instruments mobilised during the last three years to address migration challenges in line with the JVAP. Valletta partners acknowledged the need to mobilise sufficient financial resources to implement the JVAP in line with policy priorities identified by the Rabat and Khartoum processes.

On 4 December 2018, the European Commission adopted a Communication “Managing

Migration in all its aspects: progress under the European Agenda for Migration” reiterating that long-term partnerships with third countries are essential to facilitate return and reintegration, to assist refugees and stranded migrants, to fight against human trafficking networks, and to address the root causes of irregular migration. At the same time, building credibility to work with partner countries requires also providing alternatives to irregular migration in the form of legal pathways into the EU. Taking stock of the progress achieved so far under the European Agenda for Migration, the Communication recognised that different EU tools have delivered good results on the Central Mediterranean route, and could be rolled out on other routes as well.

Through the implementation of its actions in 2018, the EUTF for Africa has contributed to further facilitate progress on political dialogues with African partner countries. It has continued pursuing a balanced approach supporting the multiple aspects of migration, with a focus on areas of mutual interest such as addressing the root causes of irregular migration and forced displacement, the fight against trafficking of human beings and smuggling of migrants and the return and reintegration of migrants to their countries of origin.

More in particular, the EUTF for Africa has developed a comprehensive approach providing protection to migrants along the Central Mediterranean route (which remains the most dangerous route in the Mediterranean), voluntary return and sustainable reintegration options to migrants from transit countries and support to refugees, internally displaced people and their hosting communities. In response to the increased flow of irregular migrants along the Western Mediterranean route, the EUTF for Africa has intensified its support to Morocco with the objective to protect and save lives and to fight against smuggling and trafficking networks.

Finally, at the global level, the Global Compact for Safe, Orderly and Regular Migration and the Global Compact on Refugees were adopted, respectively on 10 and 17 December 2018, setting the global framework for international cooperation in the areas of migration and forced displacement. In the course of 2018, the EU, through the EUTF for Africa, has further pursued its efforts, together with its African and European partners, to foster stability and contribute to improved migration management in the Sahel and Lake Chad, the Horn of Africa and the North of Africa regions. It continued tackling the root causes of destabilization, forced displacement and irregular migration, by promoting development and security.

In 2018 the approval of new projects or top-ups to by the Operational Committee of the Trust Fund amounted to EUR 285 million, which represents a significant joint effort of the EU and donors to contribute to improving the migration situation in the North Africa region.

## **SECTION 2 – PROGRAMMING, IMPLEMENTATION AND RESULTS (INCLUDING EVALUATIONS)**

### **2.1. Programming**

Over the course of 2018, the North of Africa (NOA) window has experienced a substantial increase in the number of programmes adopted and the implementation pace of its activities compared to 2017. The North of Africa window approved EUR 285 million of actions, which includes 10 new programmes, the replenishment of ongoing actions and contributions to cross-window programmes. This brings the total amount of approved programmes as of 31 December 2018 to 23 for a total of EUR 582 million, including contributions to two cross-regional programmes, capturing the objectives of the EUTF for Africa’s strategy and addressing the priorities of the Operational Framework.

In 2018, while continuing to respond to the orientations of the regional operational framework, the EUTF Board has agreed to focus on the following strands of action in 2018 and 2019:

1. Support to improved migration governance
2. Support to labour migration and mobility
3. Protection of vulnerable migrants, voluntary return and sustainable reintegration, as well as community stabilization (including through support to municipalities along migration routes)
4. Integrated border management

Donors have continued to respond positively to the need for contributions targeting this window, and helped to enhance considerably the EU Trust Fund for Africa's partnership with North African countries. In 2018, EU Member States have invested over EUR 47,2 million into this window as to ensure synergies and develop a common EU response along the Central and Western Mediterranean routes.

During the period February-December 2018, the EUTF for Africa conducted a number of results oriented monitoring (ROM) exercises for some projects implemented in Libya and Tunisia covering priority areas of the North of Africa window. While there is an overall positive assessment on the progress of activities being implemented, the ROM reports have identified the need to improve certain aspects, such as reinforce risk management and coordination on the ground and to strengthen monitoring and reporting of project implementation.

| Total                                                                                                                            | 285     |         |                   |       |       |                   |

Decisions were approved in the following way:

- in **February 2018**, the three window of the EUTF for Africa adopted a cross-regional programme supporting the political commitments of the African Union (AU) – European Union (EU) – United Nations (UN) Task Force to support protection and assistance as well as evacuate vulnerable persons from Libya for an amount of EUR 115 million. On the occasion, the EUTF for Africa also adopted a top up to the Research Facility with a EUR 3 million contribution from the North of Africa window;
- in **March 2018**, the NoA window adopted a EUR 50 million programme to support community stabilisation in Libya through a written procedure;
- in **July 2018**, the NoA window held its 5<sup>th</sup> Operational Committee and adopted 3 programmes worth EUR 90.5 million:
  - EUR 55 million support efforts of national institutions in Morocco and Tunisia to save lives at sea, improve maritime border management and fight against smugglers operating in the region;
  - EUR 29 million to support reinforce its support to the protection of refugees and migrants in Libya at disembarkation points, in detention centres, in remote southern desert areas. It will also promote initiatives to develop economic opportunities for migrants in the domestic labour market, together with the Libyan Ministry of Labour and urban settings;
  - EUR 6.5 million to reinforce its assistance to vulnerable migrants, supporting the 2014 Moroccan National Strategy on migration. It will facilitate access to

<sup>59</sup> Top up to the programme "Favoriser la mise en œuvre de la stratégie nationale migratoire de la Tunisie".

<sup>60</sup> The amounts reflected include two regional programmes: the EUR 55 million programme "Border Management Programme for the Maghreb", of which EUR 30 million are earmarked for activities in Morocco and EUR 20 million for activities in Tunisia, and the "Towards a Holistic Approach to Labour Migration Governance and Labour Mobility in North Africa" regional programme (EUR 15 million). It also includes a EUR 32 million contribution to the cross-regional programme "Protection and sustainable solutions for migrants and refugees along the Central Mediterranean route" to cover actions in Libya as well as a EUR 3 million contribution to the cross-regional "Research and Evidence Facility for the Sahel and Lake Chad Region and the North of Africa".

basic services for vulnerable migrants and improve local associations' and organisations' capacity to effectively deliver those services.

- in **December 2018**, the NoA window adopted 4 actions worth EUR 115 million:
  - EUR 45 million expanding the first phase of the programme Supporting border and migration management in Libya;
  - EUR 40 million to help Morocco develop its border management system;
  - EUR 15 million to promote legal migration and mobility between North of Africa, its southern neighbours and Europe. The German Development Agency GIZ, the International Labour Organisation and the International Organisation for Migration will implement this action;
  - EUR 8 million to reinforce the EU's support to facilitate the integration process of migrants living in Morocco as well as the positive contribution of Moroccans living abroad or coming back home to the development of the country. The programme, implemented by the Belgian Cooperation Agency;
  - In addition, the Commission expanded its support to Voluntary Humanitarian Return and Reintegration operations in Libya with an amount of EUR 7 million.

At the end of 2018, 14<sup>61</sup> new contracts or riders were signed for an amount of EUR 137,3 million.

### **OECD DAC<sup>62</sup> compliance**

One issue that has been raised by a number of EU Member States and other donors is the assurance that all the actions implemented under the EUTF – NoA are compliant with Official Development Assistance (ODA) eligibility criteria under the OECD-DAC.

As a response to the political priorities established in the different European Council Conclusions and political statements of the European Union, the North of Africa window has considerably enlarged the amounts committed to activities in the area of border management. Together with actions committed to support community stabilisation and governance in the region, this development represents a substantial shift in the original strategy of the North of Africa window as reflected in the Strategic Orientation Paper and the Regional Operational Framework. In 2018 alone, the Operational Committee approved three programmes of a total amount of EUR 140 million.

The nature of these activities is complex and represents a new strand of action for programmes financed through ODA resources. Although in principle border management activities can comply with ODA eligibility criteria, it would be appropriate undertake consultations with the DAC Secretariat at the OCDE in order to identify the potential risks that parts of these activities funded might not be eligible.

In the event that some activities were considered ineligible, it should be borne in mind that the North Africa window is not only funded through ENI but also through other channels such as the Internal Security Funds, the Asylum, Migration and Integration Fund (AMIF) or Common Security and Defence Policy instruments which are not subject to ODA requirements. With the use of different source of funding, in principle the assistance provided by the Trust Fund can be in line with the objectives of the relevant EU instruments. However, given the significantly increased funding of border management actions, the margin of non-ODA activities may become smaller in case larger parts of ongoing border management programmes should be considered non-eligible under ODA criteria by the OECD-DAC.

## **2.2. Implementation and results**

Programmes adopted in 2018 have been identified and formulated by the Trust Fund

---

<sup>61</sup> At the end of 2018 two additional contracts were signed by the Commission but not countersigned

<sup>62</sup> The Organisation for Economic Co-operation and Development's (OECD) Development Assistance Committee (DAC) is a forum to discuss issues surrounding aid, development and poverty reduction in developing countries. It describes itself as being the "venue and voice" of the world's major donor countries.

Managers in close partnerships with EU Delegations, Member States agencies and other relevant stakeholders at country level, as well as with technical partners with relevant expertise such as UN agencies and international civil society organizations.

Programmes adopted and contracts signed in 2018 are implemented, similarly to previous years, by different categories of implementers including EU Member States' development agencies, international and local NGOs and international or UN agencies. Overall, as indicated in Art 10 of the EUTF for Africa Constitutive Agreement, delegated cooperation with Member States agencies represents the main implementation modality used for programmes funded by the EUTF for Africa.

In 2018, challenges across the North of Africa region have required a determined and comprehensive response from the EU aimed at saving lives, ensuring legal, safe and orderly migration, reducing the number of irregular arrivals and developing new tools to deliver together on challenges on both sides of the Mediterranean. The EUTF for Africa has continued to react to emerging needs in the region through a spirit of partnership and joint responsibility. Actions adopted in 2018 have responded to clear political orientations defined by the EU and its Member States in the European Council conclusions of June and October 2018.

The Central Mediterranean route remains the most dangerous route in the Mediterranean, as 1,314 people have lost their lives while crossing this route in 2018. By protecting and assisting stranded migrants, refugees and their host communities all along the migration routes and providing essential health care, critical goods and a safe environment for the most vulnerable, EUTF programmes adopted in 2018 through the EUTF reflect our increased engagement to protect lives and ensure humane and dignified treatment of migrants and refugees.

According to the IOM and UNHCR, the number of migrants in Libya is estimated at almost 700,000, among which 57,546 are registered as refugees and asylum seekers by the UNHCR. Despite efforts to improve living conditions of migrants in the country, UNHCR claims that most of those detained are in need of international protection. Tunisia has witnessed a substantial increase of departures from its shores where Tunisians account as the main nationality.

However, the Western Mediterranean route has witnessed a particular increase of irregular migration from Morocco to Spain. In 2018, the largest number of arrivals across the Mediterranean has been recorded on this route, with more than 60,000 irregular arrivals to Spain until mid-December – as compared to 28,000 in 2017. This route has also become increasingly dangerous where 784 people have been reported dead or missing in 2018. In response, the EUTF for Africa has intensified its support to Morocco to address irregular migration with the objective to protect and save lives and to fight against smuggling and trafficking networks.

The EUTF for Africa has remained a key delivery tool, which complements traditional EU development instruments and existing political dialogues with partner countries. The EU continued its High-Level Dialogue on Migration with Tunisia in November 2018 and followed-up on the Migration Dialogue with Egypt. An informal dialogue on migration took also place between the EU and Algeria. At multilateral level, the EUTF for Africa has become instrumental in implementing the commitments undertaken by the Africa Union (AU) – European Union (EU) – United Nations (UN) Task Force, established after the Abidjan AU-EU Summit in November 2017.

### ***To foster rights-based migration governance-systems in the region***

This last year, the EUTF for Africa has continued to support the development and implementation of national strategies on migration and to ensure that every aspect of migration management has a legal and regulatory basis aligned with international conventions and agreements as well as with best practices. The EUTF for Africa supports the establishment of rights-based legislative, institutional and regulatory migration

frameworks, and an improved production of migration-related knowledge and data. It also promotes the transfer of expertise between relevant institutions as well as civil society organisations both in the region and with EU counterparts. Moreover, ongoing actions aim to foster a fair narrative on migration, promoting intercultural dialogue, cultural diversity and mutual understanding.

As regards Morocco for instance, the Operational Committee adopted a EUR 8 million programme to support the implementation of two national strategies: the National Strategy on Migration and Asylum and the National Strategy benefitting Moroccans living abroad. The Programme will offer administrative and technical support to migrants living abroad seeking to use their remittances as powerful financing tools for the development of the communities of origin in Morocco. The programme will also improve socioeconomic conditions of regularised migrants or in the process of regularisation by enhancing their access to basic services (e.g. education, health, employment).

### ***To increase mutually beneficial legal migration and mobility***

The North of Africa region has a strong tradition of intra-regional migration. Through migration, people contribute to the economic and social development of both countries of origin and destination. Diasporas can have an important impact on development through remittances as well as investments. In order to ensure that migration and mobility lead to win-win situations, the EUTF for Africa has stepped up work to facilitate legal migration to the EU and within the region, while improving dialogue and cooperation within the region on the conditions of migrant workers.

In December 2018, the Operational Committee adopted a EUR 15 million programme on legal migration. This new regional initiative will strengthen the governance on labour migration in North of Africa partner countries and reinforce the protection of migrant workers in the region. It will also facilitate the placement of workers from the region on the European labour market, through a mobility scheme piloted by Germany.

The EUTF for Africa has been working towards mobilising human talent and financial capacity of Diasporas' networks. In Tunisia, for instance, the project "*Développement des opportunités d'emploi et d'investissement à travers la mobilisation de la diaspora*" has started working with the Tunisian Diaspora in Europe to raise awareness about the existing opportunities to invest in the socioeconomic development of Tunisia. A study launched by this project is currently looking at the opportunities for Tunisians living in Germany, which will provide a EUR 5 million as co-financing, France, Belgium, Italy and Switzerland to invest in their home country.

### ***To strengthen protection and resilience of those in need***

Migration patterns in the region are complex with migrants and refugees coming along the same routes. The EUTF for Africa has continued to ensure protection and assistance of those in need, notably by providing essential health care, critical goods and a safe environment for the most vulnerable persons, and enhancing sustainable livelihoods for displaced persons and their host communities as well as promoting social cohesion.

Following the commitments made by the African Union and the European Union in Abidjan in November 2017, in February 2018 the EUTF for Africa adopted a cross-regional programme with a particular focus on Libya. Through this programme, the EU doubled its support to IOM's Voluntary Humanitarian Return and Reintegration operations from Libya to countries of origin for an additional 15,000 migrants<sup>63</sup>. The programme also facilitated the evacuation of 3,800 refugees and asylum seekers through the UNHCR's Emergency Transit Mechanism in Niger. In December 2018, the EUTF increased its contribution to IOM's operations by EUR 7 million.

Moreover, in response to a call by the European Council to increase protection and

---

<sup>63</sup> Together with actions adopted in December 2016, the EUTF for Africa covers the Voluntary Humanitarian Return and Reintegration of 30,000 stranded migrants in Libya to countries of origin.

assistance of vulnerable migrants in Libya, the EUTF for Africa has further reinforced its cooperation with the United Nations agencies (in particular, IOM, UNHCR and UNICEF) to protect and assist stranded migrants, refugees and their host communities all along the migration routes. Soon after the EU Council meeting of June 2018, the North of Africa window adopted a top-up (worth EUR 29 million) of the ongoing efforts (a EUR 90 million programme “Managing mixed migration flows in Libya through expanding protection space and supporting local socioeconomic development” adopted in April 2017).

The EU has also expanded protection and assistance measures in the region. In July 2018, the North of Africa window adopted a new programme for Morocco worth EUR 6.5 million to facilitate access to basic services for vulnerable migrants and improve local associations and organisations' capacity to deliver effectively services to the most vulnerable people. Civil Society Organisations, selected through a call for proposals, will implement this programme.

Given the particular situation in Libya, assisted voluntary return operations carried out by IOM are considered as protection measures and, therefore, its developments are reported under the strategic priority “To strengthen protection and resilience of those in need”. In 2018, the IOM assisted 16,458 migrants with humanitarian voluntary return from Libya to their countries of origin across Africa and Asia.

Programmes adopted in 2017 have improved their implementation pace over 2018. Through United Nations agencies and Civil Society Organisations, the EUTF for Africa has brought help to the most vulnerable. Since May 2017, 61,300 refugees and vulnerable migrants in Libya have received direct assistance (non-food items and hygiene kits), 89,700 persons have received medical assistance and 14,600 children have received learning supplies.

#### **Alternatives to detention: the Gathering and Departure Facility (GDF)**

*In December 2018, UNHCR evacuated the first group of refugees from Libya to Niger after hosting them at a Gathering and Departure Facility (GDF) in Tripoli. After securing their release from five detention centres across Libya, refugees were transferred to the Facility while waiting for their evacuation.*

*The Facility is the first centre of its kind in Libya. It aims to bring vulnerable refugees to a safe environment while UNHCR seeks durable solutions for them, such as refugee resettlement, family reunification, or evacuation to emergency facilities in other countries.*

*This initiative is one of many others supported by the EUTF for Africa to offer viable alternatives to the arbitrary detention system in Libya and prevent the deadly journeys that many refugees and migrants take along the Central Mediterranean route.*

*Since November 2017, with EUTF for Africa support, UNHCR has evacuated 2,793 refugees and asylum seekers from Libya.*

#### **Supporting access to education in Libya**

*Sarah is only 16 years old and lives in Sabha, Southwest Libya, with her parents and five brothers.*

*Eight years ago, Sarah's family migrated from Niger to Libya to find better living, education, and hence a brighter future. Sarah says, "My school is very small. Teachers have a bad salary and the students' parents do not have documents. This means that we don't have options for our future" said Sarah.*

*UNICEF is working to improve the living conditions of children like Sarah, by ensuring that irrespective of their background or nationality, all children in Libya are able to access education and get a proper certification. With support from the EUTF for Africa, UNICEF trains teachers on official English and French curricula, and reaches out to children at risk of dropping out of school to make sure that they are given the opportunity and the means to pursue their studies. UNICEF distributes textbooks and other learning materials to vulnerable migrant children and provides, where needed, education grants.*

*Since the beginning of the project, UNICEF has reached, with EUTF for Africa funding, 14,815 school-age children with learning kits to enable them to have continued access to learning opportunities as well as 370 teachers with teachers' kits to supplement the teaching process for children and ensure quality-learning opportunities. UNICEF is also currently working on the rehabilitation of 12 schools across Libya.*

## ***To foster a more inclusive social and economic environment and stability in the region***

Despite an overall decrease of migration flows through the Central Mediterranean route in 2018, migrants transiting through Libya remain of great concern. Moreover, flows in the region are changing as evidenced by the upsurge of irregular migrants from Morocco or Tunisia. In order to address this trend, the EUTF for Africa has continued working towards providing equal economic opportunities for vulnerable population groups living in disadvantaged areas and at risk of migrating irregularly. In the same vein, it has also continued enhancing stability and recovery of local communities, including migrant populations on the move and returnees, notably in Libya.

To this end, in 2018 the North of Africa window adopted a EUR 50 million programme expanding both geographically and financially the support provided to Libyan municipalities across the country, and in particular, along the main migration routes. The programme will focus on enhancing the capacities of local authorities in providing basic services such as health, education, water and sanitation as well as social services to the most vulnerable people.

Actions adopted in 2017 have improved their implementation pace, in particular in Libya, where local communities have received significant help, including for the rehabilitation of key infrastructures and equipment providing essential services to over 1.2 million people.

### **Empowering youth in Libya**

*Fatima Nasser is 21 years old and was born in Sabha, south-western Libya, is one of the young Libyan entrepreneurs supported by the EUTF for Africa to develop their businesses in the country.*

*Fatima has developed a food delivery app called Yummy, which delivers homemade meals cooked at home by local women. The app was launched in August 2018, with 300 women being ready to start cooking in Benghazi and Tripoli.*

*To respond to the many challenges people are facing in Libya, the EUTF for Africa supports the UNDP to put the country on a more robust development path by helping local authorities to restore security, and ensure essential services delivery and livelihoods opportunities in different locations (Tripoli, Sabratha, Sabha, Murzuq, Benghazi and Al Kufra). Over 1.2 million people in Libya have gained better access to healthcare and education while more than 100 entrepreneurs were trained to start their own business.*

*As part of this project, the EUTF for Africa is providing funding to train young Libyans and support their innovative ideas through the Tatweer Entrepreneurship Campus (TEC), a three-year initiative to support start-ups by providing training, consulting, mentoring, office space and financial aid.*

## ***To mitigate vulnerabilities arising from irregular migration and to combat irregular migration***

The European Council Conclusions of June 2018 called upon intensified efforts to stop smugglers operating out of Libya or elsewhere. With this aim, the EUTF has expanded its support to improve the capacity of the Libyan, Tunisian and Moroccan authorities covering sea and land borders to carry out Search and Rescue operations. This Action strives for implementing a comprehensive approach on border management with institutional reforms, capacity building as well as concrete training including on human rights and gender sensitisation.

In July 2018, a EUR 55 million programme on border management was adopted to address the needs expressed by Morocco and Tunisia in this sector. Out of this amount, EUR 30 million are earmarked for actions in Morocco and EUR 20 million for actions in Tunisia. To complement these efforts, in December 2018, the EUTF for Africa adopted an initiative worth EUR 40 million supporting Morocco in developing its border management system and fighting more effectively trafficking of human beings.

The two programmes are part of a EUR 140 million package together with an action financed under the European Neighbourhood Instrument (ENI) further to negotiations between the European Commission, Spain and Morocco over the second half of 2018.

These actions will pay particular attention to the protection of migrants' rights and prevention of further loss of lives at sea.

The EUTF for Africa expanded its support to border and migration management in Libya with additional EUR 45 million. This support will focus on developing capacities of the Libyan Coast Guards, the establishment of the Maritime Rescue Coordination Centre, and the development of the integrated border management in the south of Libya, building upon the work of the EU Border Assistance Mission (EUBAM) in the country. Human rights training will remain a key component to guarantee that the Libyan authorities targeted by this action comply with human rights standards in their operations.

### **2.3. Research, Monitoring & evaluation, communication activities**

In 2018, the EUTF for Africa has consolidated a comprehensive approach to monitoring, evaluating and learning, which allows tracking progress of our activities, measuring their success and improving implementation and programming accordingly through informed decision-making.

Our approach is conducted at three levels: at programme level, at operational window level and for the EUTF for Africa as a whole. In addition to indicators specific to each project, a first set of common output indicators had been designed in 2017 to offer an overall perspective of the results achieved by the Trust Fund and to capture their concrete achievements. The initial list has been extended to 41 macro indicators in 2018 to better reflect the scope and variety of the work carried out by our implementing partners. This enhanced list also offers the possibility for implementing partners to provide disaggregated data when available and in line with the priorities established by each operational window. Each of the projects contracted under the Trust Fund will include at least a minimum set of the above mentioned indicators resulting in a common basis for reporting across the three regions of the EUTF for Africa.

#### **The Monitoring and Learning System in the Horn of Africa and the Sahel and Lake Chad**

In the Horn of Africa and in the Sahel and Lake Chad windows, the Monitoring and Learning System (MLS) has been designed as a regional meta-monitoring system to gather primary data from all projects on a quarterly basis, following the EUTF for Africa common output indicators. The information is cross-analysed and delivered in quarterly reports<sup>64</sup> which enables the European Commission to showcase results early on in the implementation process and analyse the way in which the Trust Fund is reaching its beneficiaries. It also includes a learning component to capture and share more qualitative information on projects' approaches, in order to inform the programme strategy.

As of the end of 2018, the analysis carried out by the MLS in the Horn of Africa illustrates that three years after the creation of the Trust Fund, tangible results are already available for around 50 projects which are often implemented in difficult contexts. The EU has been able to combine short-term and long-term approaches, in particular by: supporting the host communities and the most vulnerable people who may be likely to migrate irregularly, as well as those who have already migrated, be they IDPs, refugees, migrants or returnees ; promoting the development of sustainable economic opportunities and resilience-building practices to give beneficiaries, especially youth, the chance to build a better future in their country rather than risking the dangers of irregular migration ; and enhancing the structural capacities of local governments and institutional partners to develop long-term solutions. The first MLS report for the Sahel and Lake Chad window will be published in the first half of 2019.

#### **The Monitoring and Evaluation System of the North of Africa**

---

<sup>64</sup> See the MLS second quarterly report for the Horn of Africa:  
[https://ec.europa.eu/trustfundforafrica/sites/euetfa/files/eutf\\_q2\\_2018\\_final\\_07112018.pdf](https://ec.europa.eu/trustfundforafrica/sites/euetfa/files/eutf_q2_2018_final_07112018.pdf)

The Monitoring and Evaluation System for the North of Africa window (MENOA) has been conceived as a framework linking all funded projects consistently to the strategic objectives and priorities of the EUTF for Africa.

In 2018, the MENOA focused on aligning the logical framework of newly adopted projects to the strategic objectives of the North of Africa window, supporting implementing partners during the contracting and inception phase to ensure selection of SMART indicators through bilateral meetings as well as field workshops in Egypt, Libya and Tunisia and facilitating data collection at project level. The first MENOA report is due by the first half 2019.

The MLS and the MENOA are both additional to the Monitoring and Evaluation (M&E) system of each individual project or other existing mechanisms such as the Results-Oriented Monitoring (ROM), project evaluations or the EUTF for Africa mid-term evaluation. It relies on data produced by M&E systems of each project and complement these systems where needed so as to have an overview of progress achieved at country and regional level.

### **The external mid-term evaluation of the EUTF for Africa**

An external mid-term evaluation of the EUTF for Africa has been launched at the end of 2018 and will be carried out in 2019. It will assess in particular the relevance and coherence of the EUTF for Africa strategic approaches against its objectives, its intermediary results, focusing on effectiveness and efficiency; its value added, the coordination and complementarity of the European Union's interventions with other donors' interventions (focusing on EU Member States); the coherence between the European Union's interventions in the field of development cooperation and other European Union policies that are likely to affect the partner country/region. The final results of the mid-term evaluation are expected in the first quarter of 2020.

### **Research and Evidence Facilities**

Under the Research and Evidence Facility (REF) for the Sahel and Lake Chad and the North of Africa, six contracts have been signed in 2018 (five for the Sahel and Lake Chad window amounting to EUR 6.5 million and one under the North of Africa window amounting to EUR 2.5 million). In the North of Africa, a project is conducting research on migration patterns, human trafficking and smuggling dynamics in Libya and the Sahel (Niger, Chad and Mali) as well as on underlying dimensions of instability/potentials of conflict linked to or in consequence of irregular migration flows and business. An additional budget of EUR 6 million has been approved by the Operational Committee in November 2018 to cover needs identified by EU Delegations with a specific focus on equality, human rights, and gender-based approach to programme design as well as vulnerable groups.

Ongoing studies will be made available on the EUTF for Africa website in the first quarter of 2019.

### **Results-oriented monitoring**

As of December 2018, 62 EUTF for Africa projects were selected for Results-Oriented Monitoring (ROM) reviews, of which 36 were fully completed. These reviews consist of assessments conducted by external experts according to four DAC criteria: relevance, efficiency, effectiveness and sustainability. They cover all three windows of the EUTF for Africa with 38 projects assessed in the Horn of Africa, 20 in the Sahel & Lake Chad and 4 in the North of Africa. A specific ROM-EUTF for Africa consolidated report will be published in early 2019 based on the reviews already available. It will present an overview of the ROM reviews main findings as well as lessons learnt and recommendations for future project implementation.

## **Communication**

The European Commission is committed to ensuring transparency and to facilitate a clear understanding of programmes implemented under the EUTF for Africa. On top of Operational Committees and Board meetings, we have presented in detail the operational and financial situation of the Trust Fund to the European Parliament (BUDG, CONT and DEVE committees), the Council (CODEV and ACP working groups; EDF and DCI committees) and the ACP-EU inter-parliamentary assembly. Our teams have regular in-depth exchanges with institutional partners and implementing agencies with which we maintain a dynamic dialogue through the Practitioners' Network for Development Cooperation.

An lunchtime conference on the Monitoring and Learning System (MLS) for the Horn of Africa took place at the end of last year in DG DEVCO in Brussels to present the second "Quarterly Monitoring and Learning report for 2018" and the approach to monitoring project results in the Horn of Africa. The Research and Evidence Facility of the Horn of Africa also presented three of studies at an Infopoint last November. Both events were attended by a large number of representatives from the civil society, implementing partners and EU institutions.

Our programmes were showcased during the European Development Days in June in Brussels through a session entitled "Women on The Move: Stories of Resilience and Reintegration" as part of the Joint EU-IOM Initiative for the Protection and Reintegration of Migrants.

Earlier this year, EUTF for Africa projects in support of stabilisation and development in the G5 Sahel region were highlighted at the High-Level International Conference on the Sahel, which confirmed the international community's political commitment to the Sahel countries.

A photography exhibition presenting the EU's support to G5 Sahel took place in Nouakchott in December and was inaugurated by the European Commissioner for International Cooperation and Development, Mr Neven Mimica in the presence of four heads-of-state of G5 countries. This exhibition illustrates the work undertaken in the areas of food security, access to drinking water, access to basic services and peaceful coexistence of populations in the most vulnerable regions of the Sahel. It will tour in five African countries and in Brussels in 2019.

Finally, in 2018, the EUTF for Africa website has gained considerable importance and helped to make our activities known with more than 71,000 visits and 212,000 page viewed. The overall content has considerably increased and now includes all the action documents as well as regular news and updates on ongoing programmes and information on the general state-of-play of the EUTF for Africa updated weekly. On social networks, the #AfricaTrustFund has been mentioned more than 3,000 times.

The North of Africa window contracted a Framework Contract to support the team in producing communication and outreach products in an effort to improve the knowledge and attract interest to the activities implemented under the EUTF for Africa in the North of Africa region.

## **SECTION 3 – Financial report<sup>65</sup>**

### **3.1. Amounts pledged and received**

As of 31 December 2018, resources allocated to the EU Trust Fund for Africa amounted to approximately EUR 4.2 billion. This includes around EUR 3,7 billion from the European Development Fund (EDF) and EU financial instruments including the Development Cooperation Instrument (DCI), the European Neighbourhood Instrument (ENI), and

---

<sup>65</sup> Draft annual accounts of the EU Trust Fund will be annexed to the AAR of the AOD.

funding from the Directorate-General for Migration and Home Affairs (DG HOME) and the Directorate-General for European Civil Protection and Humanitarian Aid Operations (DG ECHO), as well as EUR 489.5 million from EU Member States and other donors (Switzerland and Norway).

The overall resources of the EUTF have increased by EUR 884 million in 2018, including EUR 650 million from the European Development Fund and EUR 117 million from EU Budget (out of which EUR 27,7 to the North of Africa window). The EUTF received 25 new contributions from EU Member States and other donors for EUR 116.7 million (EUR 55.1 million to the Sahel and Lake Chad window, EUR 47.2 million to the North of Africa window and EUR 14.4 million to the Horn of Africa window). The conclusions of the European Council of 28 June 2018 called on the EU and its Member States to provide additional funding to the EUTF for Africa. As a follow-up, the Commission has adopted on 6 July a decision to transfer EUR 500 million from the 11<sup>th</sup> EDF reserve<sup>66</sup>.

This Financial Report is drawn up in line with Art. 7.2 (d) of the Constitutive Agreement of the EUTF for Africa.

The tables below provide a summary of the contributions to the EUTF for Africa as of 31 December 2018. Contributions are split between the three windows according to the earmarking information contained in the Contribution Certificate or, if no earmarking has been requested, according to the following distribution key:

- Window SAH(A) – Sahel and Lake Chad: 40 %
- Window HOA(B) – Horn of Africa: 40 %
- **Window NOA(C) – North of Africa: 20 %**

The first table provides information on the contributions from external contributors (i.e. Member States and other external donors), as follows:

- Contributions pledged: total funding for the EUTF for Africa as agreed by donors (i.e. pledges that have been announced in a formal manner but have not yet been officially confirmed by a Contribution Certificate).
- Contributions certified: contributions supported by a Certificate of the external contributor.
- Contributions received: contributions received in the EUTF for Africa bank account, on the basis of which the amount available for commitment (i.e. the total amount of legal obligations that can be incurred) and the amount available for payment are subsequently established in the EUTF for Africa accounting system (ABAC). Contributions received in currencies other than EUR are registered using the ECs official exchange rate.

The second table of this section provides information on the contributions from the EU and EDF budgets, as follows:

- Contributions pledged: total funding for the EUTF for Africa as agreed by donors;
- Contributions certified: contributions supported by a Commission Financing Decision, on the basis of which the amount available for commitment (e.g. the total amount of legal obligations that can be incurred) is subsequently established in the EUTF for Africa accounting system (ABAC).
- Contributions received: contributions received in the EUTF for Africa bank account, on the basis of which the amount available for payment is subsequently established in the EUTF for Africa accounting system (ABAC).

Interest generated by cash received in the EUTF for Africa bank account is shown in section III of the second table.

#### **Table - EUTF for Africa contributions from external contributors**

---

### 3.4. KPI analysis

The implementation of the on-going contracts is making progress considering the difficult environment in certain countries, and in particular in Libya. The values of the KPIs related to the North of Africa window are reflected in Annex 6. Some of them are orange for the reasons explained below.

KPI 1 – Pay. Fcst. - Accuracy of initial annual financial forecast for payments (Between 90% and 110% 58% ) – Value from the KPI report: 58,65

<sup>68</sup> At the end of 2018 two additional contracts were signed by the Commission but not countersigned

This low value is due to the following factors: i) over-optimistic initial forecast for 2018; ii) the forecast for 2018 took into account payments for contracts of projects under the EUR 60 million Financing Agreement (FA) with Egypt initially signed in October 2017. However, the FA was renegotiated at the request of the Egyptian Authorities and finally signed in October 2018<sup>69</sup>; iii) delays in implementation of some projects have led to delays in receiving requests for second pre-financings; and iv) two contracts were at the end of the year without the possibility of making the corresponding pre-financing payments.

In the future, the forecast for payments should take properly into account all the elements of risks.

KPI 2 Ctr. Fcst. Accuracy of initial annual financial forecast for contracts (Between 90% and 110%) 60%. Value from the KPI report: 60,09

The reasons for this low value are also related, at least partially, to the fact that contracts under the FA signed with Egypt could not materialise as explained above. Delays in the negotiations of some contracts with a number of implementing partners mainly due to discussion on eligibility of costs for staff participating in the projects have had also an impact.

In the future, delays in negotiating the contracts are expected to be reduced by reaching general agreements on topics that are problematic and that can be applicable to all the contracts to be negotiated with a given organisation.

KPI 3 Dec. Fcst. Accuracy of initial annual financial forecast for decisions (Between 90% and 110%). Value from the KPI report: 72%

The programmes approved by the Operational Committee of the Trust Fund amounted to EUR 285 million, which is a significant achievement. The forecasted amount of EUR 398 million seems to be over-ambitious and in the future the forecast should be more accurate

KPI 4 - Ral absorp. - Ral absorption period (less than 4). Value: 4,9

The reasons for the value above the threshold are related to the reasons given for KPI 1. Level 2 commitments increased quicker than the payments made.

KPI 6 - Proj. Imp. - % of projects with red traffic light for implementation projects / KPI 7 Proj. Object. - % of projects with red traffic light for achieving results

Although these KPIs, calculated for whole set of projects considered are green, there are specific projects that appear as red (one) and orange (seven) in the excel table used to calculate the aggregated KPI 6 and 7. This is due to the difficult environment in which these projects take place, especially in the case of Libya. The implementation of these projects need to be followed very closely. The situation of the project that appears in red is described below.

LCM.T05.62 T005-GRANT CONTRACT WITH DRC: STRENGTHENING PROTECTION AND RESILIENCE OF DISPLACED POPULATIONS IN LIBYA

Delays have been experienced since the beginning of the project's implementation. The consortium of NGOs implementing the project (Danish Refugee Council, CESVI, International Medical Corps, Save the Children) has faced several challenges: security problems, NGOs phasing out of Libya, not to mention a difficult security situation on the ground. At this stage, only DRC and CESVI are implementing activities in Tripoli and Misrata. A ROM is currently being carried out. An amendment of the contract is currently

---

<sup>69</sup> The FA has yet to be ratified by the Egyptian Parliament.

under discussion but DG NEAR is waiting for additional elements from the ROM in order to assess relevance of amending the project at this stage.

The implementation of the relevant projects will be followed very closely, conducting ROM as necessary and assessing the level of risk.

KPI 11 – Pay. time - 11 % of payments paid within the contractual deadline (at least 85 %) - Value: 84 %:

The value is very close to the threshold. The slightly low value is due to difficulties in receiving the necessary credits to make payments. It should be noted in this regard that DEVCO manages the allocation of payment credits. As the funds available for payments are shared by the three windows of the EUTF for Africa, the North Africa window was not always given the necessary priority. This issue needs to be clarified with DG DEVCO in the context also of the transfer of ENI funds to the ETFF account to make payments, in order to avoid similar situations in the future.

KPI 21 – Ex-ante inelig. - Undue payment prevented by ex-ante control (at least 2 %) – Value: 0

Most of the contracts under the Trust Fund are delegation/contribution agreements signed with pillar-assessed organisations. The number of other types of contracts is very limited. Based on the information included in the KPI dashboard, only three transactions have been considered for the calculation of this KPI, which it is not statistically significant.

## **SECTION 4 – MANAGEMENT AND INTERNAL CONTROL**

### **4.1 Control results**

The EUTF for Africa operates in the general system of internal control defined by the European Commission.

It was decided that the EU Financial Regulation and the rules and procedures developed by the European Commission's Directorate General for International Cooperation and Development (DEVCO) for the management and implementation of its operations are equally applicable to the EUTF for Africa.

For the **North of Africa window**, the Directorate-General for Neighbourhood and Enlargement Negotiations (NEAR) benefits from a sub delegation from DEVCO so that the EU Financial Regulation and the rules and procedures developed by the latter for the management and implementation of its operations are applicable to this window also.

Once approved by the Operational Committee, actions are implemented in accordance with the implementing procedures provided for in the applicable Commission rules and regulations.

As per the Constitutive Agreement of the Trust Fund and given its objective to operate in a crisis and post-crisis situation, flexible procedures appropriate to the local environment are used to ensure that the Fund is effective and responsive to the needs identified. These procedures are in accordance with the FR provisions and are set up in NEAR financial guides. A register of exceptions, derogations and prior approvals granted under the Trust Fund together with non-compliance events detected during the year is kept.

Project implementation is foreseen in direct management where the Trust Fund is the Contracting Authority and signs procurement and grant contracts, or indirect management by which project implementation is delegated to a third party, a EU Member State Agency or International Organisation. Candidate entities to be entrusted with budget-implementation tasks have to demonstrate a level of financial management and protection of the EU's financial interest equivalent to that of the Commission.

International Organisations and Member States Agencies have to provide Management declarations on the use of the funds they are entrusted of.

Ex-ante controls are carried out by the TF staff for all operations/transactions carried out under the TF.

In line with NEAR contractual models and audit policy, audits/expenditure verifications are either foreseen in contracts or can be launched by the TF based on a risk analysis. The Trust Fund accounts are subject to an annual external audit.

The Trust Fund Managers take into account reports and recommendations of the different control bodies, notably the IAS and Court of Auditors, for the purpose of providing an assessment of the effectiveness of risk management, control and governance processes, in addition to the results of the audits carried out at the level of contractors/beneficiaries.

The European Anti-Fraud Office (OLAF) exercises the same powers over the Trust Fund in its entirety, including its governance bodies and the representatives of donors and observers participating in such bodies, as it does in respect of other activities of the Commission.

#### **4.1.1 Results of ex-ante controls**

There is no specific issue to highlight. In 2018 most of the payments made were for pre-financing payments. It should be borne in mind that the most of the programmes of the Trust Fund are implemented under indirect management through delegation/contribution agreements by pillar-assessed development agencies from Member States or International Organisations. Only a few programmes are implemented through grants. There are also a few service contracts.

#### **4.1.2 Results of external audits**

No external audits were deemed to be necessary specifically for the EU Trust Fund for Africa - North of Africa window. However, an audit/verification is expected to be prepared in the course of 2019 based on the potential risks of the portfolio of contracts under the Trust Fund.

The annual external audits of accounts of the EUTF Africa for years 2016 and 2017 were both concluded satisfactorily. With regards year 2018 an external audit of the accounts is currently in preparation.

#### **4.1.3 Fraud prevention, detection and correction<sup>70</sup>**

No investigations by the European anti-fraud Office (OLAF) have yet been carried out.

EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge. Therefore, EUTF Africa is subject to OLAF's competence for the anti-fraud matters and OLAF's rules on the management of the related information apply.

### **4.2 Observations and recommendations made by IAS/ECA**

The European Court of Auditors ECA conducted a performance audit of the EUTF for Africa between November 2017 and April 2018. Upon collection of documents and background material, several meetings between the Auditors Team and EUTF teams, as well as two country visits (Niger and Libya/Tunisia), the ECA issued first the Clearing Letter in April 2018, and then the draft report in July 2018. The Commission replies to the Preliminary Conclusions of the Court and its recommendations were thoroughly discussed in September up to the Adversarial Meeting held on 3 October 2018. The final

---

<sup>70</sup> EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge.

Audit Report was approved by the ECA in October and published on 5 December 2018.

The Audit was developed around two overarching questions:

1. *Is the EUTF for Africa well established?*
2. *Is the EUTF for Africa well implemented?*

### **Main Conclusions and recommendations**

In its main conclusions, the ECA highlighted that:

- The EUTF for Africa is a flexible tool, but considering the unprecedented challenges that it faces, its design should have been more focussed;
- The audited projects were at an early phase of implementation but had already started to produce outputs.
- While the broad objectives of the EUTF for Africa allow flexibility, this has resulted in a strategy that is not focussed enough to steer action across the three windows; Furthermore, the strategic guidance provided to Trust Fund Managers has not been very specific;
- The Commission did not comprehensively analyse the needs to be addressed by the EUTF for Africa or the means at its disposal. When needs were identified, they were not quantified, just as a critical mass of funding was not defined.
- Pooling of resources and capacities was not carried out in the most effective and systematic way. In addition, an appropriate lessons-learned mechanism was not developed;
- Compared to traditional instruments, the EUTF for Africa was faster in launching projects. It has, overall, managed to speed up the signing of contracts and making advance payments. However, projects face similar challenges as under traditional instruments that delay their implementation.
- Procedures for selecting projects varied between windows and the criteria for assessing project proposals were not sufficiently clear or documented. Furthermore, the comparative advantage of funding projects through the EUTF for Africa was not always well explained.
- The common monitoring system adopted by the EUTF for Africa is not yet fully operational and the three operational windows of the Trust Fund use different systems for monitoring performance. Moreover, project objectives were often not SMART and indicators used for measuring project performance lacked baselines.

Based on the results of the Audit, the ECA made four recommendations. The Commission has accepted all the recommendations including the timeframe for implementation, except for recommendations 2 (a) and 2 (b):

#### **1. Improve the quality of the objectives of the EUTF for Africa**

The Commission should propose to the Trust Fund Board a review of the existing objectives and priorities of the EUTF for Africa to make them more specific and achievable. It should take into account the particular challenges of the three windows, and to the extent possible, include targets and baselines. In this exercise, the Commission should, in particular, use:

- (a) the outputs of the Research and Evidence Facilities;
- (b) the capabilities of all donors; and
- (c) a lessons-learned mechanism for the Trust Fund as a whole.

Timeframe: end of 2019.

#### **2. Revise the selection procedure for projects**

The Commission should:

- (a) establish clear common criteria applied across windows and document the assessment of project proposals against these criteria;
- (b) provide the Operational Committees (OpComs) with a list of received proposals that have not been developed into an Action Fiche, including the

- reasons for their rejection, by the TF Manager;
- (c) inform the OpComs of any substantial changes to already approved projects (i.e. changes in objectives, budget and duration);
- (d) create a dedicated section in the Action Fiche demonstrating the comparative advantage of supporting the project through the EUTF for Africa rather than through other forms of EU support.

Timeframe: mid 2019.

The Commission has not accepted recommendations 2(a) and 2(b). The Commission does not consider it is necessary to establish a list of general and common criteria to be used since the EUTF for Africa is not working on the basis of submission of proposals, and the Commission will take measures to ensure that Action documents clearly explain the link between the proposed Action and the strategic objectives defined.

EUTF for Africa actions are identified and developed by the Commission (EUTF Managers) into project documents through a consultative process involving many actors at HQ and country level EU Delegations, Member States representatives and local stakeholders) in line with the Commission common practices (e.g. DCI and EDF committees).

### 3. Take measures to speed up implementation

The Commission should identify all accelerated procedures that can be applied to the EUTF for Africa and enhance their use in consultation with potential implementing partners where relevant.

Timeframe: end 2019

### 4. Improve the monitoring of the EUTF for Africa.

The Commission should:

- (a) make the common monitoring system fully operational;
- (b) include SMART objectives in the project logframes, and improve the quality of indicators by establishing quantified baselines and targets.

Timeframe: mid 2019

All the recommendations will be properly implemented in the course of 2019 in line with the above timeframes.

## 4.3 Assessment of the effectiveness of the internal control systems

The EU Trust Fund operates in the general system of internal control defined by the European Commission. The EU Trust Fund has put in place the organisational structure and the internal control systems suited to the achievement of the policy and control objectives, in accordance with the standards and having due regard to the risks associated with the environment in which it operates.

Monitoring of the compliance and effectiveness of the internal control systems was done on a continuous basis by the Trust Fund Manager and adjusted and complemented where necessary.

Exceptions, derogations, prior approvals and non-compliance events are registered and documented (see table in Annex 6 containing the 'events to be reported' and 'exceptions' registered during the reporting period).

## 4.4 Conclusions as regards assurance

During the reporting period the North of Africa window of the EU Trust Fund continues to expand its portfolio of contracts after the successful approval of new programmes and riders by the Operational Committee for a value of EUR 285 million. New programmes will be adopted in the course of the year.

The starting of implementation of new projects together with the implementation of the existing ones has led to an increase of the workload do the TF teams in Headquarters and relevant EU Delegations, which call for the reinforcement of the teams, initially estimated in a project manager in Delegation and another one in HQ.

Based on experience gained with the implementation of the Trust Fund, an internal control business workflow process, based on PRAG and Companion was created to ensure priority setting in contracting, clarify procedures and transparency for all involved in business management of the Trust Fund, including Delegation staff and C&F section.

A deputisation system is in place in order to ensure business continuity of the Trust Fund business operations.

## SECTION 5 - ANNEXES

### Annex 1 – List of derogations, exceptions, non-compliance events, prior approvals and events to be reported

Register of derogations, exceptions, non-compliance events, prior approvals and events to be reported for the EU Trust Fund for stability and addressing root causes of irregular migration and displace persons in Africa – North of Africa window.

| N. | Reference                                                                                                                                                                                                  | Type                                                                                                                                      |         | Description                                                                       | Date       |

## **SECTION 6 – DECLARATION OF ASSURANCE**

I, the undersigned,

Manager of the North of Africa window of the European Union Trust Fund for Africa.  
In my capacity as authorising officer by sub-delegation

Declare that the information contained in this report gives a true and fair view.

State that I have reasonable assurance that the resources assigned to the activities described in this report have been used for their intended purpose and in accordance with the principles of sound financial management, and that the control procedures put in place give the necessary guarantees concerning the legality and regularity of the underlying transactions.

This reasonable assurance is based on my own judgement and on the information at my disposal for years prior to the year of this declaration.

Confirm that I am not aware of anything not reported here which could harm the interests of the North of Africa window of the European Union Trust Fund for Africa.

- **Section 3 - Financial Report**
- **Section 4- Management and internal controls**
- **Section 5- Annexes**
- **Section 6 - Statement of assurance**

## **SECTION 1 – POLICY AND/OR OPERATIONAL HIGHLIGHTS OF THE YEAR**

2018 saw the first Parliamentary and Presidential elections in Colombia since the signature of the Peace agreement and therefore with FARC participating as a political party. Elections took place in a largely peaceful environment, qualified by local media as the most peaceful in decades.

On the Parliamentary elections on 11 March 2018 turnout was higher than expected (45-46%). While there was no major change in seat distribution, the main winner in the Senate was Centro Democrático party (right-wing) and the Liberals in the House of Representatives. FARC registered low votes, not winning a seat in their own right. However, the party still benefits from 5 seats in each house as a result of the peace agreement.

Centro Democrático also won the Presidential elections and its candidate, Ivan Duque, became President of Colombia on 7<sup>th</sup> August. The new government expressed its commitment to implement the peace agreement and has worked closely with the EU in all aspects pertaining to the Trust Fund. Emilio Archila was appointed High Counsellor for post-conflict and stabilization and became the Colombian representative in the Trust Fund governance bodies.

At the Strategic Board of the Trust Fund, members expressed general satisfaction with state of play of the Trust Fund and the way it has been managed to date. It was agreed that strategic priorities (rural development and reincorporation) remain valid. Consensus that we should now move to a new phase in which projects should serve to anchor a structured dialogue with the government on peace implementation, achieve a greater impact and be more aligned and complementary to government programmes.

Additional pledges exceeding EUR 28 million were announced (details in point 3.1) Chile announced its intention to contribute \$ 100.000 becoming the first non-European country that contributes to any EU Trust Fund

At operational level, the Trust Fund reached cruise speed during 2018. EUR 39.5 million were contracted, reaching a total of EUR 56.5 million contracted at the end of the year (plus EUR 2 million Administrative expenditure). The recruitment of staff members was completed.

## **SECTION 2 – PROGRAMMING, IMPLEMENTATION AND RESULTS (INCLUDING EVALUATIONS)**

Given the almost EUR 30 million increase in late 2018 and the guidelines provided by the Strategic Board with regards to projects in this phase being more aligned and complementary to Government programmes, the main programming task for 2019 will be the formulation and adoption of two main programmes in the two priority areas of the Fund, rural development and reincorporation of FARC ex-combatants which follow the orientations of the Board with regard to impact, complementarity and policy dialogue.

With regards to implementation and results, most of the projects have started in 2018 and therefore are still at a very initial phase to produce tangible results. However, most report that levels of trust on the peace process have increased, projects have managed in many cases to offer some hope to populations that have historically been badly hit by the conflict. We have also observed in those projects where we work with reincorporated population, that trust between former FARC combatants and surrounding communities is also being built and a genuine social reintegration process is taking place. Trust Fund projects have also been able to provide quick wins for beneficiaries be it in terms productive infrastructure (7 fish farming facilities, poultry and pork processing infrastructure, pineapple processing facility for ex-combatants), training (e.g. 61 women certified in rural journalism and peacebuilding, scholarships awarded to rural youth) or increased access to market (project have started to export coffee to Europe and

Australia, bananas to USA, peasant markets –mercados campesinos- have been established or revamped, food security activities have begun to yield results)

However, the areas where the Trust Fund intervenes continue to be difficult. The vacuum left by FARC demobilization has often been filled by organized crime and armed groups linked to illicit economies (mostly drug trafficking and illegal mining). Many projects present delays in their chronograms and report difficulties on implementation due to the security situation in the field, including serious situations affecting to project staff. An intense monitoring activity will be necessary in 2019 to ensure that action can be taken where needed and we can keep projects on track.

## SECTION 3 – FINANCIAL REPORT<sup>73</sup>

### 3.1. Amounts pledged and received

| Donor           | Pledged       | Received     |
|-----------------|---------------|--------------|
| EC DCI          | 91,47         | 76,21        |

| Spain           | 3,00          | 2,01         |
| Sweden          | 3,12          | 1,39         |
| United Kingdom  | 1,51          | 1,51         |
| <b>TOTAL</b>    | <b>118,50</b> | <b>97,80</b> |
| EC              | 93,47         | 78,21        |
| External donors | 25,03         | 19,59        |

In addition to the above, at the meeting of the Strategic Board in November 2018, Germany indicated a EUR 3 million contribution in 2019 (no yet formalized), Spain additional EUR 3 million and Chile \$ 100.000. No contribution certificates have yet been received for these.

<sup>73</sup> Draft annual accounts of the EU Trust Fund will be annexed to the AAR of the AOD.

### 3.2. Amounts paid

In 2018 the EU Trust Fund for Colombia signed 15 contracts for which pre-financings were paid for a total value of EUR 18.35 million. A total amount of EUR 1.34 million was committed for Administrative expenditure. All amounts in the table reflect EUTF contributions only; additional co-funding by counterparts is not included.

Apart from administrative expenditure, most of payments were first pre-financings for newly signed contracts in 2018. One expenditure payment only is a biannual payment for Technical Assistance contract (T06.7).

### 3.3. Beneficiaries and amounts contracted

Note: In addition to the list below, a contract with LKS/Alecoop for EUR 3 million was signed on 14/12/2018 and will be reported in the 2019 annual accounts

### 3.4. KPI analysis

**Payments forecast. 84%.** This is mainly due to two contracts on reincorporation that we expected to sign in 2018 and remain blocked at government level.

**Contracts forecast. 59%.** Mainly due to 9 projects that were in the pipeline in January 2017, having been presented by Member States to the manager, which in conversations between the Delegation and Headquarters it was decided to drop.

**Decisions forecast. 131%.** Due to the Decision in June to merge two projects into one which resulted in a level 1 commitment higher than we had anticipated in January.

**% invoices registered in 7 days. 76%.** Given that signed contracts when received were first sent to the operational section for registration, visas and inclusion in statistical systems and only then sent to the F&C section for payment of the pre-financing, we did not respect the 7 days deadline in 5 cases. In view of this, we have now changed the internal circuit for the reception of signed contracts, reversing the order between operational and finance sections.

**Undue payment prevented by ex-ante controls. 0%.** KPI not relevant this year since most payments were mere pre-financings.

As a general comment, given the speed of action within a Trust Fund, one makes forecasts in January based on programmes that have not yet been adopted or passed through QRG. One can only estimate what might be the timing for such approval and forecast decisions, contracts and payments on that basis (quite often the time lead from formulation to payment is less than a year). But there is a high level of uncertainty for many of those assumptions. We have suggested to HQs that a risk factor can be introduced in our forecasts (as done in BPC) so that our forecasts reflect reality more accurately.

## SECTION 4 – MANAGEMENT AND INTERNAL CONTROL

### 4.1. Control results

#### 4.1.1. Control effectiveness as regards legality and regularity

##### 4.1.1.1. Results of ex-ante controls

Only pre-financing payments on grants have been executed in 2018 which explains the 0% of ineligible expenditure recorded ex-ante.

##### 4.1.1.2. Results of external audits

Most EUTF contracts having started their activities in 2018, no audit / expenditure verification missions has been performed yet which explains the 0% of ineligible expenditure identified by external audits.

#### 4.1.2. Fraud prevention, detection and correction<sup>74</sup>

---

<sup>74</sup> EU Trust Funds are included in the anti-fraud strategy of the DG of the Authorising Officer in charge.

None

#### **4.2. Observations and recommendations made by IAS/ECA**

None

#### **4.3. Assessment of the effectiveness of the internal control systems**

Internal controls have been performed daily when processing operations (ex-ante verification) and in fully accordance with rules and procedures in place. The financial circuits have been correctly applied and all tasks implemented according to priorities and deadlines. Regular project visits have identified some weaknesses / delays in the implementation process and corrective measures have been taken accordingly.

Projects have been implemented in conformity with the existing rules, procedures and instructions. Contractual deadlines, financial circuits, internal controls and impartiality have been fully respected. The resources and EUTF staff assigned to the activities have been used for their intended purpose and have ensured the regularity and the legality of the financial operations.

#### **4.4. Conclusions as regards assurance**

It is important to mention that in 2018 only pre-financings were paid, no financial/narrative reports have been delivered yet reporting on the relevance and results of the activities implemented, and no financial audits/expenditure verification missions has taken place. Therefore, since most contracts financed by the Trust Fund entered into force in 2018 we do not have enough elements to evaluate the financial performance of the on-going projects.

## SECTION 5 – ANNEXES

### Annex 1 – List of derogations, exceptions, non-compliance events, prior approvals and events to be reported.

| DEROGATIONS, EXCEPTIONS, NON-COMPLIANCE EVENTS, PRIOR APPROVALS, EVENTS TO BE REPORTED - YEAR 2018                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                 |                          |                                                                                                                                                                                           |                      |                   |                               |                                 |                             |                         |

## **SECTION 6 - DECLARATION OF ASSURANCE**

I, the undersigned,

Manager of the European Union Trust Fund for COLOMBIA.

In my capacity as authorising officer by sub-delegation

Declare that the information contained in this report gives a true and fair view<sup>75</sup>.

State that I have reasonable assurance that the resources assigned to the activities described in this report have been used for their intended purpose and in accordance with the principles of sound financial management, and that the control procedures put in place give the necessary guarantees concerning the legality and regularity of the underlying transactions.

This reasonable assurance is based on my own judgement and on the information at my disposal, such as the results of the self-assessment, ex-post controls, the opinion of the Internal Auditor on the state of control for years prior to the year of this declaration.

Confirm that I am not aware of anything not reported here which could harm the interests of the European Union Trust Fund for COLOMBIA.

**Bogotá 30 January 2019**

**Francisco GARCIA GARCIA  
(signed)**

---

<sup>75</sup> True and fair in this context means a reliable, complete and correct view on the state of affairs under the TF

## ANNEX 9: Evaluations and other studies finalised or cancelled during the year

| 7027             | Mapping on foundations                                                        |             | O - mapping | Mapping of networks of foundations working in development                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                | General Study | Mapping study update on the regional, continental and global Foundations                                                             |
| 9181             | Study on Joint Programming in conflict-affected and fragile states            |             | I           | The objective of the study is to identify lessons learned and opportunities to strengthen Joint Programming processes as part of wider efforts to increase the EU's efforts to address conflicts/crises and to support fragile countries through the Integrated Approach. This includes opportunities in different contexts across the conflict/crisis 'cycle' – in upstream early warning and prevention/preparedness settings; in crisis response and stabilisation settings; and longer-term peace-building and reconstruction efforts. A representative range of country cases will be examined, including Joint Programming in different conflict situations and cases where there is a conflict dimension but Joint Programming is not applied. Specific attention will be dedicated to the challenge of developing a joint response in the absence of a country-owned development strategy/priorities.       | EEAS and NEAR  | General Study | Joint Programming in Conflict -Affected and Fragile States : available on Capacity4Dev Joint Programming web page                    |
| 9197             | Joint Programming in More Advanced Developing and Middle-Income Countries     |             | I           | This study aims to demonstrate examples of how Joint Programming has included strategic issues such as migration, security, scientific innovation so far, and to give recommendations on how to improve the implementation of Joint Programming in Middle-income countries. The general objectives of the review are:<br>1. To showcase an inventory of experiences where JP is active in Middle-income countries.<br>2. Based on this inventory provide: (a) An assessment on whether JP is providing the basis for better coordination and coherence beyond development cooperation of the EU response in MICs and supporting transition to higher income levels; and (b) Information on lessons learned for Joint Programming practitioners about current experience in MICs and to reflect on what the data says about the potential role for Joint Programming in MICs and More Advanced Developing Countries. | EEAS and NEAR  | General Study | Joint Programming in More Advanced Developing and Middle-Income Countries : available on Capacity4Dev Joint Programming web page     |
| 9199             | Mapping Joint Programming's contribution to the Sustainable Development Goals |             | I           | It is timely to step up efforts to capture and map out how Joint Programming Documents to date are effectively contributing to the achievement of the SDGs. A previous study commissioned by EuropeAid's and the EEAS' Joint Programming teams on Joint Results frameworks, highlighted that SDG targets have not been well integrated into results frameworks, partly due to the fact that a number of existing results frameworks were developed before Agenda 2030 was agreed. In this new post-2015 context, it is time to acquire a more comprehensive picture of how the EU and Member States Joint Programming Documents are supporting the SDGs and where there are gaps. The present analysis will help understand what is – and what is not yet –                                                                                                                                                         | EEAS and NEAR  | General Study | Mapping Joint Programming's contribution to the Sustainable Development Goals : available on Capacity4Dev Joint Programming web page |

|                                           |                                                                                                             |             |        | happening with regard to SDG localization at country level, and use this information to identify further opportunities / proposals for going forward. Ultimately, related conclusions may serve as a basis for more active communication on how Joint Programming can promote the implementation of Agenda 2030.                                                                                                                                                                                                                                                                                                                                                              |                |               |                                                                                      |
| 9200                                      | Capturing Joint Programming and Joint Implementation Stories                                                |             | C      | There are 26 countries where there is a finalised or almost finalised Joint Programming Document. A minimum of 10 stories on Joint Programming and 10 stories on Joint Implementation are to be captured to showcase good practice and the impact that the Joint Programming process has had on the work of the European partners at country level. Some countries will be the source of more than 2 stories. In this context the various stories can be prepared to showcase different aspects of the experiences of working together better with Member States including possibly drilling down to a specific sector framed by the country level Joint Programming process. |                | General Study | Internal stories 'case studies' : to be reformatted for web use                      |

# ANNEX 11: Analysis of DG DEVCO Key Performance Indicators (KPI) for 2018

## I – Introduction

KPIs are at the basis of the assurance provided by the Heads of Delegations and by DEVCO Directors in their External Assistance Management Reports.

They feed directly into the Annual Activity Report of DG DEVCO, supporting the Declaration of Assurance of the Director-General.

KPIs are also used by DG DEVCO as a management tool. They identify targets or benchmarks on key issues of financial management, audits and controls. An analysis of KPI's results versus targets is regularly presented to Management and a follow-up is ensured by the concerned services at Headquarters and the EU Delegations through the established action plans and regular review of progress made.

The purpose of this report is to present the results of DEVCO<sup>76</sup> KPIs on 31/12/2018 for 86 "EAMR Delegations" implementing projects as per Budget devolution and 42 HQ units managing projects or financial transactions centrally and to decide on necessary actions.

The main variances compared to the annual benchmarks are highlighted. Correlations between KPIs and constraints that may have a negative impact are examined. KPI values are based on the data as registered in the systems (ABAC, CRIS, Audits, BPC) on 31/12/2018. They are presented in the frozen version of the [KPI Dashboard](#).

The report includes a detailed analysis of 2018 performance on projects implementation and results (KPI-6 and KPI-7).

A KPI definition and benchmark overview is available at the very end of this Annex.

---

<sup>76</sup> DEVCO KPIs only cover transactions for which the Director General of DG DEVCO is the Authorising Officer by Delegation. Transactions made in the framework of the cross-sub-delegation made by DEVCO to other DGs (including DG NEAR) are not covered by the report.

## II - Executive Summary

Key Performance Indicators (KPI) are grouped in three categories: sound financial management, effectiveness of the internal control systems, and effectiveness of the audit system. DEVCO KPI results assessed against benchmarks are presented as “traffic lights” in the table below.

| KPI Name                                                                |                                                                                           | KPI result   | Annual Target/Benchmark     |
|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|--------------|-----------------------------|
| <b>A - Sound financial management and effective use of EC Resources</b> |                                                                                           |              |                             |

<sup>77</sup> The former Internal Control Standards KPIs (formerly six KPIs) have been reformulated in line with the new Internal Control Framework which entered into force in 2018.

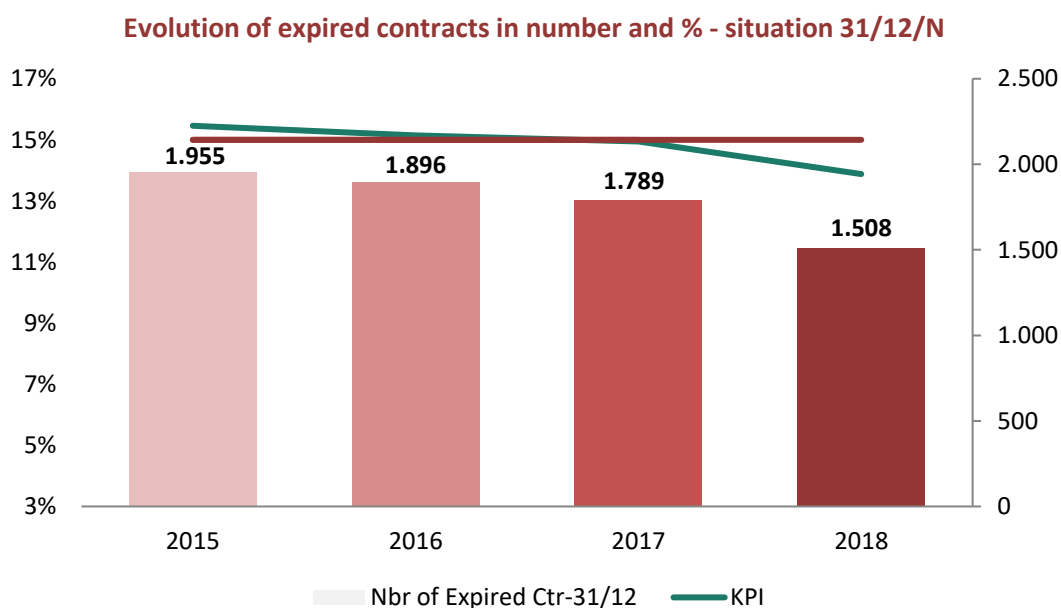

## Results at global level:

At global level, the performance of DG DEVCO remains very good with 22<sup>78</sup> out of 25 KPIs in line with the benchmarks compared with 24 out of 25 KPIs in 2017:

- 11 green out of 13 KPIs in the category "Sound financial management and effective use of EC resources";
- 7 green out of 8 KPIs in the category "Effectiveness of Internal Control System";
- All green KPIs out of 4 KPIs in the category "Effectiveness of the Audit System".

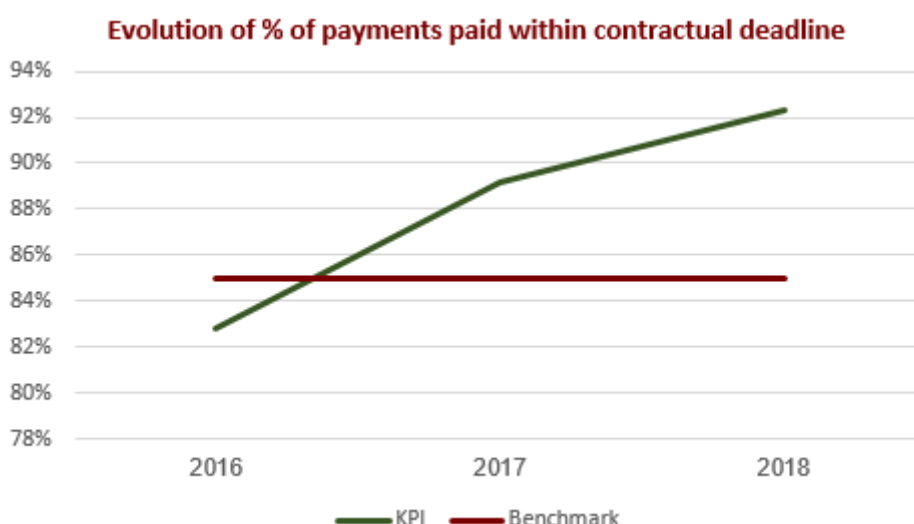

In addition, the results for 14 out of 25 KPIs further improved in 2018 compared with 2017:

- Accuracy of initial annual financial forecast for payments: 103.51% in 2018 vs 101.63% in 2017.
- RAL absorption period: 3.61 years in 2018 vs 3.7 years in 2017.
- Reduction of old pre-financing: 43.79% in 2018 vs 37.6% in 2017. In 2018, DEVCO has reduced the amount of old pre-financing by EUR 1,343 million.
- Expired contracts as a % of the contract portfolio: 13.88% in 2018 vs 14.95% in 2017. The evolution in terms of KPI and number of expired contracts since 2014 is presented below.

- Reduction of old RAL: 39.71% in 2018 vs 38.49% in 2017. The Old RAL's reduction rate (39.7%) continues to be above the target (25%) and demonstrates that DG DEVCO is following up closely the old RAL.
- % of payments made within contractual deadlines: 92.34% in 2018 vs 89.1% in 2017. This is in line with the EC results (92.9%) and reflects the efforts done by DEVCO during the last three years to reduce the payments period. The graph below shows the evolution of payments made within the contractual deadline in percentage.

<sup>78</sup> Result for KPI 2 (accuracy of initial financial forecasts for contracts) is slightly above the upper limit of the threshold (111% vs 110%) but can still be considered as in line with the target defined for 2018.

- % of invoices registered within 7 days: 92.55% in 2018 vs 89.51% in 2017.
- Undue payment prevented by ex-ante controls: 3.28% in 2018 vs 2.07% in 2017.
- % contractualisation of the annual audit plan: year N: 78.09% in 2018 vs 71.43% in 2017.
- % implementation of the annual audit plan: year N-1: 81.08% in 2018 vs 76.64% in 2017.
- Ineligible amounts identified by audits as a % of the audited amount: 5.05% in 2018 vs 4.66% in 2017.

However, benchmarks were not achieved for the following 3 KPIs:

- KPI 3: Accuracy of initial financial forecasts for decisions: 116.98% in 2018 vs 106.73% in 2017.
- KPI 13: Respect of the flexibility arrangements for the use of staff in Delegations: 96.51% and three Delegations (Kenya, Lesotho & Malawi) have declared in their EAMR that they did not fully respect the flexibility arrangements for the use of staff in Delegations.
- KPI 20: Contractualisation of projects evaluation foreseen in the annual project evaluation plan: 63.20% in 2018 vs 80.94% in 2017.

### Results at Delegation level:

Very good results have been achieved at Delegation level with 98% of Delegations meeting the targets for more than 60% of the KPIs and 73% of Delegations meeting the targets for more than 80% of the KPIs in 2018:

| % of green KPIs   | 2017               |     | 2018               |      |
|-------------------|--------------------|-----|--------------------|------|
|                   | Nbr of Delegations | %   | Nbr of Delegations | %    |
| Total Delegations | 86                 |     | 86                 |      |
| 80% and more      | 55                 | 64% | 63                 | 73%▲ |
| 60% and more      | 82                 | 95% | 84                 | 98%▲ |
| Less than 50%     | 0                  | 0%  | 0                  | 0%   |

As a result of the action plans implemented during the year, all 4 Delegations that were at risk in 2017 (Eritrea, Mauritania, South Sudan and Yemen) have achieved the benchmark of 60% green KPIs in 2018.

Only 2 Delegations (Sudan and Swaziland) did not reach the 60% benchmark in 2018.

| Overall Green KPI Result for | 2017 | 2018 |
|------------------------------|------|------|
| Eritrea                      | 58%  | 63%  |
| Mauritania                   | 58%  | 79%  |
| South Sudan                  | 50%  | 68%  |
| Sudan                        | 67%  | 54%  |
| Swaziland                    | 83%  | 50%  |
| Yemen                        | 50%  | 65%  |

### Priorities for 2019

- Particular attention will be given to the accuracy of financial forecasts (KPIs 1-3) especially for EDF and EU Trust Funds. Risk weighting should not be overestimated as it could lead to systematic overpassing of the targets set for those KPIs.
- Planning of evaluations and monitoring of KPI 20 on contracted project evaluations will be enhanced in 2019, in order to achieve a better result on this KPI at the end of the year.
- Delegations will be reminded of the correct application of flexibility rules regarding the use of staff in Delegations (KPI 13) and of the obligation to obtain the prior agreement of the Director in case an exception seems to be required (see DEVCO Companion Chapter 8.5) as well as on the importance of regular field visits by Delegation staff (KPI 19).

## III. Detailed Analysis

### A) Results at KPI level

#### KPI 1 – Accuracy of initial annual financial forecast for payments

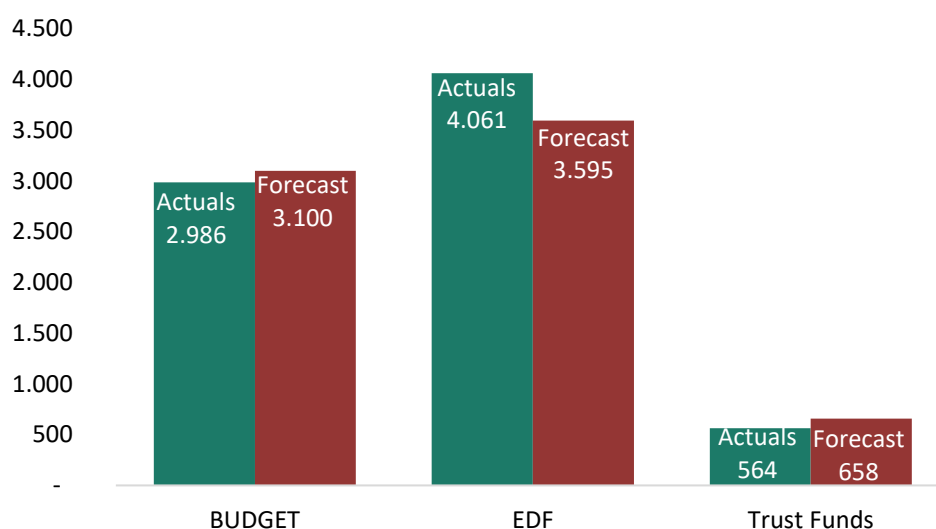

DEVCO achieved an accuracy rate of 103.51% of its financial forecast for payments for 2018 in line with the benchmark range of [90-110%]. EUR 7,612 million was paid compared to the forecasted amount of EUR 7,354 million.

| 103.51% <sup>▲</sup>          | DEVCO A | DEVCO B | DEVCO C | DEVCO D  | DG 02  | DIR BCR | DEVCO E | DEVCO F  | DEVCO G | DEVCO R | Total    |

#### Results by fund source:

Payment forecasts for the General Budget are highly reliable with an accuracy rate of 96%. More efforts should be made in order to improve the predictability of payments for EDF and EU Trust Funds that achieved accuracy rates of 113% and 86% respectively.

### Payments forecasts by fund source - 2018 (in EUR million)

Detailed results for each EU Trust Fund are presented below:

- for the TF Africa, the ratio of payments versus forecast is EUR 489 million: EUR 569 million (85.81%).
- for the TF Bekou, the ratio of payments versus forecast is EUR 57 million: EUR 66 million (85.82%).
- for the TF Columbia, the ratio of payments versus forecast is EUR 18 million: EUR 22 million (83.99%).

### KPI 2 – Accuracy of initial annual financial forecast for contracts

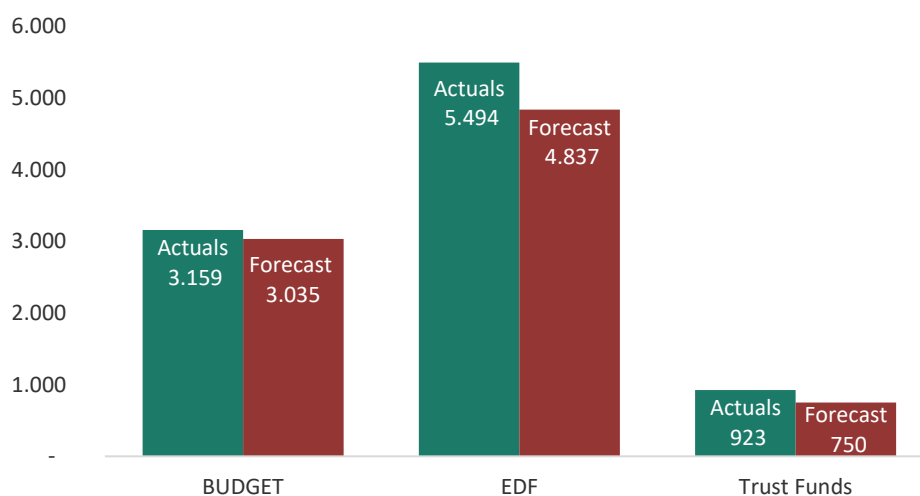

DEVCO achieved an accuracy rate of 111.08% of its financial forecast for contracts just above the upper limit of the benchmark range of [90-110%]. The volume of contracts is EUR 9,577 million compared to the forecasted amount of EUR 8,622 million.

| 111.08%▼                      | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 02  | DIR BCR | DEVCO E | DEVCO F | DEVCO G | DEVCO R | Total   |

### Results by fund source:

Contracts forecasts for the General Budget are highly reliable with an accuracy rate of 104%. More efforts should be made in order to improve the predictability of contracts signed for EDF and EU Trust Funds that achieved accuracy rates of 113% and 123% respectively.

### Contracts forecasts by fund source - 2018 (in EUR million)

On EDF, Managing Entities exceeding the forecasts by the largest amounts are: DEVCO D01 (EUR 496 million), DEVCO D02 (EUR 127 million), DEVCO B04 (EUR 113 million), DEVCO D03 (EUR 90 million), Fiji (EUR 83 million), Sierra Leone (EUR 46 million) and Guyana (EUR 33 million).

Detailed results for each EU Trust Fund are presented below:

- for the TF Africa, the ratio contracted versus forecast is EUR 804 million : EUR 617 million (130.37%).
- for the TF Bekou, the ratio contracted versus forecast is EUR 83 million : EUR 71 million (116.92%).
- for the TF Columbia, the ratio contracted versus forecast is EUR 37 million : EUR 62 million (58.79%).

### KPI 3 – Accuracy of initial annual financial forecast for decisions

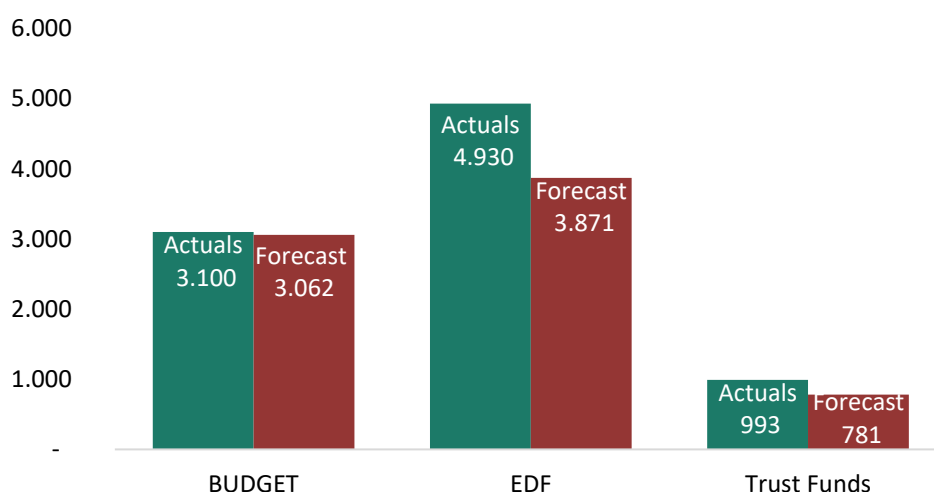

The total decided amount at the end of 2018 was EUR 9,023 million which represents 116.98% of the initial forecasted amount (EUR 7,713 million).

| 116.98%▼                      | DEVCO A | DEVCO B  | DEVCO C | DEVCO D  | DG 02  | DIR BCR | DEVCO E | DEVCO F  | DEVCO G | DEVCO R | Total    |

| Variance<br>(in EUR million)  | 19.65   | 211.64   | 6.08    | 797.60   | -3.39  | 25.46   | 128.59  | -6.40    | 126.07  | 4.14    | 1,309.44 |

### Results by fund source:

Decisions forecasts for the General Budget are highly reliable with an accuracy rate of 101%. More efforts should be made in order to enhance the predictability of new decisions for EDF and EU Trust Funds for which decided amounts have largely exceeded the benchmark (127% vs benchmark of [90-110%]).

### Decisions forecasts by fund source - 2018 (in EUR million)

Detailed results for each EU Trust Fund are presented below:

- for the TF Africa, the ratio decided versus forecast is EUR 929 million : EUR 705 million (131.67%).
- for the TF Bekou, the ratio decided versus forecast is EUR 57 million : EUR 70 million (81.97%).
- for the TF Columbia, the ratio decided versus forecast is EUR 7 million : EUR 6 million (131.18%).

### KPI 4 – RAL Absorption period

The implementation of External Aid projects takes several years. This period of implementation is calculated by dividing the RAL amount at the end of the reporting year by the total amount of payment made during the year. The global result for DEVCO by the end of 2018 is 3.61 years. This result has improved compared to 2017 (3.7 years), since the amount of payments in 2018 was higher.

The RAL absorption period is a snapshot of the situation of each Delegation at the end of the year. At Delegation level, the Delegations' highest and lowest absorption periods are presented in the tables below:

| TOP 10 Delegations  | KPI result |
|---------------------|------------|
| Eritrea ER          | 0.85       |
| Yemen YE            | 1.74       |
| Mexico MX           | 1.89       |
| Kazakhstan KZ       | 1.9        |
| Afghanistan AF      | 2          |
| Colombia CO         | 2.09       |
| Jamaica JM          | 2.09       |
| Tadzhikistan TJ     | 2.17       |
| Union Africaine OUA | 2.39       |
| Zimbabwe ZW         | 2.49       |

| BOTTOM 10 Delegations | KPI result |
|-----------------------|------------|
| Gabon GA              | 11.12      |
| Zambia ZM             | 9.79       |
| Uganda UG             | 8.77       |
| Myanmar MM            | 7.4        |
| Bangladesh BD         | 7.24       |
| Madagascar MG         | 6.84       |
| Indonesia ID          | 6.54       |
| Lesotho LS            | 6.52       |
| Mozambique MZ         | 6.49       |
| Senegal SN            | 6.35       |

RAL absorption period can be exceptionally high at one point in time as a result of a combination of high financial amounts committed during the year (as a result of an emergency for example) and low level of payment during the reporting year. In these

cases, the RAL absorption period will quickly improve as the amount of payments will increase.

### **KPI 5 – Time to grant**

This new KPI measures the respect of the 90 days period for signing grant contracts as from the date of the note informing the successful applicants (Article 128 of the Financial Regulation). This KPI covers grants signed under Direct Management following the publication of a call for proposals in PROSPECT.

The global result for DEVCO is 60.8 days for a total of 295 grants<sup>79</sup> signed in 2018.

| 60.8                      | DEVCO B | DEVCO D | DEVCO E | DEVCO F | DEVCO G | Total  |
|---------------------------|---------|---------|---------|---------|---------|--------|
| KPI Value                 | 93,71   | 59,54   | 57,01   | 69,76   | 56,79   | 60,8   |
| Grants                    | 7       | 76      | 67      | 54      | 91      | 295    |
| Days taken to sign grants | 656     | 4.525   | 3.820   | 3.767   | 5.168   | 17.936 |

KPI results at Delegation level are presented in the tables below:

| TOP 10 Delegations and HQ Units | Total Days | Grants | KPI result | BOTTOM 10 Delegations and HQ Units | Total Days | Grants | KPI result |
|---------------------------------|------------|--------|------------|------------------------------------|------------|--------|------------|

### **KPI 6 – % of projects with red traffic light for implementation progress**

The traffic light is computed based on the following question: What is the expected level of scheduled resources the project will be able to use before the end of the project (< 75%: red / 75% - 90%: orange / > 90%, green)?

This year's result for share of projects with red traffic lights looks as follows:

| KPI 6 result | Annual Target/Benchmark |                                       |
|--------------|-------------------------|---------------------------------------|
| 2.95% ▼      | Max 10%                 | No of projects with red traffic light |

A share of 2.95% of projects received a red traffic light for implementation progress. This is below the benchmark of 10% and represents a decrease compared to last year by 0.36 percentage points. In terms of the corresponding financial amount, this translates into 1.6% of the overall project budget – a decline in the share compared to last year where the share corresponded to 3.3%.

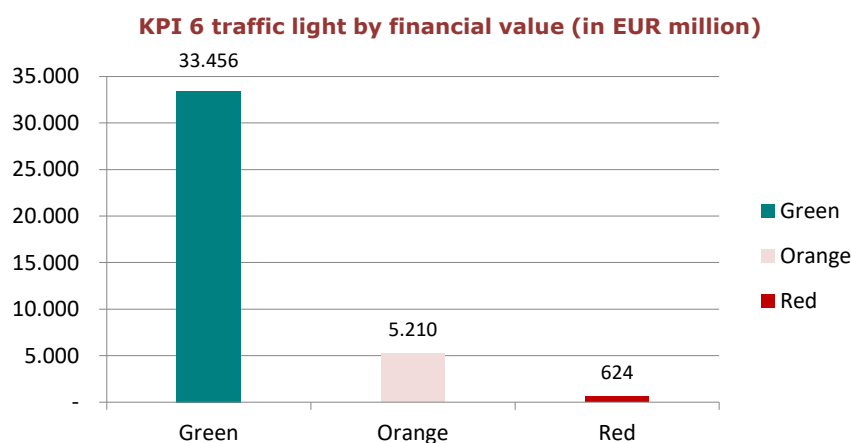

<sup>79</sup> Contracts linked to Reserve List applications are excluded from the KPI's population

## Distribution of KPI 6 traffic lights by directorate

| Directorate  |                      | Orange             | Red               | Total (G+O+R)         |
|--------------|----------------------|--------------------|-------------------|-----------------------|
| DEVCO A      | 17 (89.5%)           | 2 (10.5%)          | 0 (0.0%)          | 19                    |
| DEVCO B      | 318 (94.4%)          | 17 (5.0%)          | 2 (0.6%)          | 337                   |
| DEVCO C      | 198 (96.1%)          | 5 (2.4%)           | 3 (1.5%)          | 206                   |

| DEVCO E      | 654 (87.3%)          | 73 (9.7%)          | 22 (2.9%)         | 749                   |
| DEVCO F      | 806 (88.0%)          | 87 (9.5%)          | 23 (2.5%)         | 916                   |
| DEVCO G      | 609 (85.2%)          | 82 (11.5%)         | 24 (3.4%)         | 715                   |
| Task Force   | 4 (100.0%)           | 0 (0.0%)           | 0 (0.0%)          | 4                     |
| <b>Total</b> | <b>3,792 (86.8%)</b> | <b>448 (10.3%)</b> | <b>129 (3.0%)</b> | <b>4,369 (100.0%)</b> |

## Distribution KPI 6 traffic light by financial value

|                                          | Green  | Orange | Red | Total (G+O+R) |
|------------------------------------------|--------|--------|-----|---------------|
| Project financial value (In EUR million) | 33,456 | 5,210  | 624 | 39,291        |

## KPI 7 – % of projects with red traffic light for achieving results

The traffic light is computed based on the following two questions for each project:

7.1. *What is the likely level that the projects will achieve in terms of output targets (< 75%, red; 75% - 90%, orange; > 90%, green)?*

7.2. *What are the risks that - regardless of outputs achieved - the outcomes of the project will not be achieved (high: red/ medium: orange/ low: green)?*

The traffic light is awarded based on the worst-scoring of the two above questions.

| KPI 7 result | Annual Target/Benchmark |                                       |
|--------------|-------------------------|---------------------------------------|
| 3.8% ▼       | Max 10%                 | No of projects with red traffic light |

A share of 3.8% of projects received a red traffic light for achieving results. This represents a decrease of 0.5 percentage points since last year and is below the benchmark of 10%. In terms of the corresponding financial amount, this translates into 3.2% of the overall project budget, slightly lower than last year (3.9%) - see the table

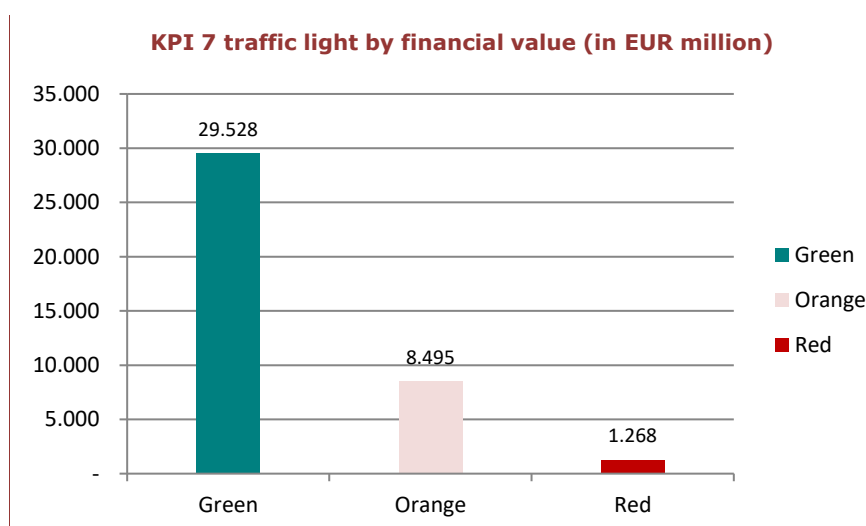

below.

### Distribution of KPI 7 traffic lights by directorate

| Directorate  | Green                | Orange             | Red               | Total (G+O+R) |
|--------------|----------------------|--------------------|-------------------|---------------|

### Distribution of KPI 7 traffic light by financial value

|                                       | Green         | Orange       | Red          | Total (G+O+R) |
|---------------------------------------|---------------|--------------|--------------|---------------|
| <b>Project Value (in EUR million)</b> | <b>29,528</b> | <b>8,495</b> | <b>1,268</b> | <b>39,291</b> |

### Analysis of KPI 6 and 7 - Problematic projects

A project is defined as problematic if one amongst KPI-6 and KPI-7 is orange or red.

KPI-6 and KPI-7 are forward looking as they assess the probability to fully use the project resources and to reach the expected level of outputs and outcomes at the end of the projects. Orange or red traffic lights call for attention and indicate the need for corrective actions.

A project can be given an orange traffic light even if it is on schedule, if a risk remains. On the other hand, a project behind schedule may be given a green traffic light if constraints or issues have been solved and the project will now continue at full speed and make up for delays.

Out of 4,369 projects reported upon in the EAMR, 3,357 (76.8%) received a green traffic light on both KPI-6 and KPI-7 and are therefore not considered problematic. This relates

to a total value of EUR 28,961 million (73.7% of total financial value).

Conversely, 825 (18.9%) projects were flagged orange on KPI-6 and/or KPI-7, representing EUR 8,892 million (26.3% of total financial value).

Particularly, 187 (4.3%) projects were flagged red with a total EUR 1,438 million (3.7% of total financial value). In financial terms, this represents a decrease by 0.6 percentage points compared to last year.

|                                       | Green             | Problematic (Orange + Red) | Total (G+O+R)            |
|---------------------------------------|-------------------|----------------------------|--------------------------|
| <b>Nb projects</b>                    | 3,357<br>(76.8%)  | 1,012<br>(23.2%)           | <b>4,369<br/>(100%)</b>  |
| <b>Project Value (in EUR million)</b> | 28,961<br>(73.7%) | 10,330<br>(26.3%)          | <b>39,291<br/>(100%)</b> |

### Performance results per EU Delegation/DEVCO HQ unit

Top 10 Delegations/DEVCO HQ Units with the highest share of green projects in the portfolio in terms of financial value are reported below:

| Delegation/DEVCO HQ unit | Green projects in EUR | Total value of portfolio EUR | % of green projects value of total value |
|--------------------------|-----------------------|------------------------------|------------------------------------------|
| DEVCO B 02               | 549,460               | 549,460                      | 100%                                     |

## Problems and corrective measures

### Types of problems or risks encountered in 2018

To strengthen corporate reporting, EU Delegations and DEVCO HQ Units are requested to select main types of problems encountered for projects flagged orange or red (1,012) and to specify which corrective measures are being undertaken – choosing from a predetermined menu of options.

Multiple problem and/or corrective measures can be selected for a project. In the table below, problem types and related occurrence are reported.

| Problem typology                                                                                 | Problematic projects (Orange or Red)<br>% total occurrences |
|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| Low capacity/performance of implementing partner/T.A./beneficiaries (absorption/procedures)      | 27% (552)                                                   |
| Procurement issues/delays (calls for tender/proposals/other)                                     | 14% (287)                                                   |
| Political or economic instability or general/sector policy issues                                | 12% (250)                                                   |
| Low interest/commitment of stakeholders - insufficient coordination among stakeholder            | 11% (220)                                                   |
| Blocking conditions (e.g. awaiting voting of a law, an administrative reform, a resettlement...) | 7% (151)                                                    |
| Insecurity/unrest                                                                                | 7% (139)                                                    |
| OTHER                                                                                            | 6% (121)                                                    |

| Problem typology                                                                   | Problematic projects (Orange or Red) |
|------------------------------------------------------------------------------------|--------------------------------------|
|                                                                                    | % total occurrences                  |
| Substantial flaws in the intervention logic in assumptions                         | 5% (93)                              |
| Insufficient co-financing/staff contribution by Government or partner organisation | 4% (85)                              |
| Substantial flaws in the intervention logic in risk assessment                     | 3% (58)                              |
| Fiduciary risk (corruption, fraud...)                                              | 2% (37)                              |
| Natural disaster/hazard                                                            | 1% (25)                              |

The more frequent problem occurring in almost one third of the cases is the *low perceived capacity of the implementing partner*. Delays due to procedural issues and procurement of goods and services are the second most frequent problem, followed by political instability.

### Types of corrective measures applied in 2018

| Corrective measure                                                              | Problematic (Orange or Red) |                     |
|---------------------------------------------------------------------------------|-----------------------------|---------------------|
|                                                                                 | Count                       | % total occurrences |
| Moderate adaptation of activities/budget reallocation                           | 340                         | 18%                 |
| Increased monitoring (internal/ROM/MTR) - increased fiduciary control mechanism | 340                         | 18%                 |
| Extension of project anticipated (this year or in later years)                  | 335                         | 18%                 |
| Intensified political dialogue and/or donor coordination                        | 310                         | 16%                 |
| Changes in implementation/contractual arrangements                              | 152                         | 8%                  |
| Suspension or termination of project                                            | 137                         | 7%                  |
| OTHER                                                                           | 83                          | 4%                  |
| No new significant corrective measures required/planned                         | 77                          | 4%                  |
| Security risk mitigation measures impacting on performance                      | 58                          | 3%                  |

Adaptation of activities and budget is the main countermeasure being applied, together with project extension and increased monitoring. This is followed by intensified political dialogue or donor coordination. Though linking problems and corrective measures is more meaningful at project level, these figures seem to suggest that low capacity amongst partners is dealt with readjusting the scope and duration of the projects, engaging more in internal monitoring as well increasing dialogue at political level with partner countries and other stakeholders.

### Evolution of project flagging from 2017 to 2018

The large majority of projects were and still are flagged as green (2,198). Improvements were made for 342 projects, out of which the large majority managed to reach a satisfactory score (green). Conversely, a total of 386 projects overall worsened their performance compared to the previous year – mostly being scored as orange. In this context, it is important to stress the relevance of continuous monitoring at all levels as well as the provision of specific support – as the one provided through the ROM system – to EU operational managers in order to timely detect problems and identify corrective measures.

| Flag 2017                                   | Flag 2018 | Comparison | Number |
|---------------------------------------------|-----------|------------|--------|
| Green                                       | Green     | =          | 2,198  |
| Orange                                      | Green     | ▲          | 291    |

| Red                                         | Red       | =          | 72     |
| Total (G+O+R) appearing in 2017 + 2018 EAMR |           |            | 3,322  |

### KPI 8 – Reduction of old pre-financing

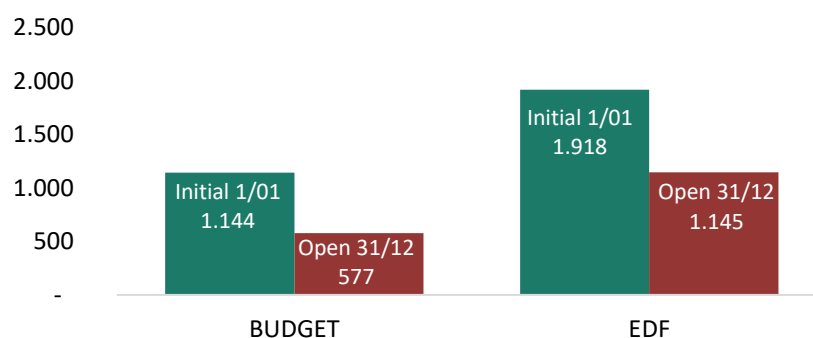

Old pre-financing was reduced by 43.79% or EUR 1,343 million in 2018 and currently is EUR 1,724 million. This result is above the benchmark (reduction by 25%).

*The old pre-financing amount at the end of 2018 represents 15% of the total pre-financing open in DEVCO (EUR 11,707 million).*

| 43.79% <sup>▲</sup>                           | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 02   | DIR BCR | DEVCO E | DEVCO F | DEVCO G | DEVCO R | Total  |
|-----------------------------------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|--------|
| KPI Value                                     | 16.19%  | 63.81%  | 13.98%  | 56.44%  | 100.00% | 38.69%  | 45.11%  | 50.28%  | 47.25%  | 100.00% | 43.79% |
| Old pre-financing 31/12/2018 (in EUR million) | 36      | 81      | 603     | 415     | 0       | 4       | 186     | 213     | 181     | 0       | 1,724  |
| Reduction in amounts (in EUR million)         | 7       | 142     | 98      | 538     | 1       | 3       | 153     | 216     | 162     | 23      | 1,343  |

At the end of 2018, 34% of old pre-financing relates to EU BUDGET and 66% to EDF; this difference is explained by an initial open pre-financing amount twice higher<sup>80</sup> for the latter (i.e.: EUR 1.9 billion for EDF and EUR 1.1 billion for the EU BUDGET) combined with a higher reduction rate for the EU BUDGET (49% vs 40%). Delegations account for 53% of the total reduction of the old pre-financing amount.

### Old pre-financing reduction in 2018 by fund source - (in EUR million)

<sup>80</sup> With the same effect than in 2017, the increase of the old pre-financing amount in 2018 is explained by the opening of the 11<sup>th</sup> EDF in 2015 with the commitment of many new contracts and the payment of related pre-financings.

At Delegation<sup>81</sup> level, Nigeria and Ethiopia have the largest open amounts with EUR 55 million and EUR 45 million respectively. The table below shows the Delegations having the biggest amounts of old open pre-financing.

| Delegation | Open amount (in EUR million) | KPI    |
|------------|------------------------------|--------|
| Nigeria    | 55.58                        | 64.84% |
| Ethiopia   | 47.78                        | 61.48% |
| Fiji       | 43.05                        | 37.54% |
| Nicaragua  | 34.63                        | 46.03% |
| Uganda     | 29.52                        | 21.24% |
| Cameroon   | 26.66                        | 26.25% |
| Bangladesh | 26.60                        | 38.36% |
| Malawi     | 24.95                        | 25.06% |
| Mali       | 24.48                        | 48.42% |
| Yemen      | 23.86                        | 52.89% |

Top 10 Delegations for this KPI are: Benin(98.55%), Gambia(95.32%), Guinea-Bissau(88.24%), Guinea Conakry(87.84%), Paraguay(87.57%), Laos(86.73%), Sierra Leone(84.26%), Myanmar(82.63%) and Ghana(79.52%).

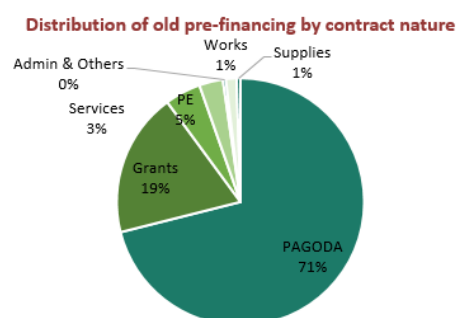

Sudan(22.34%) and Uganda(21.24%.) are the only Delegations that did not manage to clear at least 25% of their backlog of old pre-financing.

DEVCO has followed-up the Legal Entities associated with the largest old pre-financing amount at the beginning of 2018. The old pre-financing reduced by the largest amount was the one associated with the World Bank (EUR 220 million) in 2018. The table below shows the follow up of these Legal Entities.

| follow up on Legal Entities having largest old pre-financing amount (in EUR million) |                  |              |                                     |                                        |
|--------------------------------------------------------------------------------------|------------------|--------------|-------------------------------------|----------------------------------------|
| Legal Entity                                                                         | Initial 1/1/2018 | Q4 2018      | Cleared and/or recovered in Q4-2018 | Total Cleared and/or recovered in 2018 |

<sup>81</sup> The 10 lowest ranking Delegations in terms of KPI achievement are : Djibouti, Rwanda, Guyana, Botswana, Benin, Ghana, Afghanistan, Sri Lanka, Sierra Leone and Uganda

Old pre-financing amounts mostly relate to Delegated Cooperation with International Organisations and Member States Agencies<sup>82</sup> (71%) followed by grants (19%). International Organisations alone make up 42% or EUR 817 million.

During the second half of 2018, DEVCO has launched the annual Accounting and Data Quality campaign requesting feedback on commitments with old open pre-financing amounts greater than or equal to EUR 100,000. The campaign encourages, monitors and supports the activities linked to the clearing of the old open pre-financings.

### **KPI 9 - Expired contracts as a % of the contract portfolio**

At the end of the year, 1,508 contracts or 13.88% of the total number of open contracts (10,862) were expired – this represents 281 expired contracts less than in 2017 (KPI: 14.95%). In contract numbers, EDF makes up 60% of expired contracts and Budget 40%. In terms of amounts, 76% of the "expired contracted amount" belongs to EDF (EUR 3,210 million) and 24% to Budget (EUR 1,028 million). This is explained by the EDF Average Contract Size which is 1.8 times higher than Budget contracts. Expired contracts represent 10.26% (EUR 4,239 million) out of total contracted amounts (EUR 41,312 million).

*On 31/12/2018, DEVCO managed 11,995 contracts with an average contract size of EUR 3.7 million. Out of the total number of contracts, HQ manages 17% and Delegations 83%. In terms of amounts, HQ manages 32% and Delegations 68%. The average contract size in HQ is EUR 6.8 million and the average contract size in Delegations is EUR 3.1million.*

The graph below shows the Expired contracts KPI on split Budget versus EDF.

<sup>82</sup> PAGODA contracts have the biggest share (45%) of the total open contracted amount and 57% of the total open pre-financing amount. Moreover, PAGODA's contractual specific conditions allow 1st pre-financing instalment to go up to 100% of the Commission's part of the forecast budget for the subsequent 12- month period. For grants, the amount of the pre-financing is always limited to 80% up to 95%. Moreover, progress reports received by the Commission in the framework of Standard Contribution Agreements (SCA) signed under the previous financial regulation did not always include necessary information for defining the amount of eligible costs and allowing for the clearing of previous pre-financing(s). Clearing should therefore be done on case by case basis, depending on the quality and content of the supporting documents provided by the Organisations.

### Expired contracts in 2018 - BUDGET vs EDF

The table below lists the 10 Delegations and HQ units with the highest number of expired contracts. These Managing Entities hold 42% of all DEVCO expired contracts.

| Delegation/HQ Unit                | Expired    | KPI result | RAL (in EUR million) |
|-----------------------------------|------------|------------|----------------------|
| Central African Republic CF       | 120        | 47.81%     | 11.18                |
| Congo (Democratic Republic of) CD | 84         | 26.50%     | 11.11                |
| Barbados BB                       | 70         | 37.84%     | 5.82                 |
| Chad TD                           | 67         | 30.59%     | 6.37                 |
| Nigeria NG                        | 65         | 22.65%     | 26.57                |
| Sudan SD                          | 58         | 39.73%     | 3.31                 |
| Haiti HT                          | 56         | 28.14%     | 16.92                |
| Fiji FJ                           | 47         | 26.70%     | 6.59                 |
| Madagascar MG                     | 43         | 15.47%     | 6.67                 |
| DEVCO B 01                        | 30         | 18.63%     | 2.20                 |
| <b>Total</b>                      | <b>640</b> |            | <b>96.75</b>         |

The lowest-ranking Managing Entities for this KPI are presented in the table below.

| Delegations/HQ Unit         | Expired    | KPI result | RAL (in EUR million) |
|-----------------------------|------------|------------|----------------------|
| Central African Republic CF | 120        | 47.81%     | 11.18                |
| Sudan SD                    | 58         | 39.73%     | 3.31                 |
| Barbados BB                 | 70         | 37.84%     | 5.82                 |

| Fiji FJ                     | 47         | 26.70%     | 6.59                 |
| Congo (DRC)                 | 84         | 26.50%     | 11.11                |
| <b>Total</b>                | <b>540</b> |            | <b>70.32</b>         |

In addition to PAR (Potential Abnormal RAL) exercise that always contributes to reduce BUDGET expired contracts, DEVCO has launched Data Quality actions to help reducing the amount of expired contracts and in particular the 8<sup>th</sup>, 9<sup>th</sup> and 10<sup>th</sup> EDF contracts' closure campaign. In 2018, DEVCO closed 13 out of the 28 remaining 8<sup>th</sup> EDF contracts, 94 out of the remaining 321 9<sup>th</sup> EDF contracts, and 812 out of the 3635 remaining 10<sup>th</sup> EDF contracts.

The table below contains the Delegation and HQ Units with the remaining ongoing 8<sup>th</sup> EDF contracts.

| Managing Entity          | Nbr of Open 8 <sup>th</sup> EDF Contracts |
|--------------------------|-------------------------------------------|
| Haiti                    | 3                                         |
| Barbados                 | 2                                         |
| Gabon                    | 2                                         |
| Burkina Faso             | 1                                         |
| Central African Republic | 1                                         |

### **KPI 10 – Reduction of Old RAL**

DEVCO has reduced its old RAL amount by 39.71% at the end of 2018 well above the yearly target of an annual reduction of 25%. The graph below shows the evolution of old RAL in amounts and in percentage.

**Evolution of old RAL reduction in amounts(in EUR million) and % - situation 31/12/N**

| 39.71% <sup>▲</sup>                            | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 02   | DIR BCR | DEVCO E | DEVCO F | DEVCO G | DEVCO R | Total  |
|------------------------------------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|--------|
| KPI Value                                      | -41.33% | 49.06%  | 31.01%  | 33.34%  | -25.29% | -17.19% | 43.33%  | 55.61%  | 44.10%  | 96.98%  | 39.71% |
| Reduction achieved in amounts (in EUR million) | -5.72   | 25.63   | 20.50   | 178.33  | -0.19   | -1.02   | 114.56  | 123.58  | 69.26   | 0.08    | 525    |
| Old RAL remaining 31/12/2018 (in EUR million)  | 19.57   | 26.61   | 45.62   | 356.56  | 0.92    | 6.98    | 149.80  | 98.65   | 87.78   | 0       | 792.50 |

At the end of the year, 70% of the old RAL amount refers to EDF and 30% to Budget. HQ A01 and HQ R01 have cleared 100% of the old RAL in 2018. HQ F01 (90%) and F02 (95%) have cleared the highest amount of old RAL in 2018. HQ D 03 (-13.48%) and HQ A 05(-42.81%) have the highest amount of old RAL in HQ. Tables below show the top 10 HQs in terms of: KPI 10 result, cleared old RAL amount, and old RAL amount at the end of 2018.

| TOP HQ  | KPI result | Cleared amount (in EUR million) |
|---------|------------|---------------------------------|
| HQ-A 01 | 100%       | 0.26                            |

| HQ-B 01  | 6.40                                |
| HQ-G 02  | 5.85                                |
| HQ-DG 03 | 5.75                                |

With the highest old RAL in the headquarters, HQ-D 03 and HQ-A 05 did not manage to reduce 25% of their old RAL amount.

The following tables show that despite their positive results and the large amounts cleared, some Delegations (ie: Central African Republic, Haiti, Nigeria and Mali) still have to intensify their efforts to reduce their Old RAL amounts.

| TOP 10 Delegations  | KPI result | Cleared amount (in EUR million) | Delegations       | Largest Cleared amount (in EUR million) | Delegations       | Largest Old RAL 31/12/2018 (in EUR million) |
|---------------------|------------|---------------------------------|-------------------|-----------------------------------------|-------------------|---------------------------------------------|

While being in top 10 cleared amounts, Nigeria, Haiti, Ethiopia and Mali remain among the top 10 Delegations with the largest old RAL amounts at the end of 2018.

The lowest-ranking Delegations are presented in the table below. Djibouti, Cape Verde, Colombia, Burundi and Swaziland have a negative KPI, which is generally due to de-commitments.

*The performances achieved by DG DEVCO in 2018 were very good: 92.34% of the invoices were paid within the contractual deadlines. This is in line with the Commission average of 92.9%.*

| Bottom 10 Delegations | KPI result | Cleared amount (in EUR million) |
|-----------------------|------------|---------------------------------|
| Djibouti              | -84.48%    | -5.97                           |
| Cape Verde            | -62.10%    | -0.35                           |
| Colombia              | -10.95%    | -0.30                           |
| Burundi               | -3.98%     | -0.64                           |
| Swaziland             | -1.57%     | -0.17                           |

| Congo (DRC)           | 20.92%     | 7.63                            |

### KPI 11 – % of payments paid within the contractual deadline

In total, 10,998 payments have been made during 2018 and 92.34% of payments were paid within the contractual period. This result is above the benchmark set (85%). In terms of financial value - out of the total amount paid in 2018 (EUR 6,048 million), 93.31% has been paid on time.

| 92.34% <sup>83</sup> | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 01 | DG 02  | DIR BCR | DEVCO E | DEVCO F | DEVCO G | DEVCO R | DEVCO (other) <sup>83</sup> | Total  |

At delegation level, the KPI result is 92.64%, which is above the benchmark, and setting the performance of the Delegations at a higher level than the one of HQ (91.35% of invoices were paid within the contractual deadlines). The delegations represent 81% of the volume of payments done in 2018. 79 out of 86 DEVCO delegations reached the 85% benchmark and 2 out of the 7 EUDs not reaching the benchmark have a KPI above than 80%. Highest and lowest ranking delegations in term of respecting the payment period are presented in the table below.

| TOP Delegations     | KPI result | TOP 10 Delegations       | Highest no. of payments | Bottom 10 Delegations | KPI result |
|---------------------|------------|--------------------------|-------------------------|-----------------------|------------|
| Bolivia             | 100%       | Congo (DRC)              | 391                     | South Sudan           | 60.87%     |

Among the 10 Delegations with the highest number of invoices, 9 have a positive KPI. Most of the payments paid outside contractual period relate to Services and Grants contracts. The distribution of the payments paid outside the contractual delays is presented in the chart below.

**Distribution of payments paid outside contractual delay in 2018  
by contract nature**

**KPI 12 – % of invoices registered within 7 days**

This KPI compares the number of invoices registered within 7 calendar days, to the total number of invoices registered during the period. In total, 14,066 invoices were registered during the year 2018. At DEVCO level, 92.55% of invoices were registered within 7 calendar days which is well above the benchmark of 80%.

The table below gives an overview, by directorate, of the respect of the 7 days target for the registration of invoices.

| 92.55% <sup>84</sup>                                  | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 01 | DG 02  | DIR BCR | DEVCO E | DEVCO F | DEVCO G | DEVCO R | DEVCO (Other) <sup>84</sup> | Total  |
|-------------------------------------------------------|---------|---------|---------|---------|-------|--------|---------|---------|---------|---------|---------|-----------------------------|--------|
| KPI 12 Invoice Registration                           | 85.57%  | 92.92%  | 91.94%  | 92.78%  | 100%  | 90.91% | 87.63%  | 91.66%  | 92.80%  | 93.35%  | 95.64%  | 86.24%                      | 92.55% |
| Average period for registration of invoices (in days) | 6.88    | 3.67    | 5.61    | 4.92    | 3.5   | 14.99  | 18.98   | 6.07    | 4.28    | 4.72    | 3.9     | 4.61                        | 5.11   |
| Total no. of invoices                                 | 97      | 565     | 360     | 4,738   | 2     | 99     | 97      | 2,853   | 2,154   | 2,000   | 803     | 298                         | 14,066 |
| Number of invoices registered within 7 days           | 83      | 525     | 331     | 4,396   | 2     | 90     | 85      | 2,615   | 1,999   | 1,867   | 768     | 257                         | 13,018 |

At HQ level the KPI is 91.93%. All the HQ entities have achieved the target of 80%. Although dealing with the highest number of invoices, HQ B and R are among the top 5 entities that respect the maximum period of 7 days to register the invoices with KPIs exceeding 90%.

| HQ         | KPI result | Total of invoices | Number of invoices registered within 7 days |
|------------|------------|-------------------|---------------------------------------------|

| HQ R         | 95.64%        | 803          | 768          |
| <b>Total</b> | <b>91.93%</b> | <b>2,477</b> | <b>2,277</b> |

At Delegation level, the KPI result is 92.85%. The delegations represent 80% of the volume of invoices registered in DEVCO for the year 2018.

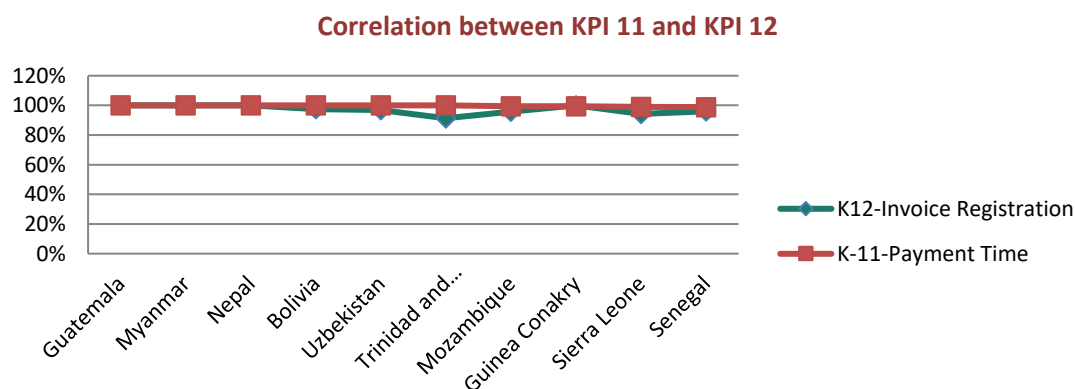

All DEVCO's delegations reached the 80% benchmark except the delegation of Yemen. The Top 10 delegations in term of respecting the registration time are presented in the table below. All the 10 delegations with the highest number of invoices have achieved a positive KPI. The lowest performing delegations are also presented here (only 1 delegation did not reach the benchmark).

| TOP 10 Delegations | KPI result |
|--------------------|------------|
| Angola AO          | 100%       |
| Guatemala GT       | 100%       |
| Guinea Conakry GN  | 100%       |
| Mauritius MU       | 100%       |
| Myanmar MM         | 100%       |
| Nepal NP           | 100%       |
| Pakistan PK        | 100%       |
| Peru PE            | 100%       |
| Sri Lanka LK       | 100%       |
| Tadzhikistan TJ    | 100%       |
| Zambia ZM          | 100%       |

| TOP 10 Delegations          | Highest no. of invoices |
|-----------------------------|-------------------------|

| Cuba CU                  | 85.71%     |
| South Sudan SS           | 86.08%     |
| Benin BJ                 | 86.23%     |
| Central African Republic | 86.29%     |
| Burkina Faso BF          | 86.44%     |
| Lesotho LS               | 86.96%     |
| Swaziland SZ             | 87.00%     |

There is a strong correlation between KPI 11 and 12 that shows that all directorates that have a good performance on invoice registration usually reach the payments KPI's benchmark as well. This trend is confirmed at Delegation level. The graph below illustrates the correlation between KPI 12 and KPI 11 for the Delegations in the TOP 10 ranking for KPI 11-Payment Time.

### KPI 13 – Use of DEVCO staff and respect of the flexibility arrangements

The global DEVCO result of 96.51% is below the benchmark of 100% and the same as in 2017.

| 96.51% | Directorate result |        |
|--------|--------------------|--------|
|        | DEVCO D            | 96.55% |
|        | DEVCO E            | 88.24% |
|        | DEVCO F            | 100%   |
|        | DEVCO G            | 100%   |

Based on the 2018 EAMRs, 3 Heads of Delegation falling under DEVCO D (Kenya) and DEVCO E (Lesotho and Malawi) indicated that they have not fully respected the flexibility arrangements for the use of staff in Delegations which relates to staff under the responsibility of either DEVCO (cooperation sections) or EEAS (political sections).

#### **KPI 14 – Effectiveness of the Internal Control Framework Component “Control Environment”**

Global DEVCO result of 92.10% is far above the benchmark of 80%.

| 92.10% | Directorate | KPI result |
|--------|-------------|------------|
|        | DEVCO D     | 91.80%     |
|        | DEVCO E     | 91.53%     |
|        | DEVCO F     | 92.18%     |
|        | DEVCO G     | 93.03%     |

7 Delegations (Angola, Cameroon, Colombia, Ethiopia, Kazakhstan, Pakistan and Swaziland) did not reach the benchmark of 80%.

#### **KPI 15 – Effectiveness of the Internal Control Framework Component “Risk Assessment”**

Global DEVCO result of 90.74% is far above the benchmark of 80%.

| 90.74% | Directorate | KPI result |
|--------|-------------|------------|
|        | DEVCO D     | 87.23%     |
|        | DEVCO E     | 93.18%     |
|        | DEVCO F     | 91.14%     |
|        | DEVCO G     | 93.43%     |

Delegations (Eritrea, Ethiopia, Guinea-Bissau and Sudan) did not reach the benchmark of 80%.

#### **KPI 16 – Effectiveness of the Internal Control Framework Component “Control Activities”**

Global DEVCO result of 86.38% is above the benchmark of 80%.

| 86.38% | Directorate | KPI result |
|--------|-------------|------------|
|        | DEVCO D     | 83.25%     |
|        | DEVCO E     | 85.88%     |
|        | DEVCO F     | 89.09%     |
|        | DEVCO G     | 88.38%     |

13 Delegations (Benin, Cameroon, Cape Verde, Dominican Republic, El Salvador, Eritrea, Guinea-Bissau, Lesotho, Papua New Guinea, Sudan, Swaziland, Trinidad and Tobago and Uzbekistan) did not reach the benchmark of 80%.

#### **KPI 17 – Effectiveness of the Internal Control Framework Component “Information and Communication”**

Global DEVCO result of 93.52% is far above the benchmark of 80%.

| 93.52% | Directorate | KPI result |
|--------|-------------|------------|
|        | DEVCO D     | 91.39%     |
|        | DEVCO E     | 93.33%     |
|        | DEVCO F     | 93.74%     |
|        | DEVCO G     | 96.76%     |

2 Delegations (Cameroon and Guinea-Bissau) did not reach the benchmark of 80%.

### **KPI 18 – Effectiveness of the Internal Control Framework Component “Monitoring Activities”**

Global DEVCO result of 93.21% is far above the benchmark of 80%.

| 93.21% | Directorate | KPI result |
|--------|-------------|------------|
|        | DEVCO D     | 92.73%     |
|        | DEVCO E     | 92.94%     |
|        | DEVCO F     | 92.27%     |
|        | DEVCO G     | 95.43%     |

2 Delegations (Guinea-Bissau and Swaziland) did not reach the benchmark of 80%.

### **KPI 19 – % of projects visited by DEVCO staff and/or by the HOD**

Results by Directorate in charge are presented in below table.

| 87.34%                                             | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DIR BCR | DEVCO E | DEVCO F | DEVCO G | Total  |
|----------------------------------------------------|---------|---------|---------|---------|---------|---------|---------|---------|--------|
| KPI result                                         | 28.68%  | 89.18%  | 95.19%  | 88.80%  | 28%     | 90.59%  | 73.76%  | 91.85%  | 87.34% |
| project value of visited projects (in EUR million) | 21      | 2,523   | 3,488   | 14,428  | 1       | 5,308   | 4,904   | 3,642   | 34,315 |
| project value of all projects (in EUR million)     | 73      | 2,829   | 3,664   | 16,247  | 5       | 5,860   | 6,648   | 3,966   | 39,291 |
| number of visited projects                         | 5       | 247     | 186     | 1,125   | 1       | 626     | 714     | 567     | 3,471  |
| number of all projects                             | 19      | 337     | 206     | 1,423   | 4       | 749     | 916     | 715     | 4,369  |
| contextual indicator                               | 26.32%  | 73.29%  | 90.29%  | 79.06%  | 25%     | 83.58%  | 77.95%  | 79.30%  | 79%    |

In 2018, 79 % of the projects were visited, which represents 87.34 % in value (EUR) of the projects. The benchmark of 80 % in value has therefore been reached.

In terms of number of projects visited, security issues may make it difficult to visit projects (Afghanistan, Sudan, Yemen...).

The table below shows the least performing Delegations in number of projects visited.

| Country      | % of projects visited in number and in total value |             |                | % in visited number | % in visited value |
|--------------|----------------------------------------------------|-------------|----------------|---------------------|--------------------|
|              | Visited                                            | Not visited | Total projects |                     |                    |
| Afghanistan  | 16                                                 | 45          | 61             | 26%                 | 23%                |
| Ethiopia     | 78                                                 | 32          | 110            | 71%                 | 84%                |
| Haiti        | 35                                                 | 24          | 59             | 59%                 | 94%                |
| Sudan        | 46                                                 | 22          | 68             | 68%                 | 82%                |
| Kenya        | 64                                                 | 21          | 85             | 75%                 | 86%                |
| Senegal      | 47                                                 | 21          | 68             | 69%                 | 81%                |
| Yemen        | 21                                                 | 21          | 42             | 50%                 | 51%                |
| Mozambique   | 31                                                 | 19          | 50             | 62%                 | 86%                |
| Bangladesh   | 52                                                 | 17          | 69             | 75%                 | 83%                |
| Burkina Faso | 51                                                 | 17          | 68             | 75%                 | 88%                |

### **KPI 20 – % contracted of project evaluations in the Annual Evaluation Plan**

Global DEVCO result at 63.20% is below the benchmark of 75%.

This is also the case at Directorates level as presented in the below table except for DEVCO F (82.22%).

| Directorate  | number of implemented projects | number of all projects | KPI result    | project value of implemented projects (in EUR million) | project value of all projects (in EUR million) | contextual indicator |
|--------------|--------------------------------|------------------------|---------------|--------------------------------------------------------|------------------------------------------------|----------------------|
| DEVCO D      | 123                            | 244                    | 50.41%        | 1,128                                                  | 3,341                                          | 33.76%               |
| DEVCO E      | 81                             | 126                    | 64.29%        | 674                                                    | 1,394                                          | 48.32%               |
| DEVCO F      | 111                            | 135                    | 82.22%        | 1,075                                                  | 1,375                                          | 78.18%               |
| DEVCO G      | 37                             | 52                     | 71.15%        | 223                                                    | 392                                            | 56.85%               |
| <b>Total</b> | <b>352</b>                     | <b>557</b>             | <b>63.20%</b> | <b>3,099</b>                                           | <b>6,502</b>                                   | <b>47.66%</b>        |

27 Delegations have contracted 100% of their evaluation plans in 2018: Bangladesh, Benin, Burundi, Chad, Congo (DRC), Dominican Republic, Guatemala, Guinea Conakry, Haiti, Honduras, Kazakhstan, Kenya, Laos, Malawi, Mauritius, Myanmar, Namibia, Nepal, Pakistan, Paraguay, Philippines, South Africa, Sri Lanka, Timor-Leste, Togo, African Union and Vietnam.

Delegations Burkina Faso, Cameroon, Fiji, Guinea-Bissau, Ivory Coast, Madagascar, Mali, Niger, Nigeria, Rwanda, Sudan and Swaziland contracted less than 50% of the project evaluations of the Annual Evaluation Plan while Delegations in Bolivia, Cape Verde, Djibouti, Eritrea, Gambia, Liberia, Mexico, and Sierra Leone have contracted none of them.

In most cases, if the KPI value is below target for a given Delegation, this is due to delays in the implementation of a project or programme and consequently the postponement of the contracting of the corresponding evaluation to the next year.

However, the FWC for the launching of evaluations changed during 2018, from the BENEF2013 to the SIEA2018. This had a negative impact on the number of evaluations carried out by the delegations thus leading to a lower score for KPI 20. Furthermore, the calculation of KPI20 has shown some limitations that also introduced a negative bias on the score. This will be addressed in 2019 as KPI value will be directly calculated based on the data encoded in the IT system managing the evaluations.

### **KPI 21 – undue payment prevented by ex-ante controls**

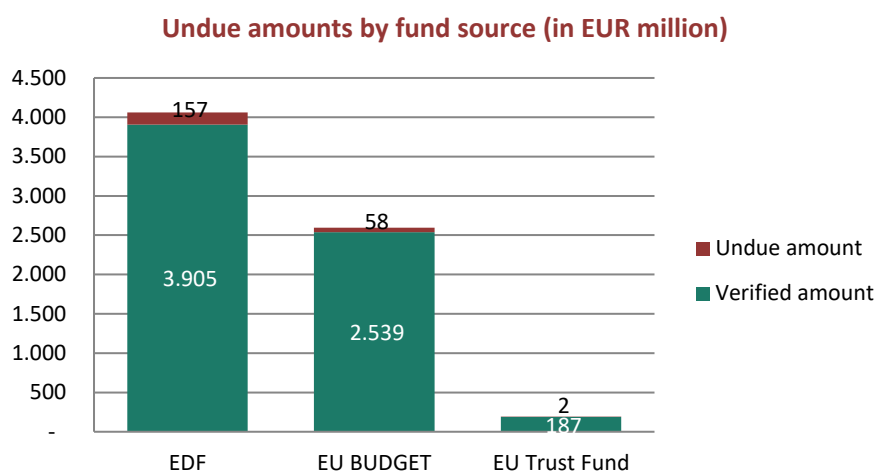

At DEVCO level, the percentage of undue amounts identified by ex-ante controls by the end of 2018 is 3.28% which is on target of 2%. It represents a total amount of EUR 217 million of undue payment prevented. This is higher than in 2017 (2.07% and EUR 130 million).

Results by directorate are presented in the table below:

| 3.28%▲                           | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 01 | DG 02 | DGA DIR BCR | DEVCO E | DEVCO F | DEVCO G | DEVCO R | Total |
|----------------------------------|---------|---------|---------|---------|-------|-------|-------------|---------|---------|---------|---------|-------|
| KPI                              | 0.04%   | 0.20%   | 0.75%   | 3.28%   | 0%    | 4.35% | 2.77%       | 9.45%   | 2.38%   | 3.19%   | 3.88%   | 3.28% |
| Invoiced amount (in EUR million) | 33      | 729     | 463     | 2,707   | 0.23  | 7     | 12          | 728     | 1,137   | 669     | 143     | 6,631 |
| Undue amount (in EUR million)    | 0.01    | 1.47    | 3.48    | 88.84   | 0     | 0.32  | 0.33        | 68.81   | 27.01   | 21.37   | 5.55    | 217   |

Undue amounts were identified for 18.51% of the total number of invoices and cost claims issued during the year 2018 (16.4% in 2017).

With 4% of undue amount, EDF is performing better than BUDGET (2.3%) and EU Trust Funds (1.2%). Distribution of verified and undue amounts by Fund Source is displayed in the chart below.

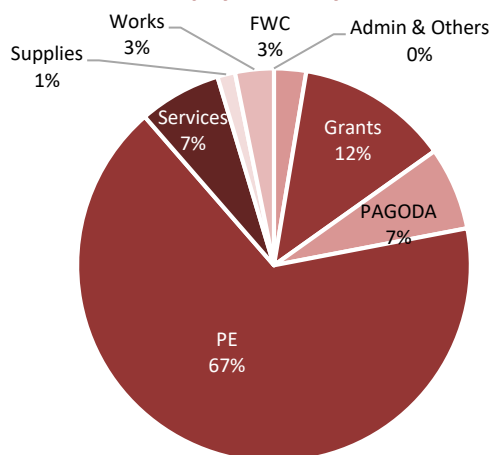

The Delegations have detected the majority of the undue amounts identified by ex-ante controls: EUR 200 million or a share of 92% of the undue amount.

| TOP 10 Delegations | KPI result | TOP 10 Delegations | Sum of undue amounts (in EUR million) | TOP 10 Delegations | Sum of invoiced amounts (in EUR million) |
|--------------------|------------|--------------------|---------------------------------------|--------------------|------------------------------------------|
| Mozambique         | 53,58%     | Mozambique         | 54,85                                 | Afghanistan        | 230,06                                   |
| Tadzhikistan       | 16,66%     | Niger              | 19,88                                 | Nigeria            | 198,33                                   |

EUR 143 million of the total undue amounts relate to Budget Support payments making up 67% of the total undue amounts identified.

The distribution by contract nature is presented below (Budget Support undue payments represent 97% of Programme Estimates (PE) undue amounts).

**Ex-ante undue payments by contract nature**

## KPI 22 – % of contractualisation of the Annual Audit Plan year N

At DEVCO level, 78.09% of the audits foreseen in the Annual Audit Plan year N have been contracted. This is above the benchmark of 60% and higher than the 71.43% of 2017.

All DEVCO directorates are above the benchmark. 93% of audits foreseen (555) are in Delegations.

| 78.09% <sup>▲</sup>                     | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DEVCO E | DEVCO F | DEVCO G | DEVCO R | Total  |

Grants and programme estimates represent the highest number of audits planned and contracted.

### KPI 23 - % of implementation of the Annual Audit Plan year N-1

On DEVCO level, 81.08% of the audits foreseen in the Annual Audit Plan N-1 have been implemented. This result is above the benchmark of 40% and higher than the 76.64% of 2017.

All DEVCO Directorates reached the target. The highest number of audits yet to be implemented is under the responsibility of geographic directorates, since 96% of the audits are foreseen in Delegations.

| 81.08% <sup>▲</sup>                      | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 02  | DEVCO E | DEVCO F | DEVCO G | DEVCO R | Total  |

Grants, programme-estimates and PAGODA represent the biggest share of audits implemented and reached the benchmark.

## KPI 24 - % of implementation of the Annual Audit Plan year N-2

DEVCO has implemented 88.92% of the audits foreseen in the Annual Audit Plan year N-2. This is above the target of 60% but slightly lower than in 2017 (90.48%).

DEVCO D has reached the second highest green KPI result among the geographical Directorates while it has the highest number of audits planned.

| 88.92%▼                                  | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 02 | DEVCO E | DEVCO F | DEVCO G | Total  |
|------------------------------------------|---------|---------|---------|---------|-------|---------|---------|---------|--------|

56 Delegations reached a 100% implementation rate. 93% of audits foreseen are in Delegations.

Only Delegation Central African Republic remained below the benchmark (40%). The table below shows the Delegations by the highest number of audits still to be implemented.

| BOTTOM 10 Delegations    | No of audits still to be implemented | KPI result |
|--------------------------|--------------------------------------|------------|
| Angola                   | 9                                    | 60,87%     |
| Central African Republic | 9                                    | 40%        |
| Haiti                    | 7                                    | 68,18%     |
| Chad                     | 6                                    | 66,67%     |
| Fiji                     | 4                                    | 85,19%     |

The majority of audits in audit plan N-2 relate to programme estimates and grants. 44 out of the 73 remaining implementation have to be done for the same contract categories.

**Distribution of audits planned N-2 vs implemented -by contract nature**

## KPI 25 – Ineligible amounts identified by audits as a % of the audited amount

DEVCO has found 5.05% or EUR 99 million of audited expenditure to be ineligible. This figure is higher than in 2017 when the ineligible amount was EUR 90 million and the KPI of 4.66%.

51% of the cases where audits identified ineligible amounts (i.e in 80% of the cases), the amounts were larger than EUR 1 million.

| 5.05% <sup>▲</sup>                      | DEVCO A | DEVCO B | DEVCO C | DEVCO D | DG 02 | DEVCO E | DEVCO F | DEVCO G | Total |
|-----------------------------------------|---------|---------|---------|---------|-------|---------|---------|---------|-------|
| KPI 25 audit ineligible                 | 1.06%   | 1.37%   | 2.67%   | 4.34%   | 2.30% | 4.53%   | 6.80%   | 5.95%   | 5.05% |
| Ineligible expenditure (in EUR million) | 0.15    | 0.57    | 1.59    | 37.51   | 0.09  | 12.00   | 37.96   | 8.94    | 99    |
| Audited expenditure (in EUR million)    | 14.33   | 41.90   | 59.49   | 863.64  | 4.10  | 264.63  | 558.23  | 150.31  | 1,957 |

All Geographical Directorates have reached positive KPI results. DEVCO A and DEVCO B KPI results of 1.06% and 1.37% are below the benchmark.

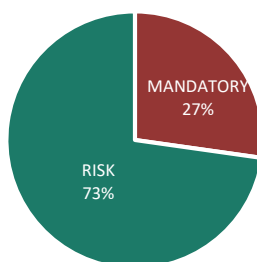

Among the TOP 10 Delegations in terms of KPI results, Delegation Eritrea also appears at the TOP 10 ineligible amount.

Out of the Delegations with a high ranking of the total audited expenditure, Pakistan did not reach positive KPI results.

| Uzbekistan          | 13.69%     | Haiti              | 2.02                                | Mozambique         | 32.11                                |

73% of the total ineligible amounts were identified by risk assessment based audits; which represent around 62% of the number of audit reports registered in 2018.

### Ineligible amounts by audit reason in 2018

## B) Results at Delegation level

DEVCO has requested specific Action Plans from the Delegations which met targets for less than 60% of KPIs in 2017 (with the exception of Yemen, given the specific political situation).

All of these 4 Delegations have improved their results this year reaching the minimum threshold of 60% of green KPIs at the end of 2018. Despite its political situation, Delegation of Yemen results improved compared to the previous reporting periods and moved above the 60% threshold in 2018.

In 2018, only 2 Delegations did not reach the 60% benchmark of green KPIs: Sudan and Swaziland. Both Delegations will be requested to elaborate Actions plans.

| Overall Green KPI Result for | 2017 | 2018 |
|------------------------------|------|------|
| Eritrea                      | 58%  | 63%  |
| Mauritania                   | 58%  | 79%  |
| South Sudan                  | 50%  | 68%  |
| Sudan                        | 67%  | 54%  |
| Swaziland                    | 83%  | 50%  |
| Yemen                        | 50%  | 65%  |

Below table presents the Delegations with less than 60% of green KPIs at the end of 2018 in detailed view for all KPIs.

| Managing Entity            | Sudan      | Swaziland  |
|----------------------------|------------|------------|
| <b>Overall Green -2018</b> | <b>58%</b> | <b>50%</b> |

### C) KPI Definition and Benchmarks

| KPI                                                                                                  | Definition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Benchmark                                                                                                                                                                                                                                                 |
|------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| KPI 1, 2 and 3: Accuracy of initial annual financial forecasts for payments, contracts and decisions | These indicators measure the accuracy of the financial forecasts for payments, contracts and decisions by calculating the actual figure for the reporting period as a percentage of the forecast amount for the reporting period.                                                                                                                                                                                                                                                                                                                   | Between 90% and 110%                                                                                                                                                                                                                                      |
| KPI 4: RAL absorption period                                                                         | The indicator estimates how long it would take for Managing Entities to implement decided amounts: the RAL (Reste à Liquider) at the end of the year is divided by the amount paid during the year.                                                                                                                                                                                                                                                                                                                                                 | Not more than 4 years                                                                                                                                                                                                                                     |
| KPI 5: Time to Grant                                                                                 | The indicator measures the average interval between informing the applicant that they were successful and signing the grant contract, for grants signed in the reporting period. Under the Financial Regulations the interval should not exceed three months.                                                                                                                                                                                                                                                                                       | Not more than 90 days                                                                                                                                                                                                                                     |
| KPI 6: % of projects with Red Traffic Lights for implementation progress                             | The indicator measures the percentage of all projects ongoing during all or part of the reporting year to which the Managing Entities (ME) awarded a red traffic light for the question 'what is the expected level of scheduled resources the project will be able to use before the end of the project?'<br><br>Green = The implementation is on track.<br>Orange= There are some problems in implementation. Corrective actions are being undertaken.<br>Red = Implementation faces fundamental problems that need to be addressed.              | Not more than 10%                                                                                                                                                                                                                                         |
| KPI 7: % of projects with Red Traffic Lights for achieving results                                   | The indicator measures the percentage of all projects ongoing during all or part of the reporting year to which the MEs awarded a red traffic light for the question 'Objectives - Is there any risk that the project's objectives will not be met?'<br><br>Green = The objectives are likely to be reached.<br>Orange = There is some concern that the objectives will not be reached.<br>Red = The risk of not attaining the objectives is high.                                                                                                  | Not more than 10%                                                                                                                                                                                                                                         |
| KPI 8: Reduction of old pre-financing                                                                | This indicator measures sound financial management as demonstrated by the reduction of the open amount of old pre-financing since the beginning of the year.<br>A pre-financing payment is considered old if it still has an open amount more than 2 years after it was originally paid.<br>The indicator identifies all the pre-financings that were old at the beginning of the year, their open amount at the beginning of the year ("initial") and their open amount at the end of the reporting year ("current") and the percentage reduction. | Reduction of the old pre-financing by at least 25% a year. The objective is to justify or recover all pre-financing after 6 years at the most.                                                                                                            |
| KPI 9: Expired contracts as a % of the contract portfolio                                            | This indicator measures problems in delay management of contracts based on the percentage of contracts in the portfolio not closed 18 months after the end of their operational activities. The indicator is expressed in number of contracts. It is complemented by a secondary/contextual indicator based on the same calculation but expressed in contract value.                                                                                                                                                                                | Not more than 15%. The objective is to progressively reduce the part of expired contracts in DEVCO's portfolio while respecting the necessary period for contract closures in view of implementation of final audits, contradictory phase and recoveries. |
| KPI 10: Reduction of old RAL                                                                         | This indicator measures the results of an accounting quality exercise concerning old RAL (Reste à                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Reduction by at least 25%. The objective is to                                                                                                                                                                                                            |

| KPI                                                                                                                                                  | Definition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Benchmark                                                                             |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|                                                                                                                                                      | <p>Liquider) based on the percentage reduction in old RAL since the beginning of the year.</p> <p>Old RAL is the open amount of level 1 and level 2 commitments that are more than 5 years old. The indicator identifies old commitments that have an open amount at the beginning of the year and uses the open amount of the same commitments at the end of the year to obtain a % reduction.</p> <p>The population to calculate the indicator therefore does not vary within a reporting year, being all commitment positions originating from year N-6 or earlier and that had a non-zero RAL on 1/1/N.</p> <p>An entity's RAL is calculated based on the commitments it manages directly, as opposed to the total RAL of the level 1 commitments (decisions) that it manages – a significant distinction when level 2 commitments (contracts) are managed by different entities.</p> | eliminate the respective generation of old RAL over a period of 4 years.              |
| KPI 11: % of payments paid within the contractual deadline                                                                                           | This indicator measures efficiency as the percentage of payments paid in the reporting period that respected the contractual payment deadline. It is expressed in number of payments and is complemented by a secondary/contextual indicator based on the same calculation but expressed in paid amount.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | At least 85% of the payments are paid within the contractual deadline.                |
| KPI 12: % of invoices registered within 7 days                                                                                                       | This indicator measures the efficiency of invoices' registration as the percentage of invoices registered within 7 calendar days of EC reception. The KPI is expressed in number of invoices.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | At least 80% of the invoices are registered within 7 calendar days.                   |
| KPI 13: Use of DEVCO staff and respect of the flexibility arrangements                                                                               | <p>The indicator is used DG DEVCO to ensure respect of the agreement between the Commission and the EEAS on the use of staff in Delegations, as defined in Article 6 of the Joint Decision of the Commission and the High Representative of the Union for Foreign Affairs and security Policy on cooperation Mechanisms concerning the Management of Delegations of the EU (JOIN(2012)8 dated 28/03/2012).</p> <p>Heads of Delegations have to state in their EAMR whether the above-mentioned agreement was respected in their Delegations during the reporting period.</p>                                                                                                                                                                                                                                                                                                              | Yes for 100% of Delegations.                                                          |
| <p>KPIs 14 to 18: Internal Control Framework.</p> <p>Control Environment.<br/>Risk Assessment.<br/>Information and Communication.<br/>Monitoring</p> | <p>These indicators assesses how effectively Internal Control Framework principles have been implemented in EUDs.</p> <p>The Internal Control Framework (2017) consists of 17 principles organised into 5 components. Each ICF indicator corresponds to one of the five Internal Control Framework (ICF) Components.</p> <p>In the Internal Control Principles (ICP) Effectiveness section of the EEAS e-DAS survey, each Head of Delegation must rate how effectively each ICF Principle has been implemented in the Delegation. The indicator value is the average rating awarded to the Principles in the Component.</p> <p>The possible rating and their numerical values are: "positive", 100%; "mostly positive", 80%; "somewhat negative", 40%; "negative", 0%.</p>                                                                                                                | The traffic light is green when at least 80% of the points are achieved for this KPI. |
| KPI 19: % of projects visited by Commission staff and/or by the HOD                                                                                  | <p>Measures project monitoring and control, as the percentage of projects visited by Commission staff or the Head of Delegation (by project value), based on information recorded in the EAMR and EAMR HQ Project Lists.</p> <p>Respondents must answer the question "was the project visited during the reporting year?"</p> <p>A visit is defined as: any field visit to the project or project component made during the reporting</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                 | At least 80% of ongoing projects/contracts visited during the year                    |

| KPI                                                                             | Definition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Benchmark                                                                                                                                                                                                           |
|---------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                 | <p>period by Commission staff or the HoD. In case of budget support and/or institutional support projects, which by their nature do not always have identifiable EU-supported activities in the field, a visit can consist of monitoring meetings between the beneficiary and Commission staff. The definition excludes visits, evaluations, and ROM missions carried out by experts or technical assistants without the attendance of Commission staff or the HoD.</p> <p>The KPI value is calculated as the sum of the project value of visited projects as a percentage of the sum of the project value of all projects.</p> |                                                                                                                                                                                                                     |
| KPI 20: % contracted of project evaluations in the AEP (Annual Evaluation Plan) | This indicator measures the number of evaluations contracted in the year as a percentage of the number planned in the Annual Evaluation Plans of the Delegations or in DEVCO MP.                                                                                                                                                                                                                                                                                                                                                                                                                                                | At least 75% of the planned evaluations to be contracted during the reporting year                                                                                                                                  |
| KPI 21: Undue payment prevented by ex-ante controls                             | <p>This indicator measures ex-ante expenditure verification as the non-accepted amount of invoices as a percentage of the total amount verified.</p> <p>The KPI is expressed in EUR. It is complemented by a secondary/contextual indicator based on the same calculation but expressed in number of invoices (that have a non-zero ineligible amount).</p> <p>The indicator is calculated based on all invoices subject to ex-ante expenditure verification completed during the reporting year. This corresponds to all not cancelled invoices.</p>                                                                           | At least 2%. The benchmark of 2% corresponds with the arithmetic average of the percentage error related to ineligible expenditures with possible recoveries identified in the RER studies for years 2012 and 2013. |
| KPI 22: % contracted of the annual audit plan year N                            | <p>The indicator measures on-track implementation of the current year's Audit Plan, based on the percentage of planned audits that have been contracted.</p> <p>The indicator is calculated based on the annual audit plan of the current reporting year N. This is defined as all audits that are not cancelled with N as their audit plan year.</p> <p>An audit is considered to have been contracted when the audit contract has been signed.</p>                                                                                                                                                                            | At least 60%. This target corresponds to the average result of the last 3 years.                                                                                                                                    |
| KPI 23: % of implementation of the annual audit plan year N-1                   | <p>The indicator measures the satisfactory implementation of the year N-1's audit plan as a percentage of planned audits that have been implemented.</p> <p>The indicator is calculated based on the annual audit plan of the reporting year N-1. This is defined as all audits that are not cancelled with N-1 as their audit plan year.</p> <p>An audit is considered to have been implemented when the draft audit report has been received.</p>                                                                                                                                                                             | At least 40%                                                                                                                                                                                                        |
| KPI 24: % of implementation of the annual audit plan year N-2                   | <p>The indicator measures the satisfactory implementation of the year N-2's audit plan as a percentage of planned audits that have been implemented.</p> <p>The indicator is calculated based on the annual audit plan of the reporting year N-2. This is defined as all audits that are not cancelled with N-2 as their audit plan year.</p> <p>In this case, an audit is considered to have been implemented when the final audit report has been received.</p>                                                                                                                                                               | At least 60%                                                                                                                                                                                                        |
| KPI 25: Ineligible amounts identified by audits as a % of the audited amount    | <p>This indicator measures the ineligible amounts identified by audits as a % of the audited amount.</p> <p>The indicator is calculated based on all audits that verified expenditure and that delivered their results during the reporting period. These are defined as all audits whose final audit report results</p>                                                                                                                                                                                                                                                                                                        | At least 2%                                                                                                                                                                                                         |

| KPI | Definition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Benchmark |

<sup>85</sup> Based on analysis of final 2014 ODA spending by EU MS and non-allocated spending by the EU institutions as reported by the OECD DAC. Final data for two EU member States was not available so earlier data was extrapolated.

<sup>86</sup> Idem.

<sup>87</sup> Based on commitments agreed upon by the EU Member States in the Council Conclusions of 26 May 2015, paragraphs 32-33 (<http://data.consilium.europa.eu/doc/document/ST-9241-2015-INIT/en/pdf>), in the framework of the 2030 Agenda for Sustainable Development.

<sup>88</sup> Idem.

<sup>89</sup> Computed on country level data from 2012 or before, drawing on World Bank data for the poverty rates, and UN Population Division data for the weights; extracted in January 2019 to take into account data revisions

<sup>90</sup> For the calculation of the baseline beneficiary countries under the Development Cooperation Instrument and European Development Fund have been taken into account. Beneficiaries under the European Neighbourhood Instrument and EU- Greenland Partnership Instrument have been excluded.

<sup>91</sup> Computed on country level data from 2017 or before, drawing on World Bank data for the poverty rates, and UN Population Division data for the weights; extracted in January 2019)

**Specific Objective 1<sup>92</sup>: Contribute to sustainable development and development effectiveness in the areas of EU international and development cooperation with a view to the implementation of the 2030 Agenda and Addis Ababa Action Agenda.** **Related to spending programme: PSC**

**Indicator 2: Number of partner countries in which a joint strategy has been agreed as a result of joint programming**

Joint Programming (JP) is an important EU policy commitment relating to development cooperation at the core of the international development effectiveness agenda. In this vein, the EU and its MS should further coordinate their programming, reducing transaction costs for the partner country and increasing effectiveness of development cooperation. The main deliverables of these processes are Joint Analysis and Joint Strategies, which should be developed in more countries, but also reflect an increase in quality, via their integration of Joint Result Framework. In selected cases, Joint Strategies are intended to be used as EU programming documents. Increased coordination with Member States will be crucial in order to guarantee the success of Joint Programming.

**Latest known results (2018):**

At the end of 2018, 26 countries had a joint strategy (23 active, including drafts and 3 expired), while a number of additional countries were intensifying talks to move from joint analysis to a joint strategy, such as Burkina Faso and Honduras; others launched joint programming processes, such as Madagascar and Burundi. In addition, some countries worked to establish their 2<sup>nd</sup> joint programming document, such as in Ethiopia and Kenya.

The publication of the new Joint Programming Guidance in mid-2018 (disseminated to all EU Delegations and shared with Member States) and the associated new one-day Joint Programming training has also contributed to raising interest in a number of countries in starting a joint programming processes. In addition, the Global Learning Workshop on Joint Programming, which took place at the end of the year, with the active participation of EU and Member States representatives has further strengthened the commitment between country level colleagues to promote joint programming.

While the milestone for 2018 has not been reached, the good progress in a number of countries gives reason to believe that the target in 2020 is achievable.

**INDICATOR 3: Adoption of decision by OECD, (a) modernising ODA definition and directives, (b) reflecting significant degree of EU position.**

ODA definition is being updated at the OECD to reflect the changes in development policies. The EU plays a key role in this process that needs to be monitored.

**Latest known results (2018):**

The modernisation of the ODA measure progressed, with the OECD DAC agreeing on a code to track expenditure for migration in summer 2018. The first data will be available in 2019, on ODA expenditures of the previous year.

However, the OECD DAC could not agree on new rules to report concessional loans to the private sector – the so-called private sector instruments (PSI) – through a grant-equivalent measure. If approved, the system would have allowed consistency with the reporting of concessional loans to the public sector, which has already adopted the grant-equivalent method since 2016. Yet the OECD DAC managed to agree on interim or default

<sup>92</sup> Indicator "Adoption of a Communication presenting policy proposals for a revised European Consensus on Development including strategic orientations on EU cooperation with Middle Income Countries, policy coherence for development, and development effectiveness" was achieved in 2017 and therefore discontinued.

reporting rules to be used by reporters in absence of this agreement. The EU took a leading role to shape the default reporting rule, also thanks to its role as chair of the WP-STAT and vice-chair of the DAC. Lastly, the EU launched discussions at the WP-STAT on improving the classification of regions used for reporting regional ODA. A more granular system, which includes more specific sub-regions, in particular for Africa, is a first step to improve the reporting of ODA by income groups and reduce the unallocated ODA. While discussions were at an early stage, and will be further pursued in 2019, several members expressed interest in the proposal.

| DIRA | PSC | Timely ODA expenditure reporting and monitoring of EU collective ODA commitments, and satisfactory outcome of OECD-DAC process on ODA modernisation, particularly in relation to TOSSD.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <ul style="list-style-type: none"><li>Commission public information on annual EU ODA figures released.</li><li>Production of the new EU Report on financing for development.</li><li>The Commission participates in all OECD DAC formal and informal negotiations and its proposals and positions are adequately reflected</li></ul>                                                                                                                             | <ul style="list-style-type: none"><li>Annual ODA report to Council released, shows progress on ODA commitments (Spring 2018) together with dissemination of new FFD Report at FFD forum 2018.</li><li>Outcome reflects EU positions on updating the ODA rules and on the parameters for TOSSD.</li></ul>                        |
|      |     | <b>Latest known results (2018):</b><br>In 2017, the Commission continued to systematically monitor Member States' progress towards their Official Development Assistance (ODA) commitments. The annual report was published in April 2018 in a timely manner. OECD DAC published the final figures for the 2017 ODA data at the end of December 2018.<br>The EU ODA/GNI ratio for 2017 stood at 0.50%, down from 0.53% in 2016. EU ODA to LDCs on GNI in 2017 increased to 0.12% gaining back the level of 2013 after having remained at 0.11% for three consecutive years.<br>The EC co-chaired the international Task Force developing the statistical measure TOSSD. The EC's contribution was key to finalise the reporting instructions for Pillar I (Cross-Border Flows) of TOSSD, which will allow the launch of the first data survey in 2019. The data collected will show the concrete added value of TOSSD and help obtain international buy-in for the measure. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                 |

| DIR A | PSC     | EU leading role in OECD/DAC in relation to implementation of 2030 Agenda and AAAA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | EU participation and positions for key meetings and processes                                                                                                                                                                                                                                                                                                                       | EU positions influential in DAC major meetings (e.g. SLM) and processes (e.g. "Transformation of the DAC") throughout the year        |
|       |         | <b>Latest known results (2018):</b><br>DEVCO continued to assure a leading role for the EU within DAC, through close coordination with EU DEL in Paris and through its DAC Delegate, who was also nominated DAC Vice Chair. DEVCO provided comprehensive input in all meetings and to all DAC policy and regulatory proposals (PSI, TOSSD, H-D-P nexus, etc). DEVCO, through its DAC Delegate, continued and improved EU coordination (EU and Member States) within DAC, which resulted in a better projection of EU objectives within DAC and the OECD in general. |                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                       |

|       |     | <b>Latest known results (2018):</b><br>DEVCO continued to work closely with EEAS and MSs proactively supporting the UN DS reform with common positions and LTT.<br>Early in 2018, DEVCO supported the preparation of EU MS common positions for the Financing for Development Forum. The 2018 Investing in Sustainable Report was launched at the 2018 Financing for Development Forum and served as common EU reference for the Financing for Development Forum. The EU ensured that EU positions were adequately reflected in the outcome document of the Forum.                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| <b>Latest known results<sup>108</sup> (2017):</b> 19,211,000<br>With EU support, more than 19 million births have been attended by skilled health personnel, surpassing the 2018 interim milestone and the 2020 target. Attendance by properly trained health personnel with adequate equipment is key to lowering maternal and infant mortality.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                 |                                    |
| <b>Indicator 4*: Number of people who have benefitted from VET/skills development and other active labour market programmes with EU support</b><br>Developing countries of all regions are confronted with very high levels of un- and underemployment, in extremely pressing demographic contexts. In response of this situation, the EU supports effective active labour market programmes, aimed at increasing access to employment opportunities of unemployed, inactive or those aiming to improve their employment status, with a particular focus on disadvantaged groups as young people and women. The largest part of those measures is represented by Vocational Education and Training (VET) programmes which seek to improve employability by promoting more demand driven VET systems, better covering the needs and opportunities of the private sector. Other active labour market programmes include labour market intermediation and entrepreneurship promotion.<br><b>Source of data:</b> EU Results Framework annual reporting. |                                 |                                    |

<sup>106</sup> Aggregate data collected from five years of Results Reporting covering interventions which ended between 2013-2018 and a selection of interventions ongoing in 2018. Since the 2018 revision of the EU results framework the indicator refers to EU RF 2.05 Number of 1-year olds fully immunised with EU support.

<sup>107</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>108</sup> This result refers to the value reported for 2017. No data can be reported for 2018 since this indicator was discontinued following the 2018 revision of the EU results framework. The figures and narrative refer to aggregate data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018).

<sup>109</sup> Aggregate data collected from five years of Results Reporting covering interventions which had ended between 2013-2018 and a selection which was ongoing in 2018.

<sup>110</sup> Target date set by world leaders for achieving the Sustainable Development Goals (UN).

<sup>111</sup> Aggregate data collected from five years of Results Reporting covering interventions which had ended between 2013-2018 and a selection which was ongoing in 2018. Since 2018 revision of the EU results framework, the indicator refers to EU RF 2.15 Number of people who have benefited from institution or workplace based VET/skills development interventions supported by the EU. The indicator methodology was slightly updated.

<sup>112</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

| By 2018, 18.4% of EU-funded international cooperation and development assistance has been committed towards supporting human development. This represents an increase by 1.5 percentage points compared to 2017 thus getting closer to the 2014-2020 target – though falling slightly short of the 2014-2018 milestone. Commitments will have to be stepped up to reach the target of 20% by 2020. |     |                                                                                                                                                                                                                                                           |  |                                                     |  |               |  |

<sup>113</sup> This result refers to the value reported for 2017. No data can be reported for 2018 because the scope of the indicator has changed in the 2018 revision of the EU results framework. The figure and narrative above refer to aggregate data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018). The indicator now covers EURF 2.1 "Number of food insecure people receiving EU assistance".

<sup>114</sup> Data collected in the frame of the first reporting on the EU Results Framework (level 3).

<sup>115</sup> Data calculated in the frame of the EU Results Framework (level 3). Following the 2018 revision of the EU Results Framework the definition of the indicator was slightly amended, now also considering gender.

|       |     | <b>Latest known results (2018)</b><br>The Annual Action Programme 2018 of the Pan-African Programme was adopted on 30.10.2018 for a total amount of EUR 155.7 million. Most of the budget (EUR 90 million) will be invested in education, knowledge and skills development, with a focus on young people. A first strand will enhance skills and promote links with the private sector to improve job prospects for young Africans (EUR 27 million). The harmonisation of higher education systems will form another project (EUR 13 million). It aims to improve quality assurance and therefore facilitate the recognition of qualifications and the mobility of students. A previous phase of this initiative spurred more than 100 African universities to progress towards harmonised and more transparent curricula. The Intra-Africa Academic Mobility Scheme is also extended for a 3rd phase, supporting students and staff mobility (EUR 20 million). Since 2010, more than 120 African universities from 39 countries have already benefited from this scheme. In the knowledge area, support for the Africa Connect initiative continues (EUR 30 million). It aims to provide affordable high-capacity internet for research and education across Africa. This action has already interconnected more than 800 higher education and research institutions within Africa, increasing as well their opportunities to work with peers across the world.                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                          |

|       |     | <b>Latest known results (2018)</b><br>1. Both documents were prepared and submitted to OPCOM members in February 2018.<br>2. The Partnership Framework with Ethiopia has been further supported with the formulation and implementation of a Job Compact Sector Reform and Performance Contract (EUR 50 million) and the provision of Sustainable Reintegration Support to Ethiopian Migrants (EUR 15 million). Furthermore, the level of consultation and coordination with key stakeholders, such as national and regional governments and EUTF partner countries has improved. The nature of the new actions approved during the year (two State Building and Sector Reform budget support contracts, several action to roll out the CRRF, etc.) have also helped reinforcing such dialogue.<br>3. 95% of the contracts have been signed within 6 months.<br>4. Since the start of its implementation, 18 ROM reports have been completed for the EUTF HoA (covering projects in Kenya, Uganda, Ethiopia only). Analysis of their findings concludes to a rather positive scoring on relevance (14 have relevance over average); efficiency (only 1 has a very low score); effectiveness (14 also have an above-average score) and sustainability (also 14 have an above-average score). They are general issues of delays in implementation and organisational capacities, yet the projects are generally seen as responding to the needs and with a high potential for replication. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                          |

|       |         | <b>Latest known results (2018)</b><br>1. The annual report has been delivered to the OPCOM the 15.02.2018.<br>2. Continuous high level dialogue has been maintained with national and local authorities in Brussels and in the respective countries.<br>3. 75% of the contracts have been signed within 6 months.<br>4. 11 ROM reports have been completed for the EUTF SLC by 2018 (covering projects in Niger, Senegal, Mauritania, Mali and Chad). In 2018, 3 projects have been assessed and the overall Efficiency was considered to be positive, as well as the Sustainability. Concerning the relevance, two out of three projects had very positive scores, whilst one had poor results concerning this aspect. All projects showed to have excellent results when measuring their Effectiveness.<br>5. 27.000 stranded and vulnerable migrants have been assisted in 2018.<br>6. 170.000 migrants and potential migrants have been reached out by information campaigns in 2018 through our Joint Partnership programme with IOM. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                        |

**SPECIFIC OBJECTIVE 3:** Under the overall objectives of the legal bases of the main instruments and mostly by targeting the poverty reduction, DEVCO will promote the enabling vectors for inclusive and sustainable growth, notably through a stronger business environment that will maximise the contribution to poverty reduction, encourage green economy, create new and decent jobs and deeper regional integration. **Related to spending programmes: DCI&EDF**

**Indicator 1\*: Number of firms with access to credit with EU support**

This indicator refers to the use of a formal credit line (from a formal financial institution) by a private enterprise, as measured by the “number of small and medium enterprise (SMEs) with an outstanding loan”.

**Source of data:** EU Results Framework annual reporting

| Baseline <sup>120</sup> (2015) | Interim Milestone(2018) | Target(2020) |
|--------------------------------|-------------------------|--------------|
| 450                            | 11,600                  | 12,500       |

**Latest known results<sup>121</sup> (2017): 37,000**

The number of firms that gained access to credit with EU support climbed to 37,000, surpassing the 2018 interim milestone and the 2020 target. Access to financial services, including for women, for the poor and for SMEs will continue to be actively promoted, so as to tackle rising economic and social inequalities.

**Indicator 2\*: Number of countries where the business environment has improved with EU support**

This indicator measures the improvement of the business environment, and shows the quality of the business environment in a particular country. It indicates how much the regulatory environment for local entrepreneurs in each economy has changed over time in absolute terms.

**Latest known results<sup>123</sup> (2017): 29**

<sup>120</sup> Data collected from projects and programmes that ended between July 2013 and June 2014

<sup>121</sup> This result refers to the value reported for 2017. No data can be reported for 2018 because the scope of the indicator has changed following the 2018 revision of the EU results framework. The figure and narrative above refer to aggregate data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018). The related indicator is now wider in scope covering financial services: EU RF 2.13a Number of beneficiaries with access to financial services with EU support: a) firms.

<sup>122</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>123</sup> This result refers to the value reported for 2017. No data can be reported for 2018 since the indicator was discontinued following the 2018 revision of the EU results framework. The figure and narrative above refer to aggregate data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018).

| In 29 countries the business environment has improved with EU, slightly surpassing the interim milestone of 28 by 2018. This reflects the Commission's strong commitment to developing conducive business environment in partner countries, which is an important pre-requisite for economic growth and poverty reduction. |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                              |

| The EU has committed to provide minimum levels of Aid for Trade and to report on yearly levels for accountability purposes, thereby justifying the indicator. The review of the Aid for Trade strategy foreseen in 2016 will seek to improve the impact of such flows while aligning with the new Agenda 2030.             |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                              |

One more contract to be signed in June 2019: A top up of EUR 20 million to the Financing Decision of the “Food and Nutrition Security and Sustainable Agriculture programme” was approved at the end of 2018 to include another blending project: the "HURUMA Fund", managed by COFIDES. This programme aims at providing access to microfinance to producer organizations and SMEs mainly in Latin America, but also in Africa, Asia and the Caribbean. |                                                                                                                                                                                                                                              |

| DIR, D&E | <b>Latest known results (2018)</b><br>In 2018, the EU signed over EUR 600 million for blending operations under the EIP for Sub-Sahara Africa, supporting projects in in Sub-Sahara Africa countries such as Liberia, The Gambia, Benin, Niger, Chad, Cameroon, Burundi, DRC, Kenya, Malawi, Uganda, Madagascar, as well as other regional and global projects. It should unlock over EUR 4 billion of public and private investment in Sub-Saharan Africa. Out of the amount endorsed for EFSD Guarantee cover by the Board in June in 2018, about EUR 720 million, or c. 90% will be available for Africa. An EU guarantee (NASIRA Risk-Sharing Facility), the first of its kind under the EU External Investment Plan, was signed in December 2018 and will use worth EUR 75 million of EU funds to leverage up to EUR 750 million of investments for entrepreneurs in Sub-Saharan Africa and the EU's southern neighbourhood. Alone this is expected to create 800,000 jobs and benefit those who usually struggle to access affordable loans, such as small and medium sized enterprises, internally displaced people, refugees, returnees, women and young people.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                              |

|          | <b>Latest known results (2018)</b><br>1. The entry into force of the EU- West Africa regional EPA requires the signature of the agreement by the 16 West African countries and the ratification by at least two-third of them. Up to now, all the EU and West Africa countries have signed the agreement with the exception of Nigeria. Mauritania and Gambia signed in 2018. The position of Nigeria has not changed. To continue enjoy custom preference, Côte d'Ivoire and Ghana signed interim EPA. Côte d'Ivoire has committed itself to start tariff dismantlement in 2019. The work on Jobs and Growth Compacts initiated in 2017 made notable progress. After the adoption of the Africa-EU Alliance for Africa the draft JGCs were revised to include a stronger forward-looking section including the four strands of the Alliance (investment climate, de-risking, market-building, education and skills-building. As agreed they are living documents. No formal adoption process is planned.<br>2. The EUR 5 million programme supported by the EU, which is under preparation, underpins this process. Also the EU is funding a study requested by Côte d'Ivoire to measure the impact of the interim EPA on regional economic integration.<br><b>Central Africa:</b><br>1. 4 JGCs prepared (Cameroon, Republic of Congo, Gabon and São Tomé e Príncipe), of which 2 discussed with National Authorities (Cameroon, Republic of Congo)<br>2. one for Cameroon<br>3. one for Cameroon<br><b>Southern Africa, Indian Ocean:</b><br>Work on EPA implementation ongoing via RIP funding for ESA and SADC EPA parties, through increased dialogue and support.<br>1. 13 JGCs prepared, of which 11 discussed with national authorities (Botswana, Eswatini, Lesotho, Madagascar, Malawi, Mozambique, Namibia, South Africa, Zambia and Zimbabwe).<br>3. Measures under the RIP for ESA EPA available. Measures for SADC EPA under the RIP available (except South Africa). |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                              |

|         |         | <b>Latest known results (2018)</b><br>1. Done for Cameroon. The identification of the Regional Economic Integration Programme was launched.<br>Implementation of EU-ESA EPA and EU-SADC EPA continued according to plan.<br>Work on EPA implementation ongoing via RIP funding for ESA and SADC EPA parties, through increased dialogue and support.<br>2. The entry into force of the EU- West Africa regional EPA requires the signature of the agreement by the 16 West African countries and the ratification by at least two-third of them. Up to now, all the EU and West Africa countries have signed the agreement with the exception of Nigeria. Mauritania and Gambia signed in 2018. The position of Nigeria has not changed. To continue enjoy custom preference, Côte d'Ivoire and Ghana signed interim EPA. Côte d'Ivoire has committed itself to start tariff dismantlement in 2019.<br>3. The EUR 5 million programme supported by the EU, which is under preparation, underpins this process. Also the EU is funding a study requested by Côte d'Ivoire to measure the impact of the interim EPA on regional economic integration. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                       |

|       |     | <b>Latest known results (2018)</b><br>East and Horn of Africa:<br>Throughout 2018 work progressed on fine-tuning the draft Jobs and Growth Compacts (JGCs), following consultations with thematic colleagues and relevant DGs. After the adoption of the Africa-EU Alliance for Africa the draft JGCs were revised to include a stronger forward-looking section including the four strands of the Alliance (investment climate, de-risking, market-building, education and skills-building). In the meantime Delegations were instructed to conduct dialogue with the Government, private sector, IFIs and Member States on the basis of the draft JGCs.<br>In the other regions of Africa, Job and Growth Compacts guide the preparation of new programmes. All planned new decisions on growth and job creation are approved according to plan, except for VET Gabon and VET Botswana as well as the regional integration programme for Central Africa that were delayed to 2019.                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                     |

| DIR.D | EDF | <b>Latest known results (2018)</b><br>By October 2018 all the financing agreements of the 1 <sup>st</sup> Phase of the West Africa Competitiveness Program were signed (including the 8 country components and the regional component). Most of these countries are now negotiating the contracts with the implementing agencies. In October 2018, the first steering committee of the program was held in Abuja, bringing together all the stakeholders to discuss and advance on the next steps of the implementation.<br>The Trade Facilitation program is also significantly advanced and implementation is currently ongoing. The 1 <sup>st</sup> Steering Committee with all the stakeholders was held in September 2018, where the first annual work plan (2019) was agreed.<br>Finally, the financing agreement for the Fiscal Transition program was countersigned in August 2018 by both UEMOA and ECOWAS. The contract for the component with OCDE is about to be finalized and the call for tenders for the implementation of the second component has already launched in December 2018. |                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                     |

|       |     | <b>Latest known results (2018)</b><br>Several triangular initiatives were launched with Laos and Singapore (PFM and education) throughout the year. The new E-READI facility allows for substantive policy dialogue and intra-ASEAN cooperation in currently 13 areas. The new partnership facility allows for incubating new triangular cooperation initiatives. Moreover, a next EU-ASEAN dialogue on sustainable development is planned in 2019.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                     |

Under this contract, FAO will advise the Commission on the sustainability of agri-food investments co-financed by the EU. Proposed institutionalisation of strategic dialogue with IFAD in 2019, with first meeting envisaged for 15 March 2019, and thereafter on an annual basis at services level, led by DEVCO and including relevant COM services (such as AGRI, SANTE or RTD). Every two years it could include a political presence. Location would alternate between Brussels and Rome.                                                                                                                                                                          |                                                                                                                                                                                                                                             |                                                                                                                                                                  |

Preliminary findings of the energy-digital nexus study fed into the AAP 2018 action on the energy-digital nexus and into the preparation of the Digital Energy Facility (DEF). The first D4D Multi-stakeholder Group meeting was organised to launch the sectoral dialogue on D4D and was followed-up by technical sub-sectoral groups meetings (on connectivity, digital skills, digital entrepreneurship and digital as enabler). |                                                                                                                                                                                                                                             |                                                                                                                                                                  |

| More than 53 million hectares of protected areas have been managed with EU support. This result reflects actions taken to more effectively ensure that "ecosystems are resilient and continue to provide essential services" (as stated in the mission of the Strategic Plan for Biodiversity 2011-2020 of the Convention on Biological Diversity (CBD)).                                                                              |                                 |                      |                                          |
| <b>Indicator 2*: Agricultural and pastoral ecosystems where sustainable land management practices have been introduced with EU support (in hectares)</b>                                                                                                                                                                                                                                                                               |                                 |                      |                                          |
| The indicator refers to the total number of hectares where, with support from the EU, farmers will have adopted sustainable land management practices aimed at reverting soil erosion, enhancing fertility, increasing biodiversity, improving water management or reducing chemical inputs.                                                                                                                                           |                                 |                      |                                          |

| On around 4.2 million hectares of land, the EU has supported the adoption of sustainable land management practices aimed at reverting soil erosion, enhancing fertility, increasing biodiversity, improving water management or reducing chemical inputs. The latest known result exceeds the 2018 milestone of 3.47 million hectares of land.                                                                                         |                                 |                      |                                          |
| <b>Indicator 3*: Number of women of reproductive age and children under 5 benefitting from nutrition related programmes with EU support</b>                                                                                                                                                                                                                                                                                            |                                 |                      |                                          |

<sup>125</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>126</sup> Aggregate data collected from five years of Results Reporting covering interventions which had ended between 2013-2018 and a selection which was ongoing in 2018. Since the 2018 revision of the EU results framework, the indicator name is EU RF 2.23 a) Areas of terrestrial and freshwater ecosystems under a) protection with EU support (ha). The indicator methodology was slightly updated but not substantially changed.

<sup>127</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>128</sup> Aggregate data collected from five years of Results Reporting covering interventions which had ended between 2013-2018 and a selection which was ongoing in 2018. In the 2018 revision of the EU RF, the indicator methodology was slightly updated but not substantially changed. It now refers to EU RF 2.04 Agricultural and pastoral ecosystems where sustainable management practices have been introduced with EU support (ha).

| <p><b>Latest known results<sup>130</sup> (2018):</b> 17,787,000</p> <p>5,811,000 for year 2018 – 17,787,000 over period 2013-2018.</p> <p>117,787,000 women and children under 5 have benefitted from nutrition related programmes with EU support in the reporting period 2013-2018. This reflects the EU’s efforts in supporting partner countries in reducing stunting by at least 7 million by 2025 and exceeds the 2018 milestone of 16,445,000. It is also bringing us closer to reaching the 2020 target.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |                                 |             |             |                                    |             |
| <p><b>Indicator 4’: SDG2.2.1 Prevalence of stunting among children under five years of age</b></p> <p>By addressing stunting (chronic under-nutrition), children mortality is reduced and children are able to better grow, learn and lead a productive life. This will contribute to break the circle of poverty and contribute to inclusive economic growth.</p> <p><b>Source of data:</b> SDG Global Database</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |                                 |             |             |                                    |             |

| <p><b>Latest known results<sup>133</sup> (2018):</b> 22.2%</p> <p>Worldwide average prevalence of stunting of children aged below five years (%) stands at 22.2. It is thus on track to towards the 2030 target.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |                                 |             |             |                                    |             |
| <p><b>Indicator 5*: Kilometres of transmission/distribution lines built or upgraded with EU support.</b></p> <p>Guidance on Transmission and distribution lines: Transmission, distribution, and sub-transmission are typical categories for power transmission infrastructure at different voltage levels. Given the diversity of partner countries ‘power systems, sub-transmission   in one country could be called transmission   in another country. For this reason, the indicator should be reported only as transmission. Power transmission infrastructure is considered distribution   if the lines connect transformers that directly supply households. Any line with a higher voltage than these distribution lines should be considered transmission, regardless of whether it is called sub-transmission   in the country in question.</p> <p>Guidance on upgraded: For the purposes of this indicator, upgraded is defined as any work directed to sustain or extend the usable life of existing transmission, or to increase the rated capacity of such lines (i.e., by increasing conductor size or adding more conductors or circuits).</p> <p><b>Source of data:</b> EU Results Framework annual reporting</p> |  |                                 |             |             |                                    |             |

<sup>129</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>130</sup> Aggregate data collected from five years of Results Reporting covering interventions which had ended between 2013-2018 and a selection which was ongoing in 2018 Following the 2018 revision of the EU results framework, the indicator now refers to EU RF 2.02 Number of women of reproductive age, adolescent girls and children under 5 reached by nutrition related interventions supported by the EU. The indicator methodology was slightly updated but not substantially changed

<sup>131</sup> Data calculated as part of Level 1 of the EU Results Framework. Values for this indicator cover countries receiving support through EDF, DCI and Greenland Instrument. Countries graduated from bilateral cooperation: Argentina, Brazil, Chile, China, Costa Rica, India, Indonesia, Iran, Kazakhstan, Malaysia, Maldives, Mexico, Panama, Thailand, Uruguay, Venezuela.

<sup>132</sup> Target for 2025: the EU committed to meet at least 10% of the World Health Assembly's global target to reduce stunting of 70 million children by 2025, pledging to reduce this number by at least 7 million.

<sup>133</sup> Data taken from Global SDG database, referring to 2017 for the region World (extracted in December 2018). Due to a change in methodology following the 2018 revision of the EU results framework, the latest known result is not comparable with the baseline values

<sup>134</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

|                                                                                                                                                                                                                                        | <b>Latest known results (2018)</b><br>Done but target partially met.<br>At the end of 2017, 26.8% of DEVCO's total commitments were allocated to climate relevant actions. This represents a significant progress towards the 20% target established by the EU for the 2014-2010 programming period.<br>Initial estimates for 2018 suggest a decrease of such spending performance to around 20% of total commitments. Increased efforts should continue, also in view of the next MFF, in which the target is of at least 25%. |                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                  |

<sup>135</sup> This result refers to the value reported for 2017. No data can be reported for 2018 since this indicator was discontinued following the 2018 revision of the EU results framework. The figure and narrative above refer aggregate data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018).

<sup>136</sup> Data collected in the frame of the first reporting on the EU Results Framework (level 3).

<sup>137</sup> Data calculated in the frame of the EU Results Framework (level 3).

|                    | <b>Latest known results (2018)</b><br><b>West Africa:</b><br>In 2018, the 33MWp solar power plant of Zagtouli (Burkina Faso), co-financed by the EU, became fully operational. EU is currently co-financing 5 other solar power plants in West Africa: Gorou Banda et Agadez au Niger, Defissol au Benin, Odienné in Côte d’Ivoire and Bauchi in Nigeria. In total, EU funds are contributing to an additional solar power production in West Africa of 206MWp. In addition, the EU supports a number of energy projects targeting isolated rural areas through solar individual and home systems and hybridization of off-grid electrification systems, in countries like The Gambia, Mali, Ghana, Côte d’Ivoire and Senegal.<br><b>Central Africa:</b><br>Two new projects approved: electrical interconnection between Cameroon and Chad, and regional grid improvement with substation in Burundi.                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                        |                                                                                                     |

|                    | <b>Latest known results (2018)</b><br>The signature of the PAGODA took place in the margins of the Pacific Islands Forum Leaders’ Meeting in Nauru in September 2018. The purpose of the EU-Pacific Marine Partnership is to support sustainable management and development of fisheries for food security and economic growth, while addressing climate change resilience and conservation of marine biodiversity in the Pacific region. Implementation started at the end of 2018.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                        |                                                                                                     |

|       |         | <b>Latest known results (2018)</b><br>A new SWITCH Asia action was adopted end of 2018 (EUR 47 million) covering both Asia and Central Asia, extending the Sustainable Consumption and Production Facility to Central Asia. Sustainability is mainstreamed in Connectivity Strategy and regional programmes with ASEAN (E-READI and ARISE Plus). The ASEAN Green Cities initiative has been postponed to 2019.<br>The Investment Facilities have proven to be a useful tool for green investments in the region as well, as illustrated for example by the China Green Growth Dialogue Fund, which was signed with KfW in 2018.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                |

|       |         | <b>Latest known results (2018)</b> <ul style="list-style-type: none"> <li>• EUROCLIMA+: 35 projects for climate action were approved and activities for climate services (climate governance) have started. One example is the provision of assistance for the reformulation of NDCs for Ecuador.</li> <li>• In Bolivia, an action has been approved to support Sanitation in small communities and water resilience in cities and one large scale intervention to improve cities' resilience to water shortages.</li> <li>• The Financing Agreement for the Sustainable Energy Project in Cuba has been signed on 9 May 2018. The post-signature ratification process of the Cuban Government has been finalised. Contracting is expected to be finalised in the first half 2019.</li> <li>• Building upon and/or complementing humanitarian intervention, eight new actions in the area of rehabilitation, reconstruction and resilience have been adopted under Envelope B: Antigua and Barbuda (EUR 5.3 million - housing); Dominica (EUR 11 million - reconstruction); St. Kitts and Nevis (EUR 2.4 million - renewable energy); Cuba (EUR 4 million - reconstruction); Anguilla (EUR 2.8 million – Education); Montserrat (0.32 million - multi-sector) and Sint Maarten and BVI (EUR 7 million and 2 million - emergency shelters, under adoption). At regional level, a new Resilience Building Facility was created (EUR 27.7 million). Under the Shock Absorption Mechanism EUR 8.6 million has been mobilised to support economic and social recovery in Dominica. A EUR 14 million individual measure was approved under the Caribbean Regional Indicative Programme in support of CDEMA and the National Emergency Commission (Comisión Nacional de Emergencias, CNE) in the Dominican Republic. Within the Caribbean Investment Facility, over EUR 33 million have been approved for three new complementary actions, including a post-disaster and climate change resilience action in Dominican Republic focused on housing and reconstruction (EUR 17.44 million). Under bilateral programmes, support has been provided on environment, climate change, renewable energy and energy efficiency in Belize (EUR 14 million), Dominica (EUR 2.62 million) and St Kitts and Nevis (EUR 5 million), adding to the already support provided to the sector in Barbados, Cuba, Guyana, Jamaica, Saba, St Eustatius for a total of around EUR 95 million.</li> </ul> |                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                |

**Latest known results (2018)****West Africa:**

As in previous years EDF funds in West African countries continued to be committed in agriculture and food security. In 2018 a total amount of EUR 158 million were approved in Sector Budget Support in Mali, Senegal and Chad (130 million) and in other project interventions (Mauritania and Nigeria).

Other interventions from the EU Trust Fund for the Sahel and the Pro Act thematic programme also supported the sector in 2018. For example the EUTF support amounted to EUR 70 million with the Emergency programme for the stabilisation of the G5 frontiers.

Food Security and Climate change trends continued to be assessed through the RPCA (Food Crisis prevention Network in West Africa). EUTF projects also continued to monitor closely migration trends. ECHO and DEVCO regularly meet in particular on preventing and responding to food crises. Nexus exercises for having humanitarian and development working in contiguum (as opposed to continuum) are ongoing in Chad and Nigeria are being selected as a pilot case. Humanitarian and Development partners continued to closely collaborate. The Groupe de Dakar, a group of main development and humanitarian donors, UN agencies and NGOs continue to regularly meet.

**Central Africa:**

2. Continued and ongoing, in particular in DRC and CAR
3. Ongoing (migration including IDPs, refugees and returnees)
4. Ongoing
5. Ongoing, in particular for CAR, DRC and Cameroon

**Southern Africa and Indian Ocean:**

2. Monthly assessments and ongoing, in particular in Mozambique, Malawi, Madagascar, Zimbabwe and Lesotho.
3. Not relevant for SAIO region
4. Not relevant for SAIO region
5. Ongoing, in particular for Mozambique, Malawi Madagascar, Zimbabwe and Lesotho.

**SPECIFIC OBJECTIVE 5: Under the overall objectives<sup>141</sup> of the legal bases for the main instruments DEVCO will promote democracy, human rights, rule of law, gender equality and empowerment of women, the economic and social inclusion of vulnerable groups, support the civil society and local authorities.** Related to spending programmes: DCI, EDF, EIDHR

**Indicator 1\*: Number of human rights defenders who have received EU support**

Defending Human Rights Defenders (HRDs) is a key priority and the EU has committed to continue supporting HRDs under the EIDHR (in the Regulation itself as well as under action 9 of the EU Action Plan on Human Rights and Democracy adopted by the Council in July 2015).

**Source of data:** EU Results Framework annual reporting

| Baseline <sup>142</sup> (2015) | Interim Milestone (2018) | Target (2020) |
|--------------------------------|--------------------------|---------------|
| 32,000                         | 184,000                  | 248,000       |

**Latest known results<sup>143</sup> (2017):** 138,000

138,000 human rights defenders have received EU support.

**Indicator 2\*: Number of elections supported by the EU where the electoral process is perceived by independent observers as free and fair<sup>144</sup>**

The EIDHR actions in support of electoral processes support the UN Declaration of principles for international election observation, endorsed by the EU. They are implemented in cooperation with other bodies experienced in electoral observation and other kinds of support to maintain standards, develop observation capacity and make best use of resources.

**Source of data:** EU Results Framework annual reporting

<sup>141</sup> Overall objectives : poverty reduction, human development, inclusive and sustainable growth and human rights

<sup>142</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>143</sup> This result refers to the value reported for 2017. No data can be reported for 2018 because the scope of the indicator has changed following the 2018 revision of the EU results framework. The figure and narrative above refer to aggregated data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018).

<sup>144</sup> This indicator is implemented at Delegation level and by the FPI.

| Baseline <sup>145</sup> (2015)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Interim Milestone (2018)                | Target(2020)                 |

| <b>Latest known results<sup>148</sup> (2018): 1,849,000</b><br>Legal aid programmes supported by the EU have benefitted 1,849,000 people, surpassing the 2018 interim milestone and the 2020 target. Beneficiaries of such programmes include individuals who received legal information, advice and assistance or benefitted from legal representation, as well as legal aid practitioners (providers) trained or otherwise supported. Such programmes are essential in promoting access to justice for all – and in particular the poor and vulnerable groups of society. |                                         |                              |
| <b>Indicator 4': SDG 5.5.1 Proportion of seats held by women in national parliaments</b><br>Women face several obstacles to participating in political life. Structural barriers through discriminatory laws and institutions still limit women's option to run for office. Capacity gaps mean women are less likely than men to have the education, contacts and resources needed to become effective leaders. The EU supports activities to overcome these barriers and promote the democratic participation of women and men in the political decision making process.   |                                         |                              |

<sup>145</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>146</sup> This result refers to the value reported for 2017. No data can be reported for 2018 because the scope of the indicator has changed following the 2018 revision of the EU results framework. The figures and narrative above refer to aggregated data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018). The indicators in the revised EURF refers to EURF 2.24 "Number of countries supported by the EU to conduct elections and/or improve their electoral process"

<sup>147</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

<sup>148</sup> Aggregate data collected from five years of Results Reporting covering interventions which had ended between 2013-2018 and a selection which was ongoing in 2018.

<sup>149</sup> Data calculated as part of Level 1 of the EU Results Framework. Values for this indicator cover countries receiving support through EDF, DCI and Greenland Instrument. Countries graduated from bilateral cooperation: Argentina, Brazil, Chile, China, Costa Rica, India, Indonesia, Iran, Kazakhstan, Malaysia, Maldives, Mexico, Panama, Thailand, Uruguay, Venezuela.

<sup>150</sup> Data taken from Global SDG database, referring to 2018 for the region World (extracted in December 2018). Due to a change in methodology following the 2018 revision of the EU results framework, the latest known result is not comparable with the baseline values.

| <b>Indicator 6: Number of countries belonging to the Democracy Pilot Countries which have improved their V-DEM Electoral Democracy Index</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                              |                                                                                      |
| The initiative on democracy in pilot countries is a priority stemming from the Agenda for Action from the 2009 Council Conclusions on democracy support, in particular in pilot countries. In the pilot countries that have already been identified, the EU is deepening its cooperation to strengthen democracy. The aim is to make democracy work for citizens. 'Varieties of Democracy' (V-Dem) is a new approach developed by more than 50 scholars worldwide to conceptualising and measuring democracy.                                                                                                                                          |                                                                                              |                                                                                      |

| The progress in achieving the GAP 85% target in development cooperation continues even if it is slowing down - perhaps because the quick gains have been made - leaving the hard work ahead of us. Difficult sectors such as environmental protection, urban development or migration, or complex new aid modalities such as blending operations and private sector partnerships, require different approaches for becoming fully inclusive for women and men, but the work on preparing new guidance for these new challenges continue and the achievement of the 2020 target set in the latest Gender Action Plan 2016-2020 is still fully in reach. |                                                                                              |                                                                                      |

|       |              | <b>Latest known results (2018)</b><br>From January to June 6 additional trainings were delivered in country by the existing facility. A new facility was put in place in June 2018 following a new approach as gender mainstreaming and right based approach have been put together in one training package. In October and November, the first training under this new approach were delivered in Zimbabwe and Ethiopia. The new team is now also fully operational in its support to DEVCO B for the quality reviews.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                    |

|       |              | <b>Latest known results (2018)</b><br>Since the launch of the Spotlight Initiative in September 2017, funding was secured in 2018 for both the ACP region and the Latin America region and in December contracts were signed which covers activities in 8 African countries and 5 Latin-American countries for which implementation will start in 2019. It was achieved in close collaboration with Geographic Directorates, EU Delegations and the United Nations, both in New York and at field level. The ASEAN project which was signed end of 2017 showed progress during 2018 and the two regional programmes for both Africa and Latin-America will be finalised early 2019. For the Pacific and the Caribbean regions, funding was secured, contracting and start of the implementation should materialize in 2019.<br>During 2018, a lot of work was also carried out in the organisation of events (for example Latin-America launch at UNGA) and to mobilize EU Member States and other donors. |                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                    |

|                                |     | <b>Latest known results (2018)</b><br>Around EUR 250 million were committed for migration throughout 2017 and 2018. All related programmes were under implementation by the end of 2018. Implementation covers all ‘people on the move’, including migrants and refugees, returnees and internally displaced persons. It also benefits host communities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                |               |

|                                |     | <b>Latest known results (2018)</b><br>The PAGoDA was signed with UN Women. The objective of this programme is to prevent violence against women and girls while also promoting gender equality. This will be achieved by challenging negative social norms and practices; enhancing awareness and practice of respectful relationships and gender equality among women, men, girls and boys; and increasing access to quality essential services for survivors of VAWG. The programme entered the inception phase at the end of 2018.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                |               |

|                                |     | <b>Latest known results (2018)</b><br>A renewed and expanded EU commitment was made in 2015 when the Council of the EU adopted the 2016-2020 Gender Action Plan - mandatory for all EU external relations. It has been implemented via bilateral and thematic programmes and by fostering the effective inclusion of the gender perspective in the programming process – a gender analysis being mandatory for all new programmes. A Report on its second year of implementation was prepared and released on 15 October 2018. The report shows progress on the actions taken by EU delegations, the European Commission and the External Action Service and by the EU Member States, there is also evidence of enhanced EU political leadership and management ownership of the gender priority. Greater use is made of gender expertise, there is a growing network of gender Focal Points and increased engagement is seen with the national gender machinery. As a conclusion, we can state that while good progress has been made, there is still a long way to go. Full details are available in the report. |                                                |               |

| DIR B | DCI     | <b>Latest known results (2018)</b><br>The new call for proposals for DEAR was launched in July 2018 with a more strategic approach targeting as before pan-European campaigns. Four priorities were put forward: 1) a focus on two main themes - Migration and Climate Change, 2) targeting youth and working directly with citizens, 3) innovation communication and outreach and 4) cross-cutting issues such as fundamental values and gender equality.                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                           |                                                                                                                                                                                  |

**SPECIFIC OBJECTIVE 6:** Under the overall objectives<sup>156</sup> of the legal bases of the main instruments<sup>157</sup> DEVCO will support the public sector capacity, public finance management, tax policy and administration, procurement, and fight against corruption in our partner countries. Related to spending programmes: DCI, EDF, PSC

**Indicator 1\*: Number of countries where the overall public financial management has improved**

Consider the countries where i) the EU provided budget support continuously over the last six years, and ii) at least two national-level PEFA PFM Reports have been written, and iii) the most recent PEFA Report was written within the last three years.

The aggregate indicator is the number of countries for which the average PEFA indicator scores (excluding indicators D-1 to D-3 of donor behaviour rather than government behaviour) in the most recent PEFA PFM Report increased compared with the previous PEFA report.

This number is compared to the total number of recipient countries receiving PFM support from the EU for which there is data (i.e. the number of countries meeting criteria i-iii above).

**Source of data:** EU Results Framework annual reporting

| Baseline <sup>157</sup> (2015) | Interim Milestone (2018) | Target (2020) |
|--------------------------------|--------------------------|---------------|
| 16                             | 52                       | 76            |

<sup>156</sup> Overall objectives: poverty reduction, human development, inclusive and sustainable growth and human rights

<sup>157</sup> Data collected from projects and programmes that ended between July 2013 and June 2014.

**Latest known results<sup>158</sup> (2017): 30**

The number of countries provided with budget support in which overall public financial management has improved increased by 19, reaching a total of 30 in 2017.<sup>159</sup>

**Indicator 2': Change in domestic revenue mobilisation as a percentage of GDP over the last 3 years<sup>160</sup>**

The change in domestic revenue mobilisation as a percentage of GDP over three years in countries where the EU has external action programmes

Revenue is cash receipts from taxes, social contributions, and other revenues such as fines, fees, rent, and income from property or sales. Grants are normally considered as revenue but are excluded here

Source of data: IMF

| Baseline <sup>161</sup> (2015) | Interim Milestone (2018) | Target(2020) |
|--------------------------------|--------------------------|--------------|
| -1.4%                          | Actual 2018              | Actual 2020  |

**Latest known results<sup>162</sup> (2017): -2.4%**

Similar to the baseline, several partner countries have increased their share of domestic revenues (excluding grants) to their GDP in the period covering 2013 to 2016. Nevertheless a total decline of 2.4 percentage points in domestic revenue mobilisation (excluding grants) as share of GDP is recorded. A significant number of countries were affected by the slowdown in commodity prices, in particular the large reduction in revenues in oil exporting economies. In addition, the decline in revenues to GDP is particularly noticeable in a series of countries in crisis or in fragile situations.

**Main outputs in 2018****Important items from work programmes/financing decisions/operational programmes**

| Output |                                                                                                                                                                                                                                                                                                                                             | Indicator                                                                                                                                                                                                                                                                                                                                                                                                       | Target                                                                                                   |

<sup>158</sup> This result refers to the value reported for 2017. No data can be reported for 2018 since this indicator was discontinued following the 2018 revision of the EU results framework. The figure and narrative above refers to aggregated data collected from five years of End-of-Project Results Reporting (EPRR) - EPRR 1 (July 2013-June 2014) to EPRR 5 (July 2017-June 2018).

<sup>159</sup> The indicator has limited applicability for annual results monitoring of PFM progress given that PEFA assessments are undertaken at best every 3-4 years.

<sup>160</sup> Indicator discontinued from the Results Framework Reporting. Latest available data is from 2017.

<sup>161</sup> Computed based on IMF data extracted in February 2018 to take into account data revisions for coherence with latest value. Data calculated as part of Level 1 of the EU Results Framework. Values for this indicator cover countries receiving support through EDF, DCI and Greenland Instrument. Both baseline and latest values do not consider countries graduated from bilateral assistance; Argentina, Brazil, Chile, China, Costa Rica, India, Indonesia, Iran, Kazakhstan, Malaysia, Maldives, Mexico, Panama, Thailand, Uruguay, Venezuela.

<sup>162</sup> This figure and narrative refer to the value reported for 2017. No data can be reported for 2018 since this indicator was discontinued following the 2018 revision of the EU results framework.

|         |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                            |

|         |     | <b>Latest known results (2018)</b><br><b>East Africa:</b><br>The foreseen regular budget support review and dialogue meetings with authorities in all countries with existing budget support operations were conducted. In the framework of the formulation of new operations in Somalia, Ethiopia and Kenya, additional meetings were organised to discuss targeted sector policies and related performance benchmarks. The three forecasted new budget support operations for East Africa in 2018 (Ethiopia Job Compact EUR 50 million; Somalia State Building and Resilience Contract EUR 100 million; Tanzania rural roads SRC EUR 46 million= total of EUR 196 million) have been committed and contracted – i.e. achievement rate of 100%.Considering that only EUR 60 million had been committed/contracted in 2017, this is a 226% increase. With regards to payments EUR 148.45 million have been paid compared to the forecasted EUR 166.19 million. This is mainly due to the non-payment of the 1 <sup>st</sup> fixed tranche of the Uganda SRC due to one pre-condition not being fulfilled.<br><b>Southern Africa / Indian Ocean region:</b><br>Southern Africa/Indian Ocean region counts with 4 budget support countries: Botswana (a new programme in support to the TVET sector under AAP2019), South Africa (5 ongoing sector reform contracts and 2 new sectoral operations under AAP 2018), Namibia with a sector reform programme in the education sector and Madagascar (a State Building Contract with a last payment carried out in July 2018).<br>In order to increase the use of budget support in the region, Risk Management Frameworks have been prepared for all countries in Southern Africa/Indian Ocean (only region in the world to have done it for non-BS countries). This exercise proved useful to identify the countries where extra efforts can be made to resume budget support. This is the case for Malawi, where a roadmap aimed to enhance dialogue and pave the way for a new budget support programme has been prepared and an update of the RMF has been validated by the BSSC in July 2018.<br>In addition, there are 8 ongoing projects in support of public financial management (Angola, Lesotho, Malawi, Mozambique, South Africa, Swaziland, Zambia and Zimbabwe). These interventions can also help to re-establish the budget support criteria in the region. |                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                            |

|       |     | <b>Latest known results (2018)</b><br><b>West Africa:</b><br>Six budget support programmes were committed at a total of EUR 349 million (The Gambia State and Resilience Building Contract (SRBC II) – EUR 55 million; Ghana SDG Contract – EUR 40 million; Niger SRBC III – EUR 86 million; Senegal SDG Contract – EUR 90 million; Senegal Sector Reform and Performance Contract (SRPC) – EUR 24 million and Chad SRBC III – EUR 54 million). Out of these, three were contracted at financing agreement level for a total of EUR 173 million (50% of 2018 commitments) (The Gambia SRBC III – EUR 55 million; Senegal SDG Contract – EUR 88 million; Senegal SRPC – EUR 30 million). The rest are expected to be contracted in early 2019. In addition, two budget support programmes were contracted in 2018 that were committed in 2017 for Liberia – SBC II at EUR 27 million – and Sierra Leone – SBC III at EUR 80 million. With regards to paid amounts, EUR 352.02 million were disbursed, compared to a forecast of EUR 358.93 million, representing a success rate of 98.1%. As foreseen, in November 2018 the "Support to the Africa Regional Technical Assistance Centre AFRITAC WEST 2 Project – Phase II" was adopted by the Commission under the West Africa Regional Indicative Program. This project will continue to support the AFRITAC West 2 center, that aims to strengthen the institutional and human capacities of six West African countries for effective macroeconomic management (Cabo Verde, Ghana, Liberia, Nigeria, Sierra Leone and The Gambia).<br><b>Central Africa:</b><br>Yes as planned, except for a variable payment to São Tomé e Príncipe that was not paid, as conditions were not met.<br>New decision contributing to SO6 adopted for Central Africa Republic. |                                                                                                         |                                                                  |

| <b>Latest known results (2018)</b><br>1. In Haiti, the Financing Agreement on the State Building Contract II was signed, including specific performance indicators on DRM, tax policy and fight against corruption, among others. A first tranche of EUR 30 million was disbursed in July 2018, as the macro-economic situation and PFM were deemed sufficient and improving.<br>2. In Jamaica, the Financing Agreement for the PFM Budget Support Programme was signed and implementation started. Technical Assistance on PFM in Jamaica was also contracted and activities started early November 2018.1.<br>3. PEFA assessment was completed in Guatemala during 2018. In Colombia, the latest PEFA assessment was carried out in 2015. However, the Fiscal Transparency Evaluation (FTE), conducted by the IMF in 2017, shows that Colombia has made a significant leap forward in terms of building strong fiscal institutions, based on good transparency practices. In the Dominican Republic, a "Programme in Support of the Dominican Republic Public Administration and Finance Reform and Domestic Revenue Mobilisation" was adopted in December 2018. |  |                                                             |                                                                                 |

On component 1, Technical Assistance contract was signed 31/07/2018 with GOPA and implementation started on 17/09/2018. The first Steering Committee Meeting was held in Abuja, 7-8 November, 2018. On component 2, "prevention of and response to IUU fishing through monitoring, control and surveillance (MCS) at national and regional Level", activities have started with regional fishery bodies (FCWC and SRFC) benefitting from the grant. As regards component 3, "Marine resources management at the regional level is improved, building resilience of marine and coastal ecosystems to perturbations", three grant contracts have been signed with FAO, University of Portsmouth and Agrocampus on 12 December 2018 following a Call for Proposal launched end of 2017. All three contracts will commence implementation by 1<sup>st</sup> February 2019.</p> <p><b>SWAIMS</b><br/>In 2018, negotiations were conducted with implementing partners leading to contracts signed in December 2018 for the Technical Assistance and with UNODC. Both contracts started on 14 January 2019. Except for supply contracts on equipment, remaining contracts (Camoës, Interpol, grants to GIABA, ARTSM and RMU) should be signed in the course of 2019.</p> |        |           |        |                                                          |                       |          |

| DIR F                                                    | DCI                   | <p><b>Latest known results (2018)</b><br/>The second phase launched in November 2018 corresponds to a new project which will provide Iran with further training and capacity building in radiation protection, radioactive waste management and other nuclear installation safety areas, such as ageing management, operational experience feedback, and risk-informed decision making. The project will also continue to support the establishment of the Nuclear Safety Centre by providing the Iranian Nuclear Regulatory Authority with access to extensive European experience and lessons learned in setting up, managing and maintaining the functionality of the Centre. Another important area of support is Iran's preparation for an upcoming International Regulatory Review Service mission.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |        |           |        |                                                          |                       |          |

## Selected results of projects and programmes financed by the EU

Since launching the EU International Cooperation and Development Results Framework<sup>167</sup> in March 2015, DEVCO collects and reports on selected results of projects and programmes financed by the EU. As of 2018, results are reported against the revised EU Results Framework, which includes some new or revised indicators aligned to SDGs.<sup>168</sup>

The following presents the latest **preliminary aggregated results** of selected indicators from the EU results framework to which the EU contributed through **projects and programmes that started since 2014 and which either ended between mid-2017 and mid-2018 or which were ongoing** and which were funded mainly by the DCI, ENI and EDF instruments. Complete reporting of all EU RF indicators will be published in the forthcoming Annual Report on the implementation of the European Union's instruments for financing external actions.

### EU contributions to results in partner countries: selected preliminary aggregated results

- **12,040,000** food insecure people received EU assistance
- **5,811,000** women of reproductive age, adolescent girls and children under 5 were reached by nutrition related interventions supported by the EU
- **3,163,000** smallholders were reached with EU supported interventions aimed to increase their sustainable production, access to markets and/or security of land
- **476,000** hectares of agricultural and pastoral ecosystems were managed by sustainable land management practices with EU support
- **63,807,000** 1-year olds were fully immunised with EU support
- **10,041,000** children enrolled were enrolled in primary education with EU support
- **1,767,000** children were enrolled in secondary education with EU support
- **723,000** individuals had access to improved drinking water source and/or sanitation facility with EU support
- **67,000** jobs were supported or sustained by the EU
- **4,900** firms had access to financial services with EU support
- **1,165,000** individuals had access to financial services with EU support
- **64** quality schemes were adopted by economic operators with EU support
- **141,000** people benefitted from who from institution or workplace based VET/skills development interventions supported by the EU
- **22,000** km of road were constructed, rehabilitated or maintained with EU support
- **6,500** Micro, Small and Medium Enterprises applied Sustainable Consumption and Production practices with EU support
- **60** countries and cities developed climate change and/or disaster risk reduction strategies with EU support and **35** countries and cities implemented climate change and/or disaster risk reduction strategies
- **6,936,000** hectares of terrestrial and freshwater ecosystems were under protection with EU support
- **155,000** hectares of terrestrial and freshwater ecosystems were under sustainable management with EU support
- **22** countries were supported to conduct elections and/or improve their electoral process
- **90** government policies were developed with civil society organisation (CSO) participation through EU support

<sup>167</sup> Staff Working Document Launching the EU International Cooperation and Development Results Framework (2015)80 final

<sup>168</sup> European Commission's Staff Working Document (SWD) (2018)444 of 11 October 2018 'A Revised EU International Cooperation and Development Results Framework in line with the Sustainable Development Goals of the 2030 Agenda for Sustainable Development and the New European Consensus on Development'

→ **168,000** people benefited directly from legal aid interventions supported by the EU

The results information has been drawn from the reporting by EU implementing partners (i.e. partner countries, International Organisations, Member State Development Agencies, international financial institutions and NGOs).
